The extensive mountain system of the Philippines belongs to the succession of volcanic ranges of the Pacific system of the world's surface. There are 20 more or less active volcanoes. Mount Apo (Apo means master), 9,610 feet, in Mindanao; Mayan Volcano, 7,943 feet, in Albay; Taal, 984 feet, in Batangas; Canlaon, 7,995 feet, in Negros; Banalao, or Malajlay, 7,144 feet, are the most famous of these. Other high mountains are Pulog, 9,580 feet; Halaon, 8,481 feet; Malingdang, 8,560 feet; Santo Tomas, 7,400 feet.

Nearly all the principal islands have important river systems. In Luzon are the Rio Grande de Cagayan, 220 miles long, which drains 16,000 square miles of territory; the Rio Grande de Pampanga, emptying into Manila Bay through a dozen mouths; the Agno, the Abra, Bued, and the more familiar Pasig. The Rio Grande de Mindanao, 330 miles long, is the largest in the islands, and the Agusan, also in Mindanao, the third in size. Mindoro has 60 rivers and Samar 26.

November, December, January and February are the temperate months. The mean average temperature at this season is about 77° to 79° Fahrenheit. In April, May and June, the hot months, the mean average is between 83° and 84°. In the other months it is about 80°. The nights are seldom unpleasantly hot even in the hot season, and a temperature of 100° is a rarity in Manila. The mountain regions of the north are cool as September

ber in the temperate zone. There are two seasons, the rainy and the dry. The rains are heaviest in July, August and September; lightest in February and March. The lowest average rainfall for the last twelve years for the whole archipelago was 60.73 inches in the driest region, the highest 125.68 in the wettest. Manila's average was 75.46.

The preamble of the Jones Act, passed by the United States Congress and approved Aug. 29, 1916, declared that "it has always been the purpose of the people of the United States to withdraw their sovereignty over the Philippine Islands and to recognize their independence as soon as a stable government can be established therein." On assuming office in March, 1921, President Harding sent Major Gen. Leonard Wood, and W. Cameron Forbes, (Governor General 1909-13) to the Philippines to make a complete survey of conditions. In their report they recommended among other things "that the present general status of the Philippine Islands continue until the people have had time to absorb and thoroughly master the powers already in their hands" and "that under no circumstances should the American Government permit to be established in the Philippine Islands a situation which would leave the United States in a position of responsibility without authority."

The Jones Act of 1916 abolished the Philippine Commission under which the islands had been governed under the act of July 1, 1902. It substituted as the Upper House of the Legislature a Senate composed of 24 members, and instead of the Assembly, a House of Representatives of 91 members, elected triennially. The Governor-General, who remains as the head of the islands, is appointed by the President. All the Cabinet heads, except Education, are Filipinos. Senators are elected for six years.

The Philippine Archipelago is divided into 43 provinces, 11 special provinces and 2 chartered cities. The chief executive of a regular province is the Provincial Governor, who is an elective official. He, together with two other elective members, form the provincial board which constitutes the legislative branch of the provincial government. In the special provinces, with the exception of Mindoro, Palawan and Batanes, the Provincial Governors are appointed officials.

Of the 24 Senators only two—those from the Twelfth District, which is composed of the Mountain Province, the City of Baguio, the Province of Nueva Vizcaya and the Department of Mindanao and Sulu—are appointed by the Governor General; all the others are elected by popular vote; as are also the 91 Representatives, excepting the nine who represent the Mountain Province, the Province of Nueva Vizcaya and the Department of Mindanao and Sulu.

Filipinos have been admitted to the civil service in increasing numbers. On July 1, 1920, there were 20 Americans and 30 Filipinos acting as chiefs or assistant chiefs, and 760 Americans and 12,074 Filipinos connected with the Government.

The government of the towns is practically autonomous, the officials being elected by the qualified voters of the municipality and serving for three years. The officials consist of a President, Vice President, and Councillors, the latter varying in number according to population. Local municipal government has been instituted in about 873 municipalities and 312 municipal districts.

The administration of justice in the Philippines is intrusted to the Supreme Courts, the Court of First Instance, the Municipal Court of the City of Manila and the Courts of the Justices of the Peace.

There are 99 school districts in the islands. Among the special Government institutions are the Normal School, the School of Arts and Trades, the Nautical School, and the Central Luzon Agricultural School. There are provincial trade schools and ships. In 1919, in the public schools, there were scholars as follows: Primary, 347,839 males, 253,501 females; intermediate, 55,082 males, 27,935 females; secondary, 12,025 males, 3,942 females. There are 300 private schools with 38,500 pupils. The State supported University of the Philippines in 1921-22 had 4,718 students and the Dominican University of Santo Tomas (founded 1611) 701. The dominant religion is Roman Catholic.

The 1919 crop values of the islands were: Rice, \$94,300,000; coconuts and products of, \$37,200,000; sugar and products of, \$37,200,000; abaca (hemp), \$32,500,000; corn and products of, \$18,800,000; tobacco leaf, \$8,700,000; other and total, \$230,800,000. Fruits and vegetables are not included in the above. Coconuts and tobacco are valuable products. In 1918 there were 603,000 cattle and

1,271,000 water buffalo (carabao). Virgin forests cover 40,000 square miles. There are 73,000,000 acres of public lands.

Under the act of 1919 any citizen of the Philippine Islands or of the United States over the age of 18 years, or the head of a family who does not own more than 59 acres of land in the Philippines may enter a homestead of not exceeding 59 acres of agricultural land of the public domain. Total homestead fee, \$10. Any citizen of lawful age of the Philippine Islands or of the United States, and any corporation or association of which at least 61 per centum of the capital stock or of any interest in said capital stock belongs wholly to citizens of the Philippine Islands or of the United States, may purchase any tract of public agricultural land of not to exceed 247 acres in the case of an individual and 2,530 acres as a corporation or association.

During 1921, 871 foreign vessels with a tonnage of 2,646,455 entered the ports of the islands.

There were, in 1921, 778 miles of railroads, and 6,200 miles of public roads. The Manila Railroad Company has been taken over from the British owners by the Government and the line of the Philippine Railroad Company is about to be taken over. Silver, lead, zinc, copper, iron, coal, petroleum, asbestos and manganese are mined, as well as clay, marble, salt, etc. The islands are rich in mineral resources, but these are as yet undeveloped. The production exceeds \$3,000,000 a year.

According to Dr. Merton Miller, former Chief Ethnologist, Philippine Bureau of Sciences, from the extreme northern end of the archipelago to its southernmost limits, with the exception of the few scattered Negritos, the people of the Philippines, pagan, Moro and Christian, are one racially. There is some reason for believing that they migrated into the islands at two different times. But in all probability they came from the same general region and have a common ancestry. There are many different languages or dialects in the Philippines, but all are closely related to one another, the pronunciation and mode of speech vary but little from one section of the Philippines to another, and the majority of the words are common to two or more of the Philippine languages. These languages, whether spoken by pagan, Moro or Christian, belong to the great Malayo-Polynesian family, branches of which are found in Sumatra, the Hawaiian Islands, Madagascar and on many other islands between. The early immigrants into the Philippines

were the Indonesians and the Malays and the blend of these two races characterizes the people of the Philippines to-day. This admixture of the Indonesians and the Malays has become so thorough that it is difficult to distinguish one group from another.

## PORTO RICO.

AREA, 3,453 square miles.

POPULATION, Census of 1920, 1,299,809.

CAPITAL, San Juan, population 70,707; other cities, Ponce, 41,561; Mayaguez, 10,069.

Governor, E. Mont Riley.

Consuls maintained at San Juan by Argentina, Belgium, Brazil, Chili, Colombia, Cuba, Denmark, Dominican Republic (C. G.), France, Great Britain, Guatemala, Haiti, Honduras, Italy, Mexico (vacant), The Netherlands, Norway, Panama, Peru, Portugal, Spain, Sweden, Uruguay and Venezuela.

Porto Rico is the fourth largest of the Greater Antilles, with the Atlantic Ocean on the north and the Caribbean Sea on the south. Santo Domingo is about 45 miles to the west, and St. Thomas 40 miles to the east. The island of Culebra, population 839, and Vieques, population 1,651, to the east, form part of the territory. It is 95 miles long (from east to west) and 35 miles wide, with a coast line of about 345 miles. The best harbors are at San Juan and Ponce. Through the middle of the island, from east to west, runs a range of mountains with an altitude of 1,500 to 3,750 feet, cultivable to the summits. The soil is extremely fertile and largely under cultivation. The lower lands to the north are well watered, but irrigation is needed in the south; an extensive system has been constructed by the Government. Sugar, pineapples, oranges, grapefruit, tobacco and coffee are the chief exports. Sugar production under modern methods increased from 35,000 tons in 1899 to 490,000 tons in 1921. Stock raising is an important industry. Valuable salt deposits are worked. Mineral production is undeveloped. The climate is the most healthful of the Western Hemisphere in the tropics.

Porto Rico was discovered and named by Columbus in 1493. Ponce de Leon conquered it for Spain in 1509-11. It was conquered by Major Gen. Miles in the Spanish-American War and ceded to the United States by the Treaty of Paris, Dec. 10,

| 1922.....    | 57,400,028                  | 6,775,121                   | 64,175,149     | 66,229,771                | 5,942,800                 | 72,172,571     |

The years 1898 and 1899 are calendar; 1900 covers January 1 to June 30; 1901, and succeeding years are fiscal. Imports from the United States in 1899 included gold and bullion.

1898. It is administered under the Foraker Act, April 12, 1900, as amended July 15, 1909, and as extensively altered by the Jones Act, March 2, 1917, which extended American citizenship to all Porto Ricans, and granted manhood suffrage. The Governor is appointed by the President. The Legislature—a Senate of 19 members and a House of Representatives of 39—is elected for four years by direct vote. The Commissioner of Education, the Attorney General and the United States Judge are appointed by the President, and the five Supreme Court Justices and minor Judges by the Governor. The Governor appoints the executive leaders of the departments of Justice, Finance, Interior, Agriculture, Labor, and Health, subject to the approval of the insular Senate. The six heads of departments form the executive council. The island elects a resident Commissioner at Washington with a voice but no vote in the House of Representatives, for a term of four years.

The distribution of the population according to color in the Census of 1920 was: White, 948,709; black, 49,246; mulatto, 301,816; all others, 38. Education has been compulsory and free since 1899, when the percentage of illiteracy was 83; in 1920 it was 55. The Roman Catholic religion is dominant.

A commission from the Rockefeller Foundation reported that 90 per cent. of the people of the island were infected with uncinaria (hookworm). The insular Commissioner of Health, himself a Porto Rican, wrote in 1920: "More than 70 per cent. of our population are in the country, badly housed and fed, ill in health, and ignorant of the first principles of hygiene." A great improvement, however, has been made in economic and social conditions during the last decade.

In 1920-21 there entered the ports 1,986 American and foreign vessels, tonnage 5,347,723. The island has 339 miles of railroads.

### VIRGIN ISLANDS OF THE U. S.

AREA, 132 square miles.

POPULATION, (Census 1917), 26,051.

CAPITAL, Charlotte Amalie (Isl. of St. Thomas), population, 7,747.

Governor, Capt. Sumner E. W. Kittelle, U. S. N. Secretary, Lt. C. C. Timmons, U. S. N.

Consuls maintained at St. Thomas by Belgium, Brazil, Colombia, Cuba, Denmark (vacant), Dominican Republic, France, Great Britain, Guatemala, Haiti (C. G.), Italy, Mexico, The Netherlands, Nicaragua, Norway (vacant), Panama, Peru, Portugal, Spain, Sweden, Uruguay and Venezuela.

The Virgin Islands of the United States, formerly the Danish West Indies, were bought for \$25,000,000 by the United States from Denmark in a treaty proclaimed Jan. 25, 1917. The group consists of three islands, St. Thomas, population Census of 1917, 10,191; St. Croix, 14,901 and St. John, 959, with about 50 smaller ones, mostly unnamed, and uninhabited; and lies about 60 miles due east of Porto Rico. The language is English.

They are administered by the Navy Department under the organic act of Congress approved March 3, 1917. The Governor is appointed by the President of the United States. The Danish code of laws, dated April 6, 1906, remains in force so far as compatible. Six appointed heads of departments—Health, Judiciary, Public Works, Education, Supply, Police and Fire,—with naval aides make up the Governor's Cabinet. The islands comprise two municipalities, that of St. Thomas and St. John, with a legislative council of 11 members elected by popular vote and 4 appointed by the Governor; and that of St. Croix with a membership of 13 and 5 respectively. The municipal franchise extend to males of unblemished character, 25 years old, resident on the islands for 5 years and possessed of an income of 1,500 francs a year. The estimated revenue for the fiscal year ending June 30, 1921, was 1,409,868 francs, derived from customs, income tax and local taxes. The annual deficit in the operation of the government is made up by Congressional appropriation. Agriculture and cattle raising are the chief industries, and the islands produce the finest bay oil and bay rum in the world, exporting in 1919 about 60,000 gallons.

Charlotte Amalie has one of the finest harbors in the West Indies and is an important coaling and oil fueling station. The Naval Station St. Thomas has a powerful radio equipment. Education is compulsory.

The commerce of the Virgin Islands with the

United States for the fiscal years ending June 30, 1921 and 1922 was:

| FISCAL YEAR. | Exports.<br>to U. S. | Imports.<br>from U. S. |
|--------------|----------------------|------------------------|
| 1920-21..... | \$3,571,787          | \$4,162,949            |
| 1921-22..... | 754,729              | 1,836,567              |

### AMERICAN SAMOA.

AREA, 57.9 square miles.

POPULATION, 1920, 8,324, including 266 Americans of the U. S. Naval Service.

CAPITAL, Pago Pago (Isl. of Tutuila), population, 8,066.

Governor, Capt. Edwin T. Pollock, U. S. N.

American Samoa, composed of the islands of Tutuila, Aunuu, Ofu, Olosenga and Tau, and the uninhabited coral atoll of Rose Island, became a possession of the United States by virtue of the tripartite treaty with Great Britain and Germany in November, 1899, accepted by the United States, Feb. 13, 1900. The census of January, 1920, gives it a native population of 8,068. Pago Pago is the most valuable harbor in the South Pacific and possibly in the entire Pacific Ocean. It was ceded in 1872 by the native king to the United States for a naval and coaling station. For 1920 the exports were valued at \$98,213 and the imports amounted to \$235,293. American Samoa is extremely valuable in its relation to the expansion of American trade in the Pacific.

American Samoa is 4,160 miles from San Francisco, 2,263 miles from Hawaii, 1,580 miles from Auckland, 2,354 miles from Sydney and 4,200 miles from Manila. The natives can all read and write and are all Christians of different denominations. They are of the highest type of the Polynesian race and are greatly on the increase due to the laws forbidding foreigners buying their land.

Under the tripartite treaty of 1899, the United States owns Tutuila and the other islands of the Samoan group east of 171 degrees of longitude west of Greenwich. The Samoan islands west of that meridian belonged to Germany until the World War. Under the 1919 peace treaty they were taken over by Great Britain and are administered by New Zealand.

The commandant of the United States Naval Station at Pago Pago is also the Governor of American Samoa. He is appointed by the President. There is a naval radio station on the island of Tutuila.

All of the land on the islands is privately owned. Under the American Commandant-Governor there is a native Governor in each of the three political divisions. The native Governors appoint the County Chiefs, who appoint the Village Chiefs. American Samoa has an area of 57.9 square miles. The chief product of the soil is coconut (the dried kernel is called copra). Other fruits are grown, but not exported.

### GUAM.

AREA, about 210 square miles.

POPULATION, 1920, 14,246, of which 13,698 were natives.

CAPITAL, Agaña; population est. 9,000.

Governor, Capt. I. C. Wettengel, U. S. N.

The Island of Guam, the largest of the Marianas, was ceded to the United States by Spain by Article 2 of the Treaty of Paris, Dec. 10, 1898. It lies between latitudes 13° 13' and 13° 39' north and longitudes 144° 37' and 144° 58' east. It is 32 miles long and 4 to 10 miles wide. Distance from Manila, 1,506 miles; from San Francisco, 5,044 miles. The inhabitants call themselves Chamorros, but the present generation are a mixed race with the Malay strain predominating. Their language, a Polynesian tongue, is also called Chamorro. About 10 per cent. speak English. Instruction in the English language is compulsory in the public schools. The northern half of the island is a plateau from 400 to 690 feet in height and is, except where cleared for cultivation, wooded. The southern half is broken by hills from 1,200 to 1,300 feet high.

The total population, July 1, 1918, exclusive of officers and enlisted men of the navy and Marine Corps and their families was 14,344, of whom 14,124 were classed as "natives." Of the foreign-born population only 69 were Americans. Death rate per

thousand was 17.6; birth rate, 47.2. Guam is under the Navy Department, as a naval station. The Governor is a naval officer, designated by the President. A marine barracks, naval hospital and station ship are maintained. The Commercial Pacific Cable Company has a cable station in Guam, and cables from Manila, Yokohama, Midway and Yap Islands are landed here. There is a powerful Government radio station here. The port of entry is Apra, which is closed to foreign vessels, except by permit from the United States Government. Apra is commodious, but unimproved.

## WAKE AND THE MIDWAY ISLANDS.

The United States flag was hoisted over Wake Island on July 4, 1898, by Gen. F. V. Greene, commanding Second Detachment Philippine expedition. It is a small island in the direct route from Hawaii to Hongkong, about 2,000 miles from the first and 3,000 miles from the second.

The Midway Islands, owned by the United States, are a group in the North Pacific, northwest of the Hawaiian Islands. A relay cable station of the Commercial Cable Co. is established there.

## VACANT PUBLIC LANDS IN THE UNITED STATES.

(As of July 1, 1922; official data.)

The lands in the original thirteen States, Connecticut, Delaware, Georgia, Maryland, Massachusetts, North Carolina, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, South Carolina, and Virginia, also in Texas, never formed a part of the public domain; their disposition is governed by the State laws and information concerning same should be sought from the State authorities.

There are no public lands in the States of Ken-

tucky and Tennessee and none is known to this office remaining undisposed of in the States of Illinois, Indiana, Iowa, Missouri, and Ohio.

The unappropriated lands in Alaska are not included herein. The total area of Alaska is 378,165,760 acres, of which about 25,754,000 acres are reserved. Approximately 1,552,128 acres have been surveyed under the rectangular system 120,708,187 acres thereof are reserved for forestry purposes.

## VACANT PUBLIC LANDS, AS OF JULY 1, 1922.

| Montana.....     | 4,370,848      | 1,289,395 | 5,659,879  | Grand total.....  | 126,131,035    | 56,755,275 | 182,886,310 |

Cash receipts of the General Land Office during the fiscal year ended June 30, 1922: Disposal of public lands, \$2,377,382.26; sales of Indian lands \$545,711.91; power permits, \$11,871.28; coal leases, \$7,331.72; receipts under mineral leasing act, public lands, \$6,374,143.52; receipts under mineral leasing act, naval petroleum reserve lands, \$2,425,324.65; depredations on public lands, \$1,998.71; miscellaneous, \$30,431.59.

Area of public and Indian lands originally entered during the fiscal year 1922, 10,367,153.15 acres. Area of lands patented, 12,904,821.57 acres.

The total number of entries, acres sold and

amount received therefor under the Timber and Stone Acts of June 3, 1878 and August 4, 1892, were from June 3, 1878 to June 30, 1922: Entries, 105,711; acres, 13,668,307.16; amount, \$34,852,144.29.

Under the provisions of the act of March 3, 1922, entitled "An act to provide for agricultural entries on coal lands in Alaska," upon the unreserved, unwithdrawn public lands in Alaska, homestead claims may be initiated by actual settlers on public lands which are known to contain workable coal or gas deposits, or which may be, in fact, valuable for the coal, oil or gas contained therein.

## UNITED STATES RECLAMATION SERVICE.

(From data furnished by the

Service; as of July 1, 1921.)

DIRECTOR, Arthur P. Davis, Interior Department Building, Nineteenth and F., N. W., Washington. D. C. Employees: Washington office, 75; field, 3,000 to 5,000. Expenditure per year, about \$10,000,000.

The Reclamation Service was organized as a bureau of the Interior Department, under the Reclamation Act of June 17, 1902. It is engaged in the investigation, construction, and operation of irrigation works in the 17 arid and semi-arid States of the far west. Twenty-five primary projects comprising 2,825,000 acres and three Indian projects comprising 384,000 acres are under construction or operation, and the major works aid in serving an additional 1,100,000 acres under private canals that generally get stored water from the Government reservoirs. The funds for this work have come chiefly from the sale of public lands, from repayments by the water users, and more recently from oil-leasing and other mineral operations, and the money expended is returned to the fund by graduated payments of settlers, usually in twenty annual installments without interest, in accordance with the Reclamation Extension Act of August 13, 1914.

The Service has built about 13,600 miles of canals, ditches, and drains (including 117,000 canal structures), involving the excavation of 200,000,000 cubic yards of materials. In connection with this work there have been constructed 100 storage and diversion dams with an aggregate volume of 14,500,000 cubic yards, including Arrowrock Dam (349 feet high) Idaho, on the Boise River and the Elephant Butte Dam (306 feet high), New Mexico, on the Rio Grande. The Service has built 101 tunnels, 1,000 miles of road, 83 miles of railroad, 3,280 miles

of telephone line, a dozen power plants, and 840 miles of transmission line. It is mining coal, and has manufactured 1,676,000 barrels of cement and sand cement. The net construction cost as of June 30, 1922, was \$135,000,000.

Over 450,000 persons are living on the 33,000 farms irrigated by the Service and in the project towns and cities. Of the 2,825,000 acres above referred to, water was furnished in 1921 to 1,227,500 acres, and of this area 1,137,900 acres were harvested in 1921, producing crops worth nearly \$50,000,000, of an average of about \$43 per acre. The additional lands using stored water yielded crops worth \$45,000,000 more.

Public land farm units on the several projects are opened for settlement from time to time as canals are extended to make irrigation water available. Under present law, soldiers of the World War have a preference right to enter these farms, and at recent openings such soldiers have taken all units.

Information in regard to farms available for settlement may be obtained by addressing Director, U. S. Reclamation Service, Department of the Interior, Washington, D. C.

The Service issues the "Reclamation Record," an illustrated monthly publication, containing articles of interest to irrigation farmers and engineers. An annual report is also issued.

An engineering library of about 5,000 manuscript and printed volumes on the subject of irrigation is maintained in the Washington office of the Service. This library contains descriptions of the construction and operation of the projects, with numerous photographs and maps, plans, specifications, cost data, and results of original experimental investigations, and is available for consultation by those interested.

## New York State Statistics.

The Almanac presents, in the following pages, tables and other detailed data relating to the State of New York.

## POPULATION AND AREA OF NEW YORK STATE COUNTIES.

(In computing the increase from 1890 to 1900 for certain counties the population of Indian reservations in 1900 has been deducted from the total population of the county in order to make it comparable with the total for 1890, which does not include the population of Indian reservations. The deductions thus made for the several counties are as follows: Cattaraugus, 1,982; Chautauqua, 31; Erie, 1,305; Franklin, 1,253; Genesee, 346; Niagara, 337; Onondaga, 530.)

| COUNTY.                 | When Formed. | Land Area Sq. M. | Population 1920. | Pop. Per Sq. M. 1920. | Population 1910. | Population 1900. | Population 1890. | Population 1880. | Population 1870. |

## STATE TOTALS FOR THOSE NOT IN TABLE ABOVE.

Armenia, 5,599; Belgium, 5,300; Canada, French, 15,560; Cuba, 3,136; Czechoslovakia, 38,247; Denmark, 14,222; Finland, 12,504; France, 32,179; Greece, 26,117; Jugoslavia, 8,547; Lithuania, 12,121; Netherlands, 13,772; Norway, 27,573; Roumania, 40,116; Scotland, 37,654; South America, 6,446; Spain, 12,548; Sweden, 53,025; Switzerland, 15,053; Syria, 8,127; Wales, 6,763; West Indies (exc. Cuba and Porto Rico), 6,396.

## PERCENTAGES, 1920 AND 1910.

The 1920 percentage of foreign-born whites in chief counties (1910 percentage in parentheses) is as follows: Manhattan, 40.4 (45.4); Bronx, 36.5 (0.1); Kings, 32.7 (35.0); Richmond, 27.1 (28.2); Niagara, 24.7 (26.0); Queens, 23.8 (27.9); Erie, 23.2 (27.0); Westchester, 23.2 (28.6); Monroe, 22.6 (25.1); Suffolk, 21.7 (22.9); Schenectady, 21.7 (23.8); Montgomery, 21.3 (23.8); Nassau, 20.6 (23.0); Oneida, 20.3 (21.9); Chataugua, 20.0 (22.2); Onondaga, 17.2 (19.8); Herkimer, 17.1 (18.3); Sullivan, 16.6 (13.8); Albany, 15.8 (17.8); Orleans, 15.5 (18.1); Rockland, 15.3 (20.7); Cayuga, 14.5 (14.9); Fulton, 14.2 (14.7); Rensselaer, 14.1 (17.3); Genesee, 14.0 (17.2).

In almost every county of the State the percentage of foreign-born whites has decreased and in 40 of the 62 counties there was also a decrease in the number of foreign-born whites.

POPULATION OF N. Y. STATE BY STATE OF BIRTH.

(U. S. Census figures as of January 1, 1920.)

Of the 10,385,227 inhabitants of New York, 6,634,469, or 63.9 per cent., were natives of that State; 925,383, or 8.9 per cent., were natives of other States or of the outlying possessions; and 2,825,375, or 27.2 per cent., were born in foreign countries.

The percentage of native Americans in the total

population of the State increased from 69.8 in 1910; to 72.8 in 1920, and the percentage foreign born decreased from 30.3 to 27.2. The percentage of natives of New York increased during the same period from 62 to 63.9, and the percentage born in other States and the outlying possessions increased from 7.9 to 8.9.

| 1902..... | 12,511,369      | 3,303,555              | 1911..... | 18,319,880      | 8,157,344              | 1920..... | 2,039,613       | 21,259,641             |
| 1903..... | 17,741,257      | 4,665,736              | 1912..... | 18,210,084      | 12,153,189             | 1921..... | 233,718         | 18,135,507             |
| 1904..... | 17,879,636      | 5,428,052              | 1913..... | 18,142,558      | 12,724,237             | 1922..... | 21,452          | 15,385,042             |
| 1905..... | 18,197,906      | 4,627,051              | 1914..... | 18,109,271      | 11,162,478             |           |                 |                        |

1908 figures cover only five months, because the excise year was changed so as to begin Oct. 1 instead of May 1.

Figures for 1917 and later cover years ended June 30.

## FINANCIAL SUMMARY OF NEW YORK STATE GOVERNMENT.

| 1850.....    | 650,202,067        |                        | 554,546,642         |                        | 22,084,926                |                        | 73,570,499    |                        |

A minus sign (—) denotes decrease.

1870 values are computed gold values, being 80 per cent. of the currency values reported.

## NUMBER OF FARMS, BY SIZE, 1880 TO 1920.

| SIZE GROUP.                | 1920.   | 1910.   | 1900.   | 1890.   | 1880.   |
|----------------------------|---------|---------|---------|---------|---------|
| Total number of farms..... | 193,195 | 215,597 | 226,720 | 226,223 | 241,058 |
| Under 10 acres.....        | 13,720  | 18,655  | 16,760  | 13,166  | 14,913  |
| 10 to 19 acres.....        | 12,820  | 15,533  | 15,782  | 15,779  | 17,229  |
| 20 to 49 acres.....        | 27,267  | 31,047  | 35,123  | 36,955  | 40,386  |
| 50 to 99 acres.....        | 50,784  | 56,821  | 63,789  | 67,835  | 70,661  |
| 100 to 499 acres.....      | 87,390  | 92,194  | 93,909  | 91,323  | 96,273  |
| 500 to 999 acres.....      | 999     | 1,104   | 1,109   | 972     | 1,275   |
| 1,000 acres and over.....  | 215     | 243     | 248     | 193     | 281     |

In New York the number of 'dairy cows,' including heifers 1 year old and over, reported for January 1, 1920, was 1,730,082, as compared with 1,509,594 'cows kept for milk' reported for April 15, 1910. This represents an increase of 220,488, or 14.6 per cent. The number of 'beef cows' reported for January 1, 1920, was 26,664, as compared with 138,361 'cows not kept for milk' reported for April 15, 1910, representing a decrease of 111,797, or 80.7 per cent.

## FARM ACREAGE AND VALUE, BY SIZE OF FARM, 1920 AND 1910.

NOTE.—The figures in the above table relating to farming in Greater New York do not cover the intensive culture carried on by Poles and Italians, chiefly the latter, on vacant lots and other small tracts in the Bronx, on Staten Island, and in the

Boroughs of Queens and Brooklyn. Garden vegetables, including the Italian varieties of tomato, cauliflower, and squash, are grown in large quantities and sold to the storekeepers in those boroughs.

The canals were made free in 1882. Figures for 1919 and thereafter are on an officially revised system of tabulation by the State.

Values were estimated by the State in 1919 and 1920, but were not recorded in 1921.

THE NEW YORK STATE CANAL SYSTEM.

(Communicated by Charles L. Cadle, Superintendent of Public Works.)

THE canal system of the State consists of the Erie Canal; the Champlain Canal; the Oswego Canal; the Cayuga-Seneca Canal; Cayuga Lake Inlet, at Ithaca; the Black River Canal; the Glens Falls Feeder, and the lakes, reservoirs, feeders, harbor basins and terminal docks connected therewith. The Shinnecock-Peconic Canal, located in the County of Suffolk, on Long Island, connecting the waters of Shinnecock and Peconic Bays, is officially a part of the canal system.

What is commonly known as the Barge Canal includes the Improved Erie, Champlain, Oswego and Cayuga-Seneca Canals. These waterways were enlarged and constructed under bond issues approved by the people in 1903, 1909, and 1915. They took the place of the old canals which had been in existence since 1825. The bond issue for the construction of terminal docks and the providing of freight handling machinery was approved in 1911.

THE MAIN WATERWAY.

The Erie Barge Canal is the main waterway and extends across the State from Troy to Buffalo. Officially, the route commences at Congress Street, Troy, and follows the line of the Hudson River to Watford, where the westward turn is made. From Watford the line of the Mohawk River, canalized, is generally followed to a point beyond Little Falls. Westward from this point the new channel follows the route of the old canal in part, but passes the northerly outskirts of the City of Utica on a new line; thence to the south of Rome and then into and across Ononda Lake. Passing out of Ononda Lake the Ononda River is used to its junction with the Seneca River at Three River Point; thence through the Seneca River to and through the Clyde River to a point east of Lyons; thence following the old canal, deepened and enlarged, to a point beyond Pittsford. Here the channel leaves the old route, crossing the Genesee River about a mile south of Rochester on a pool created by the construction of a dam, joining the line of the old canal a few miles westerly, and continuing thence in the former channel, deepened and widened, to and through Tonawanda Creek,

where the Niagara River is entered and followed to Lake Erie, at Buffalo.

The Champlain Barge Canal commences in the Hudson River, at Watford, where the Improved Erie Canal starts westward, and follows generally the channel of the Hudson River, canalized, as far northward as Fort Edward, where a new route has been established to Whitehall on the Inlet of Lake Champlain.

The Cayuga-Seneca Barge Canal branches northerly from the Erie Barge Canal at Three River Point and follows generally the line of the Oswego River, canalized, to Lake Ontario, at Oswego.

The Cayuga-Seneca Barge Canal extends in a southerly direction from the Erie Barge Canal at a point near Montezuma. The Cayuga branch follows the valley of the Seneca River to Cayuga Lake; thence through Cayuga Lake to the Cayuga Lake Inlet at Ithaca. The Seneca branch follows the Seneca River in a westerly direction from the Cayuga branch, the foot of Cayuga Lake, and connects with Seneca Lake near Geneva; thence through Seneca Lake to Watkins, with an extension to Montour Falls.

WIDTH VARIES.

The width of the Barge Canal channel varies according to the section traversed. Through canalized rivers and lakes, the channel is at least 200 feet wide. Through rock cuts and land lines, a minimum bottom width of 94 feet has been provided and through earth sections the minimum width of the bottom of the channel is 75 feet. The locks of the Barge Canal are uniform in size. The inside dimensions of the lock chambers are 310 feet in length and 45 feet in width and are capable of passing a barge 300 feet long and, say, 43 feet wide. A depth of water of 12 feet over the miter sills has been provided. Clearance under fixed bridges spanning the channel is 15½ feet at high water.

LENGTH IN MILES.

Erie Barge Canal (Watford to Tonawanda), 339; Oswego Barge Canal (from Lake Ontario to Three River Point), 24; Cayuga-Seneca Barge Canal (from junction with the Erie Barge Canal to

Ithaca and Watkins, including Cayuga and Seneca Lakes), 92; Champlain Barge Canal, 60; canal harbors at Utica, Syracuse and Rochester, 10. Total canal mileage, 525.

#### NATURAL WATER COURSES CANALIZED USED AS PART OF THE SYSTEM.

Hudson River (between Troy and Fort Edward), 37; Mohawk River, 112; Oswego, Oneida and Seneca Rivers for their entire length, 99; Oneida Lake, 21; Cayuga Lake, 38; Seneca Lake, 35; Clyde River, 19; Tonawanda River, 11; Syracuse Harbor, Onondaga Lake outlet, 7; Rochester Harbor, Genesee River, 2; Utica Harbor and a short section of the Mohawk River, 1. Total mileage in canalized rivers and lakes, 392.

Practically all the municipalities along the line of the Barge Canal system have been provided with docks and warehouse equipment. In the city of New York, there are eight terminals equipped with modern warehouses and freight handling machinery situated as follows:

At Piers 5 and 6, East River, and at the foot of West 53rd Street, on the Hudson River, in the Borough of Manhattan; at Mothaven (138th Street, East River) in the Borough of the Bronx; on the East River at the foot of North Jane Street, Long Island City, at Flushing and at the foot of Broadway, Hallett's Cove, in the Borough of Queens and at the foot of Columbia Street, Gowanus Bay, at Dupont Street, Greenpoint, in the Borough of Brooklyn.

#### GRAIN ELEVATORS.

A grain elevator of 2,000,000 bushel capacity, providing every modern facility for the handling of grain transported by canal, is being erected by the State at the Gowanus Bay Terminal, in the Borough of Brooklyn. Its completion is expected in June, 1922. It will be operated under the direction of the State Superintendent of Public Works.

The building of a similar structure was begun by

#### LAKES IN NEW YORK STATE.

The great northern lakes, viz.: Ontario, Erie and Champlain, are partly in this State. Lake George, south of Lake Champlain, communicates with it by a short outlet. It is 37 miles long, and from one to three broad, and embosoms more than 200 islets. Its waters are so clear and transparent that the bottom is visible at almost any depth; and on each side it is skirted with mountains, abounding in romantic scenery. The Adirondacks

According to the Ice Trade Journal, about 24,000,000 tons of natural ice and 29,000,000 tons of artificial ice are cut, made, and used each year in the United States.

Daily Capacity of Artificial Ice Plants in New York City. Manhattan, 5,800 tons; Bronx, 2,300 tons; Brooklyn, 5,700 tons; Queens, 1,900 tons; Richmond, 300 tons; total for city, 15,900 tons.

#### THE ALLEGANY STATE PARK.

(By the N. Y. State College of Forestry, Syracuse.)

THE Allegany State Park, which was authorized by the 1921 Legislature, and will cover 65,000 acres, is located in Cattaraugus County. It occupies practically all the land inclosed within the semi-circle described by the bend of the Allegany River as it reaches into New York State. This tract is to be forever reserved for the use of all the people, but is not to constitute part of the Forest Preserve. Thus the free use of the park is permitted for betterment purposes and recreational management by the park commissioners. This is in accordance with scientific park management and in keeping with the plan of the New York State College of Forestry for the management of all State parks.

The park will be patrolled by protectors, who will exercise all the powers of constables of towns in the enforcement of laws and regulations.

the State at Oswego on Lake Ontario and the foundation work has been completed. The erection of the superstructure has not as yet been authorized.

#### COST OF BARGE CANAL IMPROVEMENT UP TO OCTOBER, 1921.

Bond issue of 1903 for improvement of Erie, Oswego and Champlain Canals, \$101,000,000; Supplemental bond issue of 1915, \$37,000,000; Miscellaneous appropriations, \$5,338,794; Bond issue of 1907 for improvement of Cayuga and Seneca Canal, \$7,000,000. Additional appropriations: in 1918, \$350,000; Miscellaneous appropriations, \$1,071,858; Bond issue of 1911 for constructing terminals and providing freight handling facilities, \$19,800,000; Miscellaneous appropriations, \$2,338,122; Appropriations for grain elevators at Brooklyn and Oswego, \$2,725,000. Total, \$167,123,774.

The portions of the former canal system which have been retained in connection with the operation of the Barge Canal include the following:

The Glens Falls feeder, extending west and north to Glens Falls, a distance of 12 miles, and connecting with the Champlain Barge Canal at Fort Edward; and the Black River Canal, running northerly from its junction with the Erie Barge Canal at Rome to Carthage, although it is not navigable beyond Lyons Falls. The use of these two channels is limited to small type barges only.

#### OWNED BY THE STATE.

The canals above described are owned by the State of New York and are under the jurisdiction of the Superintendent of Public Works for management, maintenance, repair and operation. Navigation is free, no tolls whatever being charged. The main office of the Superintendent of Public Works is in the Capitol at Albany. Branch offices are maintained by the department at Pier 6, East River, New York City, and in the cities of Schenectady, Syracuse, Rochester and Buffalo.

contain more than 100 scenic lakes. There are numerous small lakes in the western part of the State which discharge their waters into Lake Ontario, either directly or indirectly through the Genesee, Seneca and Oswego Rivers, and being connected by canals and railroads, afford facilities to transportation. Three of the lakes have southern drainage: Oswego and Canadadaga into Susquehanna and Chautauque through only seven miles from Lake Erie, eventually into the Gulf of Mexico. These, with their extent, &c., are as follows:

**THE NEW YORK STATE FOREST PRESERVE.**

(Specially prepared for THE ALMANAC by the State Conservation Commission.)

NEW YORK STATE's great Forest Preserve was established by act of the Legislature in 1885. It includes large areas in the two great forested sections of the State, the Adirondack and Catskill Mountains. Article 7, Section 7, of the State Constitution, adopted in 1894, assured its integrity for all time. It provided that "The lands of the State, now owned or hereafter acquired, constituting the Forest Preserve as now fixed by law, shall be forever kept as wild forest land. They shall not be leased, sold or exchanged, or be taken by any corporation, public or private, nor shall the timber thereon be sold, removed or destroyed. But the Legislature may by general laws provide for the use of not exceeding three per centum of such lands for the construction and maintenance of reservoirs for municipal water supply, for the canals of the State, and to regulate a flow of streams. Such reservoirs shall be constructed, owned and controlled by the State; but such work shall not be undertaken until after the boundaries and high flow lines thereof shall have been accurately surveyed and fixed, and after public notice, hearing and determination that such lands are required for such public use. The expense of any such improvements shall be apportioned on the public and private property and municipalities benefited to the extent of the benefits received."

Since the establishment of the Forest Preserve, the State of New York has spent \$5,330,800 in the acquisition of land for its extension. In addition large areas of other land have been acquired by tax sales, with the result that January 1, 1922, the area of the Forest Preserve in both the Adirondack and Catskill Mountains aggregated 1,992,516 acres.

Jurisdiction over the Forest Preserve is exercised by the Conservation Commission, which has charge, besides, of the State Reservation at Saratoga Springs, the St. Lawrence Reservation, the Cuba Reservation, the State owned islands in Lake George, and the John Brown Farm in the Town of North Elba, Essex County. Besides administrative control over this property, the commission also has entire charge of the fighting of forest fires upon both public and privately owned land in the large forested regions.

For the prompt detection of forest fires, fifty-five observation stations are maintained upon mountain tops throughout the Adirondacks and Catskills and in the forested regions of Long Island. All of these stations are connected by telephone lines with the ranger headquarters. Observers are on duty at these stations throughout the entire dry season from spring until fall. A force of sixty-five forest rangers and five district rangers is also maintained.

The work of reforestation of State land and the raising of trees for the reforestation of private land is also conducted by the commission. For this purpose six nurseries are maintained, having a total capacity of 30,000,000 trees and an annual production of 10,000,000. Approximately 5,000 acres of

State land are reforested each year. Trees are sold to private landowners at the cost of production, to municipalities at 50 cents per thousand, and are furnished to State institutions without charge.

The sections of the Adirondack and Catskill Mountains upon which it is most important for the State to insure the maintenance of a continuous forest cover have been defined by law and are known as the Adirondack and Catskill Parks. They are bounded by a line called the blue line. Within these parks approximately one-half of the land is still privately owned. Part of the land of the Forest Preserve lies outside of the park lines, and thus the park lines, which run through both State and private land, are simply lines to designate the most vital sections of the mountain regions. Extensive lumbering operations upon much of the land within the park lines are endangering the water sheds, and this led to a referendum vote in 1916 for the authorization of a bond issue of \$7,500,000 for purchase of additional land to be added to the Forest Preserve. The proposition passed by a large majority, and the Conservation Commission is now engaged upon the expenditure of this sum.

It is conservatively estimated that the Forest Preserve is now worth, if it should be placed on the market, more than \$40,000,000, showing an increase in value of 800 per cent. over its cost to the State.

Investigations made by the Conservation Commission indicate that investment in hotels, boarding houses and much of the facilities for the care of summer visitors in the Forest Preserve regions, the amount of money annually expended in caring for these people, the money spent by vacationists, and the number of persons actually engaged in the business of caring for summer visitors, far exceed in amount similar figures for the lumber industry, thus indicating that the chief business in the Forest Preserve regions has now come to be that of caring for vacationists.

Under a careful system of game protection the fauna native to the woods is preserved, and in many respects is increasing. Chief among the large animals are deer and bears. Beaver, which had become extinct, were reintroduced to the Adirondacks in 1905, and have since spread over every section of the woods. They have also been introduced in the Catskills and are becoming more abundant there. In 1915, through co-operation with the Benevolent and Protective Order of Elks, a carload of elk from Yellowstone Park was liberated in the Adirondacks. Among other common animals, many of which furnish a large amount of fur, should be mentioned the fox, mink, otter, marten, weasel, fisher, coon, and muskrat.

The lakes and streams which are annually stocked by the Conservation Commission, contain brook trout, lake trout, rainbow trout, brown trout, largemouth and smallmouth black bass, great northern pike, pickerel, perch, bullheads, and many of the coarser fishes.

**THE PALISADES INTERSTATE PARK.**

The Palisades Interstate Park comprises 36,000 acres (1,000 acres in the State of New Jersey and 35,000 acres in New York State). The park embraces the Palisades cliffs and runs for twelve miles on the west bank of the Hudson River from Fort Lee, N. J., to Palisades, N. Y. The Harriman Park, which is the highlands region of the Palisades system, runs from Bear Mountain, N. Y., five miles south of West Point, for fifteen miles to Tuxedo, N. Y. The Commission also owns the State Rifle Range at Blauvelt, N. Y., and the Hook Mountain quarry. In the creation of the Palisades Park, the State of New York has appropriated in money and lands \$5,963,525. New Jersey has appropriated \$727,984, including \$500,000 for the Henry Hudson Drive. In addition, the Commission has received private contributions of \$4,735,144 in cash, and lands valued at \$1,692,765. All these contributions and appropriations, together with value of land donations, aggregate \$13,119,419.

In the Palisades section of the park the Commission maintains pavilions for picnic parties, bath houses and beaches; motor boat basin for small pleasure craft; week-end camps for working boys; hundreds of individual camps are established here under permit. In the Harriman Park and Bear Mountain section of the Palisades system there are maintained by the Commission the Bear Mountain Inn, which is a restaurant, built by private funds and operated by the Commissioners for the sale of food at reasonable prices; a lawn plateau for baseball, tennis, running meets, and other organized athletic sports; a large grove on the side of Hessian Lake for picnic parties, benches and tables being scattered

through this area, and swings for the children; the free use of rowboats is permitted for a limited period on Hessian Lake; sightseeing automobiles take visitors in to the park which plunges into the woodland for fifteen miles; parking places for automobiles have been developed, seven lakes have been either entirely made or artificially enlarged.

The Commission maintains the largest civil encampment in the world. In 1921 over 52,000 individuals, mostly tenement children and mothers, averaged eight consecutive days' vacation each. Camps for working girls are maintained at cost. During the summer over 1,780,000 visitors were at Bear Mountain, nearly 1,000,000 of whom came by automobile. Nearly 260,000 people were carried in the Commission automobiles. Over 3,000 people visited the Palisades section of the park. No concessions are let in the Palisades Park. This park is under the jurisdiction of a Joint Commission, appointed by the Governors of New York and New Jersey.

George W. Perkins was the President of the New York Commission for nearly twenty years until his death in 1920. The officers of the Commission are: New York State—J. Du Pratt White, President; Franklin W. Hopkins, Vice President; Geo. W. Perkins, Jr., Secretary; Edward L. Partridge, Treasurer; New Jersey—Richard V. Lindabury, President; Edward L. Partridge, Vice President; Geo. W. Perkins, Jr., Secretary; Frederick C. Sutoro, Treasurer.

The first five-mile section of the Henry Hudson Drive, paid for by the State of New Jersey at a cost of \$443,107, was opened Oct. 29, 1921. It extends from Englewood to the top of the Hudson cliffs, overlooking Alpine.

## WOODS USED IN NEW YORK STATE.

(By the U. S. Forest Service, and the N. Y. State College of Forestry.)

## GEOLOGICAL HISTORY OF NEW YORK STATE.

(By John M. Clarke, Director of the State Museum.)

THE geological history of New York can be traced back to the Precambrian era, the oldest recognizable in the rocks of the earth. These earliest rocks, the Grenville metamorphosed sediments (gneisses, marble, etc.) are, however, not the oldest which ever existed in the State. The Grenville rocks are exposed in the Adirondacks and the Hudson Highlands. They prove that in Grenville time, Northern, Eastern, and probably Southwestern New York was under the sea. After the deposition of the Grenville sediments igneous activity took place on a large scale and huge masses of molten rock (granite, anorthosite, babbrosynite) were pushed into the sediments from below. Some time after the whole Adirondack region was subjected to enormous pressure and intensely folded, and then the great mass of Grenville sediments was upraised well above the sea.

## IN CAMBRIAN TIMES.

At the beginning of Cambrian time, when organic life becomes first recognizable in the State, only the eastern margin was submerged, but toward the end (Potsdam time) the sea covered the whole region except the central and northwestern Adirondacks. At the close of Cambrian time Northern New York was, however, above sea level. In the long Ordovician period, during which the Beekmantown, Chazy, Black River limestones, and the Utica, Frankfurt and Lorraine shales and sandstones were deposited, the State was most of the time submerged under the Ordovician sea, except for the Adirondack Island. Toward the end of that period, however, the Green and Taconic Mountains arose along the eastern border of the State and practically all of Northern, Central, Eastern and Northeastern New York became dry land. In the following Silurian period were deposited the Medina and Onondaga sandstone and conglomerate, the Clinton shale, sandstone, limestone and iron ore, the Rochester shale, the Lockport and Guelph dolomites, the Salina shales, salt

and waterline, etc. During the early part of this period the sea had spread over only Central and Western New York, while during the late Silurian it had extended over practically all the State west and east of the Adirondack region. The strata of the next, or Devonian era, comprise the whole Catskill and southwestern plateau provinces and cover more than a third of the State. These rocks abound in fossils and show that the sea continued to cover at least the southern half of the State. The sea of the Carboniferous period hardly came over the boundary of the State from Pennsylvania. At the end of Paleozoic time New York, except for a small area at the mouth of the Hudson, was raised during the Appalachian revolution well above the sea, never to be invaded again until the end of the glacial period. During the long Mesozoic period New York was dry land; in Triassic time considerable volcanic activity prevailed in Southeastern New York, when sheets of lava (the trap of the Palisades) were forced into non-marine Triassic beds. During the next or Jurassic period the State was above the sea and actively eroded, but in the following Cretaceous period Staten and Long Islands disappeared under the sea. At the end of this period the State, which had been eroded nearly to a plain, was uplifted 2,000-3,000 feet. After this time in the Tertiary period the present drainage and relief of the State were developed in its major features. Finally came the glacial period, which enriched the State with thousands of lakes and waterfalls. It ended with the Champlain subsidence, during which the sea came for the last time into New York, namely, into the Champlain Basin and the Hudson Valley. A recent elevation has again drained these regions.

## THE HUDSON AN ANCIENT RIVER.

The Hudson River is one of the most ancient rivers of the continent and flows over rocks which have been frequently and heavily faulted. The fault blocks seem to have reached their equilibrium but, if subjected to new strains, may settle down to new adjustments and cause earthquake disturbances.

## NEW YORK STATE MUSEUM.

(Prepared by the Museum for THE ALMANAC.)

THE title, New York State Museum, is the statutory name of a scientific research organization. Historically it is the outcome of the great Natural History Survey of the State of New York organized in 1836. The nucleus of these now extensive collections are the scientific materials brought together during the existence of that survey. Under the present statute the "New York State Museum" includes the work of the State Geologist and his associates, who together form the Geological Survey of the State of New York; that of the State Botanist and his staff; of the State Entomologist and his staff; the Zoologist and the Archaeologist. The museum collections, as such, originate partly from the materials acquired for the researches of these officials and partly from special additions made to exemplify the resources of the State of New York. The State Museum is likewise known as the Department of Science of the University of the State of New York, and as such, is under the administrative control of that university. The collections of the museum are arranged on a floor space of about 100,000 square feet on the upper floors of the State Education Building at Albany. These collections form what has been planned and worked out as an essentially State or provincial museum exhibiting the natural resources of animal and plant life, the mineral wealth, geological history, and aboriginal culture of New York State. It has not planned to receive, nor does it especially welcome, material from outside the State, unless this is adapted to illuminate the scientific problems of the State itself. The collections are open free on every week day, 9 A. M. to 5 P. M., and on Sundays, October 1 to May 1, 2 to 5 P. M. The Legislature grants \$56,000 a year for maintenance.

## MINERAL AND FOSSIL COLLECTIONS.

**Hall of Minerals.**—The general collection of about 5,000 specimens is supplemented by a very extensive and complete collection of minerals from New York State, probably the best in existence. There are probably in this hall about 14,000 specimens on exhibition.

**Hall of Geology.**—The collections here illustrate the rock structure and the mineral wealth of the State, especially the application of minerals, ores and rocks to commerce and the industrial arts.

**Hall of Fossils.**—This hall includes vertebrates and invertebrates and the long continued researches of the Geological Survey have made the collection of invertebrate fossils, and the corresponding classification of the rocks of New York the standard of comparison for the world. The use of restorations of extinct animal life, with relief maps, reconstructions, &c., has helped to visualize the appearance of these.

**Hall of Zoology.**—The animal life of New York is exhibited in this hall, the larger mammals in habitat groups and the smaller mammals, birds, fishes, reptiles and mollusks in extensive series of well-mounted specimens. The collection of birds' eggs is one of the largest in America. This section also contains a representative gathering of insects, arranged to illustrate their economic relations to agriculture and forestry. The section of Botany maintains an herbarium of upward of 100,000 specimens of New York plants.

**Halls of Archaeology and Ethnology.**—These contain six large groups representing the customs and habits of the Iroquois Indians in their natural state, before the advent of the white man. These figures have been cast from the best available representatives among the surviving Iroquois and mounted amid actual accessories and against painted backgrounds. They depict the hunt, warfare, council ceremony, industries and agriculture of the New York aborigines. The collections of relics of Indian life in New York are the most extensive in existence, and these collections, with the groups referred to, fill the mezzanine floors.

## GENERAL ACTIVITIES.

**Publications.**—The museum issues general and special publications on the natural resources of the State, in the form of bulletins, memoirs and annual reports. These now number 350 and each can be obtained on payment of a small fee.

The museum owns three parcels of real estate, presented by citizens for preserving their geological interest: 1—The Clark Reservation near Syracuse, a tract of 104 acres characterized by its extraordinary display of abandoned cataraacts and gorges produced by the flow of the post-glacial waters; 2—Starck's Knob Reservation, or Volcano, near Schuylerville; 3—The Lester Park, or Cryptozoon Ledge in the town of Greenfield, west of Saratoga Springs.

## UNIVERSITY OF THE STATE OF NEW YORK.

## AND STATE DEPARTMENT OF EDUCATION.

(Contributed by the Department.)

The list of Regents is on page 484. They elect the President of the University and State Commissioner of Education—Frank P. Graves; Assistant Commissioner for Higher Education and Director of Professional Education—Augustus S. Downing; Assistant Commissioner for Secondary Education—Charles F. Wheelock; Assistant Commissioner for Elementary Education—George M. Wiley; Director State Library—James I. Wyer, Jr.; Director of Science and State Museum—John M. Clarke; Chiefs and Directors of Divisions: Administration—Hiram C. Case; Vocational and Extension Education—Lewis A. Wilson; Archives and History—James Sullivan; Attendance—James D. Sullivan; Library Extension—William R. Watson; Examinations and Inspection—Avery W. Skinner; School Buildings and Grounds—Frank H. Wood; Law—Frank B. Gilbert; Library School—Edna M. Sanderson; School Libraries—Sherman Williams; Visual Instruction—Alfred W. Abrams; Finance—Clark W. Halliday; and Secretary to the President of the University—Mrs. N. Frances Steers.

The educational system of the State of New York is under the control of the Board of Regents, consisting of twelve members, one from each of the nine judicial districts of the State and three others at large, each member being elected for a term of twelve years at a joint session of the two Houses of the Legislature held in the second week of February of each year.

In its origin and history it is unique. By a law of 1784, following ideas enunciated by Diderot, a French encyclopaedist, a corporation entitled the University of the State of New York, governed by a Board of Regents, was established to supervise and control collegiate and academic instruction, with the power to grant charters to institutions engaged in such work. Under the impetus given by the members of the Board of Regents a State superintendency for common schools, subsequently known as the State Department of Education, with control over education below collegiate and academic grades, was established by law in 1812. These two agencies for educational control continued as separate institutions until 1904 when they were combined and continued under the control of the Board of Regents which had become a constitutional body under the name of the University of the State of New York

in accordance with Article 9, Section 2 of the Constitution of 1894.

The powers exercised by the Board of Regents may be increased, modified or diminished by the Legislature, but the number of its members may not be reduced below nine nor may the Legislature fail to provide for the maintenance and support of the system of free schools wherein all of the children of the State may be educated (Article 9, Section 1). Under legislative enactment the Board of Regents is the embodiment of the educational agencies of the commonwealth. Its province is the entire range of education. It embraces the membership and the work of the public schools, academies, colleges, professional, technical and normal schools, universities, libraries, museums and learned societies. It provides opportunity for co-operation and understanding among its members while diminishing or adjudicating occasions of friction and conflict, adapts educational policy to varying needs, and indicates and provides a continuity of training. It accumulates books and manuscripts, supervises the public archives, collects valuable natural objects, and may carry on educational historical and scientific research work directly on behalf of the State; grants all educational charters in the State, confers honorary degrees, conducts examinations, and awards certificates, diplomas and degrees; admits to certain professions and occupations, and regulates the certification of public accountants and nurses. It apportions State educational funds. It fosters all forms of cultural work, such as is rendered by libraries and local associations of an educational and historical character, distributes printed matter, circulates library books and lantern slides, encourages civic improvement work; in fact, does everything it can to stimulate the intellectual life of the people. It meets monthly and has an annual convocation for the consideration of important educational matters.

Though it does not exercise a complete monopoly of education, for private institutions exist subject to no public authority, which do good work, it is the policy of the State to bring all chartered educational institutions into the university and, while allowing them virtually complete self-government in internal administration, to hold them accountable for the proper performance of their duties. These chartered institutions are subject to the inspection of the Regents, who may require annual reports of them.

## ILLITERACY, NEW YORK STATE.

ACCORDING to the census of 1920 there were, then, 425,022 illiterate persons 10 years of age and over in the State of New York, "illiterate" meaning unable to write. Of this number 16,150 were native whites of native parentage, 12,256 were of foreign or mixed parentage, and 389,603 were of foreign birth. The number of illiterate Negroes was 5,032. In the total

population 10 years of age and over the percentage of illiteracy was 5.1, which showed a diminution since 1910, when it was 5.5.

There is less illiteracy in the rural districts of the State than in the cities, the percentage being 2.9 for the rural population and 5.5 for the urban.

By counties the percentage of illiteracy ranges from 8.4 in Clinton County to 0.7 in Allegany County.

| New York.....     | 281,121           | 6.2       | 270,788                  | Utica.....         | 4,832             | 6.4       | 4,627                    |
| Bronx.....        | 26,202            | 4.5       | 25,620                   | Watertown.....     | 756               | 2.9       | 568                      |
| Brooklyn.....     | 98,038            | 6.1       | 94,737                   | Yonkers.....       | 4,309             | 5.5       | 4,162                    |
| Manhattan.....    | 140,810           | 7.5       | 135,358                  |                    |                   |           |                          |

The percentage of illiteracy in the total population of New York City 10 years of age and over is 6.2, which shows a slight decrease since 1910, when it was 6.7. For the native white the percentage is 0.3, for the foreign-born white, 13.8, and for the Negro, 2.1.

That the younger generation in the City of New York is much less illiterate than the older is indicated by the fact that while 6.5 per cent. of the males and 9.4 per cent. of the females 21 years of age and over are illiterate, the percentage of illiteracy in the population 16 to 20 years of age is but 1.0.

## NEW YORK STATE PRISON CENSUS, 1922-1917.

According to returns received by the U. S. Bureau of the Census, the number of persons confined in prisons, jails, and police stations in the State of New York on July 1, 1922, was 15,451, as compared with 17,494 on July 1, 1917. These figures include persons awaiting hearing or trial and those held as witnesses, as well as prisoners serving sentence.

Of the total for 1922, 7,956 were reported for 11 State institutions, 1,870 for 64 county jails, 5,077 for 162 cities, and 548 for 9 other institutions.

The returns were obtained in response to a circular of inquiry which the Bureau of the Census mailed to the various institutions, as a preliminary to the complete decennial census of prisoners, which will be taken in 1923.

## NEW YORK STATE INSTITUTIONS FOR THE DEAF AND DUMB.

The several institutions for the deaf and dumb receive \$325 a year per capita from the State for such pupils, between the ages of twelve and twenty-five years, as may receive appointments from the Commissioner of Education. Pupils between five and twelve years of age are received as county pupils at the annual charge to counties of \$300, upon the order of an overseer of the poor of a county supervisor. As a rule the grounds and buildings of these institutions belong exclusively to private corporations, who appoint the superintendent or principal. N. Y. Instit. for the Instruct. of the Deaf and Dumb (opened May 20, 1818), New York.  
Le Couteux St. Mary's Instit. for the Improv.

Instr. of Deaf Mutes (opened November, 1862), Buffalo.  
Instit. for the Improv. Instr. of Deaf Mutes (opened March 1, 1867), New York.  
St. Joseph's Instit. for Improv. Instr. of Deaf Mutes: Fem. Dept. (opened 1870), Westchester; fem. branch (opened 1874), Brooklyn; male dept. (opened 1875), Westchester.  
Central N. Y. Instit. for Deaf Mutes (opened March 22, 1875), Rome.  
Western N. Y. Instit. for Deaf Mutes (opened October 4, 1876), Rochester.  
Northern N. Y. Instit. for Deaf Mutes (opened Sept. 10, 1884), Malone.  
Albany Home School for the Oral Instr. of the Deaf (opened Sept. 17, 1889), Albany.

- Uniformity of Legislation, Commission for Promotion of in the United States**—Albany. Three commissioners, no salary. C. T. Terry, of New York City; C. C. Alden, of Buffalo; and G. G. Bogert, of Ithaca.
- Water Control Commission**—Albany. Consists of the Conservation Commissioner, as Chairman; the Attorney General, and the State Engineer and Surveyor.
- Water Power Commission**—23 So. Pearl St., Albany. Consists of the Conservation Commissioner, as Chairman; the State Engineer and Surveyor, the Attorney General, the Temporary President of the Senate and the Speaker of the Assembly.

## ILLITERACY AS A CAUSE OF ACCIDENTS.

(From a bulletin of the New York State Department of Education.)

Not only is there loss in production because of the low wage earning power of the illiterate foreigner, but there is a tremendous loss in accidents and casualties among the foreigners engaged in dangerous occupations.

Marian K. Clark, of the New York State Industrial Commission, estimates that one-half of the accidents in factories, with a resultant loss of \$50,000 per day to industries, are due to ignorance of the language.

There are 800,000 factory workers in New York State who cannot speak English. In 1916, \$11,500,000 was paid out in that State in accordance with the Workmen's Compensation Law, an amount which would be increased to \$35,000,000 if it were added loss of wages, labor turnover, doctors' bills, and administration of the law.

Statistics of the United States Bureau of Labor show that the rate of accidents in the iron and steel industry during a period of eight years was highest among the non-English-speaking workers and showed little decrease from year to year. The Ford Motor Co. officials state that accidents have fallen off 54 per cent. since their school was started in 1914.

In mining, the most hazardous occupation in this country, lack of ability to read the English language is a tremendous handicap.

In 1919 the Director of the Bureau of Mines stated that 465,000 men in the mining industry came from non-English-speaking races, and that many of them were illiterate. He states that if these men were taught to read and write English it would be a tremendous economic factor in the in-

dustry through a reduction in the casualty list. He says:

"This is a plain business proposition to prevent the death of at least 1,000 miners each year and to prevent the injury of more than 150,000 miners each year. Thousands of illiterate foreigners, many of them unable even to read or write their native language, are poured into the great American mining machine each year and with most disastrous results.

"The mines that employ numbers of foreigners generally have the precautionary rules printed in the different languages; but if the foreigner cannot even read his own language, these safety guides are of no value to him.

"The best estimates from a number of the larger mining States are to the effect that the non-English-speaking foreigners suffer twice the fatalities that the English-speaking miners do. This means an excess of 930 non-English-speaking foreigners killed each year, and I may say unnecessarily.

"If the average State compensation is \$3,000, which is a fair figure, the total economic loss each year to the country through the excess of deaths of non-English-speaking miners alone amounts to \$2,790,000. On the same basis it is estimated that the excess of non-English-speaking miners injured each year amounts to 69,750 men. This is a loss in wages alone of \$1,743,750.

"Taking the excess of deaths and injuries together, due to non-English-speaking foreigners, the economic loss each year reaches \$4,533,750. This is entirely aside from the other costs to the industry in production lost."

## CHIEF NEW YORK STATE LEGISLATION OF 1922.

**Architects**—They must pay a yearly registration fee of \$2 to the State Board of Examiners.

**Automobile (Highway Law) Amendments—Fleeing an Accident**—Makes it a misdemeanor for an operator of a motor vehicle who has damaged another vehicle or injured a person to leave the place of the accident or injury without giving his name and address and license number to the person damaged or injured, as well as to a police officer if one is in the vicinity; if not, then the operator must report the facts to the nearest police station or judicial officer; also requires police officers and judicial officers who receive reports of motor vehicle accidents to make a memorandum of the facts reported, and of such additional facts as may come to their knowledge, and promptly deliver the same to a Police Justice or other Magistrate.

**(Serial Numbers on Autos, Removing, etc.)**—Another amendment makes it a felony, instead of a misdemeanor, for any person wilfully to remove, deface, cover, alter or destroy the manufacturers' serial number or any other distinguishing number or identification mark on any motor vehicle or on any mechanical device; or for any person knowingly to buy, sell, receive, dispose of, conceal, or have in his possession any motor vehicle or mechanical device from which any identification number or mark has been removed, altered, or destroyed.

**Ball Bondsman**—Amends the code of criminal procedure, by requiring bondsmen in criminal cases to be licensed by the State Superintendent of Insurance. Bonding corporations must procure a separate license for each officer and employee authorized to execute such bonds. Limits the premium to 3 per cent. of the bond. Defines a professional bondsman as any person, firm or corporation executing within one month criminal ball bonds in more than two cases not arising out of the same transaction.

**Bankruptcy Discharges**—Amends the Debtor and Creditor Law in relation to discharge of bankrupt from judgment. Approved March 7, 1922; effective immediately.

Section 150 is amended by providing that at any time after the expiration of one year from the date a bankrupt is discharged from his debts under the Federal Bankruptcy Act, an application may be made by the bankrupt, his receiver, trustee or any other interested person or corporation to the court in which a judgment was rendered against him for an order directing the judgment to be cancelled and discharged of record; but such order shall not affect a judgment lien upon real property owned by the bankrupt more than four months prior to being adjudged a bankrupt.

**Bonus Act**—Creates the New York Veterans' Relief Commission, consisting of the Adjutant General, the Comptroller, and the Attorney General, and authorizes the appointment of a deputy commissioner in each Assembly district. Appropriates \$1,000,000 and provides for a maximum allowance of \$250 to each sick or disabled ex-service man residing in the State on April 12, 1922, whose sickness or disability was incurred in, or resulted from, his military or naval service between April 6, 1917, and November 11, 1918. Veterans without dependents are to receive \$30 per month; with dependents, \$45 per month. Veterans regularly receiving aid from the United States Government equal to that provided in this Act are not to receive State aid. Applications for relief are to be filed with deputy commissioners in the Assembly district where veterans reside. In addition to supplying proofs as to service, every applicant for relief must furnish proof that he has been out of regular employment for fourteen days preceding date of application.

**Budget, County and City**—N. Y. City Charter, effective February 28, 1922. Makes all county expenses a general charge upon the city as a whole, instead of upon each county separately. Permits merging tax levy of each county with that of the boroughs, thereby providing a flat rate for all the boroughs.

**Charity Frauds**—Amends the Banking Law by requiring banks, savings banks, and trust companies to furnish, upon request, to local officials charged with the administration of laws relating to the poor, information as to whether or not an applicant for relief, or the husband or wife of such applicant, has funds, securities or other personal property on deposit or in the custody of such banks or trust companies.

**Courts, Children's**—Outside of Greater New York, under the new law signed by Gov. Miller, April 10, 1922, the County Judge will act as the Judge of the newly created court in each county in which the Board of Supervisors certify that he is able to discharge the duties of the office. Otherwise a children's court Judge will be elected in each county.

**Extra Courts**—A new law provides for two extra Criminal Parts of the Supreme Court in New York City, and also two additional parts of General Sessions; also six additional assistants to the District Attorney.

**Commuters' Tickets**—They must not be loaned by the owner or purchaser, and must not be bought at less than the schedule of rates filed and published.

**Conditional Sales**—Amends Personal Property Law; defines conditions; prohibits removals or sale by buyer without notice; makes unlawful the concealment or removal of goods; requires original contract of sale or copy thereof to be filed with city clerk, and the refiling of contracts when goods are removed from the original filing district; and makes buyer liable for loss and injury after the delivery of the goods.

**Congressional Reapportionment**—Provides for new boundary lines for the 11th, 12th, 13th, and 14th Congressional Districts, in New York City. They cover all Manhattan south of 14th Street.

**Contracts, Awarding of**—Amends the New York City Charter by permitting the award of a contract in cases where an appropriation is insufficient at the time bids are opened, provided an additional appropriation sufficient to make up the amount required, to equal the amount bid, is secured before an award is made.

**Corporations**—In effect March 29, 1922. Amends the Stock Corporation Law by requiring all stock corporations organized prior to January 1, 1898, and other than those paying a franchise tax subsequent to January 1, 1919 except banking, insurance, transportation, and railroad corporations, to file with the Secretary of State before December 31, 1922, a report showing the corporation in existence. A list of corporations failing so to report is to be transmitted to the Governor before December 31, 1923, who by proclamation shall declare such corporations dissolved and their charters forfeited. The names of corporations so dissolved are to be reserved for a period of three months following publication of the Governor's proclamation, and during such period no corporation shall be formed under a name the same as any name so reserved or so nearly resembling it as to be calculated to deceive, nor shall any foreign corporation, within such period, be authorized to do business in this State under a name the same as any name so reserved or so nearly resembling it as to be calculated to deceive.

Within three months from date of publication of the Governor's proclamation, a corporation whose name appears therein may, upon payment of \$25 fee, file a certificate of continuance with the Secretary of State and secure the restoration of its corporate powers, rights, etc.

Other amendments to the Stock Corporation Law provide for issuance of stock without voting power; providing also that every stock corporation incorporated in this State shall pay an organization tax of one-twentieth of one per cent upon the amount of the par value of all the shares with a par value which it is authorized to issue and a tax of five cents on each share without par value, and a like tax upon any subsequent increase thereof.

**Divorce**—By an amendment to the Marriage Law, signed by Governor Miller and in effect March 25, 1922, absence for five years is made a ground of divorce in this State. The amendment is as follows:

**"Dissolution of Marriage on Ground of Absence**—A party to a marriage may present to the Supreme Court a duly verified petition showing that the husband or wife of such party has absented himself or herself for five successive years then last past without being known to such party to be living during that time; that such party believes such husband or wife to be dead; and that a diligent search has been made to discover evidence showing that such husband or wife is living, and no such evidence has been found. The court shall thereupon by order require notice of the presentation and object of such petition to be published in the same manner as required for the publication of a summons in an action in the Supreme Court where service of such summons is made by publication; such notice shall be directed to the husband or wife who has so absented himself or herself and shall state the time and place of the hearing upon such petition, which time shall be not less than twenty days after the completion of the publication of such notice; and if the court, after the filing of proof of the proper publication of said notice and after a hearing and proof taken, is satisfied of the truth of all the allegations contained in the petition, it may make an order dissolving such marriage."

**Draft Dodgers**—Violators of the war-time selective-draft act are prohibited from holding public office in New York State.

**Elections**—The Attorney General is given practically all of the powers on the defunct State Super-

**Intendent of Elections, including employing deputies to enforce the Election Law.**

**In New York City the functions of the former State Superintendent of Elections are exercised by the Board of Elections and the police.** Throughout the rest of the State police officials and Sheriffs act.

**Farm Loan Bonds**—They are made a legal investment for savings banks and trust companies.

**Firemen, Two-Platoon**—Provides for a two-platoon system in the New York City, Buffalo, and Rochester Fire Departments.

**Food, Official Grades for**—Amends the Farms and Markets Law, effective April 1, 1922, by empowering the Commissioner of Farms and Markets to establish official grades for foods and farm products, prescribe the use of such grades, and provide for the marking, packing and shipping of foods and farm products so graded; also to inspect and determine the grade and condition of farm products both at shipping points and receiving centres, and provides for the issuance of certificates as to the grade of such products.

**Food Samples**—Whenever the Commissioner of Farms and Markets shall examine or inspect any product manufactured or offered for sale and shall take a sample of such product, he shall also take a duplicate sample thereof and shall tender, and if accepted deliver, such duplicate sample to the person having custody of such product, when such sample is taken.

**Gowanus Bay District (Brooklyn) Improvement**—Authorizes the Board of Estimate to lay out upon the map or plan of the Borough of Brooklyn, and open and improve streets within the territory bounded by the northerly line of 26th Street, the easterly side of 3rd Avenue, the southerly line of 39th Street and the bulkhead line along Gowanus Bay and New York Bay, in the manner provided in the Charter, without obtaining the consent of adjacent owners.

**Harlem River**—Appropriates \$1,500,000 to buy Johnson's Iron Works site and cede it to the United States, so that the latter can remove the bend in the river between the North River and Broadway.

**Housing Laws for New York City**—One amendment permits (under the Insurance Law) life insurance companies to invest 10 per cent of their assets in new housing for the public at \$9 or less a month a room. This the companies may do until March 1, 1924—and so long thereafter as the emergency continue.

Another amendment extends to February 15, 1924, the application of certain acts of 1920 and 1921, relating to defenses in actions based upon unjust, unreasonable and oppressive agreements for rent or premises occupied for dwelling purposes.

Another amendment requires a landlord to give 30 days' notice of an increase in rent, and providing that the value of real property shall be presumed to be the assessed value for the purpose of determining the fair and reasonable rent or rental value.

Another extends to April 1, 1923, the time within which the construction of partially tax-exempt dwellings may be begun.

A special act forbids hoisting of lumber or timber on outside of buildings under construction.

**Ice Cream, Cream, Milk**—An amendment to the Food Law prohibits the sale of any substance in imitation or semblance of cream or milk, and the sale of any product as and for "ice cream" which does not contain at least 8 per cent. of milk fat and at least 18 per cent. of milk fat and milk solids not fat combined, except that when the ingredients of ice cream shall include eggs, fruit, fruit juices, cake, confections, cocoa, chocolate or nuts, such reduction in the percentages of milk fat and milk solids not fat as may be due to the addition of such ingredients shall be permitted or approved, provided the product shall contain at least 6½ per cent. of milk fat and at least 15 per cent. of milk fat and milk solids combined.

Also repeals Section 53, effective July 1, 1922, which requires that certified milk must be sold in conformity with regulations prescribed by, and bear the certification of, a milk commission appointed by a county medical society.

**Income Tax**—Amends the Tax Law in relation to estates and trusts by providing that if the distribution of income is in the discretion of the fiduciary, the tax is to be imposed as provided, without deduction of amount of income paid or credited to beneficiary; provides also that a trust created by an employer as a part of a stock bonus or profit-sharing plan for the exclusive benefit of some or all of his employees, to which contributions are made by such employer, or employees, or both, for the purpose of distributing to such employees the earnings and principal of the fund accumulated by the trust in accordance with such plan, shall not be taxable, but any amount actually distributed or made available to any distributee shall be taxable to him in the year

in which so distributed or made available to the extent that it exceeds the amount paid in by him.

**Amends the Tax Law by striking out the provisions requiring income tax returns and inventories, when used, to conform to forms and methods prescribed by the United States Internal Revenue Commissioner, and providing that inventories shall be made upon a basis to be prescribed by the Tax Commission; also that returns shall show such facts as may be deemed necessary by the commission.**

**Insane, State Hospital for**—New buildings and grounds will be at Creedmoor, Queens Borough, L. I. The present plant, at Kings Park, L. I., will be set apart for World War veterans suffering from mental diseases. The new plant will be known as the Brooklyn State Hospital, Creedmoor Division.

**Insurance Companies**—Grants to mutual fire insurance companies the rights and privileges of stock insurance companies. Another amendment prohibits mutual fire insurance companies from converting themselves into stock companies.

Still another amendment gives State Superintendent of Insurance the control of rate-making associations, and regulation of fire insurance rates.

**Interest Rate**—Amends the Banking Law by providing that investment companies organized under New York State law may charge 6 per cent. interest on loans or discounts. The exaction of a greater rate of interest forfeits the entire interest.

**Investment Securities**—Amends the Banking Law, permitting investment companies to purchase, invest in, hold and sell stocks of any corporation engaged in business of the same general character as such investment company, or engaged in business incidental to the business conducted by such investment company, to an amount in any one such corporation not in excess of 10 per cent. of the capital of such investment company and to an amount in all such corporations not in excess of 30 per cent. of the capital of such investment company; provided that the purchasing and holding of such stock is duly authorized by a resolution of the board of directors of such investment company.

**Knox Headquarters**—Permits New York State to accept as a gift from the Knox Headquarters Association a parcel of 50 acres of land in Orange County where stands the mansion occupied at times during the Revolutionary War by Major Gen. Nathaniel Greene, Major Gen. Henry Knox and Major Gen. Horatio Gates as their headquarters.

**Marriage**—(see Divorce)

**Milk** (see also Ice Cream, and Cream)—Defines (Farms and Markets Law) "skimmed milk" to mean milk from which part or all of the cream has been removed but is otherwise unadulterated except as to excess of water or fluids and deficiency in milk fat or milk solids, provided it contains at least 8½ per cent. of milk solids.

Permits the sale of pure skim cheese made from milk unadulterated except by skimming.

Prohibits the manufacture and sale of any condensed, evaporated, concentrated, powdered, dried or desiccated milk, cream or skim milk to which have been added, mixed, blended or compounded any fats or oils other than milk fat; and providing that after October 1, 1922, condensed or evaporated skimmed milk must be sold in containers or packages of not less than 10 pounds each and distinctly labeled either "Condensed Skimmed Milk" or "Evaporated Skimmed Milk."

**Oleomargarine**—Defines the terms "oleomargarine" or "butterine" to mean "any oleaginous substance" manufactured for sale as a substitute for, and to take the place of, butter, not made exclusively of pure milk or cream; prohibits the sale, as a product of the dairy, of any imitation butter; requires the name and address of the manufacturer to be plainly printed on cartons or wrappings together with the word "Oleomargarine," strikes out the provisions that packages must be sealed; and requires that where any device or brand is imprinted upon any brick or portion of the substance itself the word "Oleomargarine" must also be legibly indented thereon.

**Passenger Motor Vehicles, Indemnity Bonds**—Amends the Highway Law by requiring the owners of motor vehicles, transporting passengers for hire in cities of the first class, to file with the State Tax Commission an indemnity bond or insurance policy in the sum of \$2,500 for each such vehicle operated, conditioned for the payment of any judgment recovered for death or for injury to persons or property caused in the operation or the defective construction of such motor vehicles. Violation is made a misdemeanor.

**Pensions**—More than 50,000 county and city employees throughout the State, except those already receiving pensions, may join the State employees' retirement system under the Draper bill, signed by the Governor April 12, 1922. In explaining the new law, State Controller Wendell said:

"Some of the benefits are: Superannuation retirement at 60 years, with allowances proportionate to time served equal to one-seventieth of average salary for last five years for each year served; physical disability retirement at any age after fifteen years' service, allowances not less than one-fourth of average salary for the last five years, greater length of service producing increased amount; discontinued service allowance obtainable after twenty years' service where leaving public office through no fault of employee."

**Police Captains in New York City**—They are to be selected from lieutenants who have served at least one year.

**Push-Cart Pedlars**—Amends Farms and Markets Law, authorizing the Commissioner of Public Markets to appoint supervisors to supervise the sale of market produce from push carts and other vehicles in open-air markets; also requires push-cart vendors to secure permits; to conduct business in open-air markets, the fee therefor not to exceed \$1 per week per vehicle.

**Put-and-Take Tops**—Prohibits the sale of all gambling devices, including put-and-take tops.

**Real Estate Brokers and Salesmen's Licenses**—Amends the Real Property Law; provides that, on and after October 1, 1922, real estate brokers and salesmen in New York City and in adjoining counties must be licensed by the State Tax Commission. In cities of the first class the annual license fee for real estate brokers is \$25; salesmen, \$5; second-class cities, brokers, \$15; salesmen, \$3; in all other places, brokers, \$10; salesmen, \$2.

Receivers, referees, and fiduciaries are exempt from the requirements of this bill.

**Rent Laws**—(see Housing Laws).

**Resident, the Term Defined**—Amends the definition of "resident" in Section 350 of the Tax Law by including any person domiciled in the State and any other person who maintains a permanent place of abode within the State and spends in the aggregate more than seven months of the taxable year within the State; also adds new Section 367-a, providing that a taxpayer who changes his status from that of a resident to a non-resident, or vice versa, must file two returns, one as a resident and the other as a non-resident; and provides that the exemptions granted by Section 362 shall be divided ratably between the two returns so filed, according to time.

**Savings Banks**—They may make loans on pass books of depositors.

**Short Weight**—Amends Farms and Markets Law as follows: When commodities are sold or offered for sale in containers whose sizes are not otherwise provided by statute, the net quantity of the contents of each container shall be plainly and conspicuously marked, branded or otherwise indicated on the outside or top thereof or on a label or a tag attached thereto in terms of weight, measure or numerical count; provided, however, that reasonable variations shall be permitted.

**Soldiers' Bonus**—(see Bonus.)

**Spite Fences**—Amends Real Property Law by providing that whenever the owner or lessee of land shall erect or shall have erected thereon any fence or structure in the nature of a fence which shall exceed 10 feet in height, to exclude the owner or occupant of a structure adjoining land from the enjoyment of light or air, the owner or occupant who shall thereby be deprived of light or air shall be entitled to maintain an action in the Supreme Court to have such fence or structure adjudged a private nuisance. If it shall be so adjudged its continued maintenance may be enjoined. This section shall apply to all such existing fences or structures but shall not apply to any action now pending nor shall it preclude the owner or lessee of land from hereafter improving the same by the erection of any structure thereon in good faith.

**Standards Bureau of**—The Board of Estimate and Control shall create a Bureau of standards and appoint a director thereof and such assistants as may be needed to perform the duties imposed by this section. It shall be the duty of such bureau to establish standards and standard specifications for all materials, supplies and equipment purchased or contracted for by or under the jurisdiction of the superintendent of purchase. In its work it shall advise, consult, and co-operate with the head of each State department, board, commission and office and with the superintendent of purchase. All such standards and standard specifications shall be submitted to and approved by the head of each department, commission, board or office requiring such materials, supplies or equipment, except in case of disagreement, when the direction of the board shall prevail. Committees of officers and employees of the State shall be selected or appointed by the director of this bureau, to aid in formulating standards and standard specifications and to recommend them for consideration by the bureau.

**State Printing**—Transfers powers of the State Printer to the Board of Estimate and Control.

**Stock Transfer Tax**—One amendment strikes out the provisions exempting laundering and mining corporations from payment of the annual franchise tax on capital stock employed within the State, as provided in Section 182; also provides that corporations subject to the 4½ per cent. franchise tax under Article 9-a shall be exempt from the tax imposed by Section 182.

Another amendment provides that the tax of two cents on each \$100 of face value shall apply to all sales, or agreements to sell, or memoranda of sales and all deliveries or transfers of shares or certificates of stock, or certificates of rights to stock, or certificates of deposit representing taxable certificates, in any domestic or foreign association, company or corporation, or certificates of interest in business conducted by a trustee.

**Tax Rate, New York City**—(see Budget, County and City).

**Temple to the Arts**—Authorizes New York City to acquire, by gift, purchase or condemnation, a site in Manhattan for a building to be used for the advancement of education in music, drama, and other arts.

**Theatre Construction**—Amends the Labor Law, effective April 1, 1922. Defines a "place of public assembly" to mean a place maintained, rented or leased for pecuniary gain where one hundred or more persons may assemble for amusement or recreation.

Adds new Article 17, providing that all such places must be constructed, equipped and maintained in conformity with rules prescribed by the Industrial Board, which rules are to constitute the "State Standard Building Code," and are to supersede any special law or local ordinance inconsistent therewith, and may be limited in their application to certain classes of buildings or to the conditions under which they are operated, and some or all of such rules may apply only to buildings or places to be constructed, maintained or conducted in the future. In New York City these rules are enforced by the Building Department.

**Ticket Speculators**—Amends the General Business Law by adding new Article 10-B, effective April 12, 1922, requiring all persons engaged in selling tickets of admission to theatres, places of amusement or other places where public exhibitions, games, contests or performances are held, to be licensed by the State Comptroller, to file a \$1,000 bond, and to pay an annual license fee of \$100; also prohibiting licensees from selling such tickets at price in excess of fifty cents in advance of the price printed on the ticket; and requiring that the admission price in every case shall be printed on the face of such tickets. Violation is made a misdemeanor.

**Transit Law in New York City**—The amendments penalize a company that does not join the reorganized transit system by limiting it for all time to a 5-cent fare; give the Transit Commission jurisdiction over lines that are parties to a lease where the lease is abrogated, and allow the commission to substitute itself for the city's representatives on the Board of Control during the first year that the reorganized transit system is operated.

**Usury**—(see Interest Rate).

**Voters' Literacy Test**—The new law authorizes the Secretary of State to have a series of cards printed, each card to contain a 100-word excerpt from the State Constitution. New voters must be able to read one of these cards and to write ten words in English.

**Voting Machines**—Amends the Election Law by making the adoption of voting machines mandatory in cities of the first class, and requiring that 15 per cent of the polling places in New York City be equipped therewith for use in the general election of 1922; an additional 40 per cent. in 1923; and all polling places so equipped by 1924. If the Board of Elections fails to adopt, provide and install the requisite machines the Secretary of State is empowered to contract therefor and determine as to the polling places in which they shall be used.

**Water Power**—Embodies a plan for the power development by the State of the surplus waters of the barge canal and sale of the surplus power to the highest bidder. There is an appropriation of \$1,000,000 for the initial development of Crescent Dam and Vliesser's Ferry, where 10,000 horsepower is available. These two dams were finished in 1915 and 1913 respectively. The project is under the Superintendent of Public Works.

**Women in Night Work**—A 1922 amendment to the State Labor Law allows women proofreaders and machine typesetters on newspapers to work at night.

**Workmen's Compensation Amendments**—(see Workmen's Compensation Laws elsewhere in The Almanac).

# NEW YORK STATE LEGISLATURE.

(Assembles every year on first Wednesday in January.)

## SENATE.

| Dist. | Name.              | Politics. | Residence.    | Dist. | Name.             | Politics. | Residence.       |

 2d District, Village Hall, Stapleton, Arnold J. B. Wedemeyer.

## JURY DUTY IN THE CITY OF NEW YORK.

To be qualified to serve, a person must be not less than 21 nor more than 70 years of age, and he must be a male citizen of the United States, and a resident of the County of New York; and he is a resident within the meaning of the jury law if he dwells or lodges here the greater part of the time between the first day of October and the last day

of June. He must be the owner, in his own right, of real or personal property of the value of \$250; or the husband of a woman who is the owner, in her own right, of real or personal property of that value. He must also be in the possession of his natural faculties, and not be infirm or decrepit; intelligent, of good character, and able to read and write the English language understandingly.

## THE FOLLOWING ARE EXEMPT FROM JURY DUTY.

A clergyman, minister of any religion officiating as such and not following any other calling. A practising physician, surgeon, surgeon-dentist, or veterinary surgeon not following any other calling, and a licensed pharmacist or pharmacist, or a duly licensed embalmer, while actually engaged in his profession as a means of livelihood. A duly registered optometrist actually engaged in his profession as a means of livelihood. An attorney or counsellor-at-law regularly engaged in the practice of law as a means of livelihood. A professor or teacher in a college, academy, or public school, not following any other calling. Editor, editorial writer, or reporter of a daily newspaper or press association regularly employed as such and not following any other vocation. The holder of an office under the United States, or the State, or City or County of New York, whose official duties, at

the time, prevent his attendance as a juror. A consul of a foreign nation. A captain, engineer, or other officer actually employed upon a vessel making regular trips; a licensed pilot, actually following that calling. A superintendent, conductor, or engineer employed by a railroad company other than a street railroad company, or a telegraph operator employed by a press association or telegraph company who is actually doing duty in an office or along the railroad or telegraph line of the company or association by which he is employed. Honorably discharged firemen. Active and honorably discharged militiamen and active members of the Old Guard. A duly licensed engine drivers, poll clerks, and ballot clerks, or a person who is physically incapable. Grand, Sheriff's, Special, and Municipal Court Jurors.

The law of the County of the Bronx, recently created, is the same as Manhattan.

The figures refer to Assembly Districts.

1—Daniel E. Finn, Mrs. Margaret Fay; Thomas F. Foley, Mrs. Thomas J. Nolan.

2—Harry C. Perry, Miss Elvira E. Barra; Mrs. Barbara Forges.

3—Charles W. Culkin, Mrs. Clara E. Keenan; Frank J. Goodwin, Mrs. W. E. Murphy; William Dalton, Mrs. Ellen Downey.

4—Edward J. Ahearn, Mrs. Mary Halpin.

5—Peter J. Doelling, Mrs. Mary E. Connelly; Thomas J. McManus, Mrs. B. McCarthy; John F. Curry, Miss Martha Byrne.

6—David Lazarus, Mrs. Benjamin Hoffman.

7—James J. Hagan, Mrs. N. Taylor Phillips.

8—Solomon Goldenkranz, Mrs. Herman Bauman.

9—Thomas A. Williams, Mrs. Sadie E. Garland.

10—George W. Olvany, Mrs. Agnes P. Husch; George L. Donnellan, Miss Loretta Bonner.

11—James J. Hines, Mrs. E. F. Stewart.

12—Charles F. Murphy, Miss Elizabeth M.

**Republican**—Headquarters, 105 West 40th Street. *Chairman*—Samuel S. Koenig. *Treasurer*—Ogden L. Mills. *Secretary*—John Neville Boyle. *Executive Committee* of the Republican County Committee, *Second Vice President* and *Chairman* of Women's Division, Helen Varick Boswell. *Assistant Secretary*—Jessie Hoyt Higgins.

1—Joseph Levenson, Miss Ida Brisman; William C. Rose, Mrs. Mildred Rich.

2—Antonio Dalessandro, Miss Angela Cagnolati; Jacob Rosenberg, Miss Alice Rarkowsky.

3—R. M. Greenbank, Mrs. Kathryn MacNeil; Benjamin F. Fox, Mrs. Elizabeth Holmes; Michael H. Blake, Mrs. Anna C. Reed.

4—Alexander Wolf, Miss Tessie Cutler.

5—Herman W. Beyer, Mrs. William Wilson; Anthony P. Ludden, Mrs. Mary Grout.

6—Samuel S. Koenig, Mrs. Samuel S. Koenig.

7—Albert J. Berwin, Mrs. Niles R. Becker.

8—Geo. C. Nordinger, Mrs. Frederick L. Marshall.

9—Charles E. Heydt, Mrs. Katherine T. Hammer.

10—F. R. Stoddard, Jr., Charlotte Farrar.

11—Robert P. Lewis, Mrs. Wm. E. Wilkinson.

12—William Heukel, Mrs. Lillian Michel; John

Barry; William P. Kenneally; Michael J. Cruise, Miss Anna Montgomery; Martin G. McCue, Mrs. Mary A. Hagerty.

13—Andrew B. Keating, Mrs. Abbey Shay Hughes.

14—Thomas M. Farley, Mrs. Elizabeth McDonald.

15—Jeremiah T. Mahoney, Mrs. Ella Hastings.

16—Stephen Ruddy, Mrs. Mary Russell; Michael Cosgrove, Mrs. Anna Naughton.

17—Nathan Burkan, Miss Rose Rothenberg; Samuel Marx, Mrs. Gustave J. Paul.

18—John J. Dietz, Mrs. Frances S. Ecker; H. Warren Hubbard, Mrs. Mary A. Gulgley.

19—William Allen, Miss Annie Matthews.

20—Percival E. Nagle, Mrs. Sadie Wilson.

21—Edmund P. Holahan, Mrs. May Guttentag.

22—Joseph J. McCormick, Miss Elizabeth V. McCrystal.

23—John Mara, Mrs. Genevieve H. Walsh.

S. Shea, Mrs. Elizabeth J. Cudmore; Charles K. Lexow, Miss Matilde Schaefer.

13—Valentine J. Hahn, Sarah Schuyler Butler.

14—Joseph Pabian, Mrs. Ida Mallee; Charles W. Ferry, Mrs. Margaret Johnson.

15—William Chivers, Mrs. John H. Iselin.

16—William C. Hecht, Jr., Mrs. Helen F. Rothweiler; Ambrose O. Neal, Mrs. Elizabeth Kogel.

17—Robert Oppenheim, Mrs. Edith Schachter; Miss Anna Liebowitz.

18—Charles B. Lary, Miss Bertha Hechinger; Morris Levy, Mrs. Elizabeth Peirce.

19—David B. Costuma, Mrs. Mary Cotter.

20—Frank K. Bowers, Mrs. Gertrude M. Taaffe.

21—Robert S. Conklin, Miss Harriet E. Porritt.

22—John A. Bolles, Mrs. M. L. Ogan.

23—C. H. Woodward, Mrs. Myrta M. Hanford.

## BRONX COUNTY DEMOCRATIC EXECUTIVE COMMITTEE.

Edward J. Flynn, Chairman; Dr. K. S. Kennard, Secretary; James A. McMahon, Recording Secretary; Daniel J. Carr, Treasurer.

## BANKRUPT'S LIABILITIES \$304,840,332,912,685.

Owing more money than there is in the world, outside of Russia, George Thomas Jones, of San José, Cal., filed a bankruptcy petition at San Francisco, Sept., 29, 1922. Jones said the amount due his principal creditor was \$304,840,332,912,685.16,

and was a judgment against him by the Superior Court of Santa Clara County.

In 1897 he borrowed \$100 from Henry B. Stuart at 10 per cent interest compounded monthly. Recently Stuart brought an action to recover. Mathematical experts finally figured it up. The court held against Jones.

## MAYORS OF THE CITY OF NEW YORK.

Before the Revolution the Mayor was appointed by the Governor of the Province; and from 1784 to 1820 by the Appointing Board of the State of New York, of which the Governor was the chief

member. From 1820 to the amendment of the Charter, in 1830, the Mayor was appointed by the Common Council. In 1898 the term of the first Mayor of Greater New York (Van Wyck) began.

## POST OFFICES IN NEW YORK CITY.

The New York General Post Office, with jurisdiction over Manhattan and the Bronx, covers the two city blocks, 31st Street to 33rd Street, Eighth Avenue to Ninth Avenue. The main entrance is on Eighth Avenue. *Postmaster*—Edward M. Moran. *Assistant Postmaster*—John J. Kielej. *Secretary to the Postmaster*—A. H. Harbinson. In this building are located the Postal Inspectors, Railway Mail Service, and all the general offices.

The old General Post Office, now called the City Hall Station, covers the triangular block bounded by Broadway, Park Row and Mail Street, abutting City Hall Park.

The Grand Central Station, Lexington Avenue and 45th Street, handles the mail over the N. Y.

Central and New Haven Railroads, in addition to local business in that district.

The Foreign Station, at West and Morton Streets, handles the ocean mails.

The only other large general station is on Varick St., between Beach and Laight Streets.

Branch Offices—Pelham Branch, Pelham, N. Y.; Pelham Manor Branch, Pelham Manor, N. Y.

The Brooklyn General Post Office covers the block bounded by Adams and Washington, Tillary and Johnson Streets. *Postmaster*—Walter C. Burton. *Assistant Postmaster*—Peter J. Cleary.

There were, as of Nov. 1, 1922, in Manhattan and the Bronx, 3,856 letter carriers. The New York Post Office does a business of approximately \$54,000,000 a year.

**FIRST STREET RAILWAY IN N. Y. CITY.**

The first passenger street track in the world was laid in New York City—the Fourth Ave. (Harlem) street railroad, chartered in 1831. It was built on the Bowery and was opened for travel from Prince St. to the present site of Union Square in November, 1832.

The vehicles were drawn by two horses, and were after the style of the stage coach of that time. On the day of the opening, the Mayor and the City Councilmen and other invited guests made the first trip over the line.

A large number of people gathered to see the new cars make their start and even the most sceptical of the number were obliged to confess that the new horse cars were a success and designed to prove a great convenience to the public.

The road was extended to Murray Hill in 1833; and reached the Harlem River in 1839. Fares were paid in silver shewpence of the old Spanish currency then in circulation. A rapid extension of the system followed as towns in different parts of the country increased in size.

## SUBWAY AND "L" LINES IN NEW YORK CITY.

The first elevated railway in N. Y. City opened April 30, 1878; the first subway opened Oct. 27, 1904.

The New York State Legislature in 1921 (act signed May 12) authorized the construction of a subway between Brooklyn and Staten Island, to be used for both freight and passengers.

There are three subway systems and two elevated railroad systems in the City of New York devoted to local passenger rapid transit. There is also a fourth system, that of the Pennsylvania Railroad, which, by means of twin tubes extending under Manhattan at 33d Street, connects the Pennsylvania Terminal at Seventh Avenue with Long Island City, enabling through all-rail passenger and freight traffic between New England and the South and West. This route is used by the New Haven Railroad trains between Boston and Washington. Of the three local subway systems in the city, only one, that of the Hudson and Manhattan Railway Company, is altogether under ground. The others run on elevated structures in the outlying parts.

## HUDSON TUBES.

There are two sets of these tubes under the Hudson River, one connecting Montgomery Street, Jersey City, with the Hudson Terminal Station at Fulton-Cortlandt-Church Streets, Manhattan; the other connecting the Hudson tubes in Jersey City-Hoboken with Christopher Street, Manhattan. The main trunk-line tubes of the system run from Montgomery Street, Jersey City, to Park Place, Newark, emerging to the surface on Jersey City Heights, and connecting on the meadows with the Pennsylvania Railroad, at a surface station called Manhattan Transfer. In New Jersey one set of tubes parallels the Hudson River, linking up the Pennsylvania, Erie, and Lackawanna railroad passenger stations, so that travellers may go to or from their stations, to or from downtown or uptown Manhattan. In Manhattan, the Hudson tubes connect Christopher Street with Broadway and 33d Street by way of Sixth Avenue.

## INTERBOROUGH SUBWAYS.

There are two of these systems, the east side and the west side, with cross connections in Manhattan and also in Brooklyn, so that for one five-cent fare passengers may go to or from the eastern part of Brooklyn to the northern parts of Manhattan and the Bronx.

The west side system starts on an elevated structure at Livonia and New Lots Avenues, East New York (Brooklyn), goes on Livonia Avenue to Saratoga Avenue, then turns into the Eastern Parkway, where it becomes a subway. It runs through the Eastern Parkway to Flatbush Avenue, at Eighth Avenue, thence down Flatbush Avenue to Fulton Street, through Fulton Street to Clark Street; through Clark Street and under the East River to William Street, Manhattan; through William Street to Fulton Street; thence west to West Broadway; to Hudson Street; to Seventh Avenue; to Broadway; to St. Nicholas Avenue; to Amsterdam Avenue; to Broadway, to 242d Street, at Van Cortlandt Park. It emerges from Fort George Hill near Dyckman Street, and goes to 242d Street on an elevated structure.

Another branch of the west side system starts at Flatbush and Nostrand Avenues, Brooklyn, and runs in a subway through Nostrand Avenue to the Eastern Parkway, where it joins the other branch. Through trains run in both branches over the entire west side system. Transfers to the east side subway system are made at Nevins Street or at Atlantic Avenue, Brooklyn, and at 96th Street and Broadway, Manhattan.

At 96th Street and Broadway, the west side system has a branch (part of the original Interborough subway) that extends under the northwest corner of Central Park to Lenox Avenue, to 145th Street, thence under the Harlem River to 149th Street, where it joins the east side trunk line on Westchester Avenue and the Southern Boulevard. Just south of Bronx Park, an extension, on an elevated structure, branches off and goes along White Plains Road, to 241st Street, Mount Vernon. This extension also is used by Third Avenue "L" trains, north of Gun Hill Road.

The west side-east side systems have an elevated extension on Jerome Avenue extending north from Mott Avenue and 149th Street, up through Fordham and Bodford Park, to a point between Van Cortlandt Park and Woodlawn Cemetery, ending at about 242d Street. This extension is also used by Sixth Avenue and Ninth Avenue "L" trains, north of 162d Street.

The east side system starts at Flatbush and Atlantic Avenues (Long Island R. R. Terminal),

Brooklyn, goes on Flatbush Avenue to Fulton Street; to Joralemon Street; thence under the East River, to Battery Park, Manhattan; thence under Broadway, to Park Row; to the Brooklyn Bridge; to Lafayette Street, to Fourth Avenue; to 42d Street (Grand Central Station); to Lexington Avenue; to 130th Street; thence under the Harlem River to Mott Avenue; to 149th Street; where it emerges onto an elevated structure; to Westchester Avenue; to the Southern Boulevard; to the southern part of Bronx Park (Bronx Zoo).

An extension of the east side system starts at Mott Avenue and 138th Street, and goes through 138th Street to the Southern Boulevard; to Whitlock Avenue; to Westchester Avenue, and through Old Westchester Village, to the Eastern Boulevard, at the west side of Pelham Bay Park.

The Queensboro Branch of the Interborough subway system starts at 42d Street and Lexington Avenue, and uses the Belmont tubes under the East River at 42d Street, to Long Island City, there emerging onto an elevated structure and going to the Queensboro Bridge Plaza. There it splits into two elevated branches, one going through Ravenswood, on Second Avenue, to Dimars Avenue, Astoria; the other going on Queens Boulevard, Greenpoint Avenue and Roosevelt Avenue, to Albertus Avenue, Corona. Both branches are used by the Second Avenue, Manhattan, "L" trains between Queensboro Bridge Plaza and the terminals of the branches.

All of the Interboro's subway lines are city-owned.

## BROOKLYN RAPID TRANSIT COMPANY'S SUBWAYS.

There are three B. R. T. subways—the Fourth Avenue line, the Broadway line, and the Queensboro line.

The Transit Commission, in October, 1922, announced plans for the tunnel under the Narrows, from the extension of the Fourth Ave. subway, Fort Hamilton, Brooklyn, to Rosebank, Staten Island.

The Fourth Avenue route starts at Fourth Avenue and 86th Street, South Brooklyn, and runs along Fourth Avenue to Flatbush Avenue, to the Manhattan Bridge, re-entering a subway at the Manhattan approach to the bridge, continuing west by way of Canal Street to Broadway, where it joins the Broadway tubes of the B. R. T. Fourth Avenue traffic usually goes by way of the Montague Street tube and Broadway.

The Fourth Avenue subway is to be extended to 95th St., Fort Hamilton.

The Broadway subway line starts at Flatbush Avenue and Malbone Street (Empire Boulevard) at the Willink entrance to Prospect Park; goes along Flatbush Avenue to Fourth and Atlantic Avenues, where it connects with the Fourth Avenue subway and also with the Interborough subway; thence on Flatbush Avenue to Fulton Street, to Borough Hall, to Montague Street; thence under the East River to Whitehall Street, Manhattan; thence under Trinity Place, Church Street, Broadway and Seventh Avenue; thence under 59th and 60th Streets, and by tunnel under the East River to a connection with the Queensboro lines. The Fourth Avenue route connects with the Broadway route at Flatbush and DeKalb Avenues, Brooklyn, and also at Broadway and Canal Street, Manhattan.

The Transit Commission, in October, 1922, announced plans for an extension of the Brooklyn Rapid Transit Subway System, from 59th St. and Seventh Avenue, Manhattan, up Central Park West, Seventh Avenue and St. Nicholas Avenue to Washington Heights, where it will connect with the proposed Eighth Avenue trunk line, and the existing Interborough subway at 168th Street and Broadway.

The Brighton Beach line of the B. R. T. connects with the B. R. T. subway at Malbone Street, and the B. R. T. surface and "L" Coney Island lines connect with the Fourth Avenue subway at 86th Street, so that there are, through subway trains by both subways between Manhattan, Queens, Brooklyn, and the Coney Island district.

Owing to the many connecting and transfer points, the above grouping of Interborough and B. R. T. routes is arbitrary, intended for the reader's convenience, inasmuch as the trains are operated at times over other than the group routes indicated.

All of the B. R. T. subways are city-owned.

Under a contract between the city and the B. R. T., a 5-cent fare is assured by subway or "L" between Queens Plaza, Manhattan, or Brooklyn, and Coney Island. The B. R. T. surface lines, by resolving themselves into their old corporate identities, are able to charge a 10-cent fare to Coney Island, and on several of their other surface routes they charge 10 cents for through rides.

The lines remaining to be completed in the Dual

System are, for the Interborough Company, the extension of the Queensboro subway from Lexington Avenue (Grand Central Terminal) to 41st Street

and Eighth Avenue and, for the New York Municipal Corporation, the 14th Street-Eastern and the Nassau Street lines.

### "L" LINES—MANHATTAN AND BRONX.

There are four elevated roads in these two boroughs, all operated by the Interborough.

Second Avenue "L" starts at South Ferry, Battery Park, runs north to Pearl Street and New Bowery to the Bowery; to Division Street; to Allen Street; First Avenue to 23d Street; to Second Avenue; to 129th Street, where it merges with the Third Avenue "L."

Third Avenue "L" starts at Park Row (old Chatham Street) and the Brooklyn Bridge, and runs on Park Row to the Bowery, at Chatham Square, where it bends into the Bowery; to Third Avenue; to 129th Street, where it crosses the Harlem River, and continues north through Willis and Melrose Avenues, to Third Avenue, the Bronx; thence past Crotona and Bronx Parks to Williamsbridge, at White Plains and Gun Hill Roads. There it connects with the White Plains Road elevated Interborough subway extension to Mt. Vernon.

At 149th Street, the "L" connects with the Interborough subway elevated line that runs on Westchester Avenue, the Southern Boulevard, and White Plains Road to Mt. Vernon. The "L" trains use this extension along with the subway trains.

Ninth Avenue "L" starts at South Ferry, Battery Park, and runs north through the park to Greenwich Street; to West 14th Street and Ninth Avenue; on Ninth Avenue to 53d Street, where it merges with the Sixth Avenue "L," and the two roads jointly continue on Ninth (Columbus) Avenue, to 110th Street; to Eighth Avenue; to 155th Street, where

the road crosses the Harlem River, bearing east, connecting with the Yonkers branch of the N. Y. Central R. R., at Sedgwick Avenue, and continuing east to Jerome Avenue, whence it uses the Jerome Avenue elevated extension of the Interborough subway that goes on up to Woodlawn Cemetery.

Sixth Avenue "L" starts at South Ferry, Battery Park, and runs north through the park to Church Street; to Park Place; to West Broadway; to West Third Street; to Sixth Avenue; to West 63d Street (where a shuttle train runs between 60th Street and 59th Street, on Sixth Avenue); to Ninth Avenue, where it merges with the Ninth Avenue "L."

### ELEVATED LINES IN BROOKLYN AND QUEENS.

The "L" roads in Brooklyn and Queens (except the Interborough's subway extensions) are operated by the Brooklyn Rapid Transit Company. They run trains over the Brooklyn and the Williamsburg Bridges across the East River. Thus these lines connect Manhattan with the Borough of Brooklyn and with the outlying districts, including Richmond Hill, Jamaica, Canarsie, Sheepshead Bay, Brighton Beach, and Coney Island. The East New York, Jamaica, Brownsville lines inter-connect at East New York, so that passengers may transfer via any bridge between Manhattan, Jamaica, Ridgewood and Canarsie, and the intervening districts of Brooklyn.

### FOR FIVE CENTS.

The Fulton Street "L" runs from the Brooklyn Bridge to East New York, and thence via Pitkin and Liberty Avenues to Lefferts Avenue, Richmond Hill.

The Lexington Avenue "L" runs from the Brooklyn Bridge to Jamaica, via Myrtle and Lexington Avenues and Broadway.

The Broadway "L" runs from Manhattan via the Williamsburg Bridge to East New York and Canarsie.

The Fifth Avenue "L" runs from the Brooklyn Bridge to Bay Ridge, at 65th Street. At 36th Street, the line connects with and transfers to the Culver route.

### TO CONEY ISLAND

The only direct "L" line to Coney Island at the present time is the Culver Line operating via the Fifth Avenue line to 35th Street, and thence via a new structure, principally on Gravesend Avenue, to Coney Island.

Since the completion of the Brighton Line subway connection in 1920, no regular elevated service is operated over the Brighton route, a shuttle service only being maintained between Franklin Avenue and Fulton Street and Prospect Park. During the summer months express trains run from Fulton Street and Franklin Avenue to Brighton Beach.

The Myrtle Avenue "L" runs from the Brooklyn Bridge, and also via the Williamsburg Bridge, to Metropolitan Avenue, Ridgewood.

### SUMMARY OF RAPID TRANSIT DATA.

There are over 600 miles of subway and "L" tracks in the city, of which 361 miles are Interborough lines, and 258 are B. R. T. lines. The Interborough subway roads total 222 miles; the Manhattan "L" system, 130 miles. The Interborough subway roads have cost over \$300,000,000; the Brooklyn Rapid Transit subway roads over \$193,000,000. The Interborough's share of the cost has been over \$148,000,000, including \$48,000,000 the company spent on the first East River tubes and the extension to Flatbush and Atlantic Avenues, Brooklyn. The city has put up the rest of the cost of the Interborough subways. Of the cost of the Brooklyn Rapid Transit subways the company has borne over \$69,000,000; the city over \$124,000,000.

Under the Dual System of rapid transit all of the lines operated by the Interborough and the Consolidated Railroads Co. (the latter a B. R. T. subsidiary), including the first subway and the elevated lines of the two systems are combined in two great operating units, covering four of the five boroughs. Each company has lines which operate through the

so-called community centre of the city, namely, the section of Manhattan Island below 59th Street.

New York's original subway, operated by the Interborough, now denoted the First Subway, is an integral part of the Dual System. Under the operating conditions scheduled for the new lines, it lost its identity and was merged for operating purposes with other lines assigned under the dual agreements to the Interborough.

The Dual System was created when the city, through the Public Service Commission, on March 19, 1913, entered into an agreement (the dual contracts) with the Interborough and the Municipal Railway Corporation (the latter a B. R. T. subsidiary), providing for the construction and operation of new lines and extensions.

In October, 1922, the Transit Commission and Interborough security holders agreed, it was announced, on a financial reorganization, under which there are to be no dividends for 5 years; dividends never are to exceed 5 per cent. In a year, and the Manhattan "L" stock no longer gets a fixed dividend.

### RESULTS OF OPERATION OF STREET RAILWAY COMPANIES, N. Y. CITY.

(Years ended June 30. 1922 figures are tentative.)

| FISCAL YEAR. | Operating Revenue. | Maintenance and Operation. | Taxes, Tolls, Etc. | Operating Income. | Net Corporate Income. |
|--------------|--------------------|----------------------------|--------------------|-------------------|-----------------------|
| 1908.        | \$69,026,612       | \$40,129,956               | \$4,330,227        | \$24,560,429      | \$2,665,764           |

Operating income is the excess of revenue over expenses and taxes.

Net corporate income is the balance after interest, rents and other fixed charges.

Figures in italics in the above table show deficit.

| Grand total, all companies.....                                                                                     | \$465,680,154                                                    | \$765,094 365                                                                  | \$791,450,839                            | \$325,770,685                                                               |

The amount that the City of New York has invested in the subways is (Contracts 1, 2, 3 and 4) \$293,493,239. Adding this to the recommended valuation of company property (\$465,680,154) would give a total valuation of city and company property of \$759,173,393.

## TUNNELS IN OPERATION IN AND ABOUT NEW YORK CITY.

**PENNSYLVANIA RAILROAD SYSTEM—Tunnels** under Hudson River extend from Pennsylvania Railroad Station, New York, to Weehawken, N. J. There is no station at Weehawken; the electric trains from the Pennsylvania Station run to Manhattan Transfer, near Newark, N. J., without a stop. Work started April 1, 1904; completed in 1910. Two tubes of cast iron rings, 23 feet outside diameter and 21 feet 2 inches inside diameter; subaqueous portion 6,118 feet long.

**Manhattan crosstown tunnels** from the Pennsylvania Railroad Station, mentioned above, across New York under 32d and 33d Sts. to First Ave. Started July, 1905, completed in 1910. There are two tunnels, each with two tracks. The tunnels are built of concrete with the crown about 60 feet below the surface of the street.

**East River tunnels** connect with the crosstown tunnels and extend under the East River to Long Island City. Started September, 1904; completed in 1910. Four separate tubes with rings 23 feet outside diameter, each tube from the Manhattan shaft to the Long Island City shaft, 3,900 feet long.

**HUDSON AND MANHATTAN RAILROAD SYSTEM—**North tunnels under the Hudson River from Jersey City to Morton St., New York. Started November, 1874; the first in New York, officially opened February 25, 1908. Two single track tubes, with a minimum inside diameter of 15 feet 3 inches, and approximately 5,700 feet long.

**Up-town tunnels** connect with north tunnels at Morton St. and extend to Christopher St. thence to Sixth Ave. and up Sixth Ave. to 33d St. Started March, 1904, completed in 1910. Section from Morton to 12th St. shield construction, remainder cut and cover.

**South tunnels** under Hudson River from Jersey City to the Church St. Terminal Building (Cortlandt, Church and Fulton Sts.), New York. Started May, 1905; opened for traffic July, 1909. Two tubes about 5,950 feet long, with cast iron rings, 16 feet 7 inches outside diameter and 15 feet 3 inches inside diameter.

**Tunnels** (consisting of two single track tubes) extend from the Hoboken terminal of the Lackawanna Railroad to Washington St., Jersey City, with connections to the north tunnels and to the Erie Railroad Station. At Washington St. a branch runs to the Pennsylvania Railroad Station at Jersey City, where connections are made with the south tunnels. West from Washington St. to a point east of Summit Ave. is a double track concrete tunnel with a centre wall dividing the tracks. Work started March, 1906; completed in July, 1911.

**BELMONT TUNNEL** under the East River from 42d St., New York, to Long Island City. Subaqueous portion two single track tubes with cast-iron rings 16 feet 10 inches outside diameter, and a clear inside diameter of 15 feet 6 inches. Through rock a horseshoe shaped concrete section is used and in other places a rectangular double track cross

section with reinforced concrete lining. Construction started by New York and Long Island Railroad, July 12, 1905; practically completed January 1, 1908. (Commonly known as the Steinway Tunnel.)

**RAPID TRANSIT TUNNEL** under the East River from the Battery, New York to Joralemon St., Brooklyn, connecting the New York and Brooklyn subways. Started April, 1903; trains running January 9, 1908. Two tubes, 6,754 feet long, with a finished inside diameter of 15 feet 6 inches.

**CLARE STREET TUBE**—These twin tubes underneath the East River, connecting the Interborough-Seventh Avenue subway in Manhattan with the Fulton Street-Flatbush Avenue subway of the Interborough in Brooklyn, were completed and put in operation the Summer of 1919. They are 5,047 feet long; outside diameter of 17 feet 6 inches; inside diameter 15 feet.

**The B. R. T. subway tubes** from Whitehall St., Manhattan, to Montague St., Brooklyn, from East 14th St., Manhattan, to North 7th St., Brooklyn, and from east 60th St., Manhattan, under Blackwell's Island to Long Island City, Queens, were in full operation in 1921.

**WEST SHORE RAILROAD TUNNEL, WEEHAWKEN, NEW JERSEY**—Commenced in 1881, and completed twenty-three months later, at a cost of \$525,000. It is double-tracked and the original length was 3,883 feet. A steel and concrete portal, constructed in 1907 at the east increased its length to 4,273 feet. One-fourth of the tunnel is brick-lined, the remaining portion, unlined. The normal section is 27 feet in width and 19 feet high. 80,500 cubic yards of rock were removed, and five vertical shafts were utilized, giving ten working faces, and average progress of 173 linear feet per month was maintained. The average expenditure per linear foot of lined section was \$200, and of unlined section, \$110, and equivalent of \$7.00 per cubic yard of excavation. The tunnel is a tangent, with the exception of the extended portion of the east end, previously mentioned, at which point the freight and passenger tracks divide. There is a grade of 0.30% toward the east, and 0.34% toward the west, from approximately the centre of the tunnel. It is ventilated by rotary fans, installed in 1911.

**BERGEN CUT** of Erie Railroad through Bergen Hill, Jersey City, parallel to the present tunnel, which is 4,700 feet long. The Bergen cut was started March, 1906, and completed July 1, 1910. It has five four-track tunnels, with open cuts between the tunnels, making a total length of 4,300 feet. Tunnel sections 53 feet wide at the bottom and 21 feet high.

**LACKAWANNA RAILROAD TUNNEL**, through Bergen Hill, Jersey City. Started February 28, 1906; completed February 14, 1909. Parallel to and 24 feet away from old tunnel and of the same length, viz., 4,283 feet. New tunnel is double tracked, lined with concrete, having inside dimensions 23 feet high by 30 feet wide. Bush track construction used.

## THE NEW YORK-NEW JERSEY VEHICULAR TUNNEL.

(Contributed by the N. Y. State Bridge and Tunnel Commission, Hall of Records, Oct. 17, 1922.)

## New York State Bridge and Tunnel Commission—

Gen. George R. Dyer, Chairman;  
E. W. Bloomingdale, McDougall Hawkes, A. J. Shamberg, N. Y. City Commissioner of Plant and Structures, ex-officio; N. Y. State Engineer, ex-officio; Paul Windels, Counsel; Morris M. Frohlich, Secretary.

## New Jersey Interstate Bridge and Tunnel Commission—

Commissioners: Theodore Boettger, Chairman; Weller H. Noyes, Robert S. Sinclair, John F. Boyle, Thomas J. S. Barlow, John B. Kates, Isaac Ferris, Frank L. Suplice, Emerson Richards, Counsel; James P. Dolan, Secretary.

## Chief Engineer—Clifford M. Holland.

The States of New York and New Jersey enacted legislation providing for the construction, maintenance and operation of a tunnel, to be paid for by each State in equal parts, and directed the Commissions to enter into a treaty or contract to that end. The treaty was executed in final form on Dec. 30, 1919, and has been consented to by a resolution of Congress, approved by the President. One million dollars was made available by the Legislature of each State, and the Commissions thereby had the necessary funds to begin actual construction.

On Jan. 6, 1920, Chief Engineer Clifford M. Holland recommended the construction of twin tubes of 29 feet 6 inches external diameter of cast-iron rings lined with concrete, providing for a 20-foot roadway in each which would be capable of carrying for two lines of traffic, the north tube for westbound traffic and the south tube for eastbound. The tunnels recommended provide a narrow sidewalk for pedestrians and sufficient ventilation ducts and service conduits.

The Commissions unanimously approved the recommendation of the Chief Engineer, and contract drawings and specifications were ordered prepared, and on Oct. 12, 1920, ground was broken at Canal Street Park on contract No. 1 for the construction of the ventilation shafts on Manhattan Island. These have been completed and form the working chambers for the under-river structure from the New York side. Drawings and specifications were then prepared for similar work on the New Jersey side, as well as the under-river section of the tunnel, and are known as contracts 3 and 4. Negotiations were entered into with the City of New York for the requirement of Pier 35 and other waterfront property necessary for construction, maintenance and operation; also with the Erie Railroad Company in whose yard on the Jersey waterfront the bulk of tunnel construction operations will be carried on for a period of three years.

The difficult problems of property acquisition have been solved and contracts were signed on March 28, 1922, calling for construction work in an amount approximating \$20,000,000. Preliminary operations commenced immediately, which involved contracts for material produced in different sections of the country.

Two electric power-houses have been completely erected for furnishing the compressed air and hydraulic power required in construction work. These represent an outlay of \$500,000. The quarters for the compressed air workers as provided by law are in the course of construction, to be fully equipped for the accommodation of 600 men. A blanket of approximately 200,000 cubic yards of clay and rip-rap is being laid in the river bed for the protection of tunneling operations and the structure itself. At the New Jersey pierhead line 34 concrete steel piles 24 inches in diameter are being sunk to bedrock 260 feet below high water to form the foundation for the New Jersey river ventilation shaft.

The shields to be driven from the Manhattan side of the river were erected in the shafts at Canal and Spring Streets, and the driving of the shields under the Hudson River was started before the end of the year. The shields on the New Jersey side for driving eastward under the river will be set up early in 1923, after the land shafts located in the Erie Railroad yard have been completed. The time for completing contracts 3 and 4 is set for April, 1925.

The actual work of boring the tunnel began on Oct. 26, 1922.

## VENTILATION OF TUNNEL.

The ventilation problem, has been worked out through co-operative investigations with the U. S. Bureau of Mines, Yale University and University of Illinois, which have demonstrated the practicability of an economic system of ventilation. This will be through four shafts, two on each side of the river, one located on either side and near the pierhead line, which will provide protection to the tunnels and allow slips for the deepest draft ocean-going vessel.

These piers will be built by the City of New York and the Erie Railroad Company. The other shafts are to be located nearer the portals, thus making a series of ventilation units materially reducing the cost of equipment and operation.

The ventilation of the tunnel will be accomplished by supplying the fresh air through a continuous duct in the bottom of each tunnel and withdrawing the vitiated air through another continuous duct at the top of each tunnel. The fresh air enters the roadway through two continuous slots in the curb on either side of the roadway, and the vitiated air enters the upper duct through openings located at frequent intervals in the roof over the roadway. The ventilation requirements are based on a maximum concentration of carbon monoxide of 4 parts in 10,000 parts of air.

This will ultimately require 3,600,000 cubic feet of fresh air per minute, representing an average of 40 complete air changes per hour.

After study of traffic across the ferries and bridges and on the city streets, it was seen that precaution must be taken to prevent the congestion of traffic on the streets at the tunnel terminals; and it is planned to separate the incoming from the outgoing traffic to prevent its concentration and absorption without endangering the capacity use of the tunnel and interference with normal street traffic.

The Manhattan entrance is from a plaza on Broome Street, from Hudson to Varick Street, and the exit is on the south side of Canal Street at Varick and Vestry Streets. The Jersey City entrance is from a plaza at 12th and Provost Streets, and the exit at 14th and Provost Streets.

The entire cost of construction, approximately \$30,000,000, can be amortized on the estimated traffic at rate of tolls equal to the present ferry rates in about eleven years, which conforms with the requirement of the New York act that tolls be collected to pay all maintenance and operating charges and amortize the cost of construction within twenty years.

## QUICK TRANSIT FOR FOOD SUPPLIES.

Among the advantages which the tunnel will afford will be the quick and certain transportation of merchandise, foodstuffs and coal from the mainland direct to final destination in Manhattan, the Bronx and Long Island, unhindered by climatic or other conditions. In the item of coal alone, the entire cost of the tunnel could have been defrayed out of any one of a dozen day's losses in January, 1918, due to the inability to move the coal barges across the river, not to mention the deaths, illness and physical suffering resulting from the coal famine.

Milk and produce wagons or trucks coming from the New York counties adjoining the New Jersey line could drive directly into the city and deliver their product with certainty many hours earlier than is now possible. Outgoing freight deliveries could also be made more efficiently and in larger volume than is now possible by the present lighterage system. This would do away with the necessity of using valuable waterfront property for railroad piers, floats and bridges on both the Manhattan and Jersey shores.

Finally the most important question of time in transit would be solved for all classes of freight or passenger-carrying vehicles at no increase in ferry cost. At present, owing to the crowded conditions at certain hours, a truck or car is forced to wait in line, sometimes for several hours, before it can be driven aboard the ferry, whereas with the tunnel proposed, and its wide plazas at each end, there would not be the slightest delay or congestion at any time.

## THE TUNNEL IN BRIEF.

Total length of proposed tunnels, 9,250 feet.

Outside diameter of circular subsurface tubes, 29 feet 6 inches.

Construction material, cast-iron ring lined with concrete.

Elevation of top of tube, 60 feet below mean low tide.

Maximum gradients on approaches at each end, 3% per cent.

Width of roadway in each tunnel, 20 feet.

Ventilation—blower and exhaust fans at 4 shafts—2 on each side of river.

Estimated annual traffic on completion (both directions), 5,610,000 vehicles.

Total estimated annual capacity of tunnel (both directions), 15,800,000 vehicles.

Manhattan terminus of tunnel—entrance Broome Street—exit Canal and Varick Streets.

Jersey City terminus—entrance 12th Street—exit 14th Street.

## ALTITUDES IN NEW YORK CITY.

THE highest natural elevation of land in the City of New York—430 feet—is on top of Todt (Toad or Iron) Hill, Staten Island. This hill rises from the Richmond Road at Garretson's station on the rapid transit railway, and overlooks New Dorp and the Moravian cemetery where the Vanderbilts lie buried. A point near the summit referred to, where the altitude is 409.24 feet, is indicated by a bench mark eight feet from the east side of David J. Tyssen's dwelling, near the southeast corner of Ocean Terrace and Todt Hill Road. The house is about 100 feet south of Ocean Terrace, and about 200 feet east of Todt Hill Road.

This is the highest point on the Atlantic Coast, south of Maine.

Other high road points in Richmond Borough are: Manor Road (244.35 ft.) at Castleton Corners, near the Eckstein brewery; and Manor Road (233.43 ft.) near the N. Y. City Farm Colony. There are several hills on Staten Island over 300 feet high. The elevation at the Fort Wadsworth Post-Exchange building is 107.15 feet above sea level.

The highest natural altitude in Manhattan—267 feet, 9 inches—is near the site of old Fort Washington, a little west of Fort Washington Avenue, approximately 900 feet north of W. 181st St. The hill at Inwood rises to a height of 232 feet, 9 inches. Other elevations in Manhattan above sea level, expressed in feet and decimals thereof, are—Custom House, 17.06; Bowling Green, 21.75; Pine St. and Broadway, 40.78; Municipal Building, 41.61; City Hall, 44.74; Astor Place, 43.01; Union Square, 45.73; Columbus Circle, 36.64; Central Park near W. 93rd St., 114.14; Amsterdam Ave., at Trinity Cemetery, 148.73; Audubon Ave., at W. 174th St.,

185.92; Wadsworth Ave., near W. 182d St., 188.33; High Bridge water tower, at the street level, 203.25. The highest natural elevation in the Bronx—234 feet, 6 inches—is on the hill bounded by Icelin Ave., Highland Ave., and W. 250th St., Riverdale Hill. Other Bronx altitudes are—Jerome Ave., near E. 233rd St., 210.73; Jerome and Mosholu Aves., Van Cortlandt Park, 193.39; Riverdale Ave., and Spuyten Duyvil Parkway, 178.49; Grand Boulevard and Concourse, and E. 199th St., 148.64; Hall of Fame Terrace, at University Ave., 170.32; Poe Park, E. 192d St., 140.22; East approach to Washington Bridge, at University and Aqueduct Aves., 141.63.

The highest natural elevation in Brooklyn—210 feet—is in Greenwood Cemetery, near the 9th Ave. entrance. Other Brooklyn altitudes are—Base of the Museum on Eastern Parkway, at Washington Ave., 163.44; 9th Ave. (Prospect Park West), 32 feet south of 14th St., 155.34; Prospect Park West and 5th St., 162.16; Union St., Plaza, at Flatbush Ave., 146.29; 59th St., and 5th Ave., 116.96; Atlantic and Classon Aves., 83.68; Borough Hall, on street level, 66.71; Surf Ave., Coney Island, at the Public Bath, 11.49.

The highest elevation in Queens Borough—266.48 feet—is on Little Neck Hill, 800 feet east of Little Neck Road and 435 feet south of 61st Ave. (Hyde Park Road) near the Vanderbilt estate.

The highest track elevation (altitude above sea level at base of rail) in the Interborough tubes—133.5 feet—is at the Museum station, Eastern Parkway and Washington Ave. The tracks in the lowest part of the Queensboro (42d St.) Interborough tube under the East River are 105 feet below sea level.

## TRAFFIC ON THE BIG EAST RIVER BRIDGES.

(Summary of count for 24 hours in both directions, on a day in November, 1921.)

The 1920 figures are in parentheses.

| BRIDGE.           | Cars.         | Car Passengers.   | Vehicles, Including Autos. | Vehicle Passengers. | Pedestrians.  | Total No. of Persons. |
|-------------------|---------------|-------------------|----------------------------|---------------------|---------------|-----------------------|
| Brooklyn.....     | 9,639 (9,700) | 200,216 (148,525) | 8,529 (5,188)              | 13,444 (8,858)      | 3,263 (1,928) | 218,923 (159,311)     |
| Manhattan.....    | 3,717 (3,475) | 254,261 (209,590) | 26,733 (20,785)            | 54,953 (41,810)     | 1,340 (932)   | 310,554 (252,332)     |
| Williamsburg..... | 9,601 (9,651) | 419,015 (366,885) | 19,922 (17,480)            | 38,207 (35,382)     | 1,375 (981)   | 558,597 (493,248)     |
| Queensboro.....   | 2,322 (2,494) | 65,543 (62,604)   | 20,829 (17,858)            | 41,249 (35,896)     | 1,850 (967)   | 108,552 (99,467)      |
| Third Ave.....    | 281 (311)     | 1,067 (1,830)     | 5,986 (4,353)              | 9,125 (7,058)       | 5,285 (5,726) | 15,477 (14,414)       |

Count of total persons using, on other bridges: Harlem River: Willis Ave., 62,141; Madison Ave., 52,968; Washington, 41,237; Ship Canal, 51,065. Bronx: Westchester Ave., 21,088. Brooklyn: Hamilton Ave., 34,745; Ninth St., 30,738; Union St., 10,594; Washington Ave., 32,551; Harway Ave., 14,005; Third Ave., 17,206; Metropolitan Ave., 25,830. Newtown Creek: Vernon Ave., 59,625; Greenpoint Ave., 10,324; Grand St., 13,139. Queens: Borden Ave., 12,038; Flushing, 28,862. Richmond: Fresh Kills, 1,054.

Total 24-hour count, both ways, on the 44 municipal bridges—Cars, 39,862; car passengers, 1,212,660. Vehicles, 228,778; vehicle passengers, 443,007. Pedestrians, 105,661. Total persons using the bridges, 1,761,328.

## SUSPENSION AND CANTILEVER BRIDGES.

The suspension bridge is a fixed bridge and consists of a truss supported by cables resting on towers; the cables being anchored at each end in masonry anchorages. Suspender ropes or wires connect the truss to the cables.

The cantilever bridge is a fixed bridge in which

the truss is supported on a pier and balanced by extending in both directions from the pier, one end of the truss extending over part of the space to be bridged toward a similar truss from an opposite pier and the other end of the truss extending back to a masonry anchor pier.

## THE HARBOR OF NEW YORK.

(Data by courtesy of the Chief of Engineers, U. S. Army.)

New York Bay is the principal entrance to New York City. It is divided into two parts, the Lower Bay and the Upper Bay, by the Narrows, a passage about five-eighths of a mile wide at its narrowest part. The entrance to the Lower Bay is between Sandy Hook on the south and Rockaway Point on the north and is about seven miles wide. The Upper Bay extends from the Narrows to the Battery. The principal entrance channels to the harbor of New York are the Ambrose Channel and the Main Ship-Bayside-Gedney Channel.

Ambrose Channel, which is the newer and more important channel, was completed April 17, 1914. It has a comparatively straight course in a north-westerly and then northerly direction from deep water in the ocean through the Lower Bay. It is 38,000 feet in length and 2,000 feet in width, and has a depth of 40 feet at mean low water. The mean range of tide is about 4.5 feet.

Main Ship-Bayside-Gedney Channel is the route formerly used by deep-draught vessels. It extends westward past Sandy Hook and then northward through the Lower Bay. It has a depth of 30 feet at mean low water and a nominal width of 1,000 feet, which has decreased in places to 500 feet. The Main Channel in the Upper Bay leads between Jersey Flats and Gowanus Flats and has depths of 40 to 90 feet and a width of about one-half mile. Within the harbor there are several channels connecting the different sections. Bay Ridge, Red Hook and Buttermilk Channels lie in the Upper Bay along the Brooklyn shore of the Upper Bay and form an easterly channel that extends from the Narrows to East River and is separated from the Main Ship Channel by a broad shoal off Gowanus Bay and by Governor's Island. By means of these channels the extensive terminals of the Bush Terminal Co. and of the New York Dock Co., as well as the municipal terminals in South Brooklyn, are directly accessible for large ships and have easy communication with the other sections of the inner harbor.

Bay Ridge Channel has a minimum depth of 35 feet at mean low water for its full width of 1,200 feet, and of 40 feet for the middle 800 feet of that width. Red Hook Channel is approximately 1,200 feet wide and has available depths of 38 to 40 feet at mean low water throughout its length. The combined length of these channels is about 4.5 miles and the mean range of tide is about 4½ feet. Buttermilk Channel has a depth of 30 feet, but at places along the sides the depth does not exceed 27 feet. The channel is broad, having at its narrowest point a width of about 800 feet.

**Rivers, Creeks and Bays.**—The Hudson (North) River empties into Upper New York Bay at the Battery, the southernmost point of Manhattan Island. The width of the river between established pierhead lines is 3,900 feet at the Battery and gradually decreases to 2,750 feet between Castle Point, N. J., and West 14th Street, New York City, and 2,725 feet opposite West 59th Street.

A vessel drawing 40 feet can be carried at mean low water up to West 19th Street, through the eastern, or New York, side of the river; from West 19th to about West 50th Street, through the western, or New Jersey, side; and between West 50th and West 75th Streets, in the middle of the river, and thence generally near the east shore, to the city boundary of the city. The mean range of tide at the Battery is 4.5 feet.

The East River is a tidal strait about 16 miles long and from 600 to 4,000 feet wide, exclusive of bays and estuaries, and extends from the Battery in New York City to Throgs Neck at the head of Long Island Sound. The river separates the Boroughs of Manhattan and the Bronx from the Boroughs of Queens and Brooklyn.

The East River has a through channel to Long Island Sound 30 feet deep at mean low water and with width of 550 feet or more, except at Hell Gate, where the 30-foot channel is too narrow for navigation and the safe depth is limited to 26 feet. A project is under way for deepening the entire channel to 35 and 40 feet. The mean range of tide in the East River is 4.4 feet at the Battery, 4 feet at the Brooklyn Navy Yard and 6.6 feet at the east entrance to Hell Gate.

Harlem River and Spuyten Duyvil Creek together form a waterway about 8 miles in length, which extends from the East River to the Hudson River and separates the Borough of Manhattan from the Borough of the Bronx. The East River entrance to the Harlem River is about 8½ miles by water

northeast of the Battery and the Hudson River entrance to Spuyten Duyvil Creek is about 13½ miles by water north of the Battery. The improved channel in Harlem River has a width of 150 to 400 feet and a depth of 15 feet at mean low water, except at Macombs Dam Bridge, where ledge rock projects at a point 12 feet below mean low water.

Bronx River is a short and narrow stream that empties into a shallow bay or estuary on the East River at Hunts Point, about 11 miles northeast of the Battery. The navigable portion of the river consists of a Channel extending from its mouth to a dam at East 177th Street. This channel is about 2¼ miles long and from about 50 to 300 feet wide and has a depth of 7 feet at mean low water in the lower section. The mean range of tide in the Bronx River is about 7 feet in the estuary and 6 feet at the dam.

Westchester Creek is a small stream lying wholly within the limits of the City of New York. This stream extends northward from an estuary in the north shore of East River about 14 miles northeast of the Battery. The estuary is about 1 mile long and from 500 to 3,000 feet wide. The portion of the creek now under improvement is 2½ miles long from deep water in the East River and from 110 to 500 feet wide. The lower section has a depth at mean low water of 8 feet, while the upper section has a mean depth of 6 feet.

East Chester Creek is a shallow stream that empties into East Chester Bay on the north shore of Long Island Sound about 12 miles west of the Connecticut State line and about 21 miles northeast of the Battery. The lower two miles of the navigable portion of this stream lie wholly within the limits of the City of New York and have a depth of 4 feet at mean low water, or 11 feet at high water, while the upper section has a depth of about 5 feet at high water.

Flushing Bay is on the north shore of Long Island, about 12 miles from the Battery. The bay is about 1 mile wide and 2 miles long. Flushing Creek, which flows into the head of the bay, is a tidal stream navigable for a distance of about 3.5 miles from its mouth. The total length of dredged channel in the bay and the creek is about 3 miles and the mean low water depth of channel in the bay is 10 feet; in the creek, 8 feet. The mean range of the tide is about 7.1 feet.

Newtown Creek is the inlet of the East River that separates for a distance of about 4 miles the Boroughs of Queens and Brooklyn. The improved channel has a width of about 25 feet and a mean low water depth of 20 feet to Meeker Avenue bridge and 14 feet above. The mean range of tide is about 4 feet.

Wallabout Channel is a channel in Wallabout Bay, an inlet of the East River adjacent to the United States Navy Yard in Brooklyn. The channel consists of a waterway extending in a half circle around the inside of the island known as Cob Dock and is divided into two parts by a stone causeway connecting the mainland with Cob Dock. The eastern section of the channel is about 2,000 feet long and from 250 to 350 feet wide, and has a depth of about 20 feet at mean low water. At the head of Wallabout Channel are two bodies of navigable water, Kent Avenue Basin and Wallabout Basin, which are 2,200 feet long and 1,300 feet long respectively.

Jamaica Bay is situated on the south shore of Long Island and lies wholly within the limits of the City of New York. It is about 8 miles long and 4 miles wide, and covers an area of approximately 32 square miles. The bay is connected with the ocean at Rockaway Inlet by a shifting channel having a least depth over the bar of about 11 feet at mean low water. An entrance channel 17 feet deep at mean low water has been dredged through the north end of the bars. The bay contains numerous small low-lying islands. A channel 2¼ miles long is under joint improvement by the Federal Government and the City of New York. The United States is to provide and maintain the entrance channel and to reimburse the city for dredging the main channel in the bay; while the city is to dredge the other channels within the bay, bulkhead the shores of the bay, and fill in behind the bulkheads. On June 30, 1920, an entrance channel had been completed to a width of about 200 feet, and a depth of 17 feet at mean low water.

**The New Jersey Portion of the Harbor.**—Newark Bay is a large estuary extending from the confluence of the Passaic and Hackensack Rivers south to Staten Island, a distance of about 6 miles. It is about 1½ miles wide. At Staten Island the bay is connected on the east with Kill van Kull and on the west with Arthur Kill. The navigable channel in the bay has a dredged depth of 20 feet

at mean low water and the range of tide is about 5 feet.

Passaic River is a tidal stream which is navigable for vessels drawing 6 feet of water as far as the city of Passaic, 16 miles above its mouth. In the lower portion of the river the depth of the navigable channel is 20 feet to within 800 feet of the Jackson Street bridge at Newark; thence 16 feet deep to the Mountclair and Greenwood Lake railroad bridge; thence 6 feet deep to Passaic.

Hackensack River is a tidal stream which merges with the Passaic River at the head of Newark Bay. It is navigable to New Milford, 20½ miles from its mouth. At mean low water, 12 feet can be carried to Little Ferry, 12¼ miles; then 10 feet through the highway bridge at Little Ferry; thence 12 feet to Hackensack, 2¼ miles; thence quite shoal to New Milford.

#### THE STATEN ISLAND KILLS.

Arthur Kill separates Staten Island from New Jersey. It is about 12 miles long. This channel, together with Kill van Kull, forms Staten Island Sound, and, with the lower end of Newark Bay, forms the inland waterway between New York and New Jersey, the boundary between the two States following the centre of the waterway. Vessels drawing 19 feet can be taken at mean low water into Newark Bay via Lower New York Bay, Raritan Bay and Arthur Kill. Vessels drawing 23 feet at mean low water can be taken through Upper

New York Bay, Kill van Kull and Arthur Kill to Perth Amboy, N. J.

Kill van Kull, a connecting waterway about 3 miles in length, lies along the northern shore of Staten Island and extends from the lower end of Newark Bay to Upper New York Bay. Vessels having a draught of 25 feet can be brought at mean low water into Newark Bay through Upper New York Bay and the channel in Kill van Kull.

Raritan Bay lies at the southern end of Staten Island and forms the western portion of Lower New York Bay. Its greatest length from north to south is about 5 miles and from east to west about 7 miles. The Raritan River empties into the bay at its western end and the Arthur Kill extends northward from its western end. Vessels enter the bay by way of the Main Ship-Bay-side-Gedney Channel, but a draught of not more than 21 feet at mean low water can be carried through the dredged channels at the head of the bay.

#### THE RARITAN RIVER.

Raritan River empties into Raritan Bay at Perth Amboy. At mean low water vessels with a draught of 16 feet can be carried to the Washington Canal at Sayreville, a distance of 6.7 miles; thence 10 feet to New Brunswick, a distance of about 5.3 miles.

Elizabeth River is a small stream that empties into the Arthur Kill near its junction with Newark Bay. The navigable channel in the lower river has a depth of 7 feet at mean high water for 1½ miles.

### THE PORT OF NEW YORK AUTHORITY.

(Headquarters, No. 11 Broadway, N. Y. City.)

By chapter 154 of the Laws of New York and chapter 151 of the Laws of New Jersey, 1921, Commissioners from the State of New York and Commissioners from the State of New Jersey were authorized to sign the compact between the State of New York and the State of New Jersey for the creation of the Port of New York District and the creation of Port of New York Authority. This treaty was subsequently ratified by Congress and approved by the President.

The Port of New York Authority is a body corporate and politic, having the powers enumerated in the compact for upbuilding the port. The Port Treaty says:

"The Port Authority shall constitute a body, both corporate and politic, with full power and authority to purchase, construct, lease and, or, operate any terminal or transportation facility within said district; and to make charges for the use thereof; and for any of such purposes to own, hold, lease and or operate real or personal property, to borrow money and secure the same by bonds or by mortgages upon any property held or to be held by it."

The compact was signed on April 30, 1921, by Commissioners William R. Wilcox and Eugenius H. Outerbridge, on behalf of the State of New York, and by Commissioners J. Spencer Smith, Frank R. Ford and DeWitt Van Buskirk, and Attorney-General Thomas F. McCram, on behalf of the State of New Jersey. Attorney-General Charles D. Newton of the State of New York signed the compact on May 6, 1921.

#### PERSONNEL OF THE COMMISSIONS.

The Commissioners from New Jersey were appointed April 7, 1921; those from New York State on April 16, 1921. Their names, with year of expiration of term in parentheses, are: Eugenius H. Outerbridge, *Chairman*, New York City (July 1, 1928); Alfred E. Smith, New York City (July 1, 1926); Lewis H. Pounds, Brooklyn (July 1, 1924); J. Spencer Smith, *Vice-Chairman*, Tenafly, N. J. (July 1, 1923); DeWitt Van Buskirk, Bayonne, N. J. (July 1, 1924); Frank R. Ford, Caldwell, N. J. (July 1, 1925); George W. Goethals, *Consulting Engineer*, B. F. Cresson, Jr., *Chief Engineer*; Julius Henry Cohen, *Counsel*; William Leary, *Secretary*; C. A. Ruhlmann, *Assistant Secretary*.

The Port Authority was delegated with the duty of recommending a comprehensive plan for the development of the Port of New York and such plan was approved by the Legislature of New Jersey on February 20, 1922, and New York on February 21, and approved by Congress in June. President Harding on July 1 signed the Congressional Resolution. Thus the Port Authority is the recognized agency of the two States and the Federal Government in developing the Port of New York.

The Port Authority seeks to co-ordinate and extend the facilities of the Port of New York in pursuance of these fundamental principles:

First—That terminal operations within the Port District, so far as practicable, should be unified.

Second—That there should be consolidation of shipments at proper classification points so as to eliminate duplication of effort, inefficient loading of equipment and realize reduction in expenses.

Third—That there should be the most direct routing of all commodities so as to avoid centres of congestion, conflicting currents and long truck-hauls.

Fourth—That terminal stations established under the comprehensive plan should be union stations, so far as practicable.

Fifth—That the process of co-ordinating facilities should so far as practicable adapt existing facilities as integral parts of the new system, so as to avoid needless destruction of existing capital investment and reduce as far as may be possible the requirements for new capital; and endeavor should be made to obtain the consent of the States and local municipalities within the Port District for the co-ordination of their present and contemplated port and terminal facilities with the whole plan.

Sixth—That freight from all railroads must be brought to all parts of the port wherever practicable without cars breaking bulk, and this necessitates tunnel connection between New Jersey and Long Island, and tunnel or bridge connections between other parts of the port.

Seventh—That there should be urged upon the Federal authorities improvement of channels so as to give access for that type of water-borne commerce adapted to the various forms of development which the respective shorefronts and adjacent lands of the port would best lend themselves to;

#### MOTOR TRUCK HIGHWAYS.

Eighth—Highways for motor truck traffic should be laid out so as to permit the most efficient interrelation between terminals, piers and industrial establishments not equipped with railroad sidings and for the distribution of building materials and many other commodities which must be handled by trucks; these highways to connect with existing or projected bridges, tunnels and ferries.

Ninth—Definite methods for prompt relief must be devised that can be applied for the better co-ordination and operation of existing facilities while large and more comprehensive plans for future development are being carried out.

Measures of immediate relief from present harbor conditions, such as the consolidation of marine equipment, and the establishment of motor trunk line highways and the increased use of motor truck facilities, are provided in the Port Authority programme.

The commission has authority to hold public hearings and has conferred with committees of railroad Presidents, steamship officials, and all other official and civic bodies within the Port District as well as with the representatives of the various business interests. The Port Authority has also conferred with municipal, State, and Federal officials on phases of port planning.

## 200 COMPANIES OPERATE SHIPS AT THIS PORT.

There are approximately 200 companies operating ships into and out of the Port of New York, says a Chamber of Commerce bulletin. Over 5,000 vessels annually enter and clear the port in foreign commerce, and possibly nearly as many more in coastwise service. The tonnage of foreign vessels entering the port in 1920 was 17,404,188, which was over 27 per cent. of the total tonnage entering the United States.

The inland waterway connections with the Port of New York are numerous. Buffalo and the Great Lakes are connected by the Hudson River and the New York State Barge Canal. New England by Long Island Sound and the Cape Cod Canal. Southern States by the Delaware and Raritan Canal and

the Delaware River; the Chesapeake and Delaware Canal to Chesapeake Bay ports.

Every important railroad in the United States serves New York either by its own railroads or by through traffic arrangements with the railroads leading to the port or by a coastwise steamship service from some other port. Convenient intra-harbor communication between the different parts of the harbor is afforded by the many waterways, rivers, channels and bays provided by nature and modern engineering science.

The area of the port is 175 square miles, and it is estimated that any six of the other leading ports of the world could be placed within this area with plenty of room to spare.

Totals on entrances and clearances include vessels that reached and left the United States via other domestic ports.

Above data cover entire port district, including Newark and Perth Amboy.

The direct water front of Greater New York

extends a distance of more than 3,000,000 linear feet, or approximately 578.4 miles, of which 43.2 miles is in Manhattan; 79.8 in the Bronx; 201.5 in Brooklyn; 196.8 in Queens; and 57.1 in Richmond. The port water front on the New Jersey side extends 192.93 miles—grand total, 771.33 miles.

## RAILROAD PASSENGER STATIONS IN MANHATTAN.

Baltimore & Ohio, foot W. 23d and Liberty Streets.  
Central of New Jersey, foot of W. 23d and Liberty Streets; Sandy Hook Route (in Summer), foot of W. 42d and Cedar Streets, also.

Delaware, Lackawanna & Western, foot of Barclay, Christopher and W. 23d Streets.

Erie, foot of Chambers and West 23d Streets.  
Hudson Terminal, Cortlandt, Dey, Church and Fulton Streets.

Lehigh Valley, foot of West 23d and Liberty Streets.  
Long Island, 7th Avenue and 33d Street; foot East 34th Street.

New York Central & Hudson River, 42d Street and

4th Avenue, Grand Central Station; Putnam Division, 155th Street and Eighth Avenue.

New York, New Haven & Hartford, 4th Avenue and 42d Street, Grand Central Station.

New York, Ontario & Western, foot of Cortlandt and West 42d Streets.

New York, Susquehanna & Western, foot of Chambers and West 23d Streets.

Pennsylvania, foot of Cortlandt and Desbrosses Streets, 7th Avenue, 31st to 33d Street and Hudson Terminal (Fulton and Church Streets).

Philadelphia & Reading, foot W. 23d and Liberty Sts.  
Staten Island, foot of Whitehall Street, South Ferry.  
West Shore, foot Cortlandt and West 42d Streets.

## THE NEW YORK SOUTHERN SOCIETY.

The New York Southern Society, with offices at 270 Broadway, was formally organized in the City of New York on Nov. 9, 1886, and incorporated under the laws of the State of New York in May, 1889. The object of the society is to cherish and perpetuate the memories and traditions of the Southern people and to cultivate friendly relations between the Southern men resident, or temporarily sojourning, in New York City.

The officers for the year 1922-1923 are *President*, Junius Parker; *Vice President*, Martin W. Littleton;

*Secretary*, Charles Cason; *Treasurer*, George N. Hartmann.

The organization has a membership of about 1,100, with members located in nearly every State in the Union and in many foreign countries. Numbered among the members are: Mortimer N. Buckner, Frank W. Baldwin, Samuel McRoberts, Amos L. Beaty, Henry Evans, Grantland Rice, Ivy L. Lee, George Foster Peabody, Thomas F. Ryan, Martin W. Littleton, Irvin Cobb, Bernard M. Baruch, William G. McAdoo, Barron G. Collier, Percy H. Johnston, and many others of distinction.

There are other private commercial piers at Quay, Oak, Milton, Kent, Java, India, Huron, Greene, Freeman and Eagle Sts. The pier at Noble St. is city-owned, as is that at Whale Creek, and at Flatbush Ave.

**Queens Borough—All privately owned**. Pigeon St.; Flushing St.; 3d, 4th, 5th, 7th and 8th Sts.; Nott Ave.; Jamaica Ave.; Whitestone Landing.

**Staten Island—Piers 1 to 21**, extending from Tompkinsville to Clifton, are privately owned. So are B. & O. R. R. piers 1 to 8, bet. St. George and New Brighton; also the Nicholas Ave. pier at Port Richmond. The city owns the Harbor Road Pier, Mariners' Harbor, and the pier at Rossville. The piers at Holland Hook and at Tottenville are privately owned.

The city has built at Stapleton 12 piers, 1,000 to 1,184 feet long, and 125 to 209 feet wide, four covered with two-story sheds, and eight with one-story sheds. One of the piers is reserved by the city for open wharfage, or general commercial use. The other eleven in number, have been rented by the city for a term of years to various ocean steamship companies, the rent being fixed at 7½ per cent. a year on the construction cost, which was \$20,000,000 for the 12 piers. They were commenced in 1920; and they furnish 26,000 linear feet of wharfage, and 1,800,000 square feet of pier space.

Piers A and New No. 1, at the Battery, North River, are the only stone piers in the city. The new city-owned pier at Roosevelt St., East River, Manhattan, is of concrete, and the city-owned pier at Barren Island, Jamaica Bay, rests on concrete piling.

## CIVIL SERVICE RULES IN THE CITY OF NEW YORK.

**SYNOPSIS** of regulations governing the admission of persons into the Civil Service of the City of New York. Information may also be had by applying to the Secretary of the Municipal Civil Service Commission, Municipal Building, 14th floor.

Under the White Civil Service Law, Chapter 370, Laws of 1899, April 19, the rules apply to all positions in the service of the City of New York except officers elected by the people, all legislative officers and employees, heads of any department, or superintendents, principals, or teachers in a public school, academy, or college. This requires "examinations, wherever practicable, to ascertain the fitness of applicants for appointment to the Civil Service of said city." The Constitution requires that these examinations shall be competitive, "so far as practicable."

There are approximately 55,000 permanent employees in the city service, exclusive of the teaching force of the Department of Education.

The entire Administration of the City of New York is divided into two general services; namely, the Unclassified Service and the Classified Service. The Unclassified Service includes all elective officers; the officers and employees of the Board of Aldermen; members of the Board of Elections; the head, or heads, of any department of the City Government; or any person appointed by name in any statute.

The Classified Service includes all positions not in the Unclassified Service.

The Classified Service is divided into four classes; namely:

**Exempt Class**—The Exempt Class includes the deputies of principal executive officers authorized by law to act generally for and in place of their principals; one secretary of each officer, board, and commission authorized by law to appoint a secretary; one clerk and one deputy clerk, if authorized by law, of each court, and one clerk of each elective judicial officer. In addition thereto there may be included in the Exempt Class all other subordinate offices for the filling of which competitive or non-competitive examination may be found to be not practicable.

**Non-Competitive Class**—Includes all those positions of a minor nature, in the city institutions or elsewhere, that it is not practicable to fill through competitive examination.

**Labor Class**—Includes all unskilled laborers and such skilled laborers as are not included in the competitive or non-competitive classes.

**Competitive Class**—Includes all positions in the Classified Service (excepting those in the Exempt, Non-Competitive or the Labor Class) for which it is practicable to determine the merit and fitness of the applicant by competitive examination.

Vacancies in the Exempt Class may be filled without examination, appointments being made by the Mayor or other official having jurisdiction over the department where the vacancy exists.

Positions in the Non-Competitive Class are filled as a result of the examinations held by the department where the person is to be employed.

**Filing Applications for Positions in Competitive Class**—Applications for positions in the

Competitive Class will be issued and received only for the position or positions advertised, and only during the period specified by the commission in such advertisement. Advertisements for the various examinations appear in the prominent daily papers and in the *City Record*. The *City Record* is on file in the reading room of any of the city libraries.

All applications for an examination must be on a prescribed form addressed to the "Secretary of the Municipal Civil Service Commission." When an examination is advertised application blanks may be obtained at the office of the commission, Room 1400.

Application blanks will be mailed upon request provided a self-addressed stamped envelope or sufficient postage is inclosed to cover the mailing. The commission will not guarantee the delivery of the same. Postage on applications forwarded by mail must be fully prepaid.

Applicants must be citizens of the United States and residents of the State of New York. The requirement as to residence may be waived by the commission, but only with the proviso that applicants become residents of the State of New York prior to the date of their appointment.

Applicants for patrolmen must have resided within the State of New York at least one (1) year prior to the date of appointment.

The prescribed application form filled out in the applicant's handwriting sets forth the following:

The applicant's name, age, residence, statement regarding citizenship or naturalization, statement regarding arrests or previous service in a City Department, if any, and also the certificate for citizens whose residences or places of business are within the City of New York.

In examinations for positions requiring previous experience, applicants must fill in and file with their application an experience paper. In some examinations where experience is a qualifying subject, applicants receiving less than the minimum passing mark in this paper are barred from the remainder of the examination.

Applications for positions in the Labor Class are issued and received continually.

Applicants for all positions in the Competitive and the Labor Classes are required to take a medical and physical examination.

Applicants for Labor Class positions that require previous training or experience must take an oral, or practical test; no written examination is given to applicants.

## CONDUCT OF EXAMINATIONS.

Applicants shall be admitted to examination upon the production of the official notification to appear for that purpose.

All paper upon which examinations are to be written shall be furnished to the applicants by the examining board and shall bear some suitable official indorsement, stamp, or mark, for the purpose of identifying the same.

All examinations shall be in writing, except such as refer to expertness or physical qualities, and except as herein otherwise provided.

The sheets of questions shall be numbered and shall be given out in the order of their numbers, each, after the first, being given only when the competitor has returned to the examiners the last sheet given to him. In general, no examination shall extend beyond five hours without intermission, and no questions given out at any session, to any candidate, shall be allowed to be answered at another session.

The time allowed for completing the examination shall be announced before the first paper is given out.

The following municipal departments and offices come under jurisdiction of Civil Service rules:

|                                                   |                                       |                               |                                               |
|---------------------------------------------------|---------------------------------------|-------------------------------|-----------------------------------------------|
| Accounts, Com. of                                 | City Chamberlain.                     | Finance Dept.                 | Public Welfare, Dept. of.                     |
| Armory, Board of.                                 | City Record, Supervisor of the.       | Fire Dept.                    | Public Works Bureau.                          |
| Art Commission.                                   | Civil Service Commission.             | Health Dept.                  | Revision of Assessments, Board of.            |
| Assessors, Board of.                              | College of the City of New York.      | Hunter College.               | Sinking Fund Commission.                      |
| Bellevue and Allied Hospitals.                    | Correction, Dept. of.                 | Law Dept.                     | Standards and Appeals, Board of.              |
| Board of Ambulance Service.                       | Court, City.                          | Licenses, Dept. of.           | Street Cleaning, Dept. of.                    |
| Board of Inebriety.                               | Court, City Magistrate.               | Mayor's Office.               | Taxes and Assessm'ts, Dept. of.               |
| Board of Water Supply.                            | Court, Municipal.                     | Medical Examiners             | Tenement House Dept.                          |
| Borough President in each Borough, Office of the. | Court of Special Sessions.            | Normal College.               | Water Supply, Gas, and Electricity, Dept. of. |
| Buildings, Bureau of.                             | Docks and Ferries, Dept. of.          | Parks, Dept. of.              | Weights and Measures.                         |
| Central Purchase Committee.                       | Education, Dept. of.                  | Parole Commission.            |                                               |
| Child Welfare, Board of.                          | Elections, Board of.                  | Plant and Structures.         |                                               |
|                                                   | Estimate and Apportionment, Board of. | Plumbers, Examining Board of. |                                               |
|                                                   |                                       | Police Dept.                  |                                               |

Inspectors of Elections and Poll Clerks are not subject to competitive examination. The minimum height of firemen has been reduced one inch, from 5 ft. 7 in. to 5 ft. 6 in.

## FIRE DEPARTMENT IN NEW YORK CITY.

| RANK AND GRADE.                  | Total. | RANK AND GRADE.               | Total. | RANK AND GRADE.            | Total. |
|----------------------------------|--------|-------------------------------|--------|----------------------------|--------|

**POPULATION OF NEW YORK AND LONDON.**

**NEW YORK.**

The City of New York comprises five boroughs—Manhattan, Bronx, Brooklyn, Queens and Richmond. Manhattan covers New York County. Brooklyn covers Kings County, and the other boroughs cover the counties from which they were named. The total area of the five boroughs and of the incorporated City of New York, according to the

Tax Department, is 314.75 square miles. By acres, the areas of the boroughs are as follows: Manhattan, 14,038; Bronx, 26,017; Brooklyn, 49,709; Queens, 75,082; Richmond, 36,600; total—201,446. Their population, Jan. 1, 1920, was, by the U. S. Census, as follows: Manhattan, 2,284,103; Bronx, 732,016; Brooklyn, 2,018,356; Queens, 469,042; Richmond, 116,531; total—5,620,048.

**LONDON.**

The registration City of London coincides in area with the municipal and parliamentary City of London; it contains 675 acres, and in 1921 it had a night population of 13,706.

The registration County of London coincides in area with the administrative County of London; it contains 74,816 acres; and in 1921 it held a population of 4,483,249. The area of registration County of London is approximately the collective area of the London parliamentary boroughs. The registration County of London is the census London and

is the area covered by the registration of London vital statistics.

The "outer ring" of London takes in many of the suburbs; in 1911 it had 2,729,673 population, estimated to have increased, in 1921, to 2,992,919. It is included in the bailiwick of the City and Metropolitan Police.

The area of the so-called Greater London, comprising the registration County of London and the "outer ring," is about 693 square miles (443,440 acres); in 1921 its population was 7,476,168.

Average population per square mile—Greater New York, 17,841; Greater London, 10,789.

**POPULATION OF NEW YORK CITY, BY ASSEMBLY DISTRICTS.**

(U. S. Census of January 1, 1920 and for the Districts as they were then.)

Bronx—1, 110,315; 2, 117,611; 3, 83,042; 4, 84,195; 5, 88,428; 6, 70,482; 7, 89,123; 8, 88,820.

### POPULATION OF NEW YORK CITY BY BOROUGHES.

THE figures, except for 1920 and other United States Census years, are estimates of the Bureau of Vital Statistics of the Municipal Department of Health. Figures for 1922 show a readjustment in accordance with the Federal Census of Jan. 1, 1920. The 1921 figures were not so readjusted.

In 1696 the population of New York City was 4,302, of whom 575 were negroes.  
In 1711 a slave market was established in Wall St., near East River.

### MARITAL CONDITION IN NEW YORK CITY, 1920. (U. S. Census Figures.)

The population of New York City, (5,620,048, on Jan. 1, 1920), comprised 2,001,025 males 15 years of age and over, of whom 1,143,643, or 57.2 per cent., were married; and 2,026,797 females above the same age limit, of whom 1,115,670, or 55 per cent., were married. In the earlier years of adult life the proportion married is much larger for females than for males, but after the age of 45 the proportion of

married men exceeds that of married women—76.4 per cent. as against 54.3 per cent. The obvious explanation is that women marry at younger ages than men. There were in the population of New York City on the census date 78,999 widowers, 232,991 widows, 4,303 divorced men, and 6,775 divorced women. The population 45 years of age and over included 62,902 single men and 63,341 single women.

| Age.                              | Total in Specified Age Group. | SINGLE. |      | MARRIED.  |      | Widowed. | Divorced. |

## FOREIGN WHITE STOCK IN N. Y. CITY.

The Department of Commerce announces that, according to the Census of 1920, the foreign white stock in the population of New York City on Jan. 1 of that year numbered 4,294,629. By "foreign white stock" is meant the total foreign-born white population plus the native white population having one or both parents foreign-born. The corresponding total for 1910 was 3,747,844, and the increase between 1910 and 1920 was 546,785, or 14.6 per cent.

The foreign white stock constituted 76.4 per cent. of the total population of the city in 1920 (5,620,048), as against 73.6 per cent. of the total in 1910 (4,766,883). The foreign white stock in 1920 comprised 1,991,547 persons who were themselves foreign-born and came to this country as immigrants and 2,303,082 who were born in this country but whose parents, one or both, were immigrants.

The classification of the foreign white stock by country of origin is based upon the pre-war map of Europe.

## STRANGERS IN THE GREAT METROPOLIS.

It is estimated that there are, on every day in the year, at least 100,000 strangers in the City of New York. They do not count, of course, in the census population. They come by water and by land, and tarry a while. The following figures show the numbers of strangers, visitors and commuters who arrived and departed in 1921 by the various railways:

Baltimore & Ohio, 551,880; Central of N. J., 16,718,099; D. L. & W., 21,594,743; Erie, 30,026,406; Lehigh Valley, 829,706; Long Island, 60,386,698; New Haven, 16,653,438; New York Central, 28,434,974; Ontario & Western, 619,658; Westchester & Boston, 5,395,365; Pennsylvania, 39,936,082. Total, 220,847,040.

## FOREIGN-BORN WHITE AND COLORED IN NEW YORK CITY.

The following shows the foreign-born white and colored for New York City and for each of the boroughs.

| BOROUGH.       | Foreign-born. | For-born White. | For-born Colored. | BOROUGH.      | Foreign-born. | For-born White. | For-born Colored. |

## MISCELLANEOUS DATA FOR 1921.

BAROMETRIC PRESSURE (reduced to sea level)—Mean, 30.05 inches; highest, 30.97 inches, January 19; lowest, 29.35 inches, December 12.

TEMPERATURE—Greatest daily range, 44°, March 28; least daily range, 4°, August 3. Greatest monthly range, 55°, March; least monthly range, 31°, July. Highest mean of three consecutive days, 81°, July 26-28; lowest mean of three consecutive days, 17°, January 17-19.

PRECIPITATION—Longest period without a measurable amount of precipitation (0.01 inch or more), 15 days, August 19-September 2. Greatest number of consecutive days with precipitation (0.01 inch or more), 6, June 26-July 1.

SNOW—Greatest amount in 24 hours, 12.5 inches, February 20. Greatest depth of snow on the ground, measured at 8 P. M., 12.0 inches, February 20. Last snow in spring occurred April 11; first snow in autumn occurred November 13.

FROST—In spring: last killing frost occurred April 11; last light frost occurred April 20. In autumn: first light frost occurred October 9; first killing frost occurred October 27.

THUNDERSTORMS—First, January 5; last, October 20.

HAIL—None at station.

AURORAS—May 14, 15.

## THE WATER SUPPLY OF NEW YORK CITY.

(For THE ALMANAC; by Merritt H. Smith, Chief Engineer.)

**Manhattan and Bronx**—The Boroughs of Manhattan and Bronx, prior to the introduction of Catskill water, were supplied entirely from the Croton watershed and from the Bronx and Byram watershed, the latter being now part of the Catskill system. Croton water was first introduced in 1842. Water from the Bronx River was introduced in 1854, and from the Byram River in 1896. The Croton watershed furnishes about half of the present supply for Manhattan and Bronx, the other half being supplied from the Esopus watershed. The Esopus watershed in the Catskills, from which the Catskill supply is obtained, has an area of 257 square miles. The water from the Esopus watershed is collected in the Ashokan Reservoir, about fourteen miles west of the Hudson at Kingston, N. Y., and about ninety-two miles from the northern city boundary. The available supply from the Esopus watershed is increased by the rainfall and run-off on some twenty-two square miles of watershed (the Bronx and Byram watershed) tributary to Kensico Reservoir, which lies east of the Hudson River, and about seventeen miles from the northern city boundary. Under average rainfall and run-off conditions the available supply from the Esopus watershed is 375,000,000 gallons daily, and from the Bronx and Byram watershed about 20,000,000 gallons daily, making the total available supply of water from the Catskill system 395,000,000 gallons daily; the safe minimum yield from these two sheds is 315,000,000 gallons daily.

The Croton watershed, which lies some 22 miles north of the city line, has an area of 375 square miles and a safe minimum yield of 336,000,000 gallons daily. Under average rainfall and run-off conditions the yield of this shed is 400,000,000 gallons daily. The water from the Croton watershed is collected in twelve reservoirs and six lakes and ponds.

**Brooklyn**—The Esopus watershed together with

the old Brooklyn system furnish the entire supply for the Borough of Brooklyn, with the exception of the Twenty-ninth Ward, which is supplied by the Flatbush Water Works Company, a private water company, the source of supply being ground water collected from driven wells. The supply from the old Brooklyn system, which yielded about 150,000,000 gallons, and which is now for the greater part held in reserve, was obtained from driven wells, infiltration galleries, and small streams along the south shore of Long Island. This supply was first introduced in 1859.

**Queens**—The city supplies only the First, Second and Third Wards in the Borough of Queens. The Esopus watershed furnishes about 70 per cent. of the supply to these wards. The First Ward was formerly supplied from the Brooklyn system, supplemented by a small amount derived from the municipal driven well pumping stations in the First and Third Wards. The Third Ward was supplied by two pumping stations, now held in reserve, one station drawing its supply from driven wells and the other obtaining about half its supply from wells and one-half from a small lake, the water being filtered. The combined yield of the two plants is about 6,000,000 gallons daily. The supply to the Second Ward was formerly furnished by the Citizens' Water Supply Co. This plant was taken over by the city in April, 1922. The Fourth and Fifth Wards, Queens, are supplied by private water companies, the source of supply being entirely ground waters, collected by means of driven wells. There are three of these private companies, with three others serving special customers.

**Richmond**—The Borough of Richmond is supplied from the Esopus watershed, supplemented by a small amount (about 7,000,000 gallons daily) derived from wells pumped at two stations. Silver Lake Reservoir, the terminal reservoir for the Catskill system, is located in this borough.

| YEAR.     | Manhattan and Bronx. | Brooklyn.   | Queens.    | Richmond.  | Private Companies, All Boroughs. | Total, Including Private Companies. |

| 1920..... | 466,200,000          | 187,200,000 | 18,100,000 | 18,400,000 | 45,000,000                       | 734,900,000                         |
| 1921..... | 462,300,000          | 186,600,000 | 18,000,000 | 17,800,000 | 46,600,000                       | 731,300,000                         |

The figures by boroughs show only daily consumption of city water. The "total" column shows daily city water consumption plus consumption of water of private companies. In 1920, for example, the total daily consumption in Brooklyn, including private water, was 200,700,000 gallons; in Queens, 49,600,000 gallons. Private companies supplied 13,500,000 gallons in Brooklyn, and 31,500,000 in Queens.

## WATER CONSUMPTION IN NEW YORK CITY—GALLONS PER DAY.

Catskill water was introduced into the city in 1917. Before that the supply in Manhattan and the Bronx was drawn from the Croton watershed, with a little from the Bronx and Byram watershed, the supply in Queens and Richmond was

drawn from local Long Island sources; and Brooklyn got most of its water from wells, ponds, and springs out on Long Island, in Southern Nassau and Suffolk Counties. Private water companies still supply water in the boroughs of Brooklyn and Queens.

## OTHER DATA ON THE WATER SUPPLY.

The new Catskill Mountain water supply is a gravity system. For New York City's Catskill Mountain water system there are two contiguous drainage areas, or watersheds, occupying the central portion of the Catskill Mountains lying between 85

and 125 miles from New York. The Schoharie watershed has an area of 314 square miles. Esopus has an area of 257 square miles. These two watersheds have a total area of 571 square miles, from which 600,000,000 gallons of water daily can safely be

drawn throughout each year. Along the aqueduct provisions have been made for storing a large quantity of water. From the Ashokan reservoir it is almost a three-days' journey for the water to flow through the aqueduct to the Silver Lake terminal reservoir on Staten Island.

For surveys, real estate, construction, engineering and general supervision, and all other items except interest on the bonds, the total cost of the completed Catskill system will be about \$177,000,000, of which \$22,000,000 is for the Schoharie works.

Ashokan reservoir, about fourteen miles west of the Hudson at Kingston, was built at a cost of nearly \$30,000,000. The water which the reservoir holds would cover all Manhattan Island to a depth of thirty feet; the area of its surface is equivalent to that of Manhattan below One Hundred and Tenth Street. The water surface of the west basin when full is at an elevation of 590 feet above mean tide in New York Harbor.

Kensico reservoir, east of the Hudson, and thirty miles from the City Hall, contains enough Catskill water to supply New York several months if carefully husbanded. It acts as a storage reservoir. This reservoir is formed by the Kensico dam across the valley of the Bronx River, about three miles north of White Plains and fifteen miles north of the Hill View reservoir. The total cost of Kensico reservoir was about \$13,500,000. It is 355 feet above tidewater.

Hill View reservoir is located in the City of Yonkers, just north of the New York City line, and fifteen miles south of Kensico reservoir. Its function is to equalize the difference between the use of water in the city as it varies from hour to hour and the steady flow in the aqueduct. It is an uncovered, artificial reservoir of the earth embankment type. It holds 900,000,000 gallons of water, with a depth of 36½ feet and has a water surface of 90 acres. The total cost of Hill View reservoir was about \$4,700,000. It was first filled December 29, 1915. It is 295 feet above tidewater.

The Hudson River is crossed by means of a tunnel wholly in granitic rock, at a depth of 1,114 feet below sea level, between a shaft at Storm King Mountain on the west bank and another shaft on the east side of the river at Breakneck Mountain.

At the Ashokan reservoir, and also at Kensico reservoir, aerators have been built. The aerators are substantially alike and are great tountain basins, approximately 500 feet long by 250 feet wide, each containing about 1,600 nozzles, through which jets of water are thrown vertically into the air, permitting thorough admixture of oxygen from the atmosphere and removal of undesirable gases and other matters causing tastes and odors.

Within the screen chamber down stream from Kensico reservoir chlorine is introduced into the water flowing in the aqueduct for the destruction of germ life. The gas is delivered at the chamber compressed to a liquid state in steel containers holding one hundred pounds each. Chlorine is used to insure the practical sterilization of the water before it goes to the city and is wholly neutralized or dissipated before the water reaches the distribution pipes.

From Hill View reservoir, Catskill water is delivered into the five boroughs by a circular tunnel in solid rock reducing in diameter from 15 to 14, 13, 12, and 11 feet. The total length of the tunnel is eighteen miles. From two terminal shafts in Brooklyn, steel and cast iron pipe lines extend into Queens and Richmond. A 36-inch flexible-jointed cast iron pipe, buried in a trench in the harbor bottom, has been laid across the Narrows to the Staten Island shore, whence a 48-inch cast iron pipe extends to the Silver Lake reservoir, holding 435,000,000 gallons. The total length of the delivery system is over thirty-four miles. The tunnel is at depths of 200 to 750 feet below the street surface, thus avoiding interference with streets, buildings, subways, sewers and pipes. These depths are necessary, also, to secure a

substantial rock covering to withstand the bursting pressure of the water inside and afford the requisite watertightness. The waterway of the tunnel is lined throughout with Portland cement concrete.

The city tunnel, which is the longest tunnel in the world for carrying water under pressure, or for any other purpose, was constructed from twenty-five shafts, including the downtake shaft at Hill View reservoir, about 4,000 feet apart, located in parks and other places where they interfered very little with traffic. Through twenty-two of these shafts the water is delivered into the street mains. These connections from the tunnel to the mains are made by means of vertical riveted steel pipes (called risers) embedded in concrete in the upper part of each shaft and lined with concrete to prevent corrosion inside. Concrete fills all spaces outside the risers, sealing the shafts against the escape of water excepting through the pipes. Provision is made at Shaft 11, in Morningside Park, and at Shaft 21, on the shore of the East River, at Clinton and South Streets, Manhattan, for unwatering the tunnel, whenever necessary, for inspection, cleaning or repairs. Unusual features in connection with the operation of the tunnel are the bronze riser valves in the shafts. The former are located about 100 feet below the top of sound rock and are designed to close automatically in case of an important break in the valve chamber or in the street mains. They can also be closed by hand from within the chambers at the shaft tops.

The cost of the portions of the Catskill aqueduct within the city limits, including the tunnel, pipe lines, appurtenances and Silver Lake reservoir, was about \$26,400,000.

The terminal Silver Lake reservoir for the Catskill water system, located on Staten Island, is about 2,400 feet long and 1,500 feet wide. It holds 435,000,000 gallons, and is 228 feet above tidewater.

#### GIVING NEW YORK CITY FIRE PROTECTION.

*High Pressure Fire Service System*—The high pressure fire service system in Manhattan is bounded by Thirty-fourth Street, Madison Avenue, Twenty-fourth Street, Lexington Avenue, Fourteenth Street, Third Avenue, Bowery, Houston Street, East River, Battery, North River. There are two pumping stations—Gansevoort and West Streets, and Oliver and South Streets. Each station has six electrically driven centrifugal pumps. Either fresh or salt water may be used. Each pump can deliver 3,000 gallons a minute. The combined capacity of the two stations is equal to about fifty fire engines. The distributing system consists of 128 miles of mains, eight to twenty-four inches in diameter, and about 2,760 four-nozzle hydrants. There are approximately 696 telephones communicating with Fire Department headquarters and with the main and subsidiary stations of the New York Edison Company, from which the necessary electric power is obtained. The present system cost about \$9,350,000.

In Brooklyn there are two high pressure fire service systems. The one for the business and manufacturing districts is bounded by the Navy Yard, St. Edward's Street, St. Felix Street, Fort Greene Place, Fifth Avenue, Twenty-fourth Street, Fourth Avenue, Thirteenth Street and the water front, covering an area of 4.8 square miles. The supply is furnished by two stations, one located at the foot of Joralemon Street, and the reserve at Willoughby and St. Edward's Streets. Both draw their supply from the Ridgewood mains. The main station is connected to the East River. The pumps are electrically operated in both stations, and have a combined rated capacity of 24,000 gallons per minute. The distributing system consists of about forty-five miles of mains, eight to twenty inches in diameter.

The Coney Island high pressure system protects an area of 470 acres. The pumping station is located at West Twelfth Street and Coney Island Creek. The total capacity is 4,500 gallons per minute. The water is distributed through six miles of mains.

#### REGISTERS OF NEW YORK COUNTY—1812-1922.

Elbert Herring, May 1, 1812, to April, 1815; William T. Slocom, May 1, 1815, to December, 1817; James Gilbert, January, 1818, to December, 1820; James W. Lent, January, 1821, to December, 1828; Thomas Franklin, May, 1829, to February, 1830; Jameson Cox, December, 1830; Gilbert Coutant, 1831 to December, 1833; William H. Bunn, 1834-1836; James Gullick, 1837-1839; J. Sherman Brownell, 1840-1845; Samuel Osgood, 1846-1848; Cornelius V. Anderson, 1849-1851; Garret Dyckman, 1852-1854; Peter Asten, part of 1854; John J. Doane, 1855-1857; William Miner, 1858-1860; John Keyser, 1861-1863;

John McCool, 1864-1866; Charles G. Haloin, 1867 to August 2, 1868; Patrick H. Jones, August, 1868, to December, 1868; Michael Connelly, 1869-1871; Franz Sigel, 1872-1874; Patrick H. Jones, 1875-1877; Frederick W. Loew, 1878-1880; Augustus T. Docharty, 1881-1883; John Reilly, 1884-1886; James J. Slevin, 1887-1889; Frank T. Fitzgerald, 1890-1892; Ferdinand Levy, 1893-1895; William Sohmer, 1896-1897; Isaac Fromme, 1898-1901; John H. I. Ronner, 1902-1905; Frank Gass, 1906-1909; Max S. Griffenhagen, 1910-1913; John J. Hopper, 1914-1917; James A. Donegan, 1918-1921; Annie Mathews, 1922.

## MONUMENTS AND STATUES IN MANHATTAN.

ARTHUR, CHESTER A., Madison Square.  
 BARTHOLOMI STATUE, see "Liberty."  
 BEAR AND FAUN FOUNTAIN (Seigman), Morningside Park and 116th St.  
 BEETHOVEN, bronze bust, on a granite pedestal, 15 feet high, Central Park, on the Mall; unveiled 1884.  
 BOLIVAR, GEN. SIMON, Bolivar Hill, Central Park West; unveiled 1921.  
 BROWNSON, ORESTES A., bronze bust of, Riverside Park and 104th St.  
 BRYANT, WILLIAM CULLEN, Bryant Park, W. 42d St. and 6th Ave.  
 BURNS, bronze statue, Central Park, on the Mall; unveiled 1880.  
 BUTTERFIELD, GENERAL DANIEL, bronze figure, on marble pedestal, Claremont Ave. and 122d St.  
 CARRERE, JOHN M., memorial to, Riverside Drive and 99th St.  
 CIVIC VIRTUE, fountain statue, City Hall Park, 1922.  
 COLUMBUS MONUMENT, 8th Ave. and 59th St. (Columbus Circle).  
 COLUMBUS, marble statue, south entrance to Mall, Central Park; unveiled 1892.  
 COMMERCE, bronze figure, Central Park, near the 8th Ave. and 59th entrance; unveiled 1865.  
 CONKLING, bronze statue, Madison Square Park, cor. Madison Ave. and 23d St.  
 COOPER, PETER, statue opposite Cooper Union.  
 COX, bronze statue of the statesman S. S. Cox, erected by the letter carriers, Astor Place.  
 DANTE, bronze statue, Broadway, 63d St., and Columbus Ave., 1921.  
 DE FEYSTER, ABRAHAM, statue in Bowling Green.  
 DODGE, bronze statue of William E. Dodge, at Broadway, 6th Ave. and 36th St.; unveiled 1885.  
 EAGLE AND PREY, bronze group, Central Park, west of Mall.  
 ERICSSON, statue of the inventor, on the Battery.  
 FALCONER, THE, Central Park, near W. 72d St. entrance.  
 FARRAGUT, bronze statue, Madison Square Park, near 5th Ave. and 26th St.  
 FIRMEN'S MEMORIAL MONUMENT, 100th St. and Riverside Drive.  
 FORT WASHINGTON MONUMENT, Fort Washington Ave. and 183d St.  
 FOUNTAIN, 116th St. and Riverside Drive.  
 FRANKLIN, bronze statue, Printing House Square; unveiled 1872.  
 GARIBOLDI, bronze statue, Washington Square; unveiled 1888.  
 GRANT, ULYSSES S., tomb, Riverside Drive and 123d St.; 160 feet high; dedicated April 27, 1897.  
 GREELEY, bronze statue, City Hall Park; unveiled 1890.  
 GREELEY, Greeley Square, 33d St. and Broadway.  
 HALE, bronze statue of Nathan Hale, martyr spy of the Revolution; City Hall Park, at Broadway and Murray St.  
 HALLECK, bronze statue, Central Park, on the Mall; unveiled 1877.  
 HAMILTON, granite statue of Alexander Hamilton Central Park, on the East Drive.  
 HANCOCK, in Hancock Square, St. Nicholas Ave. and W. 124th St.  
 HEINE, poet, Lorelei Fountain, Mott Ave. and 161st St.  
 HOLLEY, bronze bust of Alexander Holley, Washington Square; unveiled 1890.  
 HUDSON, HENRY, 100 foot shaft, Spuyten Duyvil.  
 HUMBOLDT, bronze bust, Central Park, near the 5th Ave. and 59th St. entrance.  
 HUNT, RICHARD M., Memorial, 5th Ave., opposite Lenox Library.  
 INDIAN HUNTER, bronze figure, Central Park, near lower entrance to the Mall.  
 IRVING, bronze bust, Bryant Park, on W. 40th St.; unveiled 1866.  
 JACK PHILIPS TITANIC MEMORIAL, U. S. Barge Office.  
 JEFFERSON STATUE, City Hall.  
 JEFFERSON, THOMAS, in front of the Pulitzer School of Journalism, Columbia University.  
 JOAN OF ARC, Riverside Drive and 93d St.  
 LAFAYETTE, bronze statue, Union Square, lower end of Park; unveiled 1876.  
 LIBERTY ENLIGHTENING THE WORLD, on Bedloe's Island, in the Harbor.  
 LINCOLN, bronze statue, Union Square, southwest corner; unveiled 1868.  
 LOWELL DRINKING FOUNTAIN, Bryant Park.  
 MAINE, U. S. S. MEMORIAL, National, Columbus Circle.  
 MARTYRS MONUMENT, Trinity Churchyard, in memory of the American soldiers and sailors who

died in the British prison ships in the Revolutionary War.  
 MAZZINI, bronze bust, Central Park, on the West Drive.  
 MOORE, bronze bust of Thomas Moore, the poet, Central Park, near the Pond and 5th Ave. entrance; unveiled 1880.  
 MORSE, bronze statue of the inventor of the telegraph, Central Park, near 5th Ave. and 72nd St.  
 OBELISK, Central Park, near the Metropolitan Museum of Art; brought from Egypt and erected 1881; granite, 70 feet long, and weighs 200 tons.  
 PULITZER FOUNTAIN, 5th Ave. and 59th St.  
 SCHILLER, bronze bust, Central Park, in the Ramble; unveiled 1859.  
 SCHURZ, CARL, statue, 116th St. and Morningside Drive.  
 SCOTT, bronze statue of Sir Walter Scott, Central Park, on the Mall; unveiled 1872.  
 SEVENTH REGIMENT, bronze figure of a soldier of the regiment, to commemorate its dead in the Civil War, Central Park, on the West Drive.  
 SEWARD, bronze statue, southwest corner of Madison Square Park; unveiled 1876.  
 SHAKESPEARE, bronze statue, Central Park, at the lower end of the Mall; unveiled 1872.  
 SHERMAN, GENERAL, equestrian statue, 5th Ave. and 59th St.  
 SIGEL, FRANZ, bronze monument, 106th St. and Riverside Drive; unveiled in October, 1907.  
 SIMS, bronze statue of Dr. Marlon Sims, Bryant Park, north side.  
 SOLDIER OF GREENWICH VILLAGE, bronze World War memorial, Abingdon Sq. Park.  
 SOLDIERS AND SAILORS' MONUMENT, Riverside Drive.  
 STEAD, W. T., tablet in memory of; in Central Park wall, 5th Ave. and 91st St.; July, 1921.  
 STILL HUNT, bronze statue, Central Pk., opp. 76th St.  
 STRAUS MEMORIAL, Broadway and 106th St.  
 STUYVESANT, marble effigy of Gov. Peter Stuyvesant in the outer wall of St. Mark's Church.  
 THE PILGRIM, bronze statue, Central Park, near E. 72d St. entrance.  
 THORWALDSEN, bronze statue, 59th St., facing 6th Ave.  
 TIGRESS AND CUBS, bronze group, Central Park near 64th St.  
 VERDI, statue, Sherman Square.  
 VERRAZANO, statue, Battery Park.  
 WASHINGTON AND LAFAYETTE, bronze statue, W. 114th St., Morningside and Manhattan Aves.  
 WASHINGTON, bronze bust, City Hall.  
 WASHINGTON, bronze equestrian statue, Union Square, southeast side.  
 WASHINGTON, bronze statue, at the entrance to the Sub-Treasury Building, Wall St.; unveiled 1883.

 WATER GATE, foot of W. 110th St., where Henry Hudson landed.  
 WEBB, ALEXANDER S., bronze statue of, near main building, College of the City of New York.  
 WEBSTER, bronze statue, Central Park, on the West Drive, near 72d St.  
 WORLD WAR MEMORIALS—Chelsea Park, 1921; tablet, Battery Park, 1922; bronze group, Mitchell Square, Inwood Heights, 1922.  
 WORTH, granite shaft in honor of Major General Worth, U. S. A., at Broadway and 25th St.

## LAFAYETTE PANEL, BROOKLYN.

The bronze Lafayette panel, Prospect Park, at 9th St., Brooklyn, was dedicated on May 10, 1917. Marshal Joffre, hero of the Marne, unveiled the statue, which was accepted for the city by Mayor Mitchel. Former Premier Viviani, who headed the French Commission to the United States, spoke, as did Marquis de Chambrun, great-grandson of Lafayette. The work cost \$35,000, the gift of the Henry Marteau estate. The sculptor was Daniel Chester French. The monument consists of a panel of bronze about 12 feet long and 10 feet high, against which is a figure of Lafayette in the uniform of a General in the Continental Army, with a negro holding his horse's head. The panel rests against a structure of granite of Italian Renaissance design.

## MEMORIAL ARCH, BROOKLYN.

The chief monument in Brooklyn is the white marble Soldiers and Sailors Arch, surmounted by bronze groups, designed by Frederick W. MacMonnies. It stands at the plaza entrance to Prospect Park, Union Street, Flatbush and Vanderbilt Avenues.

## PARKS IN THE CITY OF NEW YORK.

THE total area of improved parks in Manhattan is 1,275 acres; unimproved parks, 209 acres; playgrounds, 5 acres; parkways, streets, etc., under jurisdiction of Department of Parks, 40,929 feet long, width varying from 90 to 168 feet.

## PARKS IN MANHATTAN.

Battery, foot of Broadway. 21 acres.  
 Bryant, 6th Ave. and W. 42d St. 4½ acres.  
 Carl Schurz, between Ave. B and East River, E. 84th St. to E. 89th St. 12½ acres.  
 Central, 843 acres (see below).  
 Chelsea, 27th St. and 9th Ave. 3 acres.  
 City Hall Park, Broadway, Park Row, and Chambers St. 8 acres.  
 Colonial, 145th to 155th St., Bradhurst Ave. to Edgecombe Ave. 12¼ acres.  
 Columbus, Mulberry and Bayard Sts. 2¼ acres.  
 Corlears Hook Park, Corlears and South Sts. 8 acres.  
 De Witt Clinton, 52d to 54th St., North River. 7 acres.  
 Fort Washington, Ft. Washington Point, Hudson River. 40 2-3 acres.  
 Hamilton Fish Park, Houston and Willett Sts. 3½ acres.  
 Highbridge Park, 155th St. to Washington Bridge, west of Driveway. 75 2-3 acres.  
 Isham, 213th St. and Broadway to Harlem Ship Canal. 8 acres.  
 John Jay, 76th to 78th St., East River. 3 acres.  
 Kuyter Park, 129th St. and 3d Ave. .298 acres.  
 Madison Square, Broadway and 23d St. 6¼ acres.  
 Manhattan Square, Central Park W., 77th to 81st St. 17½ acres.  
 Morningside, between Columbus and Amsterdam Aves. and W. 110th and W. 123d Sts. 31¼ acres.  
 Mount Morris, between Madison and Mt. Morris Aves. and 120th and 124th Sts. 20 acres.  
 Park Ave., 34th to 42d St.; 56th to 96th St. 8 acres.  
 Riverside Drive Extension, 135th St. to 158th St.  
 Riverside Park, between Riverside Drive and the N. Y. C. R. R. and W. 72d and W. 129th Sts. 140 acres; and from 135th St. to 158th St. 24 acres.  
 St. Gabriel's Park, 1st Ave. and 35th St. 3 acres.  
 St. Nicholas, 130th to 141st St., St. Nicholas Ave. to St. Nicholas Terrace, 19½ acres; and west of St. Nicholas Terrace and the extension at 130th and 141st Sts. 7½ acres.  
 Seward, Canal and Jefferson Sts. 3 acres.  
 Straus, 106th St. and Broadway.  
 Stuyvesant, Rutherford Pl. and E. 16th St. 4 acres.  
 Thomas Jefferson, 111th St., 1st Ave., 114th St. and Harlem River. 15½ acres.  
 Tompkins Square, Avenue A and 7th St. 10½ acres.  
 Union Square, Broadway and 14th St. 3½ acres.  
 Washington Square, 5th Ave. and Waverley Pl. 8 acres.

## PLAYGROUNDS—MANHATTAN.

Abington Square at Hudson St.  
 Carmansville, Amsterdam Ave. and 151st St.  
 Cherry and Market Sts.  
 Five Points Playground, Baxter and Worth Sts.  
 Fifty-ninth Street Playground, west of Amsterdam Ave.  
 Jackson Square Playground, 8th Ave. and Horatio St.  
 Queensboro Bridge Playground.  
 St. Catherine's Playground, 67th St. and 1st Ave.  
 Yorkville Playground, 101st St. near 2d Ave.

There are also playgrounds in the following named parks: Battery, Chelsea, Colonial, Columbus, Corlears Hook, De Witt Clinton, Hamilton Fish, Hudson, John Jay, Thomas Jefferson, Morningside, Mount Morris, Riverside, at 97th Street and ball ground at 79th Street, Ryan, St. Gabriel's, St. Nicholas, Carl Schurz, William H. Seward, Tompkins Square.

Of the parks in Manhattan named in the above list, Fort Washington, Highbridge, St. Nicholas, and Isham are unimproved. The Harlem River Driveway is 11,562 feet long and 100 to 150 feet wide; Morningside Drive is 3,338 feet long and 90 feet wide; Riverside Drive is 17,000 feet long and 90 to 168 feet wide, and the extension, 135th to 158th Street, is 6,560 feet long.

## SOME FACTS ABOUT CENTRAL PARK.

The great park of New York extends from 59th St. to 110th St., being over 2½ miles long, and from 5th Ave. to 8th Ave., being over half a mile wide. It covers 843 acres, of which 185 are in lakes and reservoirs and 400 in forest, wherein over half a million trees and shrubs have been planted. There are 10¼ miles of roads, 5¼ of bridle paths, and 31 of walks. The landscape architects of the park were Frederick Law Olmsted and Calvert Vaux. Work was begun on the Park in 1857. The following fanciful names have been officially applied to the several entrances to the Park: 5th Ave. and 59th St., Scholar's Gate; 6th Ave. and 59th St., Artist's Gate; 7th Ave. and 59th St., Artisan's Gate; 8th Ave. and 59th St., Merchant's Gate; 8th Ave. and 72d St., Woman's Gate; 8th Ave. and 81st St., Hunter's Gate; 8th Ave. and 85th St., Mariner's Gate; 8th Ave. and 96th St., Gate of All Saints; 8th Ave. and 100th St., Boy's Gate; 8th Ave. and 110th St., Stranger's Gate; 5th Ave. and 67th St., Student's Gate; 5th Ave. and 72d St., Children's Gate; 5th Ave. and 79th St., Miner's Gate; 5th Ave. and 90th St., Engineer's Gate; 5th Ave. and 96th St., Woodman's Gate; 5th Ave. and 102d St., Girl's Gate; 5th Ave. and 110th St., Pioneer's Gate; 6th Ave. and 110th St., Farmer's Gate; 7th Ave. and 110th St., Warrior's Gate.

## UNION SQUARE.

Union Square was purchased by the city in 1833 for \$116,051; Madison Square, in 1847, for \$65,952; Tompkins Square, in 1834 for \$93,358; Washington Square, in 1827, for \$77,970; and Manhattan Square, in 1839, for \$54,657.

The first park space in the City of New York was that now called Bowling Green Park. In 1732 this plot of ground was leased by citizens for playing the game of bowls. The plot was originally square and in the middle there was erected, in 1770, a lead statue of George III. After the Declaration of Independence the statue was torn down by a mob and the lead used

to making bullets for the American army. In 1786 Bowling Green was first laid out as a park. At that time it was the centre of the fashionable residential district.

## THE BATTERY.

Open water existed originally where the Staten Island Ferry houses now stand, and the site of the Aquarium was under water until about 1800. State Street was not laid out until 1789, and was then bounded by the Bay on one side. A ledge of rocks stretched across Manhattan Island, and facing these rocks along the edge of the water there was built in the early days a line of defensive works known as "The Battery." These works extended from Whitehall Street to what is now Rector Street, and cannon were mounted behind them. About 1723 the first steps were taken to fill in to the present water line, but many years passed before this was actually accomplished.

## CITY HALL PARK.

The present City Hall Park constitutes a part of what was known in the latter half of the seventeenth century as "The Common Lands," which stretched from the site of the Post Office northward toward the Tombs and from the line of Broadway across what is now Park Row. This land was originally used for the grazing of cattle and at its northeasterly end was what was known as "Fresh Water Pond." The land originally comprising The Commons was gradually reduced by the laying out of streets and the construction of buildings. At the close of the Revolutionary War improvements were begun in City Hall Park. The erection of the present City Hall was authorized in 1803 and it was ready for occupancy in 1811. During the Civil War the present site of the Post Office Building was occupied by sheds where the soldiers were supplied with food. After the war it was ceded to the United States Government as a site for the Post Office.

## 1,000,000 TREES IN THE ENTIRE CITY.

There are in Manhattan Borough, according to Park Commissioner Francis D. Gallatin, about 130,000 trees, of eighty varieties, of which 90,000 are in Central Park, 25,000 in other parks, and 15,000 in the streets. These trees die at the rate of 3,500 a year, and 2,500 new trees are planted. In the entire city there are, it is estimated, over 1,000,000 trees.

## PARKWAY.

Forest... 2.5 | Jamaica Avenue to Forest Park.

## PUBLIC GOLF LINKS.

Located in Forest Park, on Myrtle, Woodhaven and Jamaica Avenues; consists of 118 acres and an 18-hole course. Golf House at Forest Parkway.

## PARKS IN RICHMOND BOROUGH (STATEN ISLAND).

Silver Lake, bounded by Revere Ave., University Pl., Forest Ave., Richmond Turnpike and Clove Pl. 96.27 acres water; 68.84 acres land.

Tompkinsville Sq., bounded by Arrietta, Bay and Griffin Sts., 0.44 acres.

Barrett Park, at St. George, 0.20 acres.

Westerleigh Park, bounded by Maine, Williard, Springfield and Neal Dow Aves.; 1.43 acres.

Washington Park, Stapleton, bounded by Bay, Canal, Wright and Water Sts.; 1.43 acres.

Hero Park, bounded by Richmond Turnpike, Louis St. and Howard Ave.; 1.92 acres.

Clifton Park, bounded by Vanderbilt Ave., Bay St., and the Rapid Transit R. R.; 0.18 acres.

Port Richmond Park, bounded by Park and Heberton Aves., and Bennett and New Sts.; 1.28 acres.

Among the proposed parks is Clove Lake Park, 191 acres, bounded by Forest, Slosson and Brookside Aves.

PARKWAYS IN RICHMOND BOROUGH.

St. Austins Place, New Brighton, between St. Austins Place N. and St. Austins Place S.; 0.14 acres.

Haven Esplanade, Forest Ave. to Castleton Ave.; 0.18 acres.

Henderson Avenue, New Brighton, Henderson Ave., east side and Davis Ave.; 0.01 acres.

Canal Street, Stapleton, between Broad St. and Wright St.; 0.20 acres.

Ellicott Place, New Brighton, between Arnold St. and Prospect Ave.; 0.10 acres.

Maple Avenue, Mariners Harbor, between Netherland Ave. and Linden Ave.; 0.64 acres.

## PUBLIC MARKETS IN NEW YORK CITY.

Under the supervision of the Municipal Department of Public Markets.

The public markets are West Washington, Gansevoort, Washington, Jefferson and Delancey in Manhattan, and Wallabout in Brooklyn.

Washington Market, at Fulton and West Streets, covers an area of 175 x 203 feet, and was established in 1812. Meat, fish and game, butter, eggs, cheese, fruits and vegetables are sold there. The city charges for space in this market.

West Washington Market, established in 1889 at Gansevoort and West Streets, covers 369 x 400 feet. There are ten buildings—two-story structures in blocks of twenty stands, with marketing space on the first floor and offices on the second. It is a wholesale market in which meat, garden produce and live poultry are sold. The stalls are leased.

Jefferson Market, at Greenwich Avenue and Sixth Avenue, occupies 36,000 square feet. This is a retail market. Space is rented by the city to dealers.

Gansevoort Market, an open square bounded by West, Little West Twelfth, Washington and Gansevoort Streets, has no buildings of any kind. It is by legislation restricted to the use of farmers and gardeners for the sale of products they themselves have grown. Each farmer is charged 25 cents daily. It is mostly a wholesale market for dealers.

Delancey Street Market is under the approach to Williamsburg Bridge at Pitt and Willett Streets, where fish, vegetables and fruits and miscellaneous dry goods are sold. It occupies a space 400 x 100 feet.

Harlem Market—Under Harlem Bridge, 130th Street and 3d Avenue. Things are sold at retail. Queensboro Market, retail, under Queensboro Bridge; Manhattan approach, 1st Avenue, Avenue A, 59th and 60th Streets.

Wallabout Market has an area of thirty-six acres. It extends from Clinton Avenue to East Avenue, to Wallabout Basin. The city owns the land and the ground is leased. Many farmers use this market to sell their produce to dealers, and pay 25 cents a day for each wagon space in the market. Mostly all the purchases are wholesale.

Jamaica Public Market, parallel to L. I. R. R., Archer Avenue and Twombly Place. This is a farm produce market, established April, 1920.

There are about 34 open air street (pushcart) markets in Manhattan, 2 in the Bronx, and 18 in Brooklyn, under the direction of a supervisor of the Department of Public Markets. Prices are regulated by the department, and are sanctioned by the Board of Aldermen.

## THE NEW YORK PUBLIC LIBRARY.

(Prepared for The Almanac by Edmund L. Pearson, Editor of Publications of the Library.)

The corporate existence of the New York Public Library began May 23, 1895, by the consolidation of the Astor Library, the Lenox Library and the Tilden Trust. The Astor Library, incorporated 1849, owned at the time of consolidation a fund of \$941,000 and 266,147 books. The Lenox Library, incorporated 1879, owned in 1895 a fund of \$505,000 and 86,000 books. The Tilden Trust (founded by Samuel J. Tilden, who died 1886), brought to the library \$2,000,000. In 1901, the New York Free Circulating Library, with 11 branches, was consolidated with the new system. Between 1901 and 1904, the New York Free Circulating Library for the Blind, the Agular, St. Agnes, Harlem, Tottenville, Washington Heights, University Settlement, Webster, and Cathedral Libraries all joined the corporation. In 1901 Andrew Carnegie gave \$5,200,000 to Greater New York for library buildings, on condition that the city provide the land and maintain the libraries when built. With the part of this sum which was assigned to the New York Public Library, 37 branch libraries have been built. (The Boroughs of Brooklyn and Queens have their own libraries. The New York Public Library serves the Boroughs of Manhattan, the Bronx and Richmond.) There are in the New York Public Library, 42 branches in all. In addition there are six sub-branches, in buildings not owned by the library. In 1909 John S. Kennedy left the library \$3,000,000.

The Central Building of the library, Fifth Avenue and 42d Street, built by the city, was opened May 23, 1911; cost, \$9,000,000; architects, Carrere and Hastings; hours, week days, including holidays, 9 A. M. to 10 P. M.; Sundays, 1 P. M. to 10 P. M. It contains the Reference Department, the descendant of the Astor and Lenox Libraries, and the headquarters of the Circulation Department (the branch libraries). Reference Department has 1,468,521 books and pamphlets; the Circulation Department has 1,161,608 books. Exceeded in size only by the Library of Congress in this country, and by two or three European libraries, it is the first library in the world in point of use. The number of persons recorded as using the Reference Department in 1921 was 1,157,275. The actual use is much larger; the count includes only those who apply on written slips for books. The number of books lent for home use by the Circulation Department in 1921 was 10,226,366. From 6,000 to 11,000 persons enter the Central Building daily. To maintain the Reference Department in 1921 the library disbursed, \$979,221.26, chiefly from its own endowments. In 1921 the disbursement for the Municipal Reference Branch, in the Municipal Building, was \$22,725.21, of which sum the city gave \$22,312.85. For the Circulation Department in 1921 was expended \$1,190,982.72, of which the city gave \$1,099,858.81. No public funds are spent for books, salaries, or other costs of the Reference Department in the Central Building, or for the Central Circulation Branch and Central Children's Room in that building.

The branch library buildings usually contain lending and reference departments for adults, similar departments for children, lecture rooms used for meetings for educational purposes and for organizations for social betterment. The branch libraries work in concert with the schools and pay special attention to the Americanization of foreign-born

citizens. The Reference Department, in the Central Building, in addition to its main reading room, with seats for 768 readers, has special rooms devoted to art and prints, American history, maps, manuscripts, music, genealogy, Slavonic literature, Jewish literature, Oriental literature, economics and public documents, books for the blind, current periodicals, science and technology, and current newspapers. There are three exhibition rooms, and two galleries which are devoted to the Lenox and Stuart art collections, with portraits of Washington, by Gilbert Stuart, paintings by Reynolds, Raeburn, Cooley, Turner, &c. The Avery collection of prints is notable. Valuable books include the Astor and Lenox collections, particularly strong in Americana, with many early printed Bibles, first folio Shakespeares, &c.; and the Spencer collection of illustrated books in fine bindings.

The library has 1,236 employees, counting both departments. A training school for librarians is maintained in the building. Director of the Library, Edwin H. Anderson. Chief Reference Librarian, Harry M. Lydenberg. Chief of Circulation Department, Franklin F. Hopper.

R.; Winfield, Queens Boulevard and Ramsey St.

Numerous other distributing agencies of travelling library such as community stations, village collections, and institutional stations.

All branch libraries are open daily except Sunday from 9 A. M. to 9 P. M. Bayside and Whitestone are open Monday, Wednesday and Friday, 10 A. M. to 6 P. M. Tuesday, Thursday and Saturday, 1 P. M. to 9 P. M. Queens is open Monday, Wednesday and Friday, 9 A. M. to 5.30 P. M. Tuesday, Thursday and Saturday, 1 P. M. to 9 P. M. Woodside branch, Monday, Wednesday and Friday, 1 P. M. to 9 P. M. Tuesday, Thursday and Saturday, 10 A. M. to 6 P. M.; Steinway branch, Monday, Wednesday and Friday, 12 M. to 9 P. M. Tuesday, Thursday and Saturday, 10 A. M. to 6 P. M. All branch libraries are open from 9 to 12 M. on all holidays except New Year's, Fourth of July, Labor Day, Thanksgiving and Christmas, on which days they are closed all day.

#### PUBLIC BATHS IN THE CITY OF NEW YORK.

##### MANHATTAN.

Pool and Shower Baths—100 Cherry St., at Oliver St.; 133 Allen St.; 326 Rivington St.; 5 Rutgers Pl.; 83 Carmine St.; Ave. A and E. 23d St.; W. 28th St., bet. 9th and 10th Aves.; 342 E. 54th St.; 232 W. 60th St.; 523 E. 76th St.; 243 E. 109th St.

Floating Baths—Two at the Battery, one for men, the other for women; foot of Pier 33, East River, near Pike St.; foot of E. 10th St.; foot of E. 90th St.; foot of E. 120th St.; foot of W. 99th St.; foot of W. 130th St. The floating baths, except those at the Battery, are for men on certain days

and for women on the other days. All the floating baths are open daily, from July 1 to October 1.

The Board of Education maintains baths for pupils, in the public schools throughout the city.

##### BROOKLYN.

The municipal baths in Brooklyn are at 486 Hicks St.; 4th Ave. and President St.; 42 Duffield St.; 6 Wilson (old Hamburg) Ave.; 14 Montrose Ave.; 139 Huron St.; 1752 Pitkin Ave.; 8th St., Long Island City; and Surf Ave., Coney Island.

The municipal bath in the Bronx is at Elton Ave. and 166th St.

## MUSEUMS IN NEW YORK CITY.

**AQUARIUM**—Battery Park. Open, free, every day; April-Sept., 9 A. M. to 5 P. M.; Oct.-March, 10 A. M. to 4 P. M.

**METROPOLITAN MUSEUM OF ART**—Fifth Ave. and 80th-84th Sts. Open, Winter, 10 A. M. to 5.30 P. M.; Summer, 10 A. M. to 6 P. M.; Sundays, open 1 P. M. Free daily (except Mondays and Fridays, 25c.).

**AMERICAN MUSEUM OF NATURAL HISTORY**—77th St. between Columbus Ave. and Central Park West. Open, free, every day; week days, 9 A. M. to 5 P. M.; Sundays, 1 P. M. to 5 P. M.

**NEW YORK HISTORICAL SOCIETY AND MUSEUM**—Central Park West and 76th St. Open daily 9 A. M. to 5 P. M.; Sundays, 2 P. M. to 5 P. M., except July-Aug.-Sept. Admission free. Closed

during August and on Christmas, New Year's and July 4.

**NEW YORK BOTANICAL GARDEN**—Bronx Park; north of Pelham Parkway. Open daily.

**BRONX ZOO**—Bronx Park. Open daily, 10 A. M. to half hour before sunset. Free (except Mondays and Thursdays, 25c.).

**CENTRAL PARK ZOO**—Fifth Ave. and 63d St.; daily, free.

**BROOKLYN INSTITUTE OF ARTS AND SCIENCES, CENTRAL MUSEUM**—Eastern Parkway and Washington Ave. Open daily, weekdays 9 A. M. to 5 P. M.; Sundays, 2 P. M. to 6 P. M. Free (except Mondays and Tuesdays, 25c.). Children's Museum, 185 Brooklyn Ave. Free. Open daily, 10 A. M. to 5 P. M.; Sundays, 2 P. M. to 5 P. M. **BROOKLYN BOTANIC GARDEN**—Flatbush Ave. and Malbone St. (Empire B'y'd). Open daily, free.

## THE NEW YORK AQUARIUM IN BATTERY PARK.

(By Charles H. Townsend, Director.)

THE Aquarium Building was erected in 1807 by the United States Government as a fort, called West Battery, and after the war of 1812 was called Castle Clinton. It had a battery of thirty guns, the embrasures for which still remain in the outer wall, which is nine feet thick. The old ammunition rooms are surrounded with walls of masonry fifteen feet thick. In 1823 the building was ceded by Congress to the City of New York and used as a place of amusement called Castle Garden, which had a seating capacity of 6,000. It was connected with Battery Park by a bridge, the intervening space having since been filled in. Gen. Lafayette was received here in 1824; President Jackson in 1832; President Tyler in 1843; Louis Kossuth in 1851. Prof. Morse, inventor of the telegraph, demonstrated here in 1835 the use of the Morse telegraphic code. Jenny Lind began singing here in 1850 under the management of P. T. Barnum. Among other notables received here were President Van Buren and the Prince of Wales. The building was used as a landing place for immigrants from 1855 to 1890, during which period 7,690,606 immigrants passed through its doors.

Then, for several years, the historic old structure was in process of repair for the use of the Aquarium, which was opened by the city on Dec. 10, 1896; and on Nov. 1, 1902, its management was transferred from the Department of Parks to the New York Zoological Society, a private scientific association with a membership of 2,550.

The Aquarium is reached by all elevated, surface and subway lines running to South Ferry. The building is open free, every day in the year. The hours for visitors are: 9 A. M. to 5 P. M., April-September; 10 A. M. to 4 P. M., October-March.

The attendance exceeds 2,000,000 visitors a year.

The New York Aquarium is the largest in the world and contains a greater number of species and of specimens than any other. It has 7 large floor pools, 94 large wall tanks and 30 smaller tanks. There are also 26 reserve tanks containing specimens not on exhibition. The building is circular in form, with a diameter of 205 feet. The largest pool is 37 feet in diameter and 7 feet deep. During 1922 the space available for exhibits will be increased one-fifth. The exhibits include fishes, turtles, crocodilians, frogs, salamanders, marine mammals and invertebrates, and are both northern and tropical in character. There are usually about 200 species of fishes and other aquatic vertebrates on exhibition. The total number of specimens, exclusive of invertebrates and young fry in the hatchery, varies from 5,000 to 6,000. Most of the local fresh-water and salt-water species are collected by the employees. Tropical fishes are brought by steamer from the Bermuda Islands.

The fish hatchery, maintained as a fish-cultural exhibit, produces yearly from three to eight millions of young food and game fishes, which are afterward deposited in New York State waters. The Aquarium is equipped for heating sea water for tropical fishes in winter, and has a refrigerating plant for cooling fresh water in summer. Flowing fresh water is supplied from the city water system, while the pumps circulate about 300,000 gallons of salt water daily. The pumps run day and night. The salt water tanks are supplied from a reservoir holding 100,000 gallons of pure stored sea water. This water, originally brought in by steamer, is used as "closed circulation," the water being pumped through the exhibition tanks, falling thence through sand filters back to the reservoir. It has been in continuous circulation since 1908.

## NEW YORK ZOOLOGICAL PARK.

(By W. T. Hornaday, the Director.)

THE New York Zoological Park was founded in 1895 by the New York Zoological Society, a scientific corporation. The park was formally opened Nov. 9, 1899. The grounds, many of the buildings, and an annual maintenance fund are provided by the city. The remainder of the buildings and the animal collections are furnished by the society, which is also charged with the direct management of the park.

The Zoological Park is free to the public on all days of the week except Mondays and Thursdays. Should Monday or Thursday fall on a legal holiday, admission to the Zoological Park is free. The opening and closing hours are 10 A. M. until one-half hour before sunset. On pay days admission for adults is 25 cents, and for children under twelve years, 15 cents. The park embraces a tract of 284 acres. It contains thirty-five acres of water, and its land consists of heavy forest, open forest and meadow glades, in about equal proportions. The park is about one mile long and three-fifths of a mile wide.

The principal buildings are the Elephant, Lion Primate, Zebra, Large Bird, Reptile, Antelope, Ostrich and Small Mammal Houses, and the Aquatic Bird House. The principal open-air enclosures are the Bear Den, Flying Cage, Pheasant Aviary, the Eagle and Vulture Aviary, Wolf and Fox Dens, Burrowing Rodent Quarters, Beaver Pond, Duck Aviary, Wild Fowl Pond and Mountain Sheep Hill. The most valuable and important mammal collections are the apes, baboons and monkeys, the lions, tigers and leopards, the zebra and wild horse collection, the antelopes and deer, the bears, and the huge specimens in the Elephant House, comprising elephants, rhinoceroses and hippopotami. The collection of living birds in the Zoological Park is the

largest and most varied to be found anywhere in the world. The collection of birds of paradise, including the rare bluebird of paradise, and the collections of parrots, parakeets and lorises easily rank among the finest of their kind.

On May 25, 1922, the National Collection of heads and horns, for which a special museum building had been erected by the gifts of ten members of the Zoological Society, was dedicated and opened to the public. This collection is now displayed free to the public "in memory of the vanishing big game of the world." Both the collection and the building to contain it are quite unique, and the collection is the most complete for all the hoofed, horned and furred animal species of the world. The total value of the building and collection is more than \$500,000.

In 1921 the census of the collections in the park was 623 mammals representing 185 species, 2174 birds of 750 species, and 465 reptiles and amphibians, representing 73 species. Total number of specimens, 2,174; total number of species, 1,008. The attendance of visitors for 1921 was 2,562,138, an increase over the previous year of 311,961.

Routes to the Zoological Park—**Automobiles**—Lenox Avenue north to 145th Street; act as Harlem River to 149th Street, continuing to top of hill, turn left at Mott Avenue; thence north along Franz Sigel Park to Grand Boulevard and Concourse; thence along Grand Boulevard and Concourse for about two miles to Fordham Road; thence to the right and continuing to the park. **Subway**—Seventh Avenue Division, Bronx Park train to end of the line at 180th Street and Boston Road entrance to the Zoological Park. Lexington Avenue Division, East 180th Street train to 177th Street and change to Bronx Park train to end of line at 180th Street.

## NEW YORK HISTORICAL SOCIETY GALLERY AND MUSEUM.

THE New York Historical Society, founded in 1804, is open free to the public daily, 9 A. M. to 5 P. M.; Sundays, 2-5 P. M., except July, August and September, and on holidays 1 to 5 P. M. (excepting Christmas, New Year's and July 4. Closed for the month of August for cleaning and repairs). The society has occupied since 1908 the building on Central Park West between 76th and 77th Streets, completed and furnished by the Society at a cost of \$1,000,000, including the land. The home before that was on Second Avenue. It is supported by endowment funds and membership fees without aid from city or State. The society maintains a library, museum and gallery of art. The library contains 130,000 volumes and 150,000 pamphlets, newspapers, prints, maps and a large collection of manuscripts, all relating to American history. The newspaper collection numbers 5,386 volumes, of which 3,181 were printed in this city and State. The earliest file being the "Boston News-Letter," beginning in 1704. The first newspaper printed in New York City was "The New York Gazette," established in 1725 by William Bradford, the first printer in the Colony of New York. The society's file of this paper begins with 1730. The largest collection of New York City and State newspapers may be found here. The old New York prints cover the period from the earliest "View of the City," published in 1651, to modern times, and is unrivaled in its completeness by either private or public collections elsewhere, among which may be mentioned The Burgess View of the City, 1717, of which only one other copy is known; the Maverick View of Wall Street, about 1825, and the Tiebout Engraving of the City Hall on Wall Street. The maps include the James Lynes survey of the city in 1731, published by William Bradford—the first engraved map of the city published—one of three known copies; the Dyckinck plan of 1755, the Ratzer map of 1767, and the commissioners' map of 1811, besides a large collection of atlases and maps of all periods. The more im-

portant manuscripts are the Cadwallader Golden papers, De Peyster family papers, James Duane papers, Albert Gallatin papers, General Horatio Gates papers, diary of Philo Hone, Rufus King papers, Lloyd family papers, Rutherford papers, and Lord Sterling papers.

The museum contains many relics of New York and American history, besides an Egyptian collection of 3,000 objects, the first brought to America. Three mummified bulls from the tombs are features, while every form of Egyptian art during the Old and Middle Kingdom and the Empire, 2900-1167 B. C., is represented. The collection is especially rich in papyrus. The society also possesses the Nineveh sculptures, presented in 1858 by the late James Lenox. Of local relics the Beekman family coach, used before the Revolutionary War, in this city, may be mentioned, as well as the remains of the famous equestrian statue of King George III., and the statue of William Pitt (the Earl of Chatham), champion of the American cause in Parliament.

The Gallery of Art now numbers over 1,000 paintings, including old masters. Over 300 of the paintings are American portraits: George Washington by Stuart, Peale and Durand, John Adams, John Quincy Adams, Bayard family portraits, Aaron Burr, Henry Clay, George and De Witt Clinton, John S. Copley by himself, De Peyster family portraits, Hamilton Fish, Benjamin Franklin, Albert Gallatin, Fitz-Greene Hallack, Alexander Hamilton, Andrew Jackson, John Jay, Thomas Jefferson, Lafayette, James Madison, Oliver H. Perry, Edgar Allan Poe, Red Jacket, Schuyler family portraits, Stuyvesant family portraits, Zachary Taylor, Daniel Webster, and N. P. Willis. The society also possesses the original water color drawings made by John James Audubon for his "Birds of America"—460 beautifully executed pictures. Special exhibitions of the society's collections are held from time to time to which the public is invited. Since the occupation of the present building in 1908 the society's treasures in art and literature have been exhibited and freely placed at the disposal of the public for its enjoyment, use and study.

## NEW YORK BOTANICAL GARDEN.

THE New York Botanical Garden occupies a reservation of nearly 400 acres of Bronx Park north of Pelham Parkway. The tract includes the beautiful natural features of the valley of the Bronx River, its gorge, its waterfall and its rapids, and over 100 acres of natural woodland, including the famous Hemlock Forest, the most southern grove of hemlock spruce near the Atlantic Coast. The institution was chartered by the Legislature of New York, 1891, and the first reservation of 250 acres was set aside by the city in 1895, and about 140 acres were added by the city in 1915. The grounds and buildings are open to the public every day in the year without charge.

**Museum Building**, situated a short distance from the Botanical Garden Station of the New York Central & Hudson River Railroad, has a frontage of 312 feet, is Italian Renaissance; front approach is ornamented by a bronze fountain by Carl E. Tefft and by terra cotta and marble fountains and seats; the vista lines are formed by four parallel lines of tulip trees. Three floors are devoted to public exhibits.

There is a large public lecture hall in the basement of the museum building, in which free public lec-

tures are given every Saturday afternoon from Spring until Autumn. The upper floor of the building contains the library of 20,000 volumes on botany, horticulture and related sciences, including several special collections; the herbarium, containing prepared and dried specimens of plants from all parts of the world, occupies the greater portion of several rooms on the upper floor and comprises some 1,500,000 specimens. There are also laboratories equipped for research on the upper floor, to which properly qualified students of botany are admitted and instructed by one or another member of the garden staff.

The Conservatories include two ranges in the southern and eastern parts of the grounds. In them are housed collections of palms, cacti and other succulents, ferns, orchids, aquatics, and other groups of exotic plants. Flower shows and lectures are held in the central display house of Conservatory range 2, near the Allerton Ave. entrance.

The gardens, besides displays of shrubs, trees, and herbaceous plants, include flowering displays in season of tulips, narcissus, irises, peonies, roses, gladioli and dahlias.

**The Mansion**—A large stone house built by the Lorillard family in 1850 stands above the Bronx River near the waterfall.

## BROOKLYN BOTANICAL GARDEN.

THE Brooklyn Botanic Garden, located between Eastern Parkway and Empire Boulevard, and Flatbush and Washington Avenues was opened to the public on Linnaeus's birthday, May 13, 1911. The Garden comprises about 50 acres of land, on which are located the various plantations, the conservatories, and the laboratory building. The object of the Garden is the advancement and diffusion of a knowledge and love of plants, and its special aim is to be of service to the local community. The grounds are open free to the public daily. The Garden is supported, in part only, by the city.

The Native Wild Flower Garden contains about 900 species that grow without cultivation within 100 miles of New York City; the Rock Garden contains over 600 species of alpine and other rock-loving plants; the Japanese Garden has been pronounced the most perfect specimen of that kind of garden in any public park in America; the general Systematic Garden, chiefly of European herbs and shrubs, occupies the central portion of the grounds; the Ecolog-

ical Garden illustrates the relation of plants to various factors of environment, such as water, light, gravity, insects, etc. The Iris Garden extends along the brook, and the Children's Garden, containing over 250 individual plots, are at the south end of the grounds. A library of over 13,000 books and pamphlets on plant life and gardening is open free to the public, and also the herbarium of over 150,000 specimens. Illustrated lectures and occasional exhibits are also open free. The Conservatories contain a collection of tropical and sub-tropical plants, including those used for food, fibre, and other economic purposes, including banana, sugarcane, tea, coffee, rubber, hemp, papyrus, figs, citrus fruits, etc.

## FLOWER GARDENS IN PROSPECT PARK.

Owing to their accessibility, the Greenhouse (where flower shows are given in season), the Old Fashioned Flower Garden and the Zoo, in Prospect Park, are visited yearly by hundreds of thousands on foot and in vehicles.

## MUSEUMS OF THE BROOKLYN INSTITUTE OF ARTS AND SCIENCES.

THE Central Museum (Brooklyn Museum) on Eastern Parkway and Washington Ave., the Children's Museum in Bedford Park, the Department of Education with activities in the Academy of Music building, the Brooklyn Botanic Garden, adjoining the Museum, and the Biological Laboratory at Cold Spring Harbor, L. I., are under the general management of the Trustees of the Brooklyn Institute of Arts and Sciences, though each department has its own Director and Governing Committee. The Museum and the Botanic Garden receive appropriations from the city for maintenance, and their collections are provided for entirely from private sources. The construction work is done through the Department of Parks and the bills are audited through this department. The new wing of the Central Museum was finished in part in 1914.

## THE HALL OF FAME.

(Director, Dr. Robert Underwood Johnson.)

March 5, 1900, the Council of New York University accepted a gift of \$100,000, afterward increased to \$250,000, from a donor, whose name was withheld, for the erection and completion on University Heights, New York City, of a building to be called "The Hall of Fame for Great Americans."

A structure was built in the form of a terrace with superimposed colonnade connecting the University Hall of Philosophy with the Hall of Languages. On the ground floor is a museum 200 feet long by 40 feet wide, consisting of a corridor and six halls to contain mementoes of the names that are inscribed above. The colonnade over this is 600 feet long with provision for 150 panels, each about 2 feet by 6 feet, each to bear the name of a famous American.

Only persons who shall have been dead twenty-five or more years are eligible to be chosen. Fifteen classes of citizens were recommended for consideration, to wit: Authors and editors, business men, educators, inventors, missionaries and explorers, philanthropists and reformers, preachers and theologians, scientists, engineers and architects, lawyers and judges, musicians, painters and sculptors,

It is expected that the city will shortly complete it. The Eastern Parkway-Brooklyn Museum station of the Interborough Subway is directly in front of the Museum building.

The Central Museum contains a noteworthy collection of paintings, sculpture, carvings, textiles and other objects of art; archaeological gatherings, Egyptian relics and jewelry, Oriental objects, including Japanese, Chinese and East Indian armor and ornaments, objects from American Indian life and legends, etc.; Natural History, minerals, zoological collections, especially the fauna of Long island, habitat groups, etc.

The Children's Museum, the first established of its kind, aided by an influential Woman's Auxiliary Committee interests and instructs thousands of children through its lectures and nature clubs and its historical and natural history exhibits.

physicians and surgeons, rulers and statesmen, soldiers and sailors, distinguished men and women outside the above classes. Fifty names were to be inscribed on the tablets at the beginning, and five additional names every fifth year thereafter, until the year 2000, when the 150 inscriptions will be completed.

In February, 1904, the plan was announced of a Hall of Fame for Women near the former, with places for 50 tablets. This plan later was abandoned, and men and women now are admitted to one and the same Hall of Fame.

The rules prescribed that the council shall invite nominations from the public. Every nomination seconded by a member of the University Senate shall be submitted to an electorate of one hundred eminent citizens selected by the senate. Executive office of the Hall of Fame is at No. 342 Madison Avenue, New York.

The hall was dedicated May 30, 1901, when twenty-five or more national associations each unveiled one of the bronze tablets in the colonnade, and on May 30, 1907, eleven new tablets were unveiled, orations being given by the Governors of New York and Massachusetts.

## AMERICANS IN THE HALL OF FAME.

Chosen in 1900—George Washington, Abraham Lincoln, Daniel Webster, Benjamin Franklin, Ulysses S. Grant, John Marshall, Thomas Jefferson, Ralph Waldo Emerson, Henry W. Longfellow, Robert Fulton, Washington Irving, Jonathan Edwards, Samuel F. B. Morse, David G. Farragut, Henry Clay, Nathaniel Hawthorne, George Peabody, Robert E. Lee, Peter Cooper, Eli Whitney, John J. Audubon, Horace Mann, Henry Ward Beecher, James Kent, Joseph Story, John Adams, William E. Channing, Gilbert Stuart and Asa Gray.

Chosen in 1905—John Quincy Adams, James Russell Lowell, William T. Sherman, James Madison, John G. Whittier, Mary Lyon, Emma Willard, Maria Mitchell.

Chosen in 1910—Harriet Beecher Stowe, Oliver Wendell Holmes, Edgar Allan Poe, James Fenimore Cooper, Phillips Brooks, William Cullen Bryant, Frances E. Willard, Andrew Jackson, George Bancroft, John Lathrop Motley.

Chosen in 1915—Alexander Hamilton, Mark Hopkins, Francis Parkman, Louis Agassiz, Elias Howe, Joseph Henry, Rufus Choate, Daniel Boone, Charlotte Cushman. Of these Hamilton and Agassiz

had been elected in 1905 to the separate hall proposed for famous foreign-born Americans. When the Constitution was amended in 1914 to do away with the line of discrimination between native-born and foreign-born, it was required that the four foreign-born, already chosen, be re-elected in competition with the native-born put in nomination. Two above named were approved, while John Paul Jones and Roger Williams lacked the votes.

Chosen in 1920—Samuel L. Clemens (Mark Twain), James B. Eads, Patrick Henry, William T. G. Morton, Augustus Saint-Gaudens, Roger Williams, Alice Freeman Palmer.

Total to date—Fifty-six men, seven women. On May 2, 1921, there was a public unveiling at the Hall of Fame on University Heights of twenty-six bronze tablets bearing the names of men and women who have been elected in this and previous elections, thirty-seven tablets having already been unveiled.

In May, 1922, busts of Edgar Allan Poe, George Washington, Gen. U. S. Grant, Miss Maria Mitchell, and Mark Hopkins were unveiled. The only other busts in the hall are those of Robert Fulton and Horace Mann, unveiled several years ago.

## MEMORIAL TO AMERICAN PAINTERS, SCULPTORS AND ARCHITECTS.

A plan to create a memorial to American painters, sculptors and architects in Gould Memorial Library of New York University was inaugurated in 1921. Only busts of painters and architects will be placed in the reading room. The architects' corner will be in the hallway of the main entrance. Busts of George Inness, Clinton Orlive Carroll Beckwith, Walter Shirlaw and J. Q. A. Ward already have been placed in the reading room. Present plans

call for a bust to be placed at the foot of each of the sixteen columns of Cornelian marble that encircle the reading room. Bronze doors have been hung at the main entrance as a memorial to Stanford White, who designed the library.

Gould Memorial Library is one of the group of university buildings in which is included the Hall of Fame, but the plans for the two memorials are unrelated movements.

## MUSEUM OF THE AMERICAN INDIAN.

The Museum of the American Indian (Heye Foundation), at Broadway and One Hundred and Fifty-fifth Street, houses the most complete collection of Indian relics ever assembled, totalling over 2,000,000 exhibits. The tracing of the Indian trails of New York and its vicinity, which is the work of Reginald Pelham Bolton, throws a new light on an unfamiliar period of local history.

Years of patient and intelligent research have been required to fix these ancient trails and re-

construct the civilization which once spread over the present site of New York City. Every section of the city has been explored for relics, often with gratifying results. The written history of the period and every possible reference in old manuscripts, maps and documents have been compared. Tens of thousands of references have been made and an elaborate card index system followed in preserving them. Millions of people to-day are following these trails, which have become busy city streets or great highways of trade.

## NEW YORK FOUNDATIONS SPEED WORLD'S SOCIAL PROGRESS.

(From Better Times, N. Y.)

THE greatest fortune in America, if not in the whole world, is dedicated to the cause of humanity. No single millionaire in this or any other country can match the vast wealth held in trust by the great philanthropic foundations of New York for the betterment of mankind.

Ten of these great trusts hold, for purposes of general social welfare, funds conservatively estimated at more than half a billion dollars, though the actual total is probably much more.

Where these great funds came from, and to what purposes they are dedicated is of interest.

The Brez Foundation is probably the least known of the group. It was incorporated in 1917, in accordance with the will of one Brez, a watchmaker born in New York of Swiss parents who died in Switzerland about twenty years ago. By the terms of this will Mr Brez's daughter enjoyed the income of his estate for life. Should she die without issue the will directed that a corporation to be known as the Brez Foundation be formed to hold and administer the estate and to pay out the income to charitable institutions and for philanthropic purposes, the beneficiaries in every case to be within fifty miles of New York.

At the death of Miss Brez in 1916 the Foundation was formed. The selection of beneficiaries is entirely at the discretion of the trustees. In a general way the undertakings seeking support are considered in the following order: hospitals, orphan asylums, other charitable organizations, other philanthropic purposes, individuals. The exact amount held by the Foundation has never been announced but it is known to be not far from \$2,000,000.

The Carnegie benefactions form a vast, far-reaching network. It is estimated that the gifts of Andrew Carnegie to public causes, from 1881, when he made his first offer of a library to the City of Pittsburgh, until his death in 1919 amounted to \$288,743,360. This includes the endowment of two great foundations which bear his name, the Carnegie Corporation of New York, established in 1911, and the Carnegie Foundation for the Advancement of Teaching, formed in 1906. While both are primarily for the advancement of education, that being apparently the underlying motive of most of the Carnegie benefactions, both have certain provisions in their charters which leave them much latitude in the wide field of social welfare.

The stated purpose of the Carnegie Corporation is to "promote the advancement and diffusion of knowledge and understanding among the people of the United States by aiding technical schools, institutions of higher learning, libraries, scientific research, hero funds, useful publications, and by such other agencies and means as shall from time to time be found appropriate therefor."

Carnegie's gifts to the Corporation during his lifetime amounted to \$125,000,000, but as, by his will, it received the residue of his estate it undoubtedly at the present time controls a much larger sum. No announcement has ever been made as to the amount of the residue.

Since its organization the Corporation has appropriated about \$50,000,000 for purposes within its scope. Its donations to various wartime causes amounted to nearly \$3,000,000. For the studies of methods of Americanization, which were directed by Allen T. Burns, and which are now being published, the sum of \$190,000 was appropriated.

The Carnegie Foundation for the Advancement of Teaching, which is concerned with "those educational agencies which undertake to deal with the intellectual, social and moral progress of mankind," began with an endowment of \$15,000,000, but through additional gifts and accruals its total resources are now put at \$25,390,000. The largest expenditure of the Foundation is for retiring allowances and pensions to teachers and their dependents. This amounted in the last fiscal year to \$956,262. The beneficiaries numbered 999, representing eighty-nine different institutions. Since 1906 the Foundation has expended for this purpose \$3,920,661.

**Commonwealth Fund**—The Commonwealth Fund is among the youngest of the foundations, having been incorporated in 1918. It had its inception in the offer of a considerable sum by Mrs. Stephen V. Harkness, to be used for "benevolent, religious, educational and like purposes, of an eleemosynary character." This gift was in the form of securities with a value of \$9,956,111.90. A year later Mrs. Harkness added to her gift to the extent of \$6,879,925.26, making the total resources of the Fund approximately \$16,336,000.

During its first years the Fund made a careful

study of different fields of opportunity, and while it has made certain limited grants to miscellaneous and comparatively unrelated projects, its efforts in the main have been directed toward accomplishing results in three fields: Education, Child Welfare and Health. The most extensive project which the Fund is supporting is a study and demonstration, to extend over a five-year period, of methods of prevention of juvenile delinquency.

The Milbank Memorial Fund has been in existence for some time under the name of the Memorial Fund Association, but in March, 1921, it was increased by the will of Mrs. Elizabeth Milbank Anderson to approximately \$10,000,000. At that time the name was changed to Milbank Memorial Fund. Its purpose is "to further secular and religious education among all classes; to care for the sick, the young, the aged and disabled; to minister to the needs of the poor; to improve the physical, mental and moral condition of humanity and generally to advance charitable and benevolent objects."

The New York Foundation has an interesting history. It was incorporated in 1909 to disburse the income from a fund of \$1,000,000, left for philanthropic purposes by the late Louis Heinsheimer. Mr. Heinsheimer's will set aside this sum for Jewish charities provided that such charities, within a stated number of years, came together in a certain form of federation. The charities did not accomplish this organization within the time specified, but the surviving brothers of Mr. Heinsheimer, to whom, by the terms of the will, the estate reverted, were anxious to carry out the intention of their relative, and extended the time limit. Still the Jewish charities were unable to form the desired organization.

The Heinsheimer brothers then formed the New York Foundation to hold and administer the funds designated by Louis Heinsheimer for philanthropic purposes. The trustees have full power to disburse the income.

**Three Rockefeller Corporations**—The Rockefeller benefactions, like the Carnegie, are vast and far-reaching. Three great philanthropic boards have been formed for their administration; the General Education Board, incorporated in 1903, the Rockefeller Foundation, incorporated in 1913, and the Laura Spelman Rockefeller Memorial, established in 1920.

The Board has for its object "the promotion of education within the United States of America without distinction of race, sex or creed." Beginning with an initial sum of \$1,000,000, Mr. Rockefeller's gifts to the Board have mounted to \$126,788,000. Principal as well as income may be disbursed. The Board aids three general lines of education: Universities and Colleges, Medical Schools, and Negro Education. It has aided 207 institutions in these three groups with gifts totaling \$48,665,639. To secure these gifts the institutions concerned raised in addition nearly \$170,000,000.

The Rockefeller Foundation was chartered "to promote the well-being of mankind throughout the world, to provide an agency which shall deal with problems of human welfare in accordance with the principles and methods most approved in each generation." It devotes its resources almost entirely to public health and medical education, carrying on its activities through three departmental organizations: the International Health Board; the China Medical Board and the Division of Medical Education. The Foundation's principal funds are \$170,000,000, both the income and principal of which are available for appropriation.

The Laura Spelman Rockefeller Memorial was established by John D. Rockefeller as a memorial to his wife, who died in 1915. The particular objects for which the Corporation is formed "are the application to charitable purposes of the income, and, if the Corporation so decides, of the principal of such property as the Corporation may from time to time possess." The Memorial has no connection with the Rockefeller Foundation or any of the other benevolent boards or institutions established by Mr. Rockefeller. The trustees have full and unrestricted discretion in the use of the funds, but the general policy, in keeping with the spirit of Mrs. Rockefeller's avowed interests, is that gifts should be made particularly to activities looking to the improvement of the conditions of women and children. Since the Memorial was established Mr. Rockefeller has made over to it securities with a total of approximately \$64,000,000.

**The Sage Millions**—The Russell Sage Foundation was established in 1907 by Mrs. Sage in memory of her husband. The original endowment of \$10,000,000 was added to, at Mrs. Sage's death, by an additional sum of about \$5,000,000. This Foundation has for its purpose "the improvement of social and living conditions in the United States of America."

Its charter gives it very wide latitude as to the means which may be employed to achieve its purpose. It may, for instance, engage in "research, publication, education, the establishment and maintenance of charitable and benevolent activities, agencies and institutions, and the aid of any such activities, agencies and institutions already established."

The departments of the Foundation are: Charity Organization Department, Department of Child Helping, Department of Education, Division of Industrial Studies, Library, Department of Recreation, Division of Remedial Loans, Division of Statistics, Department of Surveys and Exhibits.

The Havens Relief Fund Society is less widely known than the newer foundations, though it has been active since 1870, when it was incorporated to administer an endowment received from Charles G. Havens. The amount of its resources is not publicly announced. The Society appropriates its income to corporate and individual almoners, charged to give "temporary relief to indigent persons to aid in restoring them to self-support."

The Altman Foundation is another great altruistic corporation which refrains from making public the extent of its resources. Incorporated in 1913, it administers funds accruing from the estate of the late B. Altman to promote the welfare of the employees of B. Altman & Co., a corporation, and to benefit "charitable, benevolent or educational institutions within the State of New York. The Foundation has not until very recently figured in any notable

altruistic projects. The new Chair of Fine Arts at New York University, which it will finance, is its first essay into the general field open to it by the terms of its charter.

**Millions for Specific Purposes.**—The great fortunes here enumerated are, it will be noted, only those which are held for general purposes of social welfare. The endowment of the Rockefeller Institute for Medical Research, for example, is not listed, since it is for a specific purpose. The Juilliard Foundation for the development of the musical arts is omitted for a like reason, as is also the Winifred Masterson Burke Relief Foundation for the benefit of convalescents, and the Baron de Hirsch Fund for the aid of resident Jewish immigrants. Should these and many other similar funds held for specific purposes be included the total amount of the vested wealth of charity would assume staggering proportions.

## THE STATUE OF LIBERTY.

THE STATUE OF LIBERTY on Bedloe's Island, New York Harbor, was first proposed, soon after the Franco-German War, by a group of prominent Frenchmen, who commissioned one of their number, Frederic August Bartholdi, sculptor (born 1833, died 1904), to do the work. The U. S. Congress, Feb. 22, 1877, authorized President Hayes to set apart a site on the island, which Bartholdi, on a visit, had suggested. A committee was formed in 1874, to raise funds. In France, 180 cities, 40 general councils, many societies, and thousands of people contributed. In the United States, by the aid of The World, \$300,000 was raised for the pedestal. The statue cost about \$700,000, making the total about \$1,000,000.

The head of the Statue was completed for the

Paris Exposition, in 1878; the forearm had been sent to America and shown at the Centennial Exposition, Philadelphia, in 1876. Thence it was transferred to Madison Square, New York City, where it remained until 1886. On Oct. 24, 1881, the anniversary of the Battle of Yorktown, all the pieces of the framework and base were put in place at Paris, Levi P. Morton, the American Ambassador, driving the first rivet. The Statue was finished in 1883; on July 4, 1884, M. De Lesseps, President of the French Committee, officially presented the Statue to Ambassador Morton; on Aug. 5, 1884, the cornerstone of the pedestal was laid on Bedloe's Island; late in June, 1885, the French vessel, *Isere*, from Rouen, France, landed the Statue at New York in 210 packing cases; the work of putting the parts together was begun in May, 1886, and the Statue was unveiled on Oct. 28, 1886.

## DIMENSIONS OF THE STATUE.

|                                      | Ft.   | In. |                                    | Ft. | In. |
|--------------------------------------|-------|-----|------------------------------------|-----|-----|
| Height from base to torch.....       | 151   | 1   | Distance across the eye.....       | 2   | 6   |
| Foundation of pedestal to torch..... | 305   | 6   | Length of nose.....                | 4   | 6   |
| Head to top of head.....             | 111   | 6   | Right arm, length.....             | 42  | 0   |

| Head, thickness from ear to ear..... | 10    | 0   | Tablet, thickness.....             | 2   | 0   |

## DIMENSIONS OF THE PEDESTAL.

|                                 | Ft. | In. |                                  | Ft. | In. |
|---------------------------------|-----|-----|----------------------------------|-----|-----|
| Height of pedestal.....         | 89  | 0   | Square sides at top, each.....   | 40  | 0   |
| Square sides at base, each..... | 62  | 0   | Grecian columns, above base..... | 72  | 8   |

## DIMENSIONS OF THE FOUNDATION.

|                             | Ft. | In. |                          | Ft. | In. |
|-----------------------------|-----|-----|--------------------------|-----|-----|
| Height of foundation.....   | 65  | 0   | Square sides at top..... | 66  | 7   |
| Square sides at bottom..... | 91  | 0   |                          |     |     |

The Statue weighs 450,000 pounds (225 tons); the bronze alone weighs 200,000 pounds, and is 3-16 of an inch thick; 40 persons can stand in the head,

and 12 in the torch; number of steps in statue, from pedestal to head, 154; number of rounds in ladder in uplifted right arm, 54.

## BEDLOE'S ISLAND HISTORY.

The Statue site, Bedloe's Island (Bedlow's Island), was named after Isaac Bedlow, who bought it from the old Colonial Government of New Amsterdam. It was called Kennedy's Island during the Revolution, after Capt. Kennedy, commander of the British Naval Station in New York. He bought the island from the trustees of Mary Smith, a daughter of

Bedlow, for one hundred pounds. In 1750 it was purchased by New York for a pest house site. In 1800 the State gave it to the general government. In 1841 the present star-shaped fort was built on the island, at a cost of \$213,000, 70 guns were mounted on the parapets, and a garrison of 350 men was stationed there.

## HOW TO FIND ANY STREET NUMBER IN NEW YORK.

To find what street is nearest, take the number, cancel last figure, and divide by 2, add the key number found below. The result will be the nearest street. The key numbers are: Avenue A, 3; Avenue B, 3; Avenue C, 3; Avenue D, 3; First Avenue, 3; Second Avenue, 3; Third Avenue, 9 or 10; Fourth Avenue, 8; Fifth Avenue to Central Park, 18 or 17, above Mount Morris Park, 24; Sixth Avenue, 6;

Seventh Avenue, 12, Eighth Avenue, 9; Ninth Avenue, 13; Tenth Avenue, 14, Eleventh Avenue, 15; Lexington Avenue, 22; Madison Avenue, 26; Park Avenue, 34 or 35; Columbus, Amsterdam, and West End Avenues, 59 or 60; Broadway above 14th Street (subtract), 30 or 31, Central Park West, divide house number by 10, and add 60; Riverside Drive, divide house number by 10, and add 72.

## CHURCHES IN THE CITY OF NEW YORK.

In the city of New York there are over 1,600 churches, attended each Sunday, it is estimated, by more than a million worshippers, of which 100,000, at least, are strangers visiting the metropolises.

## MANHATTAN.

There are three cathedrals: St. Patrick's (Roman Catholic), Fifth Ave. and 50th St.; the Cathedral of St. John the Divine (Protestant Episcopal), located on W. 111th St., between Amsterdam and Morningside Aves.; and St. Nicholas (Greek Orthodox), located at 1 E. 97th St., near Fifth Ave.

The leading houses of worship, by chief denominations, follow:

**Baptist**—Calvary, W. 57th St., between Sixth and Seventh Aves.; Central, 92d St., and Amsterdam Ave.; Fifth Ave., formerly at 8 W. 46th St., and now named First Park Ave. Baptist Church, situated at Park Ave. and 64th St.; the First, W. 79th St., corner Broadway; Judson Memorial, 55 Washington Sq., So.; Madison Ave. Church, cor. E 31st St.; Metropolitan, W. 128th St. and 7th Ave., and the Mount Morris, 5th Ave., near W. 127th St.

The Hellenic Eastern Christian Orthodox Church of the Holy Trinity is on E. 72d St., near 3d Ave. **Christian Science (Church of Christ)**—First, Central Park West and 96th St.; and the Second, 10 W. 68th St.

**Congregational**—Tabernacle, Broadway and 56th St.; and Manhattan, Broadway and W. 76th St. **Disciples of Christ**—Central Church, W. 81st St., near Columbus Ave.

**Friends' (Quakers)**—Meeting Houses: (Hicksite), E. 15th St. and Rutherford Pl.; and (Orthodox), 144 E. 20th St.

**Jewish**—Temple Israel, W. 91st St., near B'way; Free Synagogue, Carnegie Hall; Shearith Israel, Central Park West and 70th St.; Temple Beth-El, 5th Ave. and 76th St.; Temple Emanu-El, 5th Ave. and 43d St.

**Lutheran**—Advent, Broadway and 93d St.; Grace, 123 W. 71st St.; Holy Trinity, Central Park West and 65th St.; and Immanuel, Lexington Ave. and E. 88th St.

**Methodist Episcopal**—Calvary, 129th St. and 7th Ave.; Grace, 131 W. 104th St.; John St., 44 John St.; Madison Ave., at E. 60th St.; Metropolitan Temple, 58 7th Ave.; St. Andrews, 126 W. 76th St.; St. Paul's, West End Ave. and 86th St.; and Union, W. 45th St., near Broadway.

**Presbyterian**—Brick, 5th Ave. and 37th St.; Broadway, at W. 114th St.; Central, Madison Ave. and 57th St.; Fifth Ave., at 55th St.; First, 5th Ave. and 11th St.; Fourth, West End Ave. and 91st St.; Madison Ave., at 73d St.; Park Ave., at E. 85th St.; Rutgers, Broadway and W. 73d St.; Scotch, Central Park West and 96th St.

**Protestant Episcopal**—Epiphany, 259 Lexington Ave.; Grace, Broadway and 10th St.; Heavenly Rest, 551 5th Ave.; Holy Trinity, 316 E. 88th St.; Incarnation, 205 Madison Ave.; "Little Church Around the Corner" (Transfiguration), 5 E. 29th St.; St. Andrew's, 127th St., near 5th Ave.; St. Bartholomew's, Park Ave. and 52d St.; St. George's, Stuyvesant Sq.; St. James's, Madison Ave. and 71st St.; St. Luke's, Covent Ave. and 141st St.; St. Mark's-in-the-Bowery, 2d Ave. and 10th St.; St. Paul's Chapel, Broadway and Vesey St.; St. Thomas's, 5th Ave. and 53d St.; Trinity Church, Broadway and Wall St.; Christ Church, Broadway and 71st St.

**Reformed Church in America**—Marble (Collegiate), 5th Ave. and 29th St.; St. Nicholas (Collegiate), 5th Ave. and 45th St.; West End (Collegiate), West End Ave. and 77th St.

**Roman Catholic**—Ascension, 107th St., near Broadway; Holy Trinity, 205 W. 82d St.; Notre Dame, Morningside Drive and 114th St.; St. Agnes's, 113 W. 43d St.; St. Andrew's, Duane St. and City Hall Place; St. Brigid's, 123 Ave. B.; St. Cyril, St. Mark's Pl.; St. Francis Xavier, 42 W. 16th St.; St. Ignatius Loyola's, Park Ave. and E. 84th St.; St. Leo's, 11 E. 28th St.; St. Patrick's, Mott and Prince Sts.; St. Paul the Apostle's, Columbus Ave. and W. 60th St.; St. Peter's, 20 Barclay St.

**Seventh Day Adventist**—First, Lenox Ave. and 120th St.

**Unitarian**—All Souls', 4th Ave. and 20th St.; and the Community Church, 61 E. 34th St.

**Universalist**—(Fourth) Church of the Divine Paternity, Central Park West and 76th St.

Among other places of worship in Manhattan are: All Night Mission, 8 Bowery; Bowery Mission, 227 Bowery; Broome St. Tabernacle, 395 Broome St.; Church of the Strangers (Deems Memorial), 307 W. 57th St.; De Witt Memorial, 280 Rivington St.; Divine Inspiration (Spiritualist), 20 W. 91st St.;

Doyers St. Midlight Mission, 5 Doyers St.; Eighth Ave. Mission, 290 8th Ave.; Gospel Tabernacle, 44th St. and 5th Ave.; Labor Temple, 2d Ave. and 14th St.; McAuley's Cremona Mission, 216 W. 35th St.; McAuley's Water St. Mission, 316 Water St.; New Church (Swedenborgian), 35th St., near Park Ave.; Pentecostal Nazarene, 210 W. 14th St.; Progressive Spiritualists' Church, 325 W. 59th St.; Salvation Army (see index); Seamen's, 2 W. 64th St.; 399 West St.; Seventh Day Christian Association, 151 W. 125th St.; Society of Ethical Culture, 2 W. 64th St.; Temple of International Bible Students' Ass'n, Inc., 22 W. 63d St.; Theosophical Society, 25 W. 45th St.; Vedanta Society, 236 Central Park West; Volunteers of America (see index).

## BROOKLYN.

**Baptist**—Temple, 3d Ave. and Schermerhorn St.; Emmanuel, Lafayette Ave. and St. James Pl.; Hanson Place, at So. Portland Ave.; Sixth Ave., at Lincoln Pl.; Washington Ave., at Gates Ave.; First N. Y. Ave. and Dean St.

**Congregational**—Central, Hancock St., near Franklin Ave.; Clinton Ave., at Lafayette Ave.; Flatbush, Dorchester Rd. and E. 18th St.; Pilgrims, Henry and Remsen Sts.; Plymouth, Orange St., near Hicks St.; South, President and Court Sts.; St. Paul's, N. Y. Ave. and Sterling Pl.; Tompkins Ave., at McDonough St.

**Disciples of Christ**—Flatbush, Dorchester and Marborough Roads.

**Friends**—(Hicksite), 110 Schermerhorn St.; (Orthodox), Lafayette and Washington Aves.

## THE PULITZER SCHOOL OF JOURNALISM.

The School of Journalism at Columbia University, founded and endowed by the late Joseph Pulitzer, opened in September, 1912, and a year later entered its new building at 116th Street and Broadway. The Director is Dr. J. W. Cunliffe; the Director Emeritus, Dr. Talcott Williams. One-fourth of the 150 students in the scholastic year 1922-23 were from New York City and vicinity. There are a reference library of 100,000 books, a file of 50 daily papers (American and foreign) and a "morgue" of 500,000 newspaper clips of which Dr. Talcott Williams's choice private collection was the basis.

**Advisory Board**—Nicholas Murray Butler, Columbia University, N. Y. City; Solomon B. Griffn (1915-1923) *Springfield Republican*, Springfield, Mass.; John Langdon Heaton, *The World*, N. Y. City; Arthur M. Howe (1919-1923), *Brooklyn Daily Eagle*; Victor Fremont Lawson, *Chicago Daily News*; Robert Lincoln O'Brien (1919-1923), *Boston Herald*; Edward Page Mitchell, *The Herald and The Sun*, New York City; Melville Elijah Stone, Associated Press, N. Y. City; Ralph Pulitzer, *The World*; Joseph Pulitzer, Jr. (1920-24), *The St. Louis Post-Dispatch*; John Stewart Bryan, *Richmond, Va., News Leader*.

(Of the original Advisory Board of Editors, Gen. Charles Henry Taylor, *The Globe*, Boston, Mass.; Whitelaw Reid, *The Tribune*, New York; St. Clair McKelway, *The Eagle*, Brooklyn, N. Y.; and Charles Ransom Miller, *The Times*, New York, have died.)

**Administrative Board**—President Butler, Prof. Cunliffe, Dean Hawkes, Prof. Roscoe Brown, Prof. A. H. Thorndike, Prof. Pitkin, Prof. Seager, Prof. C. P. Cooper.

## 1921 PULITZER PRIZES AND TRAVELLING SCHOLARSHIPS.

(Awarded at Commencement, June 7, 1922.)

For the most distinguished and meritorious public service rendered by an American newspaper during the year—\$500 gold medal to *The New York World* for its work in exposing the operations of the Ku Klux Klan. Previous awards: 1917, no award; 1918, *The New York Times* for its publication in full of so many official reports, documents and speeches relating to the World War; 1919, *Milwaukee Journal* for its campaign for Americanism; 1920, no award; 1921, *The Boston Post* for its work in exposure of Get-Rich-Quick Ponzi.

For the best example of a reporter's work during the year, the test being strict accuracy, terseness, the accomplishment of some public good commanding public attention and respect—\$1,000 to Kirke L. Simpson of the Washington staff of the *Associated Press* for his articles on the burial of "The Unknown Soldier." Previous awards: 1917, Herbert Bayard Swope, for his articles in *The New York World* on conditions in the German

Empire during the World War, Oct. 10, Oct. 15, and from Nov. 4 daily until Nov. 22 of that year; 1918, Harold L. Lideale, *New York Evening Post* for articles leading to reforms in the New Jersey Prison system; 1919, no award; 1920, John J. Leary, Jr., for his articles in *The New York World* during the national coal strike in the winter of 1919; 1921, Louis Seibold of *The New York World* for his interview with President Wilson, published June 18, 1920.

For the American novel published during the year which shall best present the wholesome atmosphere of American life, and the highest standard of American manners and manhood—\$1,000 to Booth Tarkington, author of *Alice Adams*. Previous awards: 1917, no award; 1918, Ernest Poole, author of *His Family*; 1919, Booth Tarkington, author of *The Magnificent Ambersons*; 1920, no award; 1921, to Edith Wharton, author of *The Age of Innocence*.

For the best book of the year upon the history of the United States—\$2,000 to James Truslow Adams, author of *The Founding of New England*. Previous awards: 1917, to His Excellency J. J. Jusserand, the French Ambassador, author of *With Americans of Past and Present Days*; 1918, James Ford Rhodes, author of *A History of the Civil War*; 1919, no award; 1920, to Justin H. Smith, author of *The War with Mexico*; 1921, to Rear Admiral William Snowden Sims, author of *The Victory at Sea*.

For the best American biography teaching patriotic and unselfish services to the people, illustrated by an eminent example, excluding as too obvious the names of George Washington and Abraham Lincoln—\$1,000 to Hamlin Garland, author of *A Daughter of the Middle Border*. Previous awards: 1917, to Laura E. Richards and Maude Howe Elliott, assisted by Florence Howe Hall, authors of *Julia Ward Howe*; 1918, William Cabell Bruce, author of *Benjamin Franklin, Self-Revealed*; 1919, to Henry Adams (Post Obitt), author of *The Education of Henry Adams*; 1920, to Albert J. Beveridge, author of *The Life of John Marshall*; 1921, to Edward Bok for *The Americanization of Edward Bok* (autobiography).

For the original American play performed in New York which shall best represent the educational value and power of the stage in raising the standard of good morals, good taste and good manners—\$1,000 to Eugene O'Neill, author of *Anna Christie*. Previous awards: 1918, to Jesse Lynch Williams, author of *Why Marry*; 1919, no award; 1920, Eugene O'Neill, author of *Beyond the Horizon*; 1921, Miss Zona Gale, author of *Miss Lulu Bett*.

For the best editorial article written during the year, the test of excellence being clearness of style, moral purpose, sound reasoning and power to influence public opinion in the right direction—\$500, awarded to Frank M. O'Brien for an article entitled *The Unknown Soldier*, printed in the *New York Herald*, Nov. 11, 1921. Previous awards: 1917,

to an editorial in the *New York Tribune*, on the first anniversary of the sinking of the *Lusitania*; 1918, to the Louisville (Ky.) *Courier-Journal*, for the editorial article *Vae Victis*, by Henry Waterson; 1919, no award; 1920, to Harvey E. Newbranch of the *Evening World-Herald*, Omaha, Neb., for *Law and the Jungle*; 1921, no award.

For the best cartoon published in any American newspaper during the year, the determining qualities being that the cartoon shall embody an idea made clearly apparent, shall show good drawing and striking pictorial effect, and shall be helpful to some commendable cause of public importance—\$500 to Rollin Kirby of *The New York World*, On the Road to Moscow.

For the best book of verse by an American author—\$1,000 to Edwin Arlington Robinson for *Collected Poems*.

An award of \$1,000 for the best history of the services rendered to the public by the American press during the preceding year was made in 1918 to Minna Lewinson and Henry Beetle Hough (School of Journalism), for *The History of Service Rendered to the Public by the American Press During the Year 1917*.

#### PULITZER SCHOLARSHIPS.

Three travelling scholarships, having the value of \$1,500 each, to graduates of the School of Journalism who shall have passed their examinations with the highest honor and are otherwise most deserving, to enable each of them to spend a year in Europe to study social, political and moral conditions of the people, and the character and principles of the European press—Won by Robert Arthur Curry, Nassau, N. P.; Bahamas I.; Zilpha Mary Caruthers, Denver, Colo.; Robert Henry Best, Spartanburg, S. C. Previous awards: 1917, Geddes Smith, David S. Levy, Otto D. Tollusch; 1918, no awards; 1919, no awards; 1920, Robert Gordon Wasson, Katherine MacMahon, Clyde Alden Beals; 1921, Martha Frances Drewry, Girard Chaput, Edward Harrison Collins.

An annual scholarship having the value of \$1,500 to the student of music in America who may be deemed the most talented and deserving, in order that he may continue his studies with the advantage of European instruction—Awarded to Sandor Harmati, of Hollis, L. I., for a symphonic poem entitled *Folio*. Previous awards: 1917, Meyer I. Silver for composition; 1918, Samuel Gardner, student in the Institute of Musical Art; 1919, no award; 1920, Bernard Rogers, for composition; 1921, to Foster Montgomery Hankins, self-taught, for *Symphony in F Minor*.

An annual scholarship having the value of \$1,500 to an art student in America who shall be certified as the most promising and deserving by the National Academy of Design, with which the Society of American Artists has been merged—Awarded to Miss Edith Bell, Des Moines, Ia. Previous awards: 1917, John Matulka, New York City; 1918, to Dusham M. Rustich, of the National Academy of Design Schools; 1919, to Jacob B. Greene, student of National Academy of Design Schools; 1920, to Frederick C. Freder, National Academy of Design Schools; 1921, to Vincent Nesbitt, Pittsburgh, Pa.

Henry Woodward Sackett has offered two scholarships of \$250 each to the two graduates of 1923 in the Pulitzer School of Journalism who, in the faculty's judgment, do the best work in the study of the law of libel and the rights and duties of newspapers, and become candidates for the degree of master of science in journalism in 1923-1924.

#### PULITZER SCHOLARS.

Of the 61 candidates (graduates of New York City public schools) for the Pulitzer Scholarships at Columbia University, 1922, 37 passed the qualifying examinations. Of these 12 were selected. Each Pulitzer Scholar receives upon the usual conditions of satisfactory performance, a stipend of \$250 and, in addition, free tuition if he attends Columbia University.

| <b>Total.....</b>                   | <b>83,820</b> | <b>41,882</b> | <b>202,970</b> | <b>96,973</b> | <b>27,252</b> | <b>452,897</b> |

In 1677 there were in New York City (present Manhattan) 12 streets and 384 houses.

## VACANT LAND IN THE CITY OF NEW YORK, 1922.

In the suburbs, vacant parcels are frequently counted as improved. Exempt and partially exempt acreage plots, hence the actual vacant area is greater than the following figures indicate. Every parcel which contains any improvement, however slight, is listed in the number of vacant parcels.

| BOROUGH.       | Total Number of Parcels | Vacant Parcels | Assessed Value of Vacant Parcels | BOROUGH.         | Total Number of Parcels | Vacant Parcels | Assessed Value of Vacant Parcels |
|----------------|-------------------------|----------------|----------------------------------|------------------|-------------------------|----------------|----------------------------------|
| Manhattan..... | 88,902                  | 5,508          | \$154,238,755                    | Richmond.....    | 45,085                  | 22,796         | \$16,971,510                     |
| Bronx.....     | 73,507                  | 36,360         | 130,454,480                      | <b>Total....</b> | <b>603,943</b>          | <b>197,877</b> | <b>\$576,513,641</b>             |

## ALTERATIONS IN BUILDINGS IN MANHATTAN.

As new building operations decrease in Manhattan alterations in existing buildings increase, showing that the Borough is being steadily re-constructed. This is in part due to limited area,

which restricts new building and compels Manhattan to provide for ever-increasing population by other means. This is shown in the following table:

| PERIOD.        | NEW BUILDINGS. |              |            | ALTERATIONS. | PERIOD.        | NEW BUILDINGS. |              |            | ALTERATIONS. |

The average number of new dwellings in Manhattan for the previous 10 years is 23 against 135 for 1921, an increase of nearly 600 per cent. This increase is due to the adoption by the Board of

Aldermen on Feb. 15, 1921, of an ordinance in relation to exemption from local taxation other than assessments for local improvements of new buildings planned for dwelling purposes.

# HIGH BUILDINGS IN MANHATTAN.

(Figures in parentheses show number of stories. The other figures show height, in feet; odd inches are not named in height.)

## THE ANNEKE JANS CLAIM—ITS HISTORY.

THOUGH the New York State Court of Appeals outlawed the Anneke Jans heirs' claim to the Trinity Church tract in New York City as long ago as 1856, and again in 1881, the claim still persists in the minds of some of Mrs. Jans's thousands of descendants. In the early part of 1922 the Appellate Division of the Supreme Court, in New York City, disbarred an attorney because he had circularized the Jans claimants in an attempt to obtain funds for another investigation and contest. The attorney, according to the Appellate tribunal, knew that investigation had already been made and had proved futile.

The so-called Anneke Jans, later the Trinity P. E. Church, tract, contained about 82 acres and has been variously known as the King's Farm, the Duke's Farm, and the Queen's Farm. It extended from Warren Street, along Broadway to Duane Street, thence northwesterly a mile and a half to Christopher Street, the Hudson River forming the base of a sort of unequal triangle. Wouter Van Twiller, the Dutch Governor of New Amsterdam, sold this tract in 1636 to Roelof Jans, and by Roelof's will it became the property of his wife, Anneke. She married Everard Bogardus, who was drowned at sea, leaving Anneke again a widow. At her death, in 1668, she was called Anetje Bogardus. She left eight children, one of whom, Cornelius Bogardus, in March, 1670, executed an instrument known as a "transport," conveying the property to Col. Francis Lovelace, then Governor of the Province of New York. In the meantime (1667), Governor Nichols had confirmed the title to the tract in Mrs. Jans-Bogardus and her eight children. Cornelius Bogardus died in 1707. He left no will, and never had made any claim to his share in the Jans tract.

Governor Lovelace seems to have acted merely as a Trustee for the State, for on May 6, 1697, Trinity Church was incorporated by Royal Charter, and thereafter in the same year a lease of the Jans tract was executed by the then Governor, Benjamin Fletcher, to the Trinity Church Corporation for seven years. This lease was afterward annulled and another one given by Governor Lord Cornbury in 1702 for his term of office. In 1703 Queen Anne formally presented the tract, then called "Queen Farm," to Trinity Church. The Queen Anne "patent" took the place of the Cornbury lease.

In 1785 a legislative report respecting the title to "the King's Farm" in the City of New York, was made to the New York Assembly. This report recites the grant by Lord Cornbury, but expresses the opinion "that the right and title of the premises were of right, before the late revolution, vested in the King of Great Britain, and now belong to and are of right vested in the People of this State."

The first attack on Trinity Church's title was made, by one Cornelius Brouwer, about 1833. He claimed a one-fifth of one-sixth interest as an heir of Cornelius Bogardus, and named the Trinity Church Corporation as a tenant in common entitled to an undivided five-sixths. Defendants claimed ownership of the entire tract by virtue of the grant from Queen Anne. The Chancellor held that at the expiration of 60 years from that time the right of the complainant's ancestor, if he previously had any, was completely barred. On appeal to the Court of Errors, then the highest Court of the State, the decree was affirmed in 1835. The heirs of Cornelius Brouwer revived the suit and the cause was finally submitted to the Vice Chancellor in January, 1847. The hearing occupied thirteen days, at the end of which the bill was dismissed.

Notwithstanding this decision, an action of ejectment was begun in 1866. An appeal from the non-suit directed in this case was taken to the Court of Appeals, where it was affirmed. Another phase of the litigation reached the Court of Appeals in 1881, where an application for letters of administration with the will annexed of the estate of Anneke Jans-Bogardus, was affirmed.

The streets laid out by Trinity Church Corporation in the Jans tract were named after leading officers of the church—Vesey, after the Rev. William Vesey, the rector, Barclay, after the Rev. Mr. Barclay, who succeeded Vesey as rector; Murray, after a distinguished lawyer and officer of the church, Warren, after Sir Peter Warren, commander of the British naval forces at this station, who married Miss Delancy of New York City; Chambers, after John Chambers, a lawyer born in New York and a leader in civil and church affairs.

The various litigations attacking the Trinity Church title, none of which was successful, were each and all based on technical irregularities in the grants of conveyances, such as the absence of a seal to a signature or on allegations that the grantors themselves had no title. The defense has been adverse possession and the statutes of limitation.

## RICH NEW YORKERS.

(The figures represent the 1923 official tentative estimated valuation of personality.)

\$2,000,000—John D. Rockefeller, Sr.  
 \$1,000,000—Dorothy P. B. Caruso; Emil E. Hepburn; James N. Hill; Marguerite S. Hill; J. P. Morgan  
 \$500,000—Edith N. Bailey; August Belmont; August Belmont, Jr.; Eleanor Belmont; F. T. Davidson; Henry P. Davidson, Jr.; K. S. Davidson; George Ehret; Mrs. E. H. Harriman; Kitty L. Harriman; Wm. A. Harriman; Cordella S. Hepburn; Fred A. Juilliard; Herman D. Kountze; Anne T. Morgan; May H. Potter; J. D. Rockefeller, Jr.; T. F. Ryan; Cornelius Vanderbilt; Rachel L. Vanderbilt; Gertrude V. Whitney; Payne Whitney.

Pierce; Mabel N. Ponnet; Ralph Pultzer; Daniel G. Reid; William Reiman; John H. Rhoades; John D. Ryan; Chas. H. Sabin; Mortimer L. Schiff; Rebecca Schiffer; Jennia D. Sherwood; Franklin Simon; Emily H. Spafford; Mrs. A. Steinnan; Helen N. P. Stokes; Cyrus L. Sulzberger; Charlotte T. Tausig; Frederick A. Taylor; Arch. S. Terrill; Belmont Tiffany; Chas. L. Tiffany; Louis C. Tiffany; Otto Timme; J. Kennedy Tod; Robt. E. Todd; Ruth B. Twombly; Cornelius J. Vanderbilt; Fred W. Vanderbilt; Harold S. Vanderbilt; Louis A. Vanderbilt; W. K. Vanderbilt, Jr.; Warner M. Van Norden; Anna H. Van Zeditz; Paul M. Warburg; Lawrence Warburg; Herman M. Weaver; Josephine D. Weeks; Edmund C. Wendt; Richard T. Wilson; Katherine W. Winthrop; Helen M. Wisner; Rawson L. Wood; St. John Wood; Minnie S. Woolf; Jennie Woolworth.

## NON-RESIDENT TAXPAYERS.

The list of "non-resident" New Yorkers on the 1923 personal assessment roll includes: Percy A. Rockefeller, \$500,000; W. A. Clark and Melville Gambrill, \$400,000 each; Elizabeth F. Durazzo, \$170,000; Geo. J. Gould, \$150,000; E. T. Gerry, \$106,000; and H. C. Cady, J. J. Duveen, W. A. Jamison, J. B. Duke, H. E. Huntington, Frances O. Jones, and Belmont Tiffany, \$100,000 each.

## 75,147 ON PERSONALTY TAX ROLLS.

Although the possession of personal property valued at \$100,000 by the tax assessors does not necessarily indicate that the owner thereof is a "millionaire," he or she is popularly so considered. When the New York City tax books were opened in 1922 there were disclosed the names of 75,147 persons from whom the assessors had decided a personal tax was collectible. This was an increase of 2,244 over 1921.

## CALENDAR FOR TAXPAYERS.

April 1—Commence to assess. Oct. 1—Annual record of assessed valuation of real and personal estate open for inspection. Nov. 15—Real estate books close. Nov. 30—Personal books close. Feb. 1—Make up assessment rolls. March 1—Deliver to Board of Aldermen. March 3—Board of Aldermen fix tax rate. March 28—Deliver to Receiver of Taxes. May 1—All personal taxes and half real estate taxes payable in May. If second half paid, rebate at rate of 4% per annum to Nov. 1. June 1—Interest at 7% runs from May 1 on unpaid taxes due in May. Aug. Third Tues.—Hearing on assessments on shareholders of banks. Nov. 1—2d half of real estate taxes payable. Dec. 1—Interest at 7% from Nov. 1 on unpaid taxes due in Nov. Dec. 15 to 31—Bank taxes payable.

## NOTES TO THE ABOVE TABLE.

The valuations for the year 1897 have been ascertained as follows: In Manhattan and the Bronx from tax bills of 1897 and from information furnished by the Department of Taxes and Assessments; in the Boroughs of Brooklyn, Queens and Richmond from the reports of the various Boards of Supervisors as verified by the expert accountants of the City of New York. The valuations for

year 1898 have been ascertained as follows: In Manhattan and the Bronx from the reports of the Department of Taxes and Assessments. In the Boroughs of Brooklyn, Queens and Richmond, as there was no tax levied in 1898, the valuations of the preceding year were repeated. The assessed valuations of real estate were increased in 1903 from a varying percentage theretofore of the full value to presumably the full value therefor.

## TAX RATES IN N. Y. CITY, BY BOROUGH, SINCE 1899.

| YEAR.     | Manhattan and Bronx. | Brooklyn. | Queens. | Richmond. | Rate of State Tax Levied by City, Incl. in Tot. Tax Rate. | State Tax Paid by City to State. |

By a special State law, the N. Y. City tax rate was \$2.74 on each \$100 of assessed values in every borough to which the city added certain amounts for local improvements.

Note—In 1914 and thereafter the first rate in second column is that of Manhattan, the second is that of the Bronx.

## ASSESSED VALUES, TAX LEVIES AND TAX RATES.

(Former City of New York. The tax rate is figured on each \$100 of assessed valuation.)

| YEAR      | Assess. Val. of Realty. | Assess. Val. of Personalty. | Tax Levy.     | Tax Rate. | YEAR      | Assess. Val. of Realty. | Assess. Val. of Personalty. | Tax Levy.     | Tax Rate. |

| 1919. | 240,487,558           | 7,537,876               | 246,190,435   | 1,835,000                 | 248,025,435   |
| 1920. | 263,305,596           | 8,708,888               | 272,014,485   | 1,675,000                 | 273,689,485   |
| 1921. | 333,820,817           | 10,029,223              | 343,850,040   | 1,680,000                 | 345,530,040   |
| 1922. | 339,636,087           | 9,988,183               | 349,674,270   | 927,300                   | 350,516,525   |

The total for city purposes includes direct State taxes, which in 1922 were \$14,430,513; interest on redemption of the city debt amounted to \$102,237,791.

## NEW YORK CITY PENSION LAW.

(Chapter 427, Laws of 1920, effective Oct. 1, 1920.)

THE New York City Pension Law provides that all employees, except those in exempt class, entering the city service after Oct. 1, 1920, shall become members of this system and all present city employees may become members by filing with the Board of Estimate and Apportionment a statement waiving all present or prospective benefits in other city retirement systems. The Board of Estimate and Apportionment has charge of all funds and of the entire system; the Comptroller is the custodian of several funds, which are (1) Annuity savings funds, (2) Annuity reserve fund, (3) Contingent reserve fund, (4) Pension reserve fund, (5) Pension fund.

Teachers, policemen, firemen and street-cleaners do not enter into this system, as they have their own.

Among the provisions of this law are life insurance protection equal to the last six months' pay of the

employee, disability insurance protection of from one-quarter to one-half of the salary any time after completing ten years of service and paying, as long as the disability continues, a three-quarter pension if the employee is disabled in the performance of duty, a half-pay pension to the dependents with return in cash of all contributions at 4 per cent. per annum if the employee is killed in the performance of duty, and a pension on demand after the ages of fifty-eight, fifty-nine and sixty, regardless of the length of service.

## AGGREGATE CAPITAL OF

The aggregate capital of the 18 national banks, 11 State banks, and 12 trust companies in the New York Clearing House, as of Oct. 28, 1922, was \$289,600,000. This did not include the Federal

## CLEARING HOUSE BANKS.

Reserve Bank. In addition, there were 4 institutions in New York City and 1 in Bayonne, N. J. (not members of the Clearing House but making through it their clearings) with a total capital of \$3,200,000, and with deposits of \$54,708,000.

## VALUE AND WEIGHT OF GOLD.

(By the United States Assay Office, New York.)

THE unit in weighing gold is the troy ounce. A "fine" ounce means an ounce of pure gold. The mint value of gold does not fluctuate, but remains constant at \$20.67183462 per fine ounce. Troy measure is used in weighing gold. The grain is the same in both troy and avoirdupois measure, but the ounce and the pound are not the same. The troy

ounce contains 480 grains and the troy pound 5,760 grains, there being 12 ounces to the pound. The troy pound is never used in weighing gold, even when the weights of large quantities are to be computed. The avoirdupois ounce contains 437½ grains and the avoirdupois pound contains 7,000 grains, there being 16 ounces to the pound.

## CONDITION OF MEMBERS, N. Y. CLEARING HOUSE ASSOCIATION.

For the week ending Oct. 28, 1922. The figures are six-day averages, except as to capital and net profits. The last named item covers the period from the foundation of the institution.

Reserves with legal depositories totalled \$517,989,000.

Net demand deposits do not include \$217,031,000 deposits in foreign branches of the National City Bank and the Bankers, Guaranty, Equitable, and Farmers Loan and Trust Companies.

## THE FEDERAL RESERVE BANK OF NEW YORK.

The Federal Reserve Bank of New York, in the calendar year 1921, had total earnings of \$34,767,289, from which were deducted \$8,673,456 for expenses, including operation, self-insurance, etc. This left a net income in 1921 of \$26,093,832, as against \$53,128,131 in 1920. Of the 1921 net earnings, \$1,068,721 were paid in dividends to member banks, at 6 per cent. on paid-in capital; \$3,782,671 were added to the surplus; and the balance, \$20,702,440, was paid to the United States Government. In 1921 the net earnings were 97.3 per cent. of the bank's capital.

## GOVERNMENT OF THE BRITISH EMPIRE.

The British Empire covers about one-fourth (13,406,103 square miles) of the world's habitable land surface; this excludes the Arctic regions. Its population in the aggregate, according to the best obtainable estimates, is some fifteen millions more than one-fourth of the inhabitants of the world—a total of 441,595,965.

The Capital of this vast empire is London, the

largest city in the world—the "Greater London" population, census of 1921, being 7,476,168.

The Ruling Sovereign is George V., the first of the House of Windsor, whose title is "by the Grace of God of the United Kingdom of Great Britain and Ireland and of the British Dominions Beyond the Seas, King, Defender of the Faith, Emperor of India." He was born June 3, 1865, the second son of King Edward VII. and Queen

Alexandra, daughter of King Christian IX. of Denmark, and he succeeded to the throne on the death of his father May 6, 1910 and was crowned, June 22, 1911. He married, on July 6, 1893, Princess Victoria Mary, born May 26, 1867, daughter of the late H. S. H. Duke of Teck and H. R. H. Princess Mary of Cambridge. They have five living children, *His Heir*, H. R. H. Edward, Prince of Wales, born June 23, 1894; H. R. H. Prince Albert, Duke of

York, born Dec. 14, 1895; H. R. H. Princess Mary, born April 25, 1897, married Viscount Lascelles, K. G., son of the Earl of Harewood, Feb. 28, 1922; H. R. H. Prince Henry, born March 31, 1900; and H. R. H. Prince George, born Dec. 20, 1902.

The Premier is the Rt. Hon. Andrew Bonar Law, took office Oct. 25, 1922, on the resignation of David Lloyd George (1916-22). His Ministry and that of Mr. Lloyd George, follow:

#### THE NEW AND OLD MINISTRY.

Mr. Lloyd George and his Ministers turned in their seals of office on Oct. 25, 1922, and Mr. Bonar Law's Ministers were sworn in and received them from King George that day. The Ministry was finally completed Oct. 31.

| OFFICE.                        | New Minister.           | Former Minister.                |

| President Board of Trade       | Sir P. Lloyd-George.    | Stanley Baldwin.                |
| Minister of Health             | Sir A. G. Boscawen.     | Sir A. Mond.                    |
| President Board of Education.  | Hon. E. F. L. Wood.     | H. A. L. Fisher.                |
| Minister of Agriculture        | Sir R. Sanders.         | Sir A. G. Boscawen.             |
| Secretary for Scotland.        | Viscount Novar.         | (vacant.)                       |
| Attorney General.              | Douglas M. Hogg, K. C.  | Sir Ernest Pollock, K. C.       |
| Lord Advocate.                 | William Watson, K. C.   | C. D. Murray, K. C.             |
| Air Minister.                  | Sir Samuel Hoare        | Capt. F. E. Guest.              |
| Minister of Labor              | Sir Montague Barlow     | T. J. Macnamara.                |
| Minister of Pensions           | Major G. C. Tryon       | J. L. Macpherson.               |
| First Commissioner of Works.   | Sir John Baird.         | Earl of Crawford and Balcarres. |
| Solicitor General.             | T. W. B. Lush, K. C.    | Leslie Scott, K. C.             |
| Postmaster General.            | Neville Chamberlain     | F. W. Kellaway.                 |
| Civil Lord of the Admiralty.   | Marquis of Lindhurst    | B. M. Fyres-Moncell.            |

The new Under Secretaries are: Home, G. F. Stanley; Foreign, Ronald McNeill; Colonies, W. Ormsby-Gore; War, Walter Guinness; Air, The Duke of Sutherland; India, Earl Winterton. Parliamentary: Overseas Trade, Sir W. Joynson-Hicks; Board of Trade, Lord Wolmer; Works and Transport, Col. Wilfred Ashley; Health, Earl of Onslow; Fisheries, Earl of Ancester; Treasury, Col. Leslie Wilson.

The British Minister to the United States is Sir Auckland Geddes, G. C. M. G., K. C. B., etc., born 1879, appointed May 26, 1920. The diplomatic affairs of the entire British Empire in the United States are cared for by the Embassy at Washington.

British Consuls General in the United States are, at New York, H. Gloster Armstrong; at Boston, Thomas Parker Porter; at Philadelphia, vacant; at Chicago, Horace Dickinson Nugent; at New Orleans, Charles Braithwaite Wallis; at San Francisco, Gerald Campbell; at Manila, P. L., Thomas Joseph Harrington.

British Consuls are, at Jacksonville, Fla., Walter Macklow; at Savannah, Arthur Montague Brookfield; at Honolulu, H. L. William Mussy Royds; at Portland, Me., John Bernard Keating; at Baltimore, Hugh Alexander Ford; at Detroit, Howard G. Meredith; at St. Louis, Godfrey Procter Henslet; at Portland, Ore., John Philip Traut; at Pittsburgh, Charles E. E. Childers; at Galveston, John Elliott Bell; at Norfolk, Barton Myers; at St. Thomas, V. I., Charles Hertram Stewart; at Seattle, Bernard Pelly; at San Juan, P. R., Arthur H. Noble. There are also Vice Consuls at Birmingham, Mobile, Skaneateles, Douglas, Ariz.; Los Angeles, San Diego, Denver, Hartford, Washington, D. C.; Key West, Miami, Pensacola, Tampa, Brunswick, Darien, Ga.; Duluth, Minneapolis, Gulfport, Kansas City, Mo.; Omaha, Wilmington, Cincinnati, Cleveland, Hallow, P. I.; Providence, Charleston, El Paso, Laredo, Port Arthur, Newport News, Richmond, Gray's Harbor, Wash., and Tacoma.

The United States Minister to Great Britain is Col. George Harvey, born Feb. 16, 1864, appointed April 16, 1921.

The United States Consuls General and Consuls will be found listed under the various subdivisions of the British Empire, which follow, according to their stations.

Parliament is the legislative governing body for the empire. It consists of two Houses; the House of Lords, made up of the Peers of the United Kingdom, to wit: the Royal Dukes, the Archbishops,

the Dukes, the Marquises, the Earls, the Viscounts, 36 Bishops, and the Barons; also 28 Irish peers elected for life, and 16 Scottish peers elected for the duration of Parliament. The full membership of the House of Lords consists of about 730 members. There are about 30 women who are peeresses in their own right, but their status as sitting and voting members of the House, though claimed by some, is still unsettled. The House of Lords has a limited veto power only in legislation. A peer of the United Kingdom is ineligible to a seat in the House of Commons, but a non-representative Irish Peer may be elected.

The House of Commons, elected in December, 1918, and which met Feb. 4, 1919 and was prorogued Oct. 2, 1922, consisted of 707 members elected by direct ballot in the several constituencies for the duration of Parliament. Of this House England had 492 members; Wales, 36; Scotland, 74; and others, 10. On the opening day the Coalition Government of David Lloyd George, the Prime Minister, had 478 supporters, a majority over all others of 249. Clergymen of the Church of England, ministers of the Church of Scotland and Roman Catholic clergymen are disqualified from sitting as members, also certain Government officers, Sheriffs, and Government contractors. Members of the House of Commons are paid, since 1911, £400 a year. The franchise was extended to women by the Act of 1918. There are certain qualifications. The total number of persons qualified for registration in 1920 was estimated at 21,776,000, of which 8,856,000 were women.

The House of Commons elected Nov. 15, 1922, numbers 615. It contains on the first announcement of the balloting: Conservatives, 346; Laborites, 142; Asquith Liberals, 64; Lloyd George Liberals, 53; others, 10. Bonar Law thus has a Conservative majority of 76 over all.

The British Empire has six members of the League of Nations. To wit: United Kingdom, Commonwealth of Australia, Dominion of Canada, India, New Zealand and the Union of South Africa.

#### BRITISH PRIME MINISTERS SINCE 1801.

| 1921.....       | 37,885,242               | 4,882,288 | No census. | *20,430,623               | *22,336,907 | *42,767,530 |

Of the Jan. 19, 1921 (census) population of England and Wales there were 18,082,220 males and 19,803,022 females. In Scotland there were 2,348,403 males and 2,533,885 females.

England (1921) 35,678,530; Wales (1921) 2,206,712.

\*The 1921 figures for males and females and total (last 3 columns), exclude Ireland. The census of Ireland in 1921 is the first which was based on such a basis as to afford a comparison with those of subsequent decades. Since 1831 the total included army, navy and merchant service at home.

## THE UNITED KINGDOM.

AREA, 121,633 square miles.

POPULATION, census of 1921, 47,307,601.

United States Consul General, at London, Robert P. Skinner. Consuls, at Belfast, William P. Kent; at Birmingham, John F. Jewell; at Bradford, Wallace J. Young; at Bristol, Robertson Honey; at Cardiff, John R. Bradley; at Dublin, Charles M. Hathaway, Jr.; at Dundee, Henry A. Johnson; at Dunfermline, Howard D. Van Sant; at Edinburgh, Hunter Sharp; at Glasgow, George E. Chamberlain; at Hull, John H. Grout; at Leeds, Percival Gassett; at Liverpool, Horace Lee Washington; at Manchester, Ross E. Holaday; at Newcastle-on-Tyne, Fred C. Slater; at Nottingham, Calvin M. Hitch; at Plymouth, Ralph C. Busser; at Queenstown (Cobb), John A. Gamon; at Sheffield, William J. Grace; at Southampton, John M. Savage; at Stoke-on-Trent, William F. Doty; at Swansea, Arthur B. Cooke.

The United Kingdom, or British Isles, lie off the northwest corner of Europe, with the North Atlantic Ocean on the north and the North Sea on the east and the English Channel separating it from the mainland on the south. The Straits of Dover, 18 miles wide, divide it from France. The northern end of Scotland lies due west from the southern end of Norway.

The climate of the British Isles is equable, mild and somewhat warmer than that of the continent opposite, because of the Gulf Stream modifying the temperature of the Isles, which is mean at 49 degrees.

Rainfall is abundant, averaging 34 inches annually, but is seldom heavy at a given time, so that the precipitation covers longer periods, and often fogs prevail in many parts, "London Fog," holding much soot in suspension, being peculiarly dense at times.

The coastline is tortuous, giving very many harbors for shipping, and numerous rivers up which deep sea craft may go. The northern ends are more rugged than the southern. Peculiar geological features are the chalk formation along the English Channel, the chalk stratum running under the waters of the channel into France; and the same "hardpan" sub-stratum recurring as in many parts of France, which prevents the super-imposition of modern "skyscrapers" such as geologically are permitted in American cities, where usually rock strata afford a firm foundation.

The soil is of varied natural fertility. It is more sterile in the north, notwithstanding the figures show that the Scotch have attained a relatively high per acre production by intensive cultivation. But centuries of tillage have rendered necessary the elaborate and large use of artificial fertilizers. The coastlines are generally of bluff formation.

The prevalent precipitation of moisture, together with the mild climate, has induced profuse growth of vegetation of all sorts. The Isles were naturally covered with forests, which have been largely cut off to accommodate so large a population on so small area, a total less than the American State of New Mexico, and only about twice that of all New England.

## AGRICULTURE A GREAT INDUSTRY.

The last census showed Great Britain (excluding waters) with 76,639,000 acres, of which 3,037,600 were woods and plantations, 13,333,000 mountain and heath grazing lands, 24,995,000 permanent pastures, and 20,764,000 arable lands. This was divided, England, 32,386,000 acres, with woods and plantations, 1,697,000; grazing, 2,732,000; pastures, 12,667,000; arable, 11,181,000; Wales, 4,751,000 acres, with woods and plantations, 187,000; grazing, 1,400,000; pastures, 1,820,000; arable, 839,000; Scotland, 19,070,000 acres, with woods and plantations, 552,000; grazing, 9,134,000; pastures, 1,359,000; arable, 5,271,000; Ireland, 20,247,000 acres with woods and plantations, 296,000; grazing (figures not available); pastures, 9,122,000; arable, 5,271,000; Isle of Man, 141,000 acres, with woods and plantations, 1,400; grazing, 35,000; pastures, 17,000; arable, 72,000; Channel Islands, 44,000 acres, with woods and plantations, 200; grazing, 2,000; pastures, 10,000; arable, 21,000.

Prewar and postwar areas, under cultivation for the Kingdom, were: 1913, corn (meaning wheat, barley, oats, rye, beans and peas), 8,211,641 acres; 1918, 10,950,985 acres; 1921, 8,902,301.

Green crops (meaning potatoes, turnips, mangold, cabbage, kohlrabi, rape and vetch): 1913, 3,984,734 acres; 1918, 4,065,164; 1921, 3,779,958.

Flax: 1913, 59,953 acres; 1918, 163,093; 1921, 48,097.

Hops: 1913, 35,676 acres; 1918, 15,666; 1921, 25,133.

Small fruits: 1913, 100,094 acres; 1918, 90,939; 1921, 100,751.

Fallow lands: 1913, 396,472 acres; 1918, 414,124; 1921, 512,910.

Clover, grasses and permanent pastures: 1913, 27,309,188 acres; 1920, 31,774,000 acres.

Total areas under cultivation for the Kingdom: 1913, 46,740,904 acres; 1918, 46,266,748; 1920, 46,073,000 acres.

Looking these figures together with those to follow as to crop yields, it is apparent that the increased intrawater food production of the British Isles was due, not to larger cultivated areas, but to larger per acre yields and to more thorough utilization of lands hitherto in agricultural industry.

Crop yields in England and Wales, were in 1913, wheat, 26,568,000 tons; 1918, 42,120,000 tons; 1921, 34,892,000 tons; potatoes, 1913, 2,895,000 tons; 1918, 4,209,000 tons; 1921, 2,958,000 tons; barley, 1913, 25,292,000 tons; 1918, 24,320,000 tons; oats, 1913, 37,512,000 tons; 1918, 57,356,000 tons; hay, 1913, 9,052,000 tons; 1918, 6,786,000 tons; 1921, 5,399,000 tons.

Scottish crops were, wheat, 1913, 1,052,000 tons; 1918, 1,284,000 tons; hay, 1913, 3,788,000 tons; 1921, 3,272,000 tons; 1921, 3,144,000 tons.

Ireland, 1913, wheat, 648,000 tons; 1918, 2,844,000 tons; 1919, 1,224,000 tons; 1920, 700,000 tons; 1921, 724,000 tons. The immense relative increase of wheat production in Ireland, accompanied by increases of other production, indicates the potential capacity for food output when Ireland applies herself to production; and the heavy and sudden decreases, after the unity of the World War had ceased, indicate also how disastrous to Ireland's economic agricultural life internal disturbances have been.

The total crops for the United Kingdom were, 1913, wheat, 28,348,000 tons; 1918, 46,572,000 tons; 1919, 34,660,000 tons; 1920, 28,416,000 tons; 1921, 37,356,000 tons.

Barley: 1913, 32,816,000 tons; 1918, 31,040,000 tons; 1919, 28,852,000 tons; 1920, 32,844,000 tons; 1921, 27,048,000 tons.

Oats: 1913, 82,640,000 tons; 1918, 124,784,000 tons; 1919, 101,980,000 tons; 1920, 90,436,000 tons; 1921, 82,332,000 tons.

Potatoes: 1913, 7,605,000 tons; 1918, 9,223,000 tons; 1919, 6,312,000 tons; 1920, 6,374,000 tons; 1921, 6,554,000 tons.

Hay: 1913, 15,995,000 tons; 1918, 12,372,000 tons; 1919, 10,708,000 tons; 1920, 14,700,000 tons; 1921, 9,883,000 tons.

Yields per acre for the Kingdom averaged in 1913 31.67 bushels of wheat, twice that of the United States; barley, 34.01; oats, 41.72, all far above the American averages; and potatoes, 215.78 bushels, against about 95 for the United States.

Hay averages about 1.57 tons to the acre. Great Britain had in 1913, 1,874,264 horses; 1918, 1,916,347; 1921, 2,137,200.

Cattle, 1913, 11,936,600; 1918, 12,311,149; 1921, 11,887,000.

Sheep, 1913, 27,629,206; 1918, 27,062,681; 1921, 23,749,000.

Pigs, 1913, 3,305,771; 1918, 2,809,215; 1921, 3,116,500.

## IMPORTS OF FOOD.

The per capita share in each head of domestic animals is of course far less than that in the United States, necessitating the importation of much meat

food, on that account as well as the general condition of large population—45 per cent. of that of the United States—confined on so limited an area.

It comes about, therefore, that Great Britain has intensively developed her manufacturing industries, and derives from exports the profits with which to buy what foodstuffs she must have, which is about 65 to 70 per cent. of her consumption. This imported food is also largely paid for by what is known as "invisible imports"—profits on shipping, insurance laid abroad by British capital, and investments abroad which return annual interest, etc., all of which enables the Isles to pay for the food surplus bought.

Imports of food, drink and tobacco, for 1913, were \$1,475,745,000; in 1921, \$2,836,235,000, expressed in dollar values, against raw materials, etc., 1913, \$1,349,695,000; in 1921, \$1,355,880,000; and manufactured articles, including "manufactured fuel": 1913, \$1,005,195,000; in 1921, \$1,225,225,000. In other words, of a total of \$3,843,675,000 imported in 1913, food, drink and tobacco represented more than 40 per cent. In 1921, the food, drink and tobacco importations were more than 50 per cent. of all importations, expressed in current dollar values.

Economically, the three factors—foods imported, raw materials imported and manufactures exported—constitute the cycle of national life on the British Isles, the three being absolutely essential to the continued existence of the British people according to existing standards of living.

The raw materials importations cover the needs of the extensive manufacturing industries of the Isles, developed very highly in England, parts of Scotland and in the north of Ireland, centring in Belfast—textile mills, steel and iron mills, wood working mills, chemical factories, earthenware works, cutlery, hardware, electrical goods, leather, and all important modern industrial products which go to the ends of the earth, output by industrial leaders and mechanics acknowledged as efficient parts of a remarkably complete industrial development, wrought by the force of the necessity to buy abroad so much food.

The prevailing policy of the British Empire for the greater part of the last century has been not to impose trade barriers on entrance of goods in the British Isles or the outlying holdings of the empire. This free trade policy has been modified by certain attached countries, which at times have even imposed import duties on stuff from the mother country. And since the World War, under the dislocation of world industry and commerce and the unsettlement of the fiscal affairs of the Allies and their enemy countries, certain preferential arrangements have been made, and some barriers have been erected.

In so far as there has been a degree of change of policy in the British Isles, it has been done by Parliament. But all such changes in the dominions and most of the colonies and dependencies have been by the local legislatures. The changes in the British Isles, were, according to the proponents of the newer policy, by reason of the necessity of preventing dumping of goods from European countries the currency of which is considerably depreciated.

## MINES AND MINING.

By and large, the mineral resources of the British Empire comprehend the gamut of the earth's varieties, in varying quantities. In the British Isles the total mineral output in 1920 was 275,384,743 tons, and in 1921 it was 284,601,174 tons, the value being \$1,676,923,755 in 1913, and \$2,137,244,420 in 1921.

Every gallon of oil or other petroleum product must be imported, and that necessity has shaped in considerable degree the foreign policy of the British. British capital has gone extensively into foreign oil fields, with Far Eastern holdings of importance, and also participation in the Dutch oil interests and in the United States and Mexico through the Pearson and other oil companies. The urgent necessity in these days of obtaining oil for power and at sea has apparently induced British statesmen to incorporate the interests of the oil companies in their national procedure, as in the United States and elsewhere.

There is, however, much natural resource mineral wealth on the British Isles, coal of excellent grades, iron ores and tin ore. Coal in 1921 furnished more than 75 per cent. of the total product of minerals. British export of coal has been for years a vital factor in keeping the economic craft of Britain afloat.

Iron ore comes next in importance, and is vital on account of the industries. Chalk alone contributes about 3 per cent. of the mineral output, and is about 8 per cent. of that which remains after coal is eliminated. The minerals otherwise are varied, and include most of the base materials for building and manufacturing.

## SHIPPING AND RAILWAYS.

Since the United States despatched its "Clipper Fleets" in the last century, the British have been masters of the world's commercial shipping. The British merchant marine exceeds in tonnage and number of vessels that of any other people. The United States since the World War is second, and far in advance of the rest.

The profits from her shipping have been a heavy factor in the "Invisible Imports," with which she pays for her food surplus bought abroad. In the latest decade British shipbuilding yards gained not only in magnitude but skill. The present tonnage (figures in detail of which appear elsewhere in *The Almanac*) is greater than that of pre-war, the deadweight tonnage sunk in the war already having been replaced.

The railway mileage of the United Kingdom is slightly more than 23,000 miles. In late years several important railway and electric tram lines in city and country of the Kingdom have been placed in the hands of American railway experts for management.

The roads are privately owned, and were returned from Government control and guarantee of interest on Aug. 15, 1921.

The British Isles have many canals — total mileage 4,673, of which 3,641 are in England and Wales, 184 in Scotland, and 843 in Ireland.

In 1921 tonnage originating on the principal canals of the United Kingdom totalled 11,898,000 tons.

In harbor development, the United Kingdom has made broad strides. The improvement of the banks of the Thames River, which flows through London, has been extensive and some very new ideas of navigation inland for deep sea coming and going have been introduced.

Probably the tidal gates for the Liverpool docks and piers are not duplicated. They enable the accommodation of deep draught craft regardless of the stages of the tides, which, at Liverpool on the northwest side of the Isles, are very high at certain phases of the moon.

A ship canal makes Manchester the third seaport of the Kingdom. Constructed in 1887-94, at a cost of £17,000,000, it accommodates steamers up to 12,850 tons. But all along the coastline, at Plymouth, Southampton, the Thames, at Hull, and at scores of other coast indentations the provisions for shipping large and small are extensive, and their use constant and for the transfer of enormous traffic in people and goods.

Normally, there are no immigration restrictions in the British Isles.

The number of Irish who emigrated from Ireland was, in 1913, 30,997; 1914, 20,314; 1915, 10,659; 1916, 7,302; 1917, 2,129; 1918, 980; 1919, 2,975; 1920, 15,585. The total number from May 1, 1851, to the end of 1920, was 4,338,199.

## OLD AGE PENSIONS.

Every British subject and resident of the United Kingdom over 70 years of age, under certain qualifications, whose yearly means do not exceed £50 (broadly speaking \$250) is entitled to a pension. The weekly amount is 10 shillings if the pensioner's yearly means do not exceed £26 5s.; above that sum the pension decreases by 2s. for every £5 5s. until at £47 5s. it becomes 1s. a week. On March 25, 1921, there were 1,002,342 pensions payable in the United Kingdom (353,794 to men, 648,548 to women). Total amount paid out in 1920-21 was £25,097,000.

The estimated cost of war pensions and allowances in 1921-22 was £107,000,000, which was exclusive of £4,000,000 cost of administration.

The total amount of unemployment benefit paid out from the Unemployment fund in 1921-22 was approximately £88,700,000; of this £27,000,000 was paid out in the last fiscal year 1921-22.

In religion, absolute freedom of conscience is guaranteed throughout the empire. The state religion in the Kingdom is that of the Church of England, and for the Imperial Army and Navy, and for all phases of imperial representation and activity abroad.

The inclusion of so many Mohammedans under the British flag abroad nevertheless constitutes a vital factor in the determination of current imperial policies, especially in the Near East, as do the vast numbers of Buddhists and other Oriental religious cults under Far Eastern British policies.

The most celebrated of British universities are Oxford and Cambridge, each with colleges founded in the thirteenth century, and inextricably intertwined in the fabric of British history. But there are many others in England, London, Durham, Manchester, Birmingham, Liverpool, Leeds,

Sheffield, and Bristol; in Scotland, St. Andrews, Edinburgh, Glasgow and Aberdeen; in Ireland, two in Dublin and one in Belfast, and one in Wales. At these sixteen universities there were, in 1922, 4,432 professors, and 50,870 students.

The system of instruction also includes elementary, special and certified schools, in which in the Kingdom the enrolment is about 8,500,000 pupils, besides very many technical, art, professional and scientific institutions along all lines incident to modern civilized needs. An exhaustive survey has just been completed to prepare the ground for a complete readjustment of educational methods to conform to modern needs.

The trade with the United States as reported by the United States Department of Commerce for the last two years has been as follows:

| England and Wales.    |                 |
|-----------------------|-----------------|
| Imports, 1920-21..... | \$1,205,259,154 |

## THE ARMY.

The army on peace strength numbers 183,000 men, with 205,000 in the trained reserve. The United Kingdom is a member of the League of Nations.

Gibraltar, the rock at the southernmost point of the Iberian Peninsula, guards the entrance to the Mediterranean. The width of the strait dividing Europe from Africa is fourteen miles. The Rock has been in British possession since 1713. It has been elaborated, tunnelled, and armed until it is considered impregnable. A large and secure harbor has been constructed at its foot. As a naval base its position is of the greatest strategic importance. The Rock is  $2\frac{3}{4}$  miles long,  $\frac{3}{4}$  of a mile wide and 1,396 feet in height; the area is nearly 2 square miles; a narrow isthmus connects it with the Spanish mainland. Its population, census of 1921, was 17,690. The military establishment numbers about 6,000 men. Gibraltar is a crown colony and the Governor and Commander-in-Chief, at present Gen. Sir Horace L. Smith-Dorrien, G. C. B., G. C. M. G., exercises all the governmental functions. The revenue for 1920 was £287,051 and the expenditures £372,994. In 1920 there entered 6,496 vessels of 11,614,187 tonnage.

| Trade with the United States was: |              |
|-----------------------------------|--------------|
| Imports, 1920-21.....             | \$21,466,475 |
| " 1921-22.....                    | 4,514,326    |
| Exports, 1920-21.....             | 409,379      |
| " 1921-22.....                    | 10,005       |

The United States Consul at Gibraltar is Richard L. Sprague.

Malta, an island 17 miles long by 8 wide and 58 miles due south of Sicily in the Mediterranean Sea and about 180 miles from the African coast, had centuries of stormy history. It was annexed to the British Empire in 1814 following the Napoleonic wars and has been greatly strengthened and made into a base for repair and refitment for the British fleet. The harbor of Valletta (population 24,159) has been improved with a breakwater, but it is not large. The area of the island is 92 square miles, and the total area, including the neighboring islands of Gozo and Comino, is 118 square miles. The civil population, by census of 1921, was 211,864. The land under cultivation amounts to 42,591 acres, mostly in small holdings. Some cotton is grown, and manufactures include lace filigree, cotton and cigarette. Fishing is important. Wheat, flour, sugar, edible oils, tobacco, textiles, wines, cattle food, petroleum, and coal are the chief imports. There are eight miles of railroads and in 1919-20 there entered the port 1,519 vessels of 1,893,850 tons.

The Governor, at present Field Marshal Lord Plumer, G. C. B., G. C. M. G., G. C. V. O., has an elected Legislature to care for purely local affairs. The revenue of the colony in 1919-20 was £650,489; expenditures, £632,233. Imports in 1920 were valued at £5,789,426 and exports at £1,602,294.

The United States Consul at Malta is Mason Mitchell.

NOTE.—Revised figures are given for 1911 to agree with boundary changes made in 1912.

The special census of the Prairie Provinces (1916) showed—Manitoba, 553,860; Saskatchewan, 647,835; Alberta, 496,525.

Of the population in 1911 there were 3,821,995 males and 3,384,648 females; population per square mile, 1.93. The densest average per square mile was 141.47, in Beauharnois, Quebec. Of the males, 2,369,766 were single, 1,331,353 were married, 89,154 were widowed, 839 were divorced, and 1,286 were legally separated. Of the females, 1,941,886

were single, 1,251,468 were married, 179,656 were widowed, 691 were divorced, and 1,584 were legally separated.

Foreign-born population of Canada (1911), 752,732; males, 470,927; females, 281,805. Of the foreign-born 303,680 were from the United States, 121,430 from Austria-Hungary, 89,984 from Russia, 49,194 from Norway and Sweden, 39,577 from Germany, 34,739 from Italy, 27,083 from China, 8,425 from Japan.

| 1919 Revised (calendar)..... | 51,086        | 2,036,165,606   | 47,940,456     | 111,487,780        | 408,598,260     | 376,789,093               |
| 1920 (Calendar).....         | 51,582        | 2,170,030,128   | 51,318,422     | 127,429,154        | 492,101,104     | 478,248,154               |

Mileage of chief Canadian railways: Intercolonial—1919, 2,243; Transcontinental—1919, 2,479; Canadian Northern—1919, 10,744; 1920, 11,046; Canadian Pacific—1919, 18,652; 1920, 18,697; Grand Trunk—1919, 5,698; 1920, 5,764; Grand Trunk Pacific—1919, 3,244; 1920, 3,269.

The figures for 1919 as given in last edition were for single track only. They have been changed to agree with the trackage figures in the table above. No separate figures for Intercolonial and Transcontinental are given for 1920. The mileage of these roads is included in the figures for the Canadian Government Railways—5,469.

C., Robert Brent Mosher; at Windsor, Ont., vacant; at Yarmouth, N. S., John N. McCunn.

Canada occupies the entire northern half of the continent of North America, excepting the United States Territory of Alaska in the northwest. It is bounded on the north by the Arctic Ocean, and the many indentations of the northeastern waters, including Baffin Bay; on the east by Baffin Bay and the Atlantic Ocean, on the south by the United States and on the west by the Pacific Ocean and Alaska.

It has 24,500 miles of coastline, and its frontier along the United States, about 3,000 miles, is a unique example of non-fortification. For more than 100 years, under treaty agreements, neither the United States nor Canada has maintained a soldier, fort, or other means of defense, at any point along this long border. Only two or three light-draft vessels, carrying a gun or two, ply the boundary waters, on customs duty for each country.

Canada is penetrated from the north in the eastern half by Hudson Bay, a body of salt water which, with the connecting strait, is about 1,000 miles long. Numerous rivers of navigable size flow into the several oceans—the St. Lawrence, dividing Canada and the United States for many miles on the eastern side, flows into the Atlantic, and in its lower reaches is very wide and accommodates the deepest draught craft; the Yukon, which rises in Canadian territory close to Alaska, then flows across Alaska into the Bering Sea to the northwest; the Mackenzie, which drains into the Arctic Ocean; and others of lesser size but of important commercial and power values.

In area Canada is larger than the United States, but is vastly less developed. The world-wide idea

people, whose employment is mostly fishing and sealing, next to agriculture and livestock. The colony contributed 11,922 men to the British armies in the World War, and 3,000 others enlisted in the Canadian contingent.

Besides the foodstuffs producible in that northern latitude, there are resources of minerals which are not yet much developed, including iron ores, copper and gold. The forests are a great source of revenue. Paper pulp is taken from there to England. It had, in 1919, 904 miles of railroad.

Imports in 1921 totalled nearly \$30,000,000, and exports more than \$23,000,000.

Foreign trade is heaviest with Canada, the United States following, Britain being next.

Trade with the United States was:

|                  |             |
|------------------|-------------|
| Imports, 1920-21 | \$9,698,622 |
| 1921-22          | 5,874,984   |
| Exports, 1920-21 | 1,758,934   |
| 1921-22          | 1,921,151   |

## BRITISH WEST INDIES.

### JAMAICA.

AREA, 4,431 square miles.

POPULATION, census of 1921, 867,021.

CAPITAL, Kingston; population, 1921, 62,562.

Other cities: Spanish Town, 8,694; Port Antonio, 7,074; Montego Bay, 6,616.

Governor, Sir Leslie Probyn, K. C. M. G.

United States Consul, at Kingston, Charles L. Latham.

Jamaica is situate in the Caribbean Sea, 90 miles south of Cuba, and is the largest and most valuable of the British West Indies. It is about the size of the State of Connecticut. It has a rather mixed population, West Indians predominating. In 1921, there were 1,074,703 acres cared for, of which 302,125 were tilled, and 772,578 pasture. Products are tropical. Imports from the United States are larger than from any other country, and exports to this country second to those to Britain.

The climate has attractions for winter tourists, and many citizens of this country visit the island. The island figures largely in the history of the Buccaneers of the West Indies before and during the time of Sir Henry Morgan, once its Governor. The old haunt of the pirate, Port Royal, at the entrance of the harbor, was destroyed and sunk under the sea by an earthquake.

Trade with the United States was:

|                  |              |
|------------------|--------------|
| Imports, 1920-21 | \$15,524,778 |
| 1921-22          | 8,238,928    |
| Exports, 1920-21 | 6,294,991    |
| 1921-22          | 7,128,854    |

### BERMUDA.

AREA, 19 square miles.

POPULATION, census of 1920, 219,987.

CAPITAL, Hamilton; population, 2,627.

United States Consul, vacant.

Bermuda, a crown colony, is a group of 360 small islands of coral formation, about 20 inhabited, in mid-Atlantic, 677 miles southeast of New York and 580 miles east of North Carolina. To Americans, the main island, capital Hamilton, population 2,627, is a favorite winter resort, fully 25,000 visiting it, annually. It ships to New York quantities of Easter lilies, early potatoes and onions. Of its 12,360 acres 4,000 are under cultivation. The population, by census of 1920, numbered 21,987, of which 7,509 were whites.

The Governor, Gen. Sir James Willcocks, is aided by two Councils and an elected House of Assembly of 35 members.

Bermuda is an important naval base with a well equipped dockyard. Food supplies are mostly imported from the United States and Canada. The imports in 1920 were valued at £1,414,250, and exports at £265,868. The revenue in 1920 was £219,753; expenditures, £188,470; debt, £85,000. Tonnage entering the port in 1920 amounted to 2,371,064 tons.

Trade with the United States was:

|                  |             |
|------------------|-------------|
| Imports, 1920-21 | \$4,311,331 |
| 1921-22          | 3,352,762   |
| Exports, 1920-21 | 1,098,682   |
| 1921-22          | 1,092,054   |

### THE BARBADOS.

AREA, 166 square miles.

POPULATION, 1920, estimated, 198,366

CAPITAL, Bridgetown; population, 16,648.

Governor, Lieut. Col. Sir C. R. M. O'Brien, K. C. M. G.

United States Consul, John J. C. Watson.

The Barbados are the most eastern of the Wind-

ward Islands, in the West Indies, lying out in the Atlantic at 13° north latitude.

Of the total 106,470 acres, 74,000 are tilled, producing chiefly sugar and cotton. Imports are heaviest from the United States, and exports heaviest to Canada. Tonnage entered in 1920 was 3,201,535.

These islands, together with others in the Caribbean Sea, were factors in the celebrated freebooting days of Morgan and other notorious pirates.

Trade with the United States was:

|                  |             |
|------------------|-------------|
| Imports, 1920-21 | \$3,912,907 |
| 1921-22          | 1,617,203   |
| Exports, 1920-21 | 1,945,816   |
| 1921-22          | 211,807     |

### TRINIDAD AND TOBAGO.

AREA, 1,863 square miles. Tobago, 114 square miles.

POPULATION, census of 1920, 391,279.

CAPITAL, Port au Spain; population, 70,146.

Governor, Col. Sir S. H. Wilson, C. B., C. M. G., R. E.

United States Consul, Henry D. Baker.

Trinidad, the most southerly of the West Indies, lies off the north coast of South America. Trade is heaviest, both import and export, with the United States. Total areas are 1,191,678 acres, of which 517,538 are cultivated. Products are mostly asphalt, oil with derivatives therefrom. The great asphalt lake, 110 acres in extent, on the island is immensely valuable, and seems inexhaustible. There are 12 miles of railroad in operation.

Port au Spain is one of the finest towns in the West Indies.

Tobago is an island governed by Trinidad.

Trade with the United States was:

|                  |              |
|------------------|--------------|
| Imports, 1920-21 | \$14,238,171 |
| 1921-22          | 4,382,268    |
| Exports, 1920-21 | 7,295,120    |
| 1921-22          | 4,565,575    |

### THE BAHAMAS.

AREA, 4,404 square miles.

POPULATION, census of 1921, 50,031.

CAPITAL, Nassau; population, about 12,000.

Governor General, Major Sir H. E. S. Cordeaux; K. C. M. G., G. B.

United States Consul, Lorin A. Lathrop.

The Bahama Islands number twenty, part of them uninhabited, and are in the Atlantic Ocean, off the coast of America. Nassau, on the Island of New Providence, near the Florida coast, is an attractive winter resort for Americans.

Sponges and sisal are the chief sources of revenue. Fruit growing is being developed. Trade with the United States is three times as heavy as with any other country.

### WINDWARD ISLANDS.

AREA, 133 square miles.

POPULATION, census of 1911, 66,750.

CAPITAL, St. George's, on Grenada Island.

Governor, Sir G. B. Haddon-Smith, K. C. M. G.

The Windward Islands lie at the eastern side of the Caribbean Sea, west from Martinique. They are Grenada and the Grenadines, St. Vincent and St. Lucia. Each has its own local government.

In 1916 there were under cultivation 30,200 acres. Products mostly are sugar, cocoa, nutmegs, cotton, mace and fruits.

### LEEWARD ISLANDS.

AREA, 715 square miles.

POPULATION, census of 1911, 127,103.

CAPITAL, Antigua.

Governor, Sir Eustace Fiennes, Bart.

The Leeward Islands, of the West Indies, are part of the Lesser Antilles, forming Froude's "Bow of Ulysses." They comprise in one administration five Presidencies, and include the Islands of Antigua, Barbuda, Redonda, St. Christopher, Nevis, Anguilla, Dominica, Montserrat, and the (British) Virgin Islands, with Sombrero, under Commissioners, and all except the latter having their own local Legislature.

Their chief products are sugar, molasses, cocoa and tropical growths. Trade with the United States is growing.

The trade of the Bahamas, the Windward Islands and the Leeward Islands with the United States was:

|                  |             |
|------------------|-------------|
| Imports, 1920-21 | \$6,124,861 |
| 1921-22          | 4,620,375   |
| Exports, 1920-21 | 4,013,120   |
| 1921-22          | 1,690,929   |

**BRITISH HONDURAS.**

AREA, 8,592 square miles.

POPULATION, census of 1921, 45,317.

CAPITAL, Belize, population, 12,660.

Governor General Sir E. Hutson, K. C. M. G.

United States Consul, William W. Early.

British Honduras is situate on the Caribbean Sea, south of Yucatan, and produces chiefly tropical fruits, mahogany, logwood, seashell, and cedar, much of which comes to the United States. Of the imports, a considerable trade is with this country and Canada, and comprehends things produced both in this country and Britain.

Imports in 1921 were valued at \$6,000,000, and exports at \$5,130,000.

Trade with the United States was:

|                       |             |
|-----------------------|-------------|
| Imports, 1920-21..... | \$2,622,217 |
| 1921-22.....          | 1,823,553   |
| Exports, 1920-21..... | 3,720,142   |
| 1921-22.....          | 2,309,003   |

**BRITISH GUIANA.**

AREA, 89,480 square miles.

POPULATION, census of 1921, 297,691.

CAPITAL, Georgetown; population, 53,422.

Governor, Sir W. Collet, K. C. M. G.

United States Consul, Chester W. Davis.

British Guiana is on the north shore of South America, with Venezuela on the west, Dutch Guiana on the east, and Brazil on the south. It is administered by a Governor, assisted by a Court of Policy, seven appointed and eight elected, these with six

others constituting the Combined Court that rules. Areas tilled are 177,000 acres, producing in 1920 sugar cane from 69,530 acres, rice from 55,250 acres, coconuts from 24,450 acres, coffee from 5,050 acres, rubber from 2,800 acres.

Livestock numbered 111,940 cattle, 1,420 horses, 2,250 sheep, 17,000 swine.

The placer gold mining industry is important, the 1920 production being \$480,000.

Ores from which aluminum is made are abundant, and it is believed that there will be development of the oil, manganese and mica resources.

Trade with the United States was:

|                       |             |
|-----------------------|-------------|
| Imports, 1920-21..... | \$6,246,348 |
| 1921-22.....          | 1,956,532   |
| Exports, 1920-21..... | 2,369,877   |
| 1921-22.....          | 301,201     |

**FALKLAND ISLANDS AND SOUTH GEORGIA.**

AREA, 6,500 square miles, including more than 100 islands. South Georgia, estimated, 1,000 square miles.

POPULATION, Falkland Island, census of 1919, 3,255 (2,271 males, 984 females). South Georgia, estimated, 1,000; only 3 females.

The Falkland Islands lie 300 miles east from the Strait of Magellan, at the southern end of South America. Their main value is in their strategic location, although there are domestic animals and whaling interests. It was off the Falkland Islands the British war fleet under Admiral Sturdee defeated the troublesome German fleet in the late war, completing the elimination of the naval force of the Central Powers in the South Pacific.

**BRITISH PROVINCES AND NATIVE STATES IN INDIA.**

NOTE.—Figures in Italics are included in the totals just preceding them.

**INDIA.**

AREA, of British provinces, 1,093,074 square miles; area of protected native states or agencies 709,555 square miles. Total India, 1,802,629 square miles.

POPULATION, of British provinces, census of 1921, 247,138,396; native states and agencies, 71,936,736; total India, 319,075,132.

CAPITAL, Delhi; population, 303,148.

Viceroy and Governor General, The Earl of Reading, F. C., G. C. B., G. M. S. I., G. M. I. E., K. C. V.

United States Consul General—At Calcutta, Alexander W. Weddell. Consuls, at Bombay, North Wanship; at Karachi, Avra M. Warren; at Madras, Thomas M. Wilson; at Rangoon, James P. Moffatt.

India is bounded on the north by Afghanistan and China; on the east by China, Siam and the Bay of Bengal; on the south by the Bay of Bengal, the Indian Ocean and the Arabian Sea; on the west by the Indian Ocean, the Arabian Sea, Persia and Afghanistan. Its territory is as large as that of the United States east of the Rocky Mountain States.

The climate ranges from the extremely hot in the southeast to cooler elevations of the north-west mountains, the whole being tropical in general character.

Approximately 25 per cent. of the area is forested, among the timber products being sandalwood, teak, ironwood, deodar, sisau, satinwood, date palm, coconut, sago, banyan and acacia.

The country is essentially agricultural 70 per cent. of the people living therefrom. By the 1911 figures, there were in all of India, British India and the native states, 313,000,000 persons, of which about 225,000,000 were supported by soil tillage, forestry and livestock husbandry. Agriculture is crude, although improvement of method is being attained through the efforts of the British Department of Agriculture, which maintains staffs of experts to inculcate modernity among the natives. They also teach better ways of caring for domestic animals, and encourage the introduction of high-bred grades.

In 1920 there were 254,990,536 acres in crops in British India, with 23,197,000 acres irrigated by canals, 7,337,000 by tanks, 12,692,000 by wells and 5,737,000 by various other ways. About \$460,000,000 of crops were taken from irrigated lands in the crop year of 1919-20.

In 1921 rice on 73,023,000 acres yielded 23,033,000 tons; wheat, 6,709,000 tons from 25,722,000 acres; cotton, 3,556,000 bales from 21,016,000 acres—an exceedingly low per acre yield.

Other important products were linseed, rape, mustard, jute, indigo, sugar cane and tea.

Livestock in 1920 numbered 117,000,000 oxen,

28,493,000 buffalo, 21,984,000 sheep, 24,134,000 goats, 1,698,000 horses, 75,000 mules, 1,372,000 donkeys and 408,000 camels.

The cotton industry is the most important next to agriculture, there being 284 spinning and weaving mills, employing 282,297 persons. Jute mills come next, with 75 establishments employing 264,373 persons; cotton ginning and baling, 1,775 establishments employing 133,323 persons. Other important industries employing 11,000 or more persons are transport, rice mills, engineering, manufacture of arms and ammunition, machinery, lumber, woollen goods, sugar, oil, tobacco, lace, rubber and other things.

Industry has 4,827 establishments and employs 1,238,410 persons.

In minerals, India has an unusually wide range of products: gold, silver, petroleum, manganese, salt, saltpetre, lead, tungsten, mica, tin, jade-stone, precious stones, iron ore, coal, copper, alum, potash, and a dozen other minerals valuable in the modern processes of manufacture.

Coal, with about \$50,000,000 output in 1919, led all others in value.

The 1919 figures showed coal, 22,628,037 tons; manganese ore, 537,995 tons; wolfram, 3,577 tons; mica, 45,784 hundredweights; copper, 32,759 tons; gold, 507,261 ounces, and of precious stones, 158,577 carats. About 250,000 work in the mines. Manganese, without which modern steelmaking is impossible, formerly came to the United States entirely from India. In the past ten years this country has drawn most of its supply from South America.

Imports in 1920-21 into India totalled in value \$1,608,012,406, of which nearly two-thirds came from the United Kingdom, the United States following with slightly more than 10 per cent., Japan coming next with 7 per cent., Java, Sumatra and Borneo next with 5 per cent., and no other of 20 countries selling to India more than 2 per cent. of the total.

India exported in 1920-21 a total of \$1,191,017,009, of which slightly more than 20 per cent. went to the United Kingdom, 15 per cent. to the United States, 17 per cent. to China, 10 per cent. to Japan, 5 per cent. to Ceylon, nearly 5 per cent. to Belgium, and not more than 3 per cent. to any other of seventeen countries.

Jute led in value of exports, cotton, raw and manufactured, coming next, while cotton manufactures exceeded all other importations, being half the total.

In 1920-21 there were 4,331 vessels entered Indian ports, of a total tonnage of 8,046,475, of which 2,444 vessels were British, with 6,113,299 tonnage, and 332 British Indian, with 144,638 tonnage. The British and British Indian ships were about 60 per cent. of the total.

India has 55,000 miles of railways and about 150,000 miles of highways. Transport is aided also by the use of irrigation canals for freight moving, there being navigable waterways inland totalling about 3,300 miles. Railway development is not modern, three gauges being employed, preventing interchange of cars from one line to another.

Great Britain officially defines British India as that part of the Indian peninsula which is directly under British rule, but the technical delimitation of British India shades off into other areas, where British influence predominates and is virtually complete. The British imperial status was given when Queen Victoria was proclaimed Empress of India in 1876.

Government there by Britain is declared to be based on the principle which has obtained in other colonies and dominions since the time the United States separated from the mother country—that of advancing the people as far as possible along the pathway toward autonomy and complete self-government. The ultimate objective is said to be that absolute self-government which the Dominion of Canada, the Commonwealth of Australia, the Union of South Africa and other areas have. The backward status of the people has prevented the realization of such an end so far, according to British authoritative statements.

India is a member of the League of Nations. It is said that there are 45 races, speaking 170 languages, and 2,400 castes and tribes, divided, 217,000,000 Hindus, 60,000,000 descendants of Turanian tribes, 66,000,000 Mohammedans, and there are 700 feudatory states. Each cult, caste and tribe adheres fiercely to its religious beliefs and social rules, many of them with fanaticism, especially the Mohammedans, who even in far-off India look quite as faithfully toward Mecca each sundown as do those nearer to the capital of Islam for 1,000 years. The stability of these conditions, touching all classes, is probably the more assured because of all the population only about 10 per cent. is urban.

## POPULATION OF CITIES OF INDIA.

The population (1921) of the cities of India of above 100,000 inhabitants was as follows:

|                  |           |              |         |
|------------------|-----------|--------------|---------|
| Greater Calcutta | 2,632,292 | Amritsar     | 160,409 |
| Bombay           | 1,172,953 | Allahabad    | 155,970 |
| Madras           | 522,951   | Nagpur       | 149,522 |
| Hyderabad        | 404,225   | Mandalay     | 147,429 |
| Rangoon          | 339,527   | Srinagar     | 141,631 |
| Delhi            | 308,148   | Madura       | 138,894 |
| Lahore           | 279,558   | Barcelly     | 127,989 |
| Ahmedabad        | 274,202   | Misert       | 122,567 |
| Lucknow          | 243,553   | Jaipur       | 120,196 |
| Bangalore        | 238,111   | Patna        | 120,109 |
| Karachi          | 215,781   | Trichinopoly | 119,521 |
| Cawnpore         | 213,044   | Surat        | 118,299 |
| Benares          | 199,493   | Dacca        | 117,304 |
| Agra             | 185,946   | Ajmer        | 114,196 |
| Poona            | 176,671   | Jubbulpore   | 108,973 |

There are also 54 cities with a population of more than 30,000 and less than 100,000.

## RELIGIOUS STATISTICS OF INDIA.

(Census of 1911.)

| SECTS.                  | Number.     |
|-------------------------|-------------|
| Total population        | 313,547,840 |
| Hindus                  | 217,586,892 |
| Sikhs                   | 3,014,466   |
| Buddhists               | 10,721,453  |
| Parsees                 | 100,096     |
| Mohammedans             | 66,647,299  |
| Christians              | 3,876,203   |
| Roman Catholics         | 1,490,863   |
| Anglicans               | 492,752     |
| Presbyterians           | 181,130     |
| Baptists                | 337,226     |
| Lutherans               | 218,500     |
| Methodists              | 171,844     |
| Congregationalists      | 135,265     |
| Salvationists           | 52,407      |
| Other Protestants       | 45,894      |
| Syrian (Romo-Syrian)    | 413,142     |
| Syrian (others)         | 315,162     |
| Armenians, Greeks, etc. | 4,064       |
| Jews                    | 20,980      |
| Animistic               | 10,295,168  |
| Others                  | 37,101      |

## ILLITERACY IN INDIA.

The following statistics of illiteracy are those of the census of 1911.

|         | Able to Read and Write. | Unable to Read and Write. | Total.      |
|---------|-------------------------|---------------------------|-------------|
| Males   | 16,938,668              | 143,480,620               | 160,419,288 |
| Females | 1,600,763               | 151,397,030               | 152,997,793 |
| Total   | 18,539,431              | 294,877,650               | 313,417,081 |

The problem in India is always how to get enough food for the people; that is, enough to stave off starvation. Famines and scourges are frequent, and obstacles to efficient use of the natural resources are ever present in the conservatism of the people and disinclination to change.

Although the efforts of Britain to introduce better methods have accomplished much and have held loyal a large proportion of the people, there has lately been an arousal of extreme nationalism, with resistance by the agitators and their followers to British rule, taking under the leadership of Gandhi the form of non-co-operation.

Trade with the United States was:  
Imports, 1920-21.....\$92,549,584  
" 1921-22.....35,723,466  
Exports, 1920-21.....122,860,161  
" 1921-22.....78,560,413

Beluchistan is in the extreme western part of the Indian Empire, with 54,228 square miles of area, and in 1921, 421,679 of population, practically all Mussulmans or Hindus. It is governed by British Residents under long-standing agreements. Barren mountains and deserts render comparative miles from the mainland of Burma. Area is 2,260 square miles, and population, 26,833. Timber wealth is large, but the use of the islands for a penal settlement is the chief interest.

Sikkim is a state of India in the Himalayas, south from Thibet. The area is 2,818 square miles, and population in 1921 was 81,722, composed of Bhutias, Lepchas and Nepalese. It is governed by a Maharajah, H. H. Tashi Namgyal, under a British protectorate.

Cereals, fruits and woolen cloth are the products. The country is undeveloped.

The Andaman Islands are in the Bay of Bengal, 120 miles from the mainland of Burma. Area is 2,260 square miles, and population, 26,833. Timber wealth is large, but the use of the islands for a penal settlement is the chief interest.

The Nicobar Islands, 75 miles from Andaman Islands, have 635 square miles of area, and population of 10,000.

## OTHER BRITISH ASIATIC POSSESSIONS.

## ADEN, PERIM, SOKOTRA, AND BAHRÉIN ISLANDS.

United States Consul at Aden, Cecil M. P. Cross.

Aden, a peninsula on the Arabian coast, is on the southern end of the Suez Canal, and has 75 square miles of area, in Aden proper, and 9,000 square miles including protectorate areas. The population, including Perim, in 1921 was 54,923, mostly Mohammedans. Foreign trade is indicated by about \$25,000,000 in 1921 of imports—cotton goods, grains, coal, sugar, and foods; exports being coffee, gum, hides, cotton goods, and foods.

Manufacturing is chiefly of cigarettes and salt.

There are about 30 miles of narrow gauge railways.

Sokotra is an island off the African coast under British protection, and the Kuria Muria Islands, off the Arabian coast—all attached to Aden. Area in all is 1,382 square miles, and population 12,000, mostly engaged in livestock husbandry.

Trade with the United States was:

|                       |             |
|-----------------------|-------------|
| Imports, 1920-21..... | \$1,221,230 |
| 1921-22.....          | 1,584,376   |
| Exports, 1920-21..... | 1,696,940   |
| 1921-22.....          | 1,541,368   |

The Bahrein Islands lie off the Arabian coast, in the Persian Gulf, the total area being 280 square miles, and the population 110,000, mostly Mohammedans. Pearl fishing is the chief interest. The foreign trade in 1920-21 totalled about \$5,900,000 of imports, chiefly rice, coffee, sugar, tea, and cotton piece goods; and exports about \$6,250,000, being about \$750,000,000, and exports \$600,000,000, mostly rice, coffee, sugar.

## CEYLON.

United States Consul, at Colombo, Marshall M. Vance.

Ceylon is an island as large as the State of West Virginia, off the southern tip of India, in the Indian Ocean, with 25,481 square miles of area and 4,497,599 of population, divided: Buddhists, 2,770,000; Hindus, 982,000; Mohammedans, 302,000; Christians, 444,000. Colombo (population 1921, 244,110), is the chief city.

Of the total 16,212,000 acres, 3,106,000 are tilled, and 1,000,000 pastureland. Products are coconuts, rubber, cinnamon, tea and grains. Tea is the most important, 185,000,000 pounds being exported in 1920, 120,000,000 to the United Kingdom. Rubber exportations in 1920 were more than 88,000,000 pounds, half going to the United Kingdom, and 39,368,000 to the United States. Total imports in 1920 were about \$125,000,000; exports, about \$85,000,000.

Trade with the United States for the fiscal year 1921-22 was: imports, \$411,108; exports, \$9,723,851. The Maldivé Islands are 400 miles west from Ceylon, with 70,000 population, almost all Mohammedans. Coconuts, millet, palms, fruit and nuts are the products.

## CYPRUS.

Cyprus is an island, third largest in the Mediterranean Sea, 40 miles from Asia Minor and 60 from Syria. Its area is 3,584 square miles, and population in 1921 was 274,108 Mohammedans (Ottoman Turks), 56,428; Christians, 214,480.

Nicosia is the capital, population 18,461; other towns, Larnaca, 10,652; Limassol, 11,843.

The island is agricultural, with wheat, barley, vetches, oats, olives and cotton chief products. 30 per cent. of the land area is cultivated.

## STRAITS SETTLEMENT.

AREA, Singapore Island, 217 square miles; Penang Island, 108 square miles; Wellesley, 280 square miles; Malacca, 840 square miles; Pangkor, 155 square miles; total, 1,600 square miles.

POPULATION, estimated, 1921, 882,000.

CAPITAL, Singapore, population, 423,768.

Governor, Sir Lawrence N. Guillemard, K. C. B., K. C. M. G., also High Commissioner for the Federated Malay States; High Commissioner for Brunel, and British Agent for North Borneo and Sarawak.

United States Consul General, at Singapore, Ernest L. Harris; Consul at Penang, Renwick S. McNeice.

The Straits Settlement is a crown colony in which Singapore, an island of 217 square miles area, just off the coast of the Malay Peninsula, is the chief part. The population in 1921 was about 890,000. Products are typical of that zone, total imports being about \$750,000,000, and exports \$600,000,000, two-thirds of each with British countries.

Trade with the United States was:

|                       |              |
|-----------------------|--------------|
| Imports, 1920-21..... | \$14,927,449 |
| 1921-22.....          | 4,545,796    |
| Exports, 1920-21..... | 107,504,102  |
| 1921-22.....          | 71,819,493   |

The Federated Malay States lie in the Malay Peninsula, and have 27,506 square miles, and population in 1919 was about 1,315,000. Products are coconuts, rice, rubber, tapioca, pepper, gambier, and nipah palms. In 1920 imports were about \$100,000,000, and exports about \$165,000,000.

The Federated Malay States, area, 23,486 square miles, and estimated population, all Mohammedans, of about 1,123,000, are five in number, each under a native Sultan and with a British adviser.

British North Borneo has 31,106 square miles area, with 208,183 population in 1911, chiefly Mohammedans on the seacoast and aboriginal tribes inland.

A. C. Pearson is Governor General, and the British North Borneo Company has jurisdiction.

Exports are mainly timber, sago, rice, gum, and the tropical products.

Brunei has been since 1888 a protected sultanate on the north side of the island of Borneo, between Sarawak and British North Borneo. Its area is about 4,000 square miles, and population, census of 1921, 25,454, of which 35 were Europeans. The revenue for 1920 was about £23,500 and expenditures about £26,000; debt £50,100. A British Resident is in control.

Sarawak, the land of the white Rajah, is along the northwest coast of Borneo, between the mountains and the China Sea. Its coast line is 400 miles long and its area 42,000 square miles. Its population is estimated at about 600,000. The chief towns are the capital, Kuching, 23 miles up the Sarawak River, and Sibiu, 60 miles up the Rejang River, which is navigable for large steamers. The chief exports are sago, pepper, gold, plantation rubber, gutta, percha, gutta, jelutong, cutch, petroleum, birds' nests, fish, oil nuts and sugar. The Rajah is H. H. Charles Vyner Brooke, great-nephew of James Brooke, the Englishman to whom the Sultan of Brunel gave the Government in 1842.

## HONG KONG.

Governor General, Sir R. E. Stubbs, K. C. M. G.

United States Consul General, William H. Gale.

British Hong Kong is a crown colony acquired in 1841, and lies at the mouth of the Canton River 60 miles from Canton. It is 11 miles long by from two to three wide. The population in 1920 was estimated at 625,168, non-Chinese being 14,000.

Hong Kong is an important British station of great strategic value commercially as well as naval as to China. Foreign trade in 1920 was: imports about \$650,000,000; exports, about \$765,000,000; of the imports 32 per cent. was from the British Empire; of the exports, 18 per cent. to British areas.

Much of the trade with the United Kingdom is for articles for re-exportation, the trade comprising exports of the simpler products of the areas tributary to Hong Kong, and imports the manufactures and other things of more advanced countries.

Trade with the United States was:

|                       |              |
|-----------------------|--------------|
| Imports, 1920-21..... | \$22,042,197 |
| 1921-22.....          | 19,589,408   |
| Exports, 1920-21..... | 28,210,902   |
| 1921-22.....          | 11,036,422   |

## WEIHAUWEI.

Weihauiwei is in the Chinese Province of Shantung, and includes islands and the bay, which were leased in 1898. The area is 285 square miles, and the population was 147,177 in 1911. Under agreement made at the Shantung Settlement at the Washington Conference, January, 1922, Great Britain will restore the territory to China.

## UNION OF SOUTH AFRICA.

AREA, 473,089 square miles; divided, Cape of Good Hope, 276,966; Natal, 35,284; Orange Free State, 50,839; the Transvaal, 110,450.

POPULATION, census of 1921, 6,922,813; divided, Cape of Good Hope, 2,781,185; Natal, 1,284,000; Orange Free State, 628,360; the Transvaal, 2,085,837.

CAPITALS, Cape Town (seat of Legislature), population, census of 1921, 206,558; Pretoria (seat of Government), 73,770; other cities, Johannesburg, population, 284,191; Durban, 140,324; Port Elizabeth, 45,927; Kimberley, 39,320; Bloemfontein, 38,865, and six others having more than 10,000 but less than 21,000 whites.

Governor General, H. R. H. Prince Arthur of Connaught, K. G.

**Primer, Gen. the Rt. Hon. J. C. Smuts** (Native Affairs).

**United States Consul General**, at Cape Town, Alfred A. Winslow; **Consuls**, at Durban, Natal, Lewis V. Boyle; at Port Elizabeth, Monnett B. Davis; at Johannesburg, vanant.

The Union of South Africa, referred to by some Britons as "The flower of British democratic development," includes the former colonies of the Cape of Good Hope and Natal, and the one-time Boer republics, the Transvaal, and the Orange Free State. These were all united May 31, 1910, under self-governing privileges. Legislative power rests with a Senate of 40 members, each with a £500 property qualification, eight appointed and 32 elected; and a House of Assembly of 134 elected members.

The Government, to which the British Parliament granted broadest powers, is on a very advanced platform of expression of the people's will. There is an elected provisional council in each state with an administration appointed by the Governor General which deals with local matters.

The Union of South Africa is a member of the League of Nations.

The census of 1921 returned 1,522,924 whites and 5,399,839 colored; of the 4,697,152 colored returned in the 1911 census, 4,019,006 were Bantu natives, 152,309 Asiatics and 525,837 of other races. Of the cities, Johannesburg, Cape Town, Pretoria, Port Elizabeth and East London alone returned a majority of white inhabitants.

The defense force of the Union has been entirely responsible for the military administration since Dec. 1, 1921, and the imperial soldiers have been withdrawn.

The railways owned by the several colonies prior to the Union were in May, 1919, merged into one system, the South African Railways, under control of the Union Government. The total mileage in operation March 31, 1920, was 9,542 miles; Natal, 1,302; Orange Free State, (Cape), 4,252; Transvaal, 2,644. The capital expenditure up to March 31, 1921, was £99,821,886; gross earnings, 1920-21, were £23,618,457; expenditures, £18,646,912. The mileage of privately-owned lines was 507 (Cape, 453; Natal, 50; Orange Free State, 4).

The overseas shipping entering the ports in 1920 was 1,200 vessels of 4,085,000 tons; coastwise, 2,532 vessels of 5,698,000 tons.

The output of gold and diamonds from South Africa from the earliest dates of discovery to Dec. 31, 1920, is given in the following table, the value of gold being calculated at £4.2477 per ounce.

| Province.              | Gold.               | Diamonds.           |
|------------------------|---------------------|---------------------|
| Cape of Good Hope..... | £21,847             | £169,832,477        |
| Natal.....             | 83,678              | 28,979,807          |
| Transvaal.....         | 673,809,271         | 18,984,856          |
| Orange Free State..... |                     |                     |
| <b>Total.....</b>      | <b>£673,914,796</b> | <b>£216,797,140</b> |

The value of the coal output for the Union in the same time was £48,871,775, in all provinces; of copper, £22,717,538, chiefly from the Cape; and of tin, £4,440,170, chiefly from the Transvaal.

The agricultural and dairying industries have been well developed for African areas, and such produce is even shipped to the London market.

Progress is being made in development of manufacturing to use the country's raw materials, more than \$200,000,000 being already invested therein.

The Union of South Africa spent out of its loan funds for war services in the six fiscal years, 1915-21, £22,940,555.

**Budget, 1921-22—Revenue.....** £29,150,000  
**Expenditure.....** £29,000,538

**Expenditure, loan account.....** 11,731,300

**Debt, March 31, 1921.....** 178,607,939

**Imports for 1920 were £101,827,104; exports,**

**£87,067,516.**

**Trade with the United States was:**

**Imports, 1920-21.....** \$46,925,067

**" 1921-22.....** 13,059,700

**Exports, 1920-21.....** 10,338,040

**" 1921-22.....** 5,282,140

**Southwest Africa**, formerly German territory, annexed 1884, occupies the Atlantic Coast from the Orange River to Angola. It was conquered by the armed forces of the Union in the World War, and surrendered on July 9, 1915, at Khorar. It is now administered by the Union under a mandate from the League of Nations, dated Dec. 17, 1920. It covers about 322,400 square miles and the native population is estimated at 218,000 with 19,000 Europeans, between 7,000 and 8,000 of whom are Germans and the rest South African farmers.

It has a very healthful climate, dry and temperate, with variety, as the country rises to mountainous

elevations inland. It is essentially a stock-raising country.

**Budget, 1921-22—Revenue.....** £696,800

**Expenditures.....** 894,644

### SOUTH AFRICA.

**Basutoland**, with 11,716 square miles, and, by the census of 1921, 500,554 population, of which 1,396 were Europeans, lies in South Africa north-east from the Cape of Good Hope Province on an elevated plateau. It is well watered and has a fine climate. Stock-raising is most important. Products are wool, wheat, cereals, with beginning of iron workings, and coal production promised. The territory is governed by a resident Commissioner under the High Commissioner for South Africa.

**Bechuanaland**, area, 275,000 square miles, and population, by the census of 1921, 152,983, is in the middle of Southern Africa between Southwest Africa and the Union of South Africa and Rhodesia. It is utterly undeveloped, but cattle growing and agriculture have gained momentum, and the livestock already totals more than 600,000 head. Gold is mined, the 1921 output being in excess of \$100,000. It is a protectorate governed by a resident Commissioner.

**Rhodesia**, with 440,000 square miles, and 1,728,000 population, estimated, and divided by the Zambesi River into Northern and Southern Rhodesia, about of equal size and importance, lies in Central South Africa, extending from the Transvaal to Belgian Congo and Tanganyika. The people are progressive, women voters, and good beginnings have been made in agriculture and cattle raising. Gold and silver are mined. The total output of gold from 1890 to Jan. 1, 1922, was £51,401,615.

The territory is under the administration of the British South Africa Company, who secured a royal charter Oct. 29, 1895. There is a Legislative Council of 19, of whom 12 are elected by direct vote, women voting.

In a referendum held Nov. 6, 1922, the people of Rhodesia cast 5,989 votes in favor of incorporation with the Union of South Africa and 8,774 against, being a majority of 2,785 against.

**Swaziland**, with 6,679 square miles, and a population, by census of 1921, of 133,663, lies at the southeast side of the Transvaal in South Africa, and produces chiefly tobacco, corn, vegetables, sweet potatoes, and livestock. Some gold is yielded. The country is undeveloped. It is governed by a resident Commissioner under the authority of the High Commissioner of South Africa.

### BRITISH WEST AFRICA.

#### NIGERIA.

**AREA**, estimated, 332,000 square miles.

**POPULATION**, estimated, 16,250,000.

**CAPITAL**, Lagos.

**Governor**, Sir Hugh Clifford, G. C. M. G.

Nigeria lies in Western Africa, between Cameroon and Dahomey (French) on the Gulf of Guinea. The hinterland stretches back 600 miles to French West Africa. The tin, lead and iron ore industries are old and valuable. Other products are palm oil, rubber, nuts, ivory, hides, livestock, ostrich feathers, drugs and tobacco.

Nigeria is a country, like most of Africa, of vast natural resources, with barely initial exploration done up to this time. The people, as in all Mohammedan countries, are backward, but Europeans with capital have gone in and are bringing resources into play. Slavery was abolished by ordinance in 1914 and slave-dealing suppressed.

Commerce is mostly by the trading stations common to such lands, at which simple manufactures are exchanged for native products. There are (1920) 1,126 miles of railroad.

The value of the imports in 1920 was £25,216,507 and of exports, £16,987,018.

**Cameroon**, 31,000 square miles, and 400,000 population, lies between British Nigeria and the French Congo in Western Africa. It is part of the former German colony Kamerun, the eastern and larger part of which went to France (which see). It is a region of fertile soils, and progress is rapid toward building up valuable agricultural production—cloves, vanilla, ginger, pepper and palm oil. Ivory is a large product.

The seat of Government is Buea and the administrator is the Governor of Nigeria.

**Gambia**, area, 4,130 square miles, and population, estimated at 240,000, is an independent West African British crown colony, from which nuts, hides and palm kernels are exported, and the usual supply of manufactures imported from developed countries.

Its imports in 1920 were valued at £2,711,880 and exports at £2,466,145. The tonnage of vessels entering the ports in 1920 was 796,920.

It is administered by a Governor as a crown colony.

The trade of all British West Africa with the United States was:

|                       |             |
|-----------------------|-------------|
| Imports, 1920-21..... | \$9,300,348 |
| 1921-22.....          | 6,077,716   |
| Exports, 1920-21..... | 7,051,365   |
| 1921-22.....          | 9,338,098   |

#### THE GOLD COAST.

(The Gold Coast, Ashanti and the Northern Territories and mandate for Togoland.)

AREA—about 80,000 square miles; area of that part of Togoland under British mandate, 12,600 square miles.

POPULATION, census of 1921, 2,029,750; of Togoland, estimated, 350,000.

CAPITAL—Accra; population, estimated, 20,000.

Governor—Brig. Gen. Sir F. G. Guggesberg, K. C.

M. G.

The Gold Coast lies along the Gulf of Guinea for 334 miles. The French Ivory Coast is on the west, and on the east is Togoland, formerly a German colony, and now divided by mandate of the League of Nations between Great Britain and France. The French portion, about 21,100 square miles, is attached for administrative purposes to Dahomey, in the east (which see), and the British, about 12,600 square miles, is administered by the Governor of the Gold Coast.

Under his administration also falls Ashanti, due north of the Gold Coast, and the Northern Territories, due north of Ashanti. These countries have enormous wealth in their forests, and the cultivation of cacao and rubber is being fostered. Palm kernels and oil are among the chief products.

There is a Government railway, 168 miles, from Secoundee to Kumasi, and a line from Accra to Anyinam (85 miles), the extension of which to Kumasi was to be pushed in 1922.

#### SIERRA LEONE.

AREA of colony, 4,000 square miles; of protectorate, 27,000 square miles; total, 31,000 square miles.

POPULATION of colony, estimated, 1920, 80,000 (European, 1,028); of Protectorate, census of 1911, 1,327,560.

CAPITAL—Freetown; population, 1911, 34,090.

Governor—Richard J. Wilkinson, C. M. G.

Sierra Leone lies on the west coast of Africa for 180 miles, between French Guinea and Liberia. In its capital, Freetown, it has the greatest seaport in West Africa, with an excellent harbor and a naval coaling station. The colony has been in British possession since 1767. The hinterland forms the protectorate, which extends inland about 180 miles. The chief exports are palm kernels, kola nuts and palm oil; the chief imports, textiles, spirits, tobacco and hardware.

The tonnage entering Freetown in 1920 was 2,428,337; the value of the imports was £3,548,478, of exports, £2,949,380.

#### BRITISH EAST AFRICA.

Kenya, colony and protectorate, extends from the Indian Ocean northeast to Italian Somaliland and north to Abyssinia, west to Uganda, and south to Tanganyika. Its boundaries are the Umba, Juba and Uganda Rivers. It has 245,060 square miles of area, and estimated population of 2,630,000. On the coast the people are Mohammedans, and inland of crude tribal religions. Nairobi, a famous centre for big game hunting, is the capital; population about 25,000. A Government railroad runs from Mombasa on the coast through Nairobi to the lake Victoria Nyanza, 618 miles.

The country, of course, is undeveloped, but what developing has been done is in mining and agriculture, with rice, coconuts, cotton, sisam, nuts, cassava, sugar cane, fruits, some cereals, and some gold, graphite, marble, manganese, opals, copper, bitumen and kaolin produced, and with large possibilities for mineral development.

Tanganyika was formerly German East Africa, and was taken by the British in 1918, the Urundi and Ruanda districts going to Belgium, and the "Kionga Triangle" to Mozambique (Portuguese East Africa). It reaches from the coast to Lake Tanganyika and from Lake Nyassa to Victoria Nyanza. It is administered under a mandate from the League of Nations, by a Governor, with headquarters at Dar-es-Salaam.

The area is 365,000 square miles, estimated, and the population 7,659,000, estimated. Whites are negligible, numbering less than 2,500.

Forest wealth is large, and there is much land susceptible of agricultural development for the production of tropical fruits and other foodstuffs. Domestic animals figure in the wealth of the people, who are extremely crude and uncivilized.

The Uganda Protectorate, in East Africa, has 110,000 square miles, and the population in 1921 was estimated at 3,200,000. The country is well advanced in civilization, 750,000 of the people belonging to the intelligent class. Cotton is the chief product. Since the British took it over there has been expansion of foreign trade by 200 per cent.

The trade of all British East Africa with the United States was:

|                       |             |
|-----------------------|-------------|
| Imports, 1920-21..... | \$2,600,642 |
| 1921-22.....          | 1,487,399   |
| Exports, 1920-21..... | 4,340,333   |
| 1921-22.....          | 1,204,997   |

Nyassaland, formerly known as British Central Africa, is situated on the southern and western shores of Lake Nya sa, and extends as far as Zambesi. It has 39,573 square miles, and in 1921 had 1,200,000 population, estimated. Coffee, tobacco, cotton, tea and livestock are the principal industries, foreign trade, imports and exports, totalling about \$4,500,000 in 1921.

#### ZANZIBAR.

Zanzibar is an island of 1,020 square miles, 23 miles off the eastern coast of Africa, having 196,733 population in 1910. Lord Salisbury, in 1890, traded Heligoland in the North Sea with Germany for it.

It is governed by a Sultan, Seyyid Khalifa bin Harub, K. C. M. G. (succeeded Dec. 9, 1911), but is administered by a British High Commissioner, Major Gen. Sir Edward Northey, K. C. M. G., and a British Resident, J. H. Sinclair. The island of Pemba, 30 miles to the northeast, area 380 square miles, is included in the government.

The people are Mohammedans, and their clove industry yields the bulk of the world's supply, there being, estimated, 48,000 acres, with 4,750,000 trees devoted to that product, with nearly \$15,000,000 in annual exports to all parts of the world. The copra industry is next, with 55,000 acres, on which 2,500,000 coconut trees produce.

Manufactures are pottery, rope, soap, oil, jewelry and mats.

Imports in 1920 were valued at £2,738,025; and exports at £3,011,180.

The revenue in 1920 was £330,212, and the expenditures £403,808.

Zanzibar, population, 35,000, has one of the finest ports in Africa. In 1920 there entered the port 335 vessels of 1,027,563 tons.

#### MINOR AFRICAN POSSESSIONS.

Mauritius, an island in the Indian Ocean, 500 miles east from Madagascar, has 720 square miles, and in 1921, 377,108 population, of which 122,424 were Roman Catholics, and most of the others Hindus. Port Louis, population 39,900, is the capital and chief seaport.

The total of about \$42,000,000 exports in 1920, all but about \$1,000,000 was sugar, it being one of the world's important sugar sources.

Seychelles and tributary dependencies include 90 islands of 156 square miles, and a 1920 population of 24,500, estimated, lying in the Indian Ocean near Mauritius. The capital is Victoria, a port with an important coaling station. From 23,000 acres, in 1920, there were 23,000,000 coconuts produced, other products being phosphates, mangrove bark, livestock and fish.

Somaliland, a protectorate, with 68,000 square miles, and 300,000 population, all Mohammedans, is in Northeast Africa, on the Gulf of Aden, with Abyssinia to the south and west and Italian Somaliland on the east. The chief town is Berbera, population 30,000, and the products skins, resin, gum, cattle and sheep.

St. Helena, the island made famous by the exile of the Emperor Napoleon, is 1,200 miles off the west coast of Africa, has 47 square miles, and about 3,800 population. Fruits, nuts, timber, flax, lace making, flax the chief, are the industries. It is an important naval coaling station, and, although volcanic and small, has large strategic value.

Ascension Island is in the South Atlantic off the coast of Africa, containing 34 square miles and 250 population.

#### AUSTRALIA, COMMONWEALTH OF.

AREA, 2,974,581 square miles, divided: New South Wales, 309,432; Victoria, 87,884; Queensland, 670,500; South Australia, 380,070; West Australia, 975,920; Tasmania, 26,215; North Territory, 523,620; Federal Territory, 940.

POPULATION, census of April, 1921, 5,496,794, divided: New South Wales, 2,099,703; Victoria, 1,531,529; Queensland, 757,634; South Australia, 495,336; West Australia, 332,213; Tasmania, 213,877; North Territory, 3,870; Federal District, 2,572; full blooded aborigines, not enumerated, estimated, at 60,000.

**CAPITAL**, Melbourne; population, 1921, 784,000; chief cities, Sydney, population, 897,640; Brisbane, 209,699; Adelaide, 255,318; Perth, 155,129; Hobart, Tasmania, 52,163.

*Governor General*, Lord Forster of Lepe, P. C., G. C. M. G.

*Prime Minister*, the Rt. Hon. W. M. Hughes (Foreign Affairs). Australasian diplomatic interests are represented in Washington by the British Ambassador.

*United States Consul General* at Melbourne, Thomas Sammons; *Consuls*, at Sydney, Henry P. Starrett; at Newcastle, N. S. W., Romeyn Wormuth; at Adelaide, Henry H. Balch.

Australia, itself a continent, is situate between 10° and 40° south latitude and 113° to 153° 40' east longitude in the Pacific Ocean, with the Indian Ocean on the west. The states of the Commonwealth are: New South Wales, Victoria, Queensland, South Australia, West Australia, the North Territory, and Tasmania, formerly known as Van Dieman's Land, an island the size of the States of Vermont, New Hampshire and Massachusetts, which lies off the southeast corner of the mainland.

Australia is one of the important parts of the British Empire, with that complete self-government that obtains in Canada. In the east mountains rise to about 7,000 feet altitude: the central portion extends westward in rolling plains, becoming sandy and in places desert, until higher elevations are reached along the west coast. The Murray River, rising on the slopes of the mountains, is navigable inland for 2,000 miles.

The climate, being in the South Hemisphere, is of the south temperate in the south, and in the north tropical. The interior portions are subject to high temperature, and in all parts the climate is regarded as healthful, being dry. Rainfall is normal only on the north, northeast and southeast coasts.

Australia is governed on the Federal plan, with a Parliament, of Senate and House of Representatives. Like Canada, it accedes to imperial requests voluntarily in all economic matters, as well as military and naval, has been loyal but, "with a mind of its own." Australian troops in the late war served with distinction.

The Commonwealth of Australia is a member of the League of Nations.

Products are not dissimilar to those of the United States, the 1920 reports showing a total tilled area of 13,299,000 acres producing 45,970,000 bushels of wheat, 12,559,000 of oats, 4,288,000 of barley, 6,764,000 of corn, 2,989,000 tons of hay, 294,000 tons of potatoes, 1,350,000 tons of sugar cane, 13,000 tons of beet sugar, 139,000 tons of grapes, from which 7,649,000 gallons of wine was made, and about \$25,000,000 values from orchards and fruit gardens. Total value of all agricultural production was \$360,765,000.

Forests cover 92,500,000 acres, of which 17,670,000 has been reserved for timber. In 1919 there were 2,421,000 horses, 12,711,000 cattle, 75,554,000 sheep, and 606,000 swine. Wool production in 1920 was 662,249,000 pounds, of which 552,334,000 were exported, much of it coming to the United States. Butter produced was 165,648,000 pounds, 39,006,000 being exported.

Minerals abound and are growing in importance of development. The 1919 mineral production was valued at \$98,625,000, consisting of gold, \$27,275,000; silver and lead, \$9,610,000; copper, \$9,460,000; tin, \$5,250,000; coal, \$33,355,000; others, \$18,225,000. Total mineral production up to the end of 1919 had been \$4,986,895,000. In 1851, there was a spectacular rush to newly discovered gold fields, similar to that of California.

Manufacturing production in 1920 was valued at \$490,000,000, forest and fisheries products at \$95,000,000. Manufactures are not yet greatly developed, but capital is entering in ever larger volume to erect and maintain works for the utilization of the resources. Most of it has come from England, but considerable is now going from the United States, and negotiations are making for the entrance of larger consignments of capital from this country.

Free trade rules between the states aggregating more than \$100,000,000 were collected in 1920-21, in which fiscal year imports were valued at \$816,667,520, and exports at \$660,146,900. Imports were varied—textiles, metal manufactures, and most of the commercial articles of modern civilized life.

Next to Great Britain, the United States took the largest proportion of the exports, and more than half as much was imported from the United States as from Britain.

The net tonnage of the 2,247 registered vessels in 1920 was 345,159, and entrances of all vessels in

ocean commerce at the ports numbered 2,981, with 8,086,507 tonnage.

Railway mileage in 1921 was 23,295, state owned, and of all gauges known to railroading.

In 1918 there were 3,424 public schools, and there are several technical schools and universities.

As in all parts of the Empire, there is religious freedom, and the Church of England predominates. Australia is insufficiently explored, and is expected to develop rapidly in the ensuing years. Its possibilities seem boundless.

Its economic life is tied with the distant North Hemisphere, and its political life with Britain; and its prevailing policy appears to be to erect barriers to the entrance of Asiatics.

Trade with the United States was:

|                       |               |

## NEW ZEALAND, DOMINION OF.

**AREA**, 103,581 square miles, divided, Auckland Province, 25,364; Taranaki, 3,732; Hawke's Bay, 4,241; Wellington, 10,807; Marlborough, 4,225; Nelson, 10,875; Westland, 4,881; Canterbury, 13,858; Otago, 13,967; Southland, 11,355.

**POPULATION**, census of 1921, 1,218,913, divided, Auckland, 369,618; Taranaki, 61,911; Hawke's Bay, 60,925; Wellington, 248,801; Marlborough, 17,788; Nelson, 47,628; Westland, 14,181; Canterbury, 199,034; Otago, 137,038; Southland, 61,989.

**CAPITAL**, Wellington; population, 95,235. Chief cities, Auckland, population, 157,757; Christchurch, 105,670; Dunedin, 72,225.

*Governor General*, Viscount Jellicoe of Scapa, G. C. B., O. M., G. C. W. O., G. C. V. O.

*Prime Minister*, the Rt. Hon. W. E. Massey (Finance, Railways, Mines, Stamp Duties, Land and Income Tax, State Advances and Imperial Supplies).

*United States Consul General*, at Wellington, David F. Wilber; *Consul*, at Auckland, Karl de G. MacVitty.

New Zealand lies 1,200 miles east from Australia, in the Pacific Ocean, and consists of South Island and North Island, extending north and south from 35° of southern latitude to 46°. There are numerous outlying islands under the New Zealand flag.

The agricultural possibilities are very great, two-thirds of the area being tillable, with 17,000,000 acres forested. Actually tilled area in 1920 was 18,004,776 acres, with large areas being surveyed for settlement by farmers.

In 1921 production was 6,872,000 bushels of wheat, 5,225,000 of oats, 1,587,000 of barley. Wheat averages were twice per acre that of the United States, and the other crops on a relatively high level of area productivity.

In 1921 there were 334,000 horses, 3,113,000 cattle, 23,236,000 sheep, and 342,000 swine. Wool production in 1919 was 265,083,924 pounds, of which more than two-thirds is normally exported.

In 1920 the value of the manufactured products was \$348,900,000, in 4,357 establishments, employing 64,951 persons, with \$164,000,000 wages and salaries.

Mineral production in 1920 was gold, \$4,415,000; silver, \$435,000; tungsten, \$6,200; coal, exported, \$642,000; consumed, \$8,815,000.

In 1920 total imports were valued at \$307,975,000; exports, \$239,205,000; the foreign trade being heaviest with the United States next to Great Britain.

In 1920 there were 548 vessels of 86,000 tonnage net registered. Total entrances of vessels in 1920 were 744 of 2,062,370 tonnage net. In 1921 there were 1,282 miles of railways Government owned, and 138 privately owned.

New Zealand is politically organized along very broadly democratic lines, with tendency to advance rather rapidly into the realm of economic and sociological experiment.

Its Government is by Legislative Council of 41 members, shortly to be enlarged by popular election to 64.

The Dominion of New Zealand is a member of the League of Nations.

Trade with the United States was:

|                      |              |
|----------------------|--------------|
| Imports 1920-21..... | \$47,605,552 |
| 1921-22.....         | 17,419,616   |
| Exports 1920-21..... | 22,237,914   |
| 1921-22.....         | 9,896,813    |

## WESTERN SAMOA.

German Samoa, which included Savali and Upolu, the largest of the Samoan Islands in the Western Pacific, were occupied by the British on Aug. 29, 1914, immediately on the outbreak of the World War. This territory was assigned as a mandate

from the League of Nations to New Zealand under date of Dec. 17, 1920, and is now called Western Samoa.

Savali is 48 miles by 25 and has an area of about 660 square miles. Upolu has an area of about 600 square miles. Both are mountainous, fertile and well watered. The population of the two aggregated by the census of April, 1921, 37,051, of which 1,035 were British and 292 Americans. The chief product is copra.

#### AUSTRALASIAN POSSESSIONS.

In the Pacific reaches of Australasia, of the other areas under the British Empire these are the most important:

**Papua**, or British New Guinea, on the Island of New Guinea north from Australia, with 250,000 estimated population, and 90,540 square miles, the people being crude tribes. The interior of the great island is unexplored.

**New Guinea**, formerly German New Guinea, has been mandated by the League of Nations to Britain.

**Bismarck Archipelago**, 15,752 square miles, and with a native population of about 188,000,

and the **Solomon Islands**, 3,800 square miles, and with a population of about 17,000, both formerly German possessions, have been placed under Britain by the League of Nations.

**Nauru Island**, formerly German, mandated by the League of Nations to Britain. It has valuable guano deposits.

**Fiji Islands**, 250 in number, area, 7,083 square miles, population, estimated, 1919, 163,416; products, tropical fruits, vegetables, sisal, hemp, domestic animals. Civilization, barely in the beginnings.

**Tonga Islands**, or Friendly Islands, about 385 square miles, with a population of 23,562, export copra and livestock.

**The New Hebrides**, area, 5,500 square miles; population about 60,000, are under the joint administration of Great Britain and France.

The trade of British Oceania with the United States was:

|                       |           |
|-----------------------|-----------|
| Imports, 1920-21..... | \$841,701 |

Berlin figures cover Greater Berlin as officially counted in 1921. The old City of Berlin has about 2,000,000 inhabitants.

The figures for the cities in the above table are from the very latest official censuses and estimates. There are 27 cities of the world with 1,000,000 or more population, of which China has 9; the United States, 3; India, 2; Japan, 2; and Argentina, Brazil, England, France, Germany, Hungary, Mexico, Russia, Scotland, and Turkey, 1 each.

## Other Foreign Countries.

## ABYSSINIA KINGDOM OF.

AREA, estimated, 350,000 square miles.  
 POPULATION, estimated, 10,000,000.  
 CAPITAL, Addis Abeba; pop., estimated, 50,000.  
*Empress*, Walzeru Zauditu, daughter of the late Emperor Menelik, born in 1876; elected Empress Sept. 27, 1916 after her nephew Lij Yaser was deposed.

Abyssinia is a mountainous, volcanic country in northeast Africa, bounded by Eritrea (Italian) on the north, British Somaliland (Berbera) and Italian Somaliland on the east, British East Africa on the south and the Sudan on the west. The agricultural and mineral resources of the country are comparatively undeveloped, and its wealth of water power is unused. In the lower country and deep valleys, which are very hot, sugar cane, cotton, coffee and rubber are produced, while grain, fruit, tobacco, potatoes, etc., are grown in the higher temperate country. The upper slopes are given over to cattle raising. Hides, skins, coffee and beeswax are the chief exports, and cotton goods the chief imports. The total trade is estimated at about \$12,000,000. A railroad 495 miles long, built under French auspices, runs from Jibuti to the capital. Slavery is prevalent. The royal family claims descent from Menelik, the son of King Solomon and the Queen of Sheba. Abyssinia is the only country in Africa that was neutral in the World War. It is not a member of the League of Nations.

Trade with the United States was:

|                       |          |
|-----------------------|----------|
| Imports, 1920-21..... | \$19,477 |
| 1921-22.....          | 2,051    |
| Exports, 1920-21..... | 336      |
| 1921-22.....          | 9,600    |

## AFGHANISTAN.

AREA, estimated, 245,000 square miles.  
 POPULATION, estimated, 6,330,500.  
 CAPITAL, Kabul; population, estimated, 150,000; other cities, Kandahar, population 50,000, and Herat, 20,000.

*Amir*, Amanullah Khan, born June 1, 1892, succeeded on the assassination of his father, Amir Habibullah Khan, Feb. 20, 1919. *Heir*, his son, born June 5, 1921.

Afghanistan occupies a mountainous country in Asia between 61° and 72° east longitude and 29° and 38° 20' north latitude. Its extreme breadth northeast to southeast is about 700 miles, and from the Herat frontier on the west to the Khyber Pass on the east it is 600 miles. It is bounded on the north by Transcaspiia (Russia) and Bokhara, on the east by British India, on the south by Beluchistan (British India) and on the west by Persia. The elevation is generally over 4,000 feet. There are three great river basins, the Oxus and the Kabul in the northeast and the Helmand, which runs southwest through the middle of the country.

Afghanistan has been called "the land of rocks and stones and sanguinary feuds." Its people are nearly all Mohammedans. The Afghans have been the dominant race for 200 years, the Tajiks, aborigines, being cultivators and traders. Along the frontier are warlike and independent tribes of Pathans and others with a fixed habit of raiding across the border and receiving punishment. Disturbances have been frequent. The language spoken is Pushtu.

There are many fertile plains and valleys in the mountains and good irrigation makes available all profitable soil. There are two or three harvests a year, one of wheat, barley or lentils, and the other of rice, millet, maize and dat. Fruits of the temperate zone are plentiful. Sheep and transport animals are raised. The fat-tailed sheep is native to the country. Its tail is of immense weight and size, formed of masses of fat, a store of nourishment drawn on by the animal in winter. These sheep furnish the Afghans their chief meat diet and the fat of the tail is a substitute for butter. Wool and skins are the main articles of export together with fruits, nuts and ghl. The imports are textiles, metals and hardware, leather goods, tea and sugar. Trans-frontier trade with India amounts to about \$15,000,000 annually. Copper, lead and iron are found.

There are no railroads in the country, but plans have been developing looking toward the building of railroads across the country in the northeast to connect Termez, the rail head of the road from Bokhara, with Peshawar in British India, via Kabul, and another to connect with the railroad from Merv at its rail head at Kuska, via Herat,

in the west, and Kandahar in the south, to New Chaman and Quetta in Beluchistan. Merchandise is now transported on camel or ponyback along the seven important trade routes.

The Government is monarchical and the laws and customs those of Islam. The late Amir was recipient of a subsidy from the British Government but that was ended by a new treaty signed on Nov. 22, 1921, in which Great Britain recognized the complete independence of Afghanistan, established the frontiers, and withdrew the privilege Afghanistan had enjoyed of importing arms and ammunition through India. The Afghan army was reported to number 100,000 well armed men.

## ALBANIA.

AREA, estimated, 11,000 square miles.

POPULATION, estimated 1921, 1,700,000.

CAPITAL, Durazzo; pop., estimated, 5,000; chief city, Scutari, pop. 32,000.

*United States Minister*, Ulysses Grant-Smith.

Albania, after centuries of Turkish domination and of contention between its Balkan neighbors and Italy during and after the World War, has had its independence assured under a treaty with Italy, Aug. 2, 1920, and was formally admitted into the League of Nations in January, 1921.

The country is mountainous, bounded by Jugoslavia on the north and east, Greece on the south and the Adriatic Sea on the west. It is an agricultural and cattle and sheep raising state. There are no railroads, banks or currency and few schools. Two-thirds of the population are Mohammedans, the rest Christians.

Legislative power rests in a Diet of 77 members, elected in February, 1921. At the head of the state is a Council of Regents composed of a representative of each of the four religious bodies of the country, a Bektashi Moslem, a Sunni Moslem, a Greek Catholic and a Roman Catholic. In December, 1921, these Regents were Omer Pasha Vrioni, Refik Toptani, Sotir Peçi and Antoine Pistilli.

The executive power was in the hands of a Cabinet, the latest being that headed by Djafer Ypi, which assumed office Dec. 22, 1921.

## ANDORRA, REPUBLIC OF.

AREA, 191 square miles.

POPULATION, 1921, 5,231, scattered in 30 villages.

Andorra is a republic in a valley of the Pyrenees under the suzerainty of France and the Spanish Bishop of Urgel. It is governed by a Council of 24, elected for 4 years by heads of families in each of the six parishes. The inhabitants speak Catalan and are Roman Catholics. Sheep raising is the chief industry. Andorra is not a member of the League of Nations.

## ARABIA.

AREA, estimated, 1,200,000 square miles.

POPULATION, estimated, 5,000,000.

The Arabians occupy a peninsula in the southwest corner of Asia between Palestine on the west, Syria on the north and Mesopotamia on the northeast (an indeterminate line), the Persian Gulf, the Gulf of Oman, the Arabian Sea and the Red Sea, with the exception of Aden, a strongly fortified coaling station of 75 square miles with a protectorate of adjacent territory of 9,000 square miles, pop. 54,923, held by Great Britain. Nearly one-half of Arabia is desert. It is roughly as large as that portion of the United States stretching east of California to the Mississippi and north from Texas to the Canadian line. Maps are very deficient. The boundaries of the native states of Arabia are undefined. Turkey, in the treaty of peace, renounced all rights to Arabia. The organization of the native states is to be developed under British auspices, the principal rulers (the King of the Hejaz and the Imam of Yemen) being subsidized on condition that they maintain internal peace and place the control of foreign affairs in the hands of British advisers. These states are:

## THE KINGDOM OF THE HEJAZ.

*King of the Hejaz*, El Husain ibn Ali, so proclaimed Dec. 1916 (Grand Sherif of Mecca.)

The Hejaz was represented, at the Peace Conference by the Emir Faisal, third son of Husain, now King of Iraq, and was admitted to the League of Nations in 1920. Its area is about 112,500 square

miles and population (estimated) of about 900,000.

The importance of the Hejaz is due to its possession of the holy cities of Islam, Medina, where the Mosque of the Prophet enshrines the tomb of Mohammed who died in the city June 7, 632, and Mecca, his birthplace, containing a great mosque sheltering the sacred shrine, the Kaaba, in which is the black stone given by Gabriel to Abraham. As many as 200,000 of the faithful have made the pilgrimage in a year. Medina (pop. 10,000) is 820 miles from Damascus, and is the terminus of the Hejaz railroad. Mecca (pop. 60,000), the capital, is 200 miles further south, and is 55 miles from Jiddah (pop. 20,000), the chief port on the Red Sea. The chief product is dates. Some hides, wool and gum are exported.

#### THE EMIRATE OF NEJD AND HASA.

Emir, Abd-el-Aziz es Saud.

Known as "the true home of the Arabs," this province stretches east from the Hejaz across the oases of Central Arabia to the Persian Gulf. Its estimated population is 300,000, mostly nomadic Bedouins, and its capital is Riyadh.

#### THE EMIRATE OF JEBEL SHAMMAR.

Emir, Abdullah ibn Mitah, born 1907, succeeded his father Saud ibn Rashid, assassinated May, 1920.

A Bedouin desert country to the north of Nejd, with an estimated population of 200,000. Capital, Hail; population 12,000.

#### THE PRINCIPATE OF ASIR.

Imam, Mohammed ibn Ali el-Idrisi.

Asir on the west coast of Arabia, south of the Hejaz and north of Yemen, with a population of about 1,000,000; capital, Sabia. Hides and livestock are exported.

#### THE IMAMATE OF YEMEN.

Imam, Yahya Mohammed ed-Din.

Yemen is in the southwest part of the peninsula between Asir and the British protectorate Aden. Its area is estimated at 75,000 square miles and population 700,000. Capital Sanaa (pop. 20,000); chief port Hodeida (pop. 40,000). On the plateau of El Jebel, the most fertile part of Arabia, grain and coffee are grown. Hides and coffee are exported. Mocha, once a flourishing coffee port, no longer counts.

#### THE SULTANATE OF KUWEIT.

Sultan, Hamed ibn Jobar succeeded March 1921.

Kuwait (pop. est., 50,000), extends along the Persian Gulf from Mesopotamia to Nejd. Its capital, Kuwait (pop. 25,000), is an important port on the Persian Gulf, and had been selected as the seaport terminal of the German Berlin to Bagdad railroad. Horses, wool, dates and pearls are exported.

#### THE SULTANATE OF OMAN.

Sultan, Seyyid Taimur ibn Faisal, born 1886; succeeded 1913.

Oman occupies the southeast portion of the Arabian peninsula with a coast line about 1,000 miles long, extending from El Katar on the Persian Gulf to Ras Salir on the Arabian Sea. It has an estimated area of 82,000 square miles and a population estimated at 500,000, chiefly Arabs. The nomadic tribes of the interior after seven years of rebellion have completely thrown off the control of the Sultan and by an agreement October, 1920, have entire home rule and freedom of trade. The Sultan has for years been subsidized by the Government of India which maintains there a political agent, Major M. E. Rae (1921). The capital is Muscat (pop. estimated, 20,000). The best camels in Arabia are bred in the interior. The chief exports are dates.

Food supplies and textiles are imported. Trade is mostly with India.

The trade of the Hejaz, Arabia and Mesopotamia with the United States is returned by the United States Department of Commerce collectively for the fiscal year 1921-22:

Imports, 1921-22.....\$291,229  
Exports, 1921-22.....754,523

#### ARGENTINA, REPUBLIC OF.

AREA, 1,153,119 square miles.

POPULATION, 1921, 8,698,516.

CAPITAL, Buenos Aires, pop. estd., 1920, 1,674,000.

Chief cities, Rosario, pop. 222,592; Cordoba,

156,000; La Plata, 90,435; Tucuman, 91,216;

Santa Fe, 59,574; Mendoza, 58,790; Avellande,

46,277; Bahia Blanca, 44,143.

President, Dr. Marcelo T. de Alvear (1922-1928).

Inaugurated Oct., 1922.

Premier, Sr. Ramon Gomez (Interior).

Ambassador to the United States, Tomas A. LeBreton.

Consuls General, at New York, Ernesto C. Perez; at San Francisco, Santos Goni. Consulates also at Mobile, Los Angeles, Apalachicola, Fla., Pensacola, Savannah, Chicago, New Orleans, Baltimore, Boston, Pascagoula, Miss., St. Louis, Philadelphia, Port Arthur and Norfolk.

U. S. Ambassador, John W. Riddle.

U. S. Consul General, at Buenos Aires, William H. Robertson; Consul, at Rosario, Wilber Z. Bonney.

Argentina extends from Bolivia 2,300 miles to Cape Horn and from the ridge of the Andes to the South Atlantic, occupying the greater part of southern South America. Its greatest breadth is about 930 miles. In area it is about equal to the eleven mountain and Pacific States of the United States. It is bounded by Bolivia on the north, Paraguay on the northeast, Brazil, Uruguay and the South Atlantic ocean on the east and Chile on the west.

East of the Andes are great plains, heavily wooded and called the Gran Chaco in the north, and vast treeless pampas, given over to wheat and cattle raising, stretching south down to the plains of Patagonia. Vast tracts of land amounting to 237,768,000 acres are public domain land, opened by the Federal Government to colonization. In the years 1857-1920 the number of immigrants here was 5,121,958. Immigration comes principally from Spain and Italy. A law passed in 1919 requires each intending immigrant to produce a certificate of good character and ability to work.

Wheat, maize, flax and oats are the principal crops. The sugar and wine industries are making great progress. Sheep, cattle, horses, goats and pigs form the chief wealth on the ranches. Packing houses have been established and the export of frozen beef and mutton and other livestock products has become a great industry.

There is little mining, but some petroleum is produced. Textiles, oils and chemicals, iron, agricultural implements and machinery, glassware and crockery, and foodstuffs are the principal imports. Manufacturing is on the increase.

In 1919 there were entered at all Argentine ports 36,356 vessels with a tonnage of 17,043,869. Argentina has 22,510 miles of railroads of which 3,816 are owned by the state; the privately owned railroads are almost entirely in the hands of English companies.

Argentina proclaimed its independence of Spain July 8, 1816, and the years until 1852 were years of disturbance and civil war. The Constitution then adopted and under which, somewhat amended, the republic is governed to-day is modelled closely after that of the United States. There are 14 provinces, with a very high measure of home rule, electing their own Governors and Legislatures, and 10 territories administered by Governors appointed by the President, also a Federal District (Buenos Aires, area 72 square miles) whose Mayor is appointed by the President and who is assisted by a deliberative council elected by the tax-paying inhabitants.

The President of the republic, who must be a Roman Catholic and Argentine by birth, is elected by an Electoral College for a six-year term and is ineligible for re-election. Congress consists of a Senate of 30 members, chosen by a special body of electors for six years, one-third retiring each two years; and a House of Deputies, numbering 158, elected by direct vote for four years, one-half retiring every two years. The Roman Catholic religion is supported by the state, but all creeds are tolerated. Primary education is free, secular and compulsory, but the percentage of illiteracy is still high. There are national universities at Cordoba, founded in 1613, with 1,603 students in 1920; Buenos Aires, with 10,404 students; La Plata, 2,979, and Rosario. There are also three provincial universities.

Service in the national militia is compulsory, the peace strength of the army being 1,750 officers and 25,600 men, with a reserve of 759,000. The navy consists of two dreadnoughts of 27,940 tons each, mounting twelve 12-inch guns; two pre-dreadnoughts, four armored cruisers and one light cruiser.

Argentina is a member of the League of Nations.

Far of exchange, peso, paper, 42.44 cents.

Rate of exchange, Nov. 1, 1922, 35.50 cents.

Units of Currency (pesos, paper, 42.44 cents.

pesos, gold 98.48 cents.

Imports, 1921.....\$615,950,000

Exports, 1921.....651,840,000

1921-22.....80,495,060

Exports, 1920-21.....124,299,424

1921-22.....60,767,964

## ARMENIA.

(See under Russia.)

## AUSTRIA, REPUBLIC OF.

AREA, 30,766 square miles.

POPULATION, census of 1920, 6,131,715.

CAPITAL, Vienna; population, 1920, 1,841,326; other cities, Graz, population, 157,644; Linz, 94,072; Innsbruck, 55,650; and seven others of more than 10,000.

President, Dr. Michael Hainisch.

Chancellor, Mr. Ignatz Seipel.

Minister to the United States, vacant; Edgar L. G. Prochnik, Counsellor and Charge d'Affaires.

Consuls General in the United States, at New York, Friedrich Fischerauer; at Chicago, Ludwig Kleinwachter.

United States Minister, Albert Henry Washburn.

United States Consul, at Vienna, Carol H. Foster.

The Austria of to-day—mere remnant of the former Austrian Empire—is now a republic in Central Europe, with Germany its neighbor to the west and the north, Czechoslovakia on the north and east, Hungary on the east, and Serbia and Italy on the south. It is slightly smaller than the four New England States of Vermont, New Hampshire, Massachusetts and Connecticut, and has only about 100,000 more inhabitants than the four together.

Austria is not only vastly reduced in area and population, but is in an economic plight equalled by few countries in world history. In the prewar days of Emperor Francis Joseph of the Hapsburg dynasty the Austro-Hungarian Empire had 261,259 square miles and about 51,000,000 population. The Dual Monarchy included Austria proper, with Vienna one of the brilliant political, commercial, industrial, financial and art centres of the world; Hungary, Transylvania, Czechoslovakia, Poland, Galicia, the Trentino, Slavonia, Croatia, Bosnia, Herzegovina, the Banat, territories which gave it access to the Adriatic, and control of practically all the Danube River. Next to Russia, it was the most populous in Europe. Hungary is an independent republic now. All the provinces mentioned have gone and Austrian territory reduced from her prewar 115,822 square miles to 30,766.

The ill-fated Hapsburgs—Francis Joseph and then Charles, his successor—maintained a court in Vienna which was in some respects the most inaccessible socially of any in the world.

Although politically held together by the bonds of empire, Austria-Hungary and the very many components contained so many diverse racial strains with such tenacious nationalistic tendencies that the non-progressive policies of the imperial rulers finally released centrifugal forces which tore the empire apart.

The World War was precipitated by the assassination of the heir presumptive to the throne, the Archduke Franz Ferdinand, by a Serbian in Bosnia in 1914.

Austria was proclaimed a republic on Nov. 12, 1918, the day after the armistice, a National Assembly assumed the government and appointed a Cabinet. On Feb. 16, 1919, the National Constitutional Assembly, consisting of one Chamber, was elected by the direct vote of all men and women over 20 years of age.

A Constitution was adopted Oct. 1, 1920, which provides for a Parliament of two Houses, a Bundesrat of 46 members, chosen indirectly, and a Nationalrat, elected by direct vote for four years. These two Houses elect a President to serve for four years. All special privileges are abolished. There are seven provinces and the city of Vienna, each with a large measure of home rule on local affairs, by elected Provincial Assemblies. The army is limited to 30,000 men.

The lands lost to Austria were those from which the capital city and the manufacturing towns drew their food supply, and held the seaports and much of the railroads and the Danube River. Only the German Atlantic port of Hamburg, via the Elbe River, is left.

To-day, with so greatly reduced areas, with no seaport, with one city, Vienna, comprising about 30 per cent. of the whole national population, rendering the distribution of the population unbalanced and difficult of economic adjustment, with immense industrial production and vast and fertile areas of foodlands taken away, and with a depreciated currency and dislocation of every economic function to degrees far greater than in other countries, Austria is one of the problems of the day in Europe, and stands with hat in hand, asking the powers to find help for her, lest she perish as a national entity.

This plea has been listened to with sober realization by the other powers, and late in 1922 there were

proposals seriously entertained to advance sums—from \$100,000,000 up and down, according to the source of the proposal—that the currency be stabilized and the economic status rebuilt toward ultimate resumption of normal functioning.

The depreciation of the currency has been so heavy that the living costs have risen enormously, leaving especially the middle classes, salaried and those living from investments, in a sorry plight.

Amid this apparently hopeless tangle of destructive currents there has appeared a trend toward resumption of industrial production, and it has been believed that, with some help from other nations in the form of long-term loans, Austria will weather the storm and emerge finally able to steer its so much smaller national ship of state into safe waters.

In the first two years of its existence as a republic it did receive a total of \$72,000,000 of credits from other countries, but it was mostly for food for actually starving people. The inhabitants had been reduced to positive want, and it is probable that only this relief prevented anarchy and the virtual wiping out of the people as a national entity.

The United States, through the Hoover Food Relief agencies, was exceedingly active in that relief, feeding stations being maintained in Vienna and elsewhere.

These conditions of then and now transcend in importance any schedule of existing assets and liabilities, material and economic. It is an utterly abnormal status, unprecedented and with non-balance of urban and rural interests, with which the other interested powers are striving to deal. The League of Nations is working on the problem, and financiers in the world capitals are taking part in the discussion.

The unit of the currency is the crown, worth at par of exchange 20.26 cents. The rate of exchange on Nov. 1, 1922, was .000014 cents. In 1921, the deficit of the republic was 50,000,000 crowns, so rapid had been depreciation. Hence, figures avail little in showing the fiscal and economic situation.

For 1922, budget estimates showed an apparent prospect for a deficit of from 130,000,000 to 160,000,000 crowns.

However, state expenditures have lately shown a tendency to decline, and that was regarded as a hopeful sign.

One element of aid is the pre-eminent position which was held by the Viennese banks, in the empire and in the Balkan states. There has been a gradual resumption of these functions, and it is believed that Austria will readjust its affairs so as to obtain much of its future strength from such financial operations. Also Vienna was a great commercial centre, and it is believed that, after the animosities of the war and post-war periods shall have died down, Vienna will again transact large business in movement of freight and money and credit.

Agriculture showed improvement in the years 1918, 1920 and 1921, but more than 25 per cent. of the arable lands are not yet producing food, and the total amount produced in 1921 of all crops was less than half that of 1913 on the lands now included in the republic.

The hamper on agricultural resumption has been the inability of the people of the cities to pay for the food. All sorts of Government remedies for the distress have been tried, but the situation has been so serious that they only slightly helped.

It is proposed to harness more of the 1,700,000 water horse power in the Austrian Alps and the Danube, 170,000 being already in use.

In 1921 there was quite a boom in manufacturing, which did not last. Yet strangely the reports in May, 1922, showed only 60,000 unemployed of a population of more than 6,000,000.

The main industries are the making of machinery, agricultural and industrial, with considerable making of automobiles; textiles, cotton and wool, which are exporting yarns to Germany; leather and fancy goods, which have always had world-wide repute, woodwork, furniture and paper.

As a means of stabilizing matters internally, the Government lately has regulated wages on a sliding scale gauged by the value of the crown, wages rising and falling—mostly rising of course—as the crown fluctuates.

Labor conditions peculiarly have not been bad, compared with some other countries, the people as a mass having apparently fully realized the extreme seriousness of the situation, and therefore standing closer together.

At times during 1920 and 1921 there have been heard suggestions that Austria's only hope was to join with Germany. But that course has not been acceptable to the Allies.

From 1910 to 1920 the population decreased 3.8 per cent., the men decreasing 6.53 per cent. In the war losses

In 1910 the present Austrian territory had 5,979,667 Roman Catholics, the Austrian Empire being

the most powerful Catholic unit in Europe. The Catholics were 94.11 per cent. of all; Jews, 2.99 per cent.; and Protestants, 2.60 per cent.

The Austrian Tyrol is one of the most beautiful mountain regions in the world, and a source of much revenue from tourists. Musical art is highly developed, and Austrian composers and players have always produced some of the world's best music, and are doing so to-day, while the literature has been accounted high by world scholarship.

The recent conference of representatives of the other Central European countries on transport, and the agreement reached to pool equipment and facilitate shipments will help Austria much. The war-damaged railways have been somewhat improved, and work proceeds.

Cataclysmic as were the effects of the war on the former empire, the removal of the discordant racial elements, leaving a virtually homogeneous people, is expected to yield at least social and political peace; so that, if industrial peace be maintained, and the immediate perils be passed safely, what remains of Austria probably, almost certainly, will slowly emerge into relative prosperity.

In 1921 imports were valued at \$314,000,000, and exports at \$175,000,000. Foodstuffs led the imports with \$73,500,000, and textiles followed with \$44,400,000. Exports were principally wooden goods, \$11,750,000; machinery, \$6,300,000; vehicles, \$12,500,000; with eight other lines.

Trade with the United States was:

|                  |             |
|------------------|-------------|
| Imports, 1920-21 | \$8,168,485 |
| 1921-22          | 1,317,628   |
| Exports, 1920-21 | 2,085,040   |
| 1921-22          | 2,603,807   |

### AZERBAIJAN.

(See under Russia.)

### BELGIUM.

AREA, 11,744 square miles.

POPULATION, census of 1921, 7,684,272 (670 to the square mile).

CAPITAL, Brussels, pop., 1921, with suburbs, 684,870. Chief port, Antwerp; pop., with suburbs, 333,882. Important cities, Ghent, pop., 165,910; Liege, 165,117; Malines, 60,118; Bruges, 54,308; Ostend, 48,073.

*King of the Belgians*, Albert, born April 8, 1875, succeeded his uncle Leopold II. Dec. 17, 1909; married Oct. 2, 1900, the Duchess Elizabeth of Bavaria. *Heir Apparent*, Prince Leopold, Duke of Brabant, born Nov. 3, 1901; other children, Prince Charles Theodore, Count of Flanders, born Oct. 10, 1903; Princess Marie-Jose, born Aug. 4, 1906. *Premier*, Col. Georges Thonnin (Finance).

*Ambassador to the United States*, Baron de Cartier de Marchienne.

*Consuls General* at New York, P. Mall; at Portland, Ore., S. Hill; at Philadelphia, Paul Hagemans.

*Consuls*, at Boston, R. Fleke; at Baltimore, J. G. Whitley; at Pittsburgh, P. Didier; at Norfolk, P. J. Andre Motta; at Richmond, Va., Fred E. Nolting; at Charleston, S. C., B. Rutledge; at New Orleans, M. Uler; at Galveston, M. H. Royston; at Memphis, P. S. McDonald; at St. Louis, G. Mignolet; at Birmingham, Ala., V. G. Nesbit; at Atlanta, H. L. DeQuile; at Savannah, F. W. Rosenthal; at Chicago, O. Vermeren; at Dubuque, X. Brûm; at Detroit, P. Boeye; at Omaha, T. J. Nolan; at Kansas City, M. Seguin; at Cincinnati, L. A. Ault; at Cleveland, Homer McKeehan; at Green Bay, M. J. Heynen; at Minneapolis, O. E. Safford; at Seattle, J. Auzias de Turenne; at San Francisco, J. Simon; at Denver, J. Mignolet. *Consulates* also at Los Angeles, Jacksonville, Pensacola, Mobile, Louisville, Oklahoma City.

*United States Ambassador*, Henry P. Fletcher.

*United States Consul General*, at Brussels, Henry H. Morgan. *Consuls*, at Antwerp, George S. Messersmith; at Ghent, Charles Ray Nasmith; at Liege, George M. Hansou.

Belgium is bounded on the north by the Netherlands, on the east by Germany and Luxemburg, on the south by France, and on the west by the North Sea. It has a frontier of 831 miles and a seaboard of 62 miles. It is not quite as large as the State of Maryland. The Scheldt and the Meuse are the principal rivers. Below Antwerp the Scheldt flows to the North Sea through the Netherlands and negotiations are in progress between the two countries aiming to make navigation as far as Antwerp free to both countries. The western part is low, level and fertile; the eastern, the tableland of the Ardennes, has a poor soil.

Belgium formed part of the Low Countries from the readjustment of Europe in 1815 following Napoleon's downfall until Oct. 14, 1830 when, following a revolution which broke out Aug. 25, a National Congress proclaimed its independence. The Constitution of 1831 proclaimed it a "Constitutional, representative and hereditary" monarchy," and the National Congress elected Prince Leopold of Saxe-Coburg, King of the Belgians on June 4 of that year. He died in 1865 and was succeeded by his son, Leopold II., who died in 1909. By the Treaty of London, April 19, 1839, the famous "scrap of paper," separation from the Netherlands and the neutrality and inviolability of Belgium were guaranteed by Austria, France, Great Britain, the Netherlands, Prussia and Russia. The Germans invaded the kingdom on Aug. 2, 1914, and held nearly all of Belgium throughout the war, evacuating it immediately after the armistice. Under the Treaty of Versailles, Eupen and Malmédy and Moresnet were ceded by Germany, adding 371 square miles and 64,520 inhabitants to the kingdom.

Belgium is the most densely populated country in Europe, having 670 inhabitants to the square mile. In the province of Brabant the ratio is 1,237. In 1920 the excess of births over deaths was 61,435, and there were 2,195 divorces to 106,514 marriages.

The population is divided into two well defined groups, the Flemish and the Walloons. The former, who speak Dutch, are somewhat in the majority, preponderating in Flanders, Limburg and Brabant, including Antwerp. French and Flemish are joint official languages. The Roman Catholic is the religion of the great majority, but complete religious toleration prevails. The state does not interfere with the intimate affairs of the churches and part of the income of the ministers of all denominations is paid from the national treasury.

Belgium has four universities; those of Ghent (1,006 students in 1920) and Liege (2,656) are state institutions, and those of Brussels (1,644) and Louvain (2,783) are free. Attached to them are various technical schools with 8,034 students. There are 134 state high schools, 44 of which are for girls, and many private schools are under ecclesiastical control. Schools are supported by local taxation and each commune must have at least one primary school. The percentage of illiteracy has been decreasing rapidly.

Belgium has 4,649 miles of railways, of which 2,759 are state-owned. The damage done by the war has been almost entirely made good. Plans for the electrification of the whole system are under consideration. The country has 6,177 miles of roads, the majority paved with stone (Belgian blocks), and 1,231 of navigable waterways—rivers and canals. The number of vessels entering Belgian ports in 1920 was 7,698; tonnage, 10,852,341; of this tonnage 10,419,051 entered at Antwerp. Of the vessels entered, Belgium were 949; British, 4,081; Norwegian, 525; French, 390; American, 362; Dutch, 354; German, 239.

The chief imports in 1920 were wool, cotton, flax, hides, building wood, iron and steel, machinery, coal, chemical products, bitumen, zinc ore, wheat and wine. The chief exports were manufactures of wool, cotton, flax, leather and glassware, iron, steel and zinc products and sugar. Agriculture and forestry are important industries, the chief crops being wheat, oats, rye, potatoes and sugar beets, yet it is eminently a manufacturing country and is dependent on foreign supplies for its food. The coal, iron and quarry industries are very valuable, as are the glass, textile and sugar, and the lace of Brussels, Malines and Bruges is famous.

Parliament consists of a Senate of 120 and a House of Representatives numbering 186, all of whom are directly elected by the people (except 27 Senators who are elected by provincial councils). Senators for 8 years and Representatives for 4. Universal male suffrage with plural voting up to three by property and educational qualification was introduced in 1894. Proportional representation was introduced in 1900. By an emergency measure the present Parliament was elected in 1919 on a one-man-one-vote basis and the law was revised to establish that franchise in 1921. Parliament must meet annually in November, and must sit for at least 40 days. The party strength of the present Parliament is:

Senate—Catholic 73, Socialists 52, Liberals 23.  
House—Catholics 80, Socialists 67, Liberals 33, miscellaneous 6.

Belgium is a member of the League of Nations. Par. of exchange, franc..... 19.3 cents  
Rate of exchange, Nov. 1, 1922, franc..... 6.51 cents

The budget estimates for 1921 and 1922 were:

|             |               |               |
|-------------|---------------|---------------|
|             | 1921, Francs. | 1922, Francs. |
| Revenue     | 4,329,405,000 | 2,573,178,913 |
| Expenditure | 4,791,970,000 | 3,468,143,961 |

The ordinary estimates for 1921 were:

# RECEIPTS.

|                       | France.     |
|-----------------------|-------------|
| Income tax.....       | 305,000,000 |

Grand total.....4,791,970,000

Extraordinary receipts in 1921 amounted to 26,550,000 francs (in 1922, 2,600,000 francs) and extraordinary expenditures to 946,010,893 francs (in 1922 to 866,293,527 francs).

The Belgian public debt on Jan. 1, 1921, amounted to 25,236,941,690 francs (at par of exchange, the Belgian franc equal to 19.3 cents. The exchange rate on Oct. 15, 1922 was 7.06 cents). The debt was made up as follows:

a Consolidated debt: (1) Internal, 7,746,826,938 francs; (2) external, 554,291,377 francs.

b Floating debt: (1) Internal, 7,536,650,700 francs; external, 601,449,933 francs; of which 180,323,000 are from British credits; 23,466,705 francs for the purchase of horses and mules, besides 9,712,500 francs due to the Government of Canada, and 151,525,290 francs due to the Government of the United States.

c Indirect debt: 807,724,251 francs.  
d Claims of 5 per cent. war losses, 1,187,879,800 francs.

e Advances from the Allied Powers since the armistice, 1,302,118,690 francs, of which 191,754,080 francs are from England, 191,305,866 francs are from France, and 919,058,743 francs from the United States.

f Advances from the National Bank (withdrawal of German money) 5,560,000,000 francs.

The debt charge is 1,216,787,601 francs.

# BELGIAN CONGO.

AREA, 909,654 square miles.

POPULATION, estimated, 1921, 10,000,000.

CAPITAL, Kinshasa (replaced Boma as capital December, 1921). Provincial capitals, Elizabethville (Katanga), Leopoldville (Congo-Kasai), Coquilhatville (Equator), and Stanleyville (Eastern).

Governor General, Maurice Lippens, appointed Jan. 25, 1921.

The Congo Free State had its origin in the vision of King Leopold II. of Belgium, who, roused by Stanley's discoveries, realized the great economic possibilities in the development of the vast territory reached by the Congo. The International Association of the Congo, which he founded and largely financed, sent Stanley back in 1879. He founded the first station, Vivi, in February, 1880, and in all twenty-four before he returned in 1884. Leopold pushed the work with the aid of a handful of men, mostly officers, and in 1885 the powers, in convention at Berlin recognized the Association as an independent state under his sovereignty—"the trade of all nations to enjoy complete freedom." The indeterminate boundaries were held to include the basin of the Congo and Lake Tanganyika, with its eastern tributaries. From 1895 the Belgian Government associated itself with this work, opening credits, although Parliament was hostile. The administration of affairs later provoked violent agitation to secure the amelioration of the condition

of the natives. The Congo Free State was ceded to Belgium by the treaty of 1907, becoming by the law of Oct. 18, 1909, Belgian Congo under control of the newly created Ministry of the Colonies.

Belgian Congo has a short coast line on the South Atlantic at the mouth of the Congo, where is situated the village of Banana on a fine natural harbor. Equatorial French Africa lies to the north and west, and Angola (Portuguese) to the south, beyond which and to the east is North Rhodesia; to the east Tanganyika, now British, but formerly German East Africa, and Uganda (British); to the north it also touches the Soudan. Vast, sunless and well-wooded impenetrable tropical forests fill the upper reaches of the river, covering about 25,000 square miles. The lianas yield 3,000 to 4,000 tons of rubber yearly. The oil-palm is cultivated, and palm kernels and palm oil to the value of 77,000,000 francs were exported in 1920. The export of copal in 1920 was about 6,000,000 pounds, valued at 40,305,021 francs. Ivory exports amounted to about 150,000 pounds, valued at 35,860,023 francs. Coffee, cocoa, rice, cotton and tobacco grow freely. Cattle thrive where there is no tsetse fly.

The chief industry is copper mining in Katanga, where the copper-bearing belt is 250 miles long by 25 to 50 miles wide. The output in 1920 was 18,924 tons. Placer mining in Welle produced gold in 1920 to the amount of 3,324 kilograms, valued at 24,088,430 francs. Small diamonds are found in the Vassal Basin, the export in 1920 being 274,103 carats. Coal, iron and tin are present, but are undeveloped.

The Congo is navigable for large vessels for 95 miles to Matadi. A railroad 249 miles long transships freight around the series of falls and rapids to Leopoldville on Stanley Pool. From here the river and its branches are navigable for about 5,000 miles. Railroads have been built around the falls on the upper river, and to connect important points. The total mileage in 1921 was 2,663. There are 5,009 miles of roads, partly suitable for automobiles. At Boma, the former capital, 60 miles up the Congo from its mouth, 53 seagoing vessels of 160,374 tonnage entered in 1920.

Belgian Congo's territory was increased as a consequence of the war by the transfer of 19,000 square miles, the Ruanda and Urundi territories, from the former German East Africa. Both are in the high plateau region, are rich in cattle and of great economic value.

The European population, census of 1921, was 8,221, of which 293 were American. The country greatly needs white colonists to develop its resources.

# BHUTAN, KINGDOM OF.

AREA, about 20,000 square miles.

POPULATION, estimated 250,000.

CAPITAL, Punakha (a strong natural fortress).

Ruler, Maharajah Sir Ugyen Wangchuk, chosen hereditary Maharajah 1907.

Bhutan is a semi-independent native state having control of its internal affairs (treaty of 1910), lying on the southern slope of the Himalayas between Tibet on the north and British India on the south with Sikkim on the west. It is 190 miles long from east to west and 90 miles extreme breadth. The people are Mongolians, the original inhabitants having been subjugated about two centuries ago by Tibetans. Their religion is Buddhism of the Tibetan form. Agriculture and stock raising (sturdy ponies especially) are the chief industries. Trade with India in 1920-21 amounted to £129,474.

# BOLIVIA, REPUBLIC OF.

AREA, 597,460 square miles.

POPULATION, estimated, 1920, 2,820,074.

CAPITAL, La Paz, pop., 1920, 107,252.

President, Bautista Saavedra, 1921-25.

Premier, Dr. Severo Fernando Alonso (Foreign).

Minister to the United States, Adolfo Ballivian.

Consul General, at New York, Carlos Gumucio.

Consuls, at Boston, Arthur P. Cushing; at Baltimore, Raymond M. Glacken; at New Orleans, Giorgio Garret; at San Francisco, Alberto Palacios; at Seattle, Nemesio Menacho; at San Diego, Philip Morse.

United States Minister, Jesse S. Cottrell.

United States Consul, at La Paz, Doyle C. McDonough.

Bolivia, the only country in South America without a seaport, lies between Peru and Chile in the west, Brazil on the north and east, Paraguay on the east and Argentina on the south. It lies across the Andes, and its chief topographical feature is the great central plateau at an altitude of 12,000 feet, over 500 miles long, lying between two great cordilleras having three of the highest peaks in America. Its area equals that of Oregon, California, Nevada, Arizona and New Mexico together. Over 50 per cent. of the population are Indians speaking their own dialects only and 25 per cent. are of mixed blood. The percentage of illiteracy is very high. Farming, grazing and mining are the chief occupations. The chief exports are tin, copper, antimony, bismuth, silver, lead, tungsten, rubber, cocoa, hides and alpaca wool.

La Paz is connected by a railroad (264 miles) with Arico on the Pacific. The principal railroad line runs from Antofagasta to La Paz (735 miles).

Bolivia is vitally interested in the disputes submitted in 1922 to arbitration by Secretary Hughes in Washington, between Peru and Chile over the provinces of Tacna and Arica on the Pacific, seized by Chile during the war of the Pacific, 1879-83, for she claims a commercial outlet at the port of Arica. She has also a serious boundary dispute with Paraguay over Gran Chaco, a potential valuable grassland. The peace strength of the army is 7,100 with reserves of 250,000. Bolivia is a member of the League of Nations.

de Sa; at Baltimore, Luiz Magalhaes Tavares;

at Richmond, Va., Fitzhugh Carter Lafferty.

United States Ambassador, Edwin V. Morgan.

United States Consul General, at Rio de Janeiro,

Alphonse Gaulin. Consuls, at Bahia, Thomas H.

Bevan; at Para, George H. Pickrell; at Pernam-

buco, Charles R. Cameron; at Porto Alegre,

Samuel T. Lee; at Sao Paulo, Ezra M. Lawton;

at Santos, vacant.

Brazil is the largest state in South America, exceeding the size of continental United States (exclusive of Alaska), by 250,000 square miles. It has a coast line on the Atlantic Ocean of 4,106 miles and extends 2,600 miles from north to south and 2,500 miles east to west. It is bounded on the north by Colombia, Venezuela, the Guianas and the Atlantic Ocean, on the east by the Atlantic, on the south by Uruguay, Paraguay and Bolivia, and on the west by Argentina, Paraguay, Bolivia and Peru. The northern half is the great heavily wooded basin of the Amazon (about 4,000 miles long, the longest river in the world), which rises in the Peruvian Andes, and with its tributaries drains 2,000,000 square miles and empties into the Atlantic at the Equator. It is navigable in Brazil for vessels of deep draft for 2,400 miles; and in all its rivers Brazil possesses 40,000 miles of navigable waterways. Mountain ranges, interspersed with fertile valleys, traverse the eastern and southern states. The majestic falls of the Iguassu, one of the natural wonders of the world, are in the southernmost state, Rio Grande do Sul.

The mineral wealth of Brazil is vast and but

little developed. Manganese is exported (450,000 tons in 1920), also the greater part of the world supply of monozite. The gold production is \$3,000,000 a year. Coal deposits are extensive but of inferior quality. But a small part of the rich agricultural land has been brought under cultivation. Four-fifths of the world coffee supply is grown in the states of Sao Paulo, Rio de Janeiro, Espirito Santo and Minas Geraes. The average annual crop is about 12,000,000 sacks of 132 pounds each; the produce 1921-22 was 8,030,000 sacks; in 1920 there were exported 11,523,000 sacks, valued at \$237,676,500. Other chief exports are rubber (over half of the world supply), about 23,531 metric tons being exported in 1920, cocoa, tobacco, sugar, yerba, cotton, leather, hides and meat.

Manufacturing of all kinds is being fostered. In 1921 there were 242 cotton factories with 1,521,500 spindles in operation. The census returns of 1920 showed there were in all 11,335 factories with 151,841 employees, capital of 665,676,000 milreis, and an annual output of 7,536,000 milreis. The vast forests are practically untouched. Stock raising is important. The chief imports are textiles, hardware, machinery, crockery and glassware etc.

In 1920 there entered the ports of Brazil 24,829 steam and sailing vessels, of 24,941,829 tonnage. Brazil on Jan. 1, 1921, had 17,847 miles of railroads in operation. Of this 9,455 miles were owned by the Federal Government (3,980 of which were Government operated); 1,527 owned by the states and 6,231 miles privately owned. The principal system, the Central Brazil Railway (1,563 miles), is Government owned. The system is joined up with the railroads of Paraguay, Argentina, and Uruguay.

Brazil, discovered in 1500 by Cabral, a Portuguese navigator, was developed as a colony of Portugal until the royal house of Braganza, fleeing from Lisbon before Napoleon's army in November, 1807, transferred the seat of Government to Rio de Janeiro in March, 1808. In 1815 Brazil was proclaimed a kingdom, and in 1822 Dom Pedro, son of King John VI., who had been left as Regent on his father's return to Portugal, was crowned Constitutional Emperor and Brazil freed from Portugal. He abdicated in 1831 in favor of his son Dom Pedro II., who was then five years old. Crowned in 1841 he ruled with varying fortunes until Nov. 15, 1889, when he was driven from the throne into exile by a revolution which established a republic, the United States of Brazil. The Constitution was adopted July 24, 1891, and is modelled largely on that of the United States. There are 20 states, largely autonomous, one territory (Acre), bought from Bolivia in 1902 and a Federal District. All males over 21 who can read and write have the franchise. The President is elected by direct vote for four years. Congress consists of a Senate of 63 members chosen by direct vote for nine years, one-third retiring every three years, and a Chamber of Deputies, of 212 members, elected by direct vote for three years, representation of the minority being provided for. The Cabinet is responsible to the President only.

All but 100,000 of the inhabitants are Roman Catholics, but religious toleration is guaranteed. Education is free in the primary grades but not compulsory save in some progressive cities. In recent years, however, great progress has been made. The University of Rio de Janeiro was founded Sept. 7, 1920. Military service is compulsory. The standing army numbers 35,000, with a reserve of 560,000. The navy has two dreadnoughts and in 1918 a personnel of 693 officers and 9,650 men. Brazil declared war against Germany on Oct. 26, 1917, following the torpedoing of three merchant ships.

On receipt of an invitation in 1922 from the Government of Brazil, the United States Navy Department assigned Rear Admiral Vogeleisang, with a staff of sixteen commissioned officers and twenty petty officers of the navy, to undertake the task of reorganizing and expanding the Brazilian Navy.

Brazil opened on Sept. 7, 1922, an exposition at Rio de Janeiro in commemoration of the centennial of the Brazilian nation. It was attended officially by Secretary of State Charles E. Hughes and a mission from the United States.

**BULGARIA, KINGDOM OF.**

**AREA,** 40,656 square miles.

**POPULATION,** census of 1920, 4,337,513, of which 3,203,000 were Bulgarians, Turks about 400,000.

**CAPITAL,** Sofia, pop., 154,431; other cities, Philippopolis, pop., 63,418; Warna, 50,819; Rusehuk, 41,574; Silivno, 28,695; Plevne, 27,779; Stava Zagore, 25,491, and ten of more than 15,000 population.

**King** (sometimes known as Czar), Boris III., born Jan. 30, 1894, succeeded on abdication of his father, Ferdinand, Oct. 3, 1918.

**Premier,** Alexander Stambulski (Foreign Affairs).

**Minister to the United States,** Stephan Panaretoff.

**Consuls in the United States—**Consular affairs in charge of the Bulgarian Legation at Washington.

**United States Minister,** Charles S. Wilson.

**United States Consul,** at Sofia, Graham H. Kemper.

The Principality of Bulgaria was created by the Treaty of Berlin on July 13, 1878, as an autonomous and tributary principality under the suzerainty of the Sultan of Turkey. Bulgaria declared its independence on Oct. 5, 1908. Eastern Rumelia joined Bulgaria on Sept. 18, 1885, after revolution against the Sultan.

In the first Balkan War, Bulgaria, with Serbia, Greece and Montenegro fought Turkey, the war ending in the Treaty of London on March 30, 1913, when Turkey ceded to the allied Balkan nations all territory west of the line from Midia on the Black Sea to Enos on the Aegean Sea, and also Crete. The Balkan League broke up soon after the treaty was signed, war breaking out between the allies—the second Balkan War. Roumania intervened and procured an extension (part of the Dobruja) of her frontier at Bulgaria's expense. Peace came again with the Treaty of Bucharest on July 26, 1913, all signing.

Bulgaria was an ally of the Central Powers in the World War. By the Peace Treaty of Neuilly (Paris) of Nov. 27, 1919, Bulgaria ceded Thrace to Greece and the "Strumitsa Line" and a strip of territory on the northwest to Serbia. The treaty deprived Bulgaria of the Aegean Sea front, but provided that which was alleged to be an efficient economic outlet thereto.

It leaves Bulgaria bounded on the north by Roumania, on the west by Serbia, on the south by Greece, and on the east and southeast by the Black Sea. It is about the size of the State of Kentucky.

Bulgaria's language is Slavonic of Indo-European influence, allied to the Russian. The state church, Orthodox Greek, is governed by a Synod of Bishops, the clergy being paid by the state.

Two-thirds of the people are engaged in agriculture. Although lands are held in fee, pastures and woodlands are held in perpetuity by the communes. Small holdings run from one to six acres. Methods are very primitive, although gradually machinery is being brought in.

The cultivated area is 9,290,175 acres of the total of 18,019,840 of the country. Production is low because of crude methods. The annual production of 2,867,066 tons from 5,426,102 acres (census of 1921) indicates slightly more than one-half ton to the acre. Domestic animals number 10,100,000. There is little other industry. Although there are coal deposits, 1920 production was only 748,085 tons. Iron, lead, copper, gold, silver and manganese are found.

Forests cover 30 per cent. of the total area—fir, beech, oak and pine.

Bulgaria had in 1921, 1,581 miles of railroads owned and operated by the state. River navigation giving access to the Danube—a great traffic route—is important. In 1920, 2,724 vessels of 278,353 tons entered Danube ports and 2,112 vessels of 833,162 tons, Black Sea ports.

By the Constitution, adopted in 1870 and amended in 1893 and 1911, legislative authority is vested in a single chamber, the Sobranje or National Assembly, of 227 members, elected for four years by universal suffrage. The King must give assent to all laws enacted before they become effective. Executive power is vested in the Council of Ten Ministers nominated by the King.

Elementary education is obligatory for children from 7 to 14 years of age. The state maintains 5,400 schools with about 680,000 pupils, besides 33 special state institutions and other private schools. Illiteracy is indicated by the 17.3 per cent. of it in the Bulgarian Army.

Pre-war Bulgaria's army was composed of 3,900 officers and 56,000 men, with a war mobilization strength of 500,000. The Treaty of Neuilly limits it to 20,000 men, who must be volunteers, obligatory military service having been abolished. Bulgaria is a member of the League of Nations.

The leva is the unit of currency, its gold par being \$0.195. Imports (census of 1920) were 2,214,080, 225 leva, and exports 1,842,771,800; textiles, metals, oils, skins and machinery going in, and tobacco, maize, hides, wheat, barley, and attar of roses going out. The public debt (budget of 1922) is 3,209,085,085 leva, foreign, and 3,399,190,960 internal; receipts, 55,518,000 leva; expenditures, 88,687,025.

Trade with the United States was:

|                 |             |
|-----------------|-------------|
| Imports 1920-21 | \$1,312,526 |
| 1921-22         | 1,242,992   |
| Exports 1920-21 | 3,014,386   |
| 1921-22         | 1,144,868   |

**CHILE, REPUBLIC OF.**

**AREA,** 289,829 square miles.

**POPULATION,** census of Aug. 1, 1921, 3,774,485.

**CAPITAL,** Santiago, pop. 1920, 507,296; chief port, Valparaiso, pop. 182,242; other cities, Concepcion, pop. 66,074; Antofagasta, 51,531; Iquique, 37,421; Talca, 36,079; Vina del Mar, 33,441; Orillan, 30,881.

**President,** Arturo Alessandri, 1920-25, born Dec. 21, 1869, inaugurated Dec. 23, 1920.

**Prime Minister,** Antonio Huneeu (Interior).

**Ambassador to the United States,** Beltran Mathieu.

**Consul General,** at New York, Gustavo Munizaga Vardla. **Consuls,** at Boston, Eugenio Vial Correa; at Baltimore, Augusto Evrazuriz O.; at Philadelphia, Reeves K. Johnson; at San Francisco, Marcos Garcia Hindobro; at Chicago, M. H. Ebert; at Detroit, L. G. Aguirre; at Newark, Federico Tonkin; at Buffalo, Alfredo von der Heyde; at Cincinnati, Tomas Alfredo Page; at Portland, Ore., Antonio R. Velaz; at Seattle, Luolo Alberto Villegas; at Norfolk, Domingo Pena Toro.

**United States Ambassador,** William M. Collier. **United States Consul General,** at Valparaiso, Carl F. Deschman. **Consuls,** at Antofagasta, vacant; at Arica, E. C. von Treskow; Concepcion, S. Reid Thompson; at Iquique, Homer Brett; at Punta Arenas, A. O. Brady.

Chile lies on the west coast of South America, occupying the strip of land between the Andes and the South Pacific, from Peru to Cape Horn, having an extreme length of about 2,800 miles with a coast line of 2,485 miles. The average breadth north of 40° is 100 miles. Its area is slightly greater than that of the eight South Atlantic States of the United States. The Andes have many lofty peaks, notably Corcoputi (alt. 22,162 feet), El Muerto (21,227 feet), the Raya (19,993 feet), the Gualatiri (19,882 feet). The land in the north part is arid, but the two provinces Tacna and Arica, taken from Peru in the war of the Pacific 1879-82, produced 95 per cent. of the world's supply of nitrates until the process of producing nitrate from the air was made commercially profitable. The production of nitrate in 1920 was 2,606,571 metric tons, valued at \$172,800,000, but was stagnant in 1921. Agriculture is flourishing but the wealth of the country is chiefly in minerals.

Chile is the world's second largest producer of copper, the amount in 1920 being 91,226 metric tons; there are also enormous iron ore deposits in the provinces of Atacama and Coquimbo, estimated at a billion tons. Much gold and silver is produced. There are large deposits of coal south of Valparaiso, over a million tons being mined in 1920.

The chief exports are nitrates, iodine, copper, silver, cereals, flour, hides and wool; the chief imports are textiles, food products, agricultural and mining machinery.

The population is almost entirely of European origin; there are about 100,000 Araucans (natives) in the Andes and an indeterminate number of nomadic Fuegians in Terra del Fuego.

Chile has 5,403 miles of railroads, of which 2,270 are privately owned. The state owns the longitudinal railroad traversing the republic from north to south for a distance of 2,862 miles; with gauge its mileage is 3,133. Electrification of the railroad between Valparaiso and Santiago, 117 miles, was begun in 1920. At the ports in 1920 there entered 14,666 vessels of 14,925,601 tons.

Chile threw off the Spanish yoke in 1810-18, and in 1833 adopted the Constitution under which the people are now governed. Electors must be able to read and write. The President is elected for 5 years, Congress is composed of a Senate with 37 members, elected by popular vote for six years, and a Chamber of Deputies, with 118 members, elected for three years. Education is free, supported by the state, and since 1920 is compulsory. The percentage of illiteracy is high. The University of Chile (state) at Santiago had 4,502 students in 1920 and the Catholic University, 614. The Roman Catholic religion is maintained by the

state, but by the Constitution all religions are protected.

All able-bodied citizens are liable for service in the state militia. The peace strength of the army is 23,782, with 609,734 in the reserve. In the navy are one dreadnought—the Almirante Latorre (formerly H. B. M. S. Canada), 28,000 tons, mounting 10 14-inch guns, one pre-dreadnought, the Capitan Prat, 6,966 tons, two armored cruisers and four protected cruisers. The strength of the navy is 6,000 men. An air force was formed in 1918 under British instruction, with a nucleus of 14 seaplanes and 80 aeroplanes, bought in Great Britain.

Chile was neutral during the World War; on specific invitation she joined the League of Nations Nov. 4, 1919.

(See Peru for boundary dispute.)

### CHINA, REPUBLIC OF.

AREA, 4,277,170 square miles; divided, China Proper, 1,532,420; Sinkiang (Eastern Turkestan), 550,340; Manchuria, 363,610; Mongolia, 1,367,600; Tibet, 463,200.

POPULATION. Figures vary widely. W. W. Rockhill, United States Minister to China, in 1911, after much technical studying, gave China Proper 362,110,000; other parts, 13,540,000; total, 320,650,000. The Chinese Maritime Customs in 1920 gave all China the total of 440,934,000; and the Chinese Post Office in 1919 estimated all China at 427,679,314, and in 1920 at 436,094,954.

CAPITAL. Peking, pop. (estd.) 1,200,000; Peking metropolitan area, 4,200,000; other cities, Canton, pop. (estd.) 950,000; Changsha, 550,000; Chungking, 440,000; Foochow, 650,000; Hankow, 700,000; Hankow, 1,500,000; Hongkong (British Crown colony), 561,000; Nanking 390,000; Ningpo, 700,000; Shanghai, 1,100,000; Soochow, 550,000.

President, Hsu Shih-Chang; born 1853; elected Aug. 10, 1918; inaugurated October, 1918.

Premier, Wang Chung-hui.

Minister to the United States, Sao-Ke Alfred Sze.

Consuls in the United States, at New York, Zhangling Chang; at San Francisco, Chu Chao-Hsin (C. G.); at Panama for the Canal Zone, Juming C. Suez (C. G.); Honorary Consuls at Portland and Seattle.

United States Minister, Dr. Jacob Gould Schurman. United States Consuls General, at Shanghai, Edwin S. Cunningham; at Hankow, F. Stewart Heintzman; at Mukden, Albert W. Pontius; at Canton, vacant; at Tientsin, Stuart J. Fuller. Consuls, at Amoy, Algar E. Carleton; at Antung, vacant; at Changsha, vacant; at Chungking, vacant; at Harbin, George C. Hanson; at Chefoo, Stuart K. Lupton; at Nanking, John K. Davis; at Foochow, Ernest B. Price; at Tsinan, Clarence E. Gouss; at Yunnanfu, Myrl S. Myers; at Swatow, Lester L. Sohner; at Kolgan, vacant.

China, the home of a highly civilized nation when Europeans were still in the bronze age, and with a history reaching back to 2205 B. C., occupies a territory in the eastern part of Asia about one-third larger than continental United States. To the north and northeast lies Siberia; to the west Russian Turkestan, to the southwest and south the well-nigh impassable barrier of the Himalayas form the Tibetan-Indian frontier. French Indo-China borders it on the south; and the China Sea and Yellow Sea on the east separate it from the Philippines, Formosa (now Japanese), the Japanese Empire and Korea. The country is of rolling topography, rising to high elevations in the north in the Kiangnan and Tarbagatay Mountains in Mongolia; the Himalayan and Kwenlun Mountains in the south-west, in Tibet, and the Hingnan Mountains of Manchuria.

China Proper—China of the 18 Provinces—occupies the rich fertile southeastern part of the country, an area nearly twice the size of the United States east of the Mississippi. There the population on the generally accepted estimates has a density of 174 to the square mile. China Proper is one of the best watered countries of the world. From the

mountains on the west four great rivers run in general course eastward to the sea, through great alluvial plains stretching for hundreds of miles along the ocean and inland to a depth of 300 miles. These rivers drain four-fifths of the country. The Yangtsze-chang, 3,158 miles long, rises in the centre of the high plateau of Tibet, 16,000 feet in altitude. At Pingshenghsien, 1,215 miles from its source, it becomes in part navigable, but with dangerous rapids, to the vicinity of Ichang, 2,193 miles from its source. From Ichang to Hankow it is navigable by small river steamers and from Hankow to its mouth, 595 miles, by sea-going vessels. The Hanho, a tributary from the north at Hankow, is navigable for 600 miles. The Yellow River (Hwang-ho), 2,700 miles long, and also rising in Tibet, is navigable only in part. It is called "China's Sorrow" because of the devastation it causes in flood time, when it overflows its banks, bursts its dikes and sweeps over the farm lands. In 1898, when a disastrous flood occurred, salt and sand were deposited over an area of 200 square miles, below Lokow, to a depth of 2 to 10 feet, amounting to over sixteen billion cubic feet. The Siliang River, 1,250 miles long, waters South China, its branches reaching the sea in the Canton delta from Hongkong to the west of Macao. It is navigable for steamers for 200 miles, and for smaller craft for another 100 miles. The Paho waters the plain of north China, and empties into the Gulf of Chihli at Taku. The Amur River, 2,920 miles long, and navigable for 1,500 miles, which forms the boundary between Manchuria and Siberia; the Yalu, navigable for 600 miles, the boundary between Manchuria and Korea, and the Liao in Manchuria are also highly important. A network of canals helps to care for the inland navigation.

China's coast line is 2,150 miles long, or with indentations about 5,000. Along the coast are 56 treaty ports, 8 voluntarily opened ports, and 25 ports of call. The climate compares favorably with that of countries in similar latitudes.

China is essentially agricultural, and intensively so. The average holdings are small, and the implements are crude, but there is much irrigation, crops are rotated, and fruit, cereal and vegetable production is regarded by scientists as relatively efficient, food values having for many years been replaced in the soils regularly. Deforestation of the mountain slopes and hills have resulted in great erosions. Large forests are rare. Bamboo is widely used. The amount of cultivated land is estimated at 341,163,500 acres. Cotton is produced chiefly in the Yangtsze-kang valley, the 1920 yield having been estimated by the China Cotton Association as 6,696,612 piculs (picul = 133 1-3 lbs.). Tea is produced exclusively in the west and south, the tea area being about 520,000 acres. Production is not officially indicated, but exportation is said to have declined from 1,576,136 piculs in 1908 to 1,305,906 in 1920, competition of Ceylon and Indian teas and the cessation of Russian purchases in late years being responsible.

The silk industry has flourished for 4,000 years. China is now producing 27 per cent. of the world's supply, having in this century yielded first place to Japan. In 1919 production was 73,078,709 piculs, valued at \$139,624,755. Wheat, barley, corn, millet, peas and beans are chiefly cultivated in the north, and sugar, indigo and several cereals in the south. Rice, the staple food of the Chinese, is grown in all but three provinces, the average annual production being 3,750,000 tons. Besides the thousands of looms in private dwellings, in 1921 there were 17 silk flatures, 57 cotton mills, with 1,747,312 spindles, 4 woolen mills, 125 modern flour mills, 445 glass factories, and developing iron and steel works. American cotton is bought by China; and in 1921 considerable wheat, owing to crop failures.

Practically all of the 18 provinces of China Proper and 3 of Manchuria contain immense stores of coal, China being one of the world's chief coal countries. The known fields cover 133,500 acres, annual production running now at about 25,000,000 tons, of which 8,000,000 is from modern mines.

Iron ores are abundant near the anthracite coal fields of Shansi, where, it is asserted, is the oldest iron industry in the world; and in Chihli, Shantung and Manchuria. There is estimated to be in China 600,000,000 tons of the ore, annual production being about 1,500,000, of which nearly two-thirds are smelted in China.

Petroleum also is abundant, but the industry has not been developed. American oil interests have done much exploration there, and driven many wells, most of which are not active. Copper ore abounds in the Yunnan deposits being of the world's richest. Tin, antimony, gold, silver, lead, mercury, tungsten, bismuth and molybdenum are also present.

In 1920, 210,609 vessels entered Chinese ports: American, 818, of 1,616,197 tonnage; 4,242 British, of 4,761,060 tons; 225 French, of 334,041; 24 Italian.

of 88,402; 4,065 Japanese, of 4,974,957 tons; 274 Portuguese, of 48,160 tons; 264 Russian, of 117,636 tons, and 21,503 Chinese, of 2,277,364 tons; total entrances, 31,667 of 14,584,856 tons.

The first railway was opened in 1876. At present there are more than 7,000 miles, including 1,857 miles in Manchuria, with 2,000 under construction. About one-half are under the Government.

Up to Feb. 12, 1912, when China became a republic, it was one of the most ancient monarchies. According to the Provisional Constitution the Government comprised a President, Vice President and a two House legislative body—the Senate of 264 members and the House of 596. The Central Government has not yet obtained full control, there being military governors in several provinces who refuse to obey. The executive authority is in a Premier named by the President, and nine Ministers nominated by the Premier, all to be confirmed by the Parliament. The Parliament, however, had failed to function up to late 1922, owing to the disturbed state of the country.

A Southern Government was formed at Canton, its authority being recognized in Kwangtung and Kwangsi.

Confucianism, Buddhism and Taoism are the religions of China, although there are also between 5,000,000 and 10,000,000 Moslems in the country, about 1,994,000 Catholics and 618,600 Protestant Christians.

In 1905 there began the new movement toward education of the masses, and since then progress has been marked. While the number of schools, 135,000, and pupils, 4,500,000, is small relative to the total population, the number is growing rapidly. There are seven universities and many technical institutions of learning.

The army numbers between 1,400,000 to 1,800,000 men, and is being wrought into a more modern organization. The navy is negligible—a protected cruiser of 4,300 tons, two cruisers of 2,600 tons and three 3,000-ton cruisers, with auxiliary vessel complement. The whole tonnage is about 40,000, with 8,000 men. China is a member of the League of Nations.

There is "unparalleled currency confusion" says an authority. The unit is the tael, which varies in gold par value from 67.08 cents in Shanghai to 74.86 in Yaku. Mexican dollars are used in all the treaty ports. Imports in 1920 were 1,848,910,500 taels; exports, 1,313,778,300. China's foreign trade is but one-fiftieth of that of the United States per capita. The last budget was in 1919, when receipts were estimated at 490,419,786 "Kuping" taels; expenditures, 495,762,888; deficit, 5,343,102.

China's national debt, as compiled by the Government Bureau of Economic Information in 1922 is as follows, amounts being stated in Mexican dollars: \$1 Mexican is worth about \$0.57 United States currency at present rate of exchange:

|                                | Dollars<br>Mex. |
|--------------------------------|-----------------|
| General foreign loans.....     | 268,979,252     |
| Foreign railway loans.....     | 334,802,631     |
| Foreign indemnities.....       | 482,841,744     |
| Internal long-term loans.....  | 276,226,738     |
| Internal short-term loans..... | 69,101,878      |
| Treasury notes, etc.....       | 16,640,000      |

Total.....1,449,592,343

The last items do not contain all the short-term loans and treasury notes issues, as the amounts of some of these cannot be ascertained.

The reorganization of the Chinese finances and debt is a pressing necessity although the difficulties in the way are well-nigh insurmountable.

The chief exports of China are silk, beans and products, tea, skins and furs, cotton, sesame seed, tin, cereals, medicines, peanuts and peanut oil, animals, wool, antimony and copper.

| China's trade with the United States was: |               |
|-------------------------------------------|---------------|
| Imports, 1920-21.....                     | \$138,455,178 |

#### MANCHURIA.

AREA, 382,630 square miles, estimate of the Southern Manchurian railway, 20,112,100.

CAPITALS, Mukden, of Shengking Province; Kirin of Kirin; Tsitsihar, of Amur.

Manchuria is the extreme northeast territory of China, with Siberia on the northwest, north and east, Korea, on the southeast and Mongolia on the west. The Amur River flows along the northern border, the Ussuri on the east, and the Yalu forms the boundary with Korea.

Its topography is extremely varied. Much of the eastern portion is intensively agricultural. The soya bean, cultivated on about 5,000,000 acres, is

a source of enormous wealth. The Chamber of Commerce at Dairen estimates that 22,744,000 acres are cultivated for all crops, 19,480,000 persons being employed. Wheat, beans, millet, rice and products of the soya bean are the chief crops. There are 50 flouring mills. Forests are extensive. There are rich deposits of coal, iron, lead, gold, silver and asbestos.

The Trans-Siberian railroad runs through Manchuria from Lake Kulun to Suifenko the border for about 100 miles northwest of Vladivostok. From Harbin the railroad runs to Mukden and branches to Peking on the west, Port Arthur and Dairen on the south, and through Korea to Uokpo and Fusan on the southeast. Railway mileage is about 1,600.

In 1920, direct imports were about 290,000,000 taels; exports, about 350,000,000 taels. In 1920, 5,300 vessels entered Dairen, of 5,509,314 tonnage.

#### MONGOLIA.

AREA, 1,369,600 square miles.

POPULATION, estimated, 2,600,000.

CAPITAL, Urga.

Mongolia, although nominally of China, was somewhat shaken loose from Chinese adherence during the late war, the status of Outer Mongolia being now that its autonomy is recognized by China, and it is recognized by Russia as under Chinese suzerainty. It is bounded on the north by Siberia, on the south by Sinkiang, on the southwest by Turkistan on the east by China, Proper and Manchuria.

There is little agriculture, the great plains between the Tarbagatai and Kinated Mountains being desert, with camels, horses and sheep as principal interests. The religion of the people is Buddhist Lamaism.

Motor transportation from Kalgan on the Great Wall of China, northwest of Peking, and at the terminus of the Kalgan-Peking railroad, with Urga, the capital of Mongolia, a distance of 650 miles across the plains, was established in 1921. In the last three months of the year goods to the value of \$2,000,000 silver were taken to Urga. The trip takes three to four days.

Mongolia has its own legal currency, adopted in 1915, equal to the gold par of the Russian ruble—50 cents.

#### SINKIANG (Chinese Turkestan).

AREA, 550,340 square miles.

POPULATION, estimated, 1,200,000.

CAPITAL, Ili.

Sinkiang, known as the New Dominion, comprises Chinese Turkestan, Kulja and Kashgaria; and includes all Chinese dependencies between Mongolia on the north and Tibet on the south. There are Turki, Mohammedan and Chinese people resident there. Along the Kashgar and Yarkand Rivers there is much irrigation, and cereals, fruits and vegetables are grown, with wool, cotton and silk production.

It is from Sinkiang that much of the jade comes.

#### THIBET.

AREA, 483,200 square miles.

POPULATION, estimated, 2,000,000.

CAPITAL, Lhasa; pop. 15,000 to 20,000.

Thibet, in Western China, is a country little known, situated between the Himalaya and Kwenlin Mountains, and hitherto practically shut to strangers. The trade is with India mostly, being carried on through lofty passes, some of which are 14,000 to 18,000 feet high, which are impassable in winter. China's hold on Thibet was visibly loosened when the 1911 revolution broke in China. The Thibetans expelled the Chinese garrisons, and the status of that country is more or less indeterminate, although nominally part of the Chinese Republic.

The religion is Lamaism, a modified form of Buddhism, and also a faith known as Shamanistic. All economic phases are affected by the non-progressive character of the people, who are immersed in their religious traditions. Some agriculture is carried on, and livestock husbandry.

#### COLOMBIA, REPUBLIC OF.

AREA, 461,606 square miles.

POPULATION, census of 1918, 5,855,077.

CAPITAL, Bogota, pop. (estimated, 1921);

160,000; chief cities, Medellin, pop. 79,146;

Barranquilla, 64,543; Cartagena, 51,382; Cali,

45,825; Cucuta, 29,490; Bucaramanga, 24,919.

President, Dr. Pedro Nel Ospina, Conservative

(1922-23). Inaugurated Aug. 7, 1922.

Premier, Jimenez Lopez (Interior).

Minister to the United States, Dr. Enrique Olaya.

**Consul General** at New York, J. M. Arango G. **Consuls**, at Boston, Enrique Naranjo M.; at Philadelphia, Ricardo Galvis; at Newark, Alfonso Sanchez S.; at Chattanooga, John L. Newkirk, Jr.; at Mobile, Juan Llores Marti; at Baltimore, Roberto F. Velez; at New Orleans, Diego Jose Fallon; at Detroit, William J. Griffiths; at Chicago, Jorge E. Caveller; at San Francisco, Alvaro Robolledo; at Los Angeles, Fortunato Pereira Gamba; at Seattle, Escipion Canal; at St. Louis, vacant; at Norfolk, vacant.

**United States Minister**, Samuel H. Piles. **United States Consuls**, at Barranquilla, Maurice L. Stafford; at Cartagena, Leroy R. Sawyer. The Republic of Colombia, situated in the extreme northwest of South America, extends up the Isthmus of Panama to the Republic of Panama—boundary line undetermined. It has a coast line of 465 miles on the Pacific Ocean, and 640 miles on the Caribbean Sea. It has as neighbors Venezuela and Brazil on the east, and Ecuador and Peru on the south. Its area is estimated at 461,606 square miles, which is equal to that of California, Oregon, Washington and Montana combined.

Three great ranges of the Andes, the Western, Central and Eastern Cordilleras, run through the country from north to south. The eastern range consists mostly of high table lands, cool and healthy, the most densely populated part of the country. The Magdalena River, in the east, rises in the high Andes and flows north into the Caribbean Sea, 18 miles from Barranquilla. It is navigable for river steamers for 900 miles, as far as Jirardot. Steamers ascend to La Dorado, 590 miles. Railroads serve to transport freight and passengers around the rapids and from Jirardot to Bogotá. The total mileage of railroads is 891, and the bulk of the transportation in the interior is on mule back.

The population, according to the census of 1918, is 3,855,077, almost entirely whites and half castes, only 158,428 Indians being returned. Bogotá, the capital, situated 8,600 feet above the sea, has a university, founded in 1572, a large library, a museum and observatory. The Roman Catholic is the prevailing religion, but all are tolerated. The standing army consists of about 6,000 men, with a reserve of 362,700. Military service is compulsory. There is no navy.

The country is divided into 14 departments, 2 intendencias and 7 comisarías, with Governors appointed by the President. The Federal Congress consists of a Senate of 34 members, elected for a term of 4 years, and a House of Representatives of 92, elected directly by the people every 2 years.

The forests are extensive, much mahogany, cedar and dyewood being exported. Colombia contains the great emerald mines of the world, the chief mines being owned by the state. The country is rich in minerals—gold, silver, platinum, copper, iron, lead and coal are mined. The Government owned salt mines at Zipaquirá are a great source of revenue. Coffee, cotton, bananas, cocoa, vegetables, ivory, tobacco, and wheat are the chief agricultural products. Cattle raising is extensive. Some woolen and cotton stuffs are manufactured for home consumption, also iron. The chief exports are coffee, hides, bananas, Panama hats, rubber, and precious metals.

The country, originally conquered by Spain and ruled by her for 300 years, won its freedom in the revolt of the Spanish-American colonies in 1811-24, the liberator, Simon Bolivar, establishing the Republic of Colombia in 1819. Venezuela and Ecuador withdrew in 1829-30, and there were frequent uprisings during the century, culminating in the secession of Panama in 1903, since which the Republic has been adjusting the terms of treaty with the United States. Under the terms of Panama (ratified by the United States Senate April 20, 1921, and by the Colombian Congress Dec. 24, 1921), Colombia is to receive in compensation \$25,000,000 from the United States, to be paid in yearly instalments of \$5,000,000. This sum of money it is planned to use in stabilizing the currency of the country, and in improving its transportation facilities.

A loan of \$5,000,000 5-year 6½ per cent. bonds was floated on the New York market on Nov. 1, 1922.

Colombia is a member of the League of Nations.

## COSTA RICA, REPUBLIC OF.

AREA, estimated, 23,000 square miles.  
POPULATION, estimated, 1922, 576,581.  
CAPITAL, San Jose, pop., 33,930. Other cities, Cartago, 17,402; Limon, 10,231.  
**President**, Sr. Don Julio Acosta Garcia (1920-24). Inaugurated May 8, 1920.  
**Premier**, Sr. Don Jose Andres Coronado Alvarado (Foreign, Justice, Worship and Charities).  
**Minister to the United States**, Sr. Dr. Don Octavio Beeche.

**Consul General**, at New York, J. Rafael Oreamuno; at San Francisco, Jorge Orozco Casoria; **Consuls**, at Boston, Mario Sancho Jimenez; at New Orleans, Julio Aguila Soto; at Baltimore, William A. Rloridan; at Chicago, Berthold Singer; at Mobile, Truman McGonigal; at Milwaukee, Eduardo Azuola Aubert.

**United States Minister**, Roy T. Davis (also accredited to Guatemala).

**United States Consuls**, at San Jose, Henry S. Waterman; at Port Limon, Stewart E. McMillin.

Costa Rica, the southern state of Central America, has Nicaragua for its neighbor on the north and Panama on the south. The latter boundary has been a subject of arbitration and was fixed in 1900 by decision of President Loubet of France—a decision that by mutual consent was interpreted by the late Chief Justice White of the United States in 1914. Panama objected strenuously to this decision and in 1921 started troops to occupy the territory she claimed and which Costa Rica had occupied; but yielded to diplomatic pressure from the United States.

The lowlands by the Caribbean have a tropical climate. Bananas are cultivated, 3,652,473 bunches being exported in 1920. The interior plateau, with an altitude of about 4,000 feet, has a temperate climate. Coffee is the chief crop. The forests are extensive but little lumbering is done. Agriculture and stock raising are the chief industries. Gold and silver mining is an important industry on the Pacific slope. Port Limon is the centre of the banana trade. In 1920 532 vessels, tonnage 760,801, entered the ports. There are 402 miles of railroads; the line from Port Limon to San Jose, 103 miles, has unusual scenic charm.

The Constitution adopted Dec. 7, 1871, has been many times modified. The legislative power is vested in a Chamber of Deputies, 43 in number, with four-year terms, one-half elected directly every two years by manhood suffrage. The President, elected for 4 years, appoints a Ministry of six. The Roman Catholic is the religion of the state. Primary education is compulsory and free. The National Police have taken over the duties of the army.

Costa Rica is a member of the League of Nations.

## CUBA, REPUBLIC OF.

AREA, 41,634 square miles; including the Isle of Pines (1,180 square miles) and surrounding keys, about 44,164 square miles.

POPULATION, census of 1919, 2,889,004; including the Isle of Pines, 2,898,905.

CAPITAL and chief port, Havana, population, 1919, 363,506; other cities, Camaguey, population, 98,193; Cienfuegos, 95,865; Santiago, 70,232; Guantanamo, 68,883; Santa Clara, 63,151; Matanzas, 62,638; Sancti Spiritus, 58,843; Manzanillo, 56,570; Pinar del Rio, 47,858; Trinidad, 40,602.

**President**, Dr. Alfredo Zayas, 1921-25, born Feb. 21, 1861; inaugurated May 20, 1921.

**Premier**, Dr. Carlos Manuel de Cespedes (State).  
**Minister to the United States**, Dr. Carlos Manuel de Cespedes.

**Consul General**, at New York, Felipe Taboada y Fonce de Leon; at Boston, Federico Sanchez y Guerra; at Philadelphia, Jacinto J. Luis; at Baltimore, Eduardo L. Desvervigne; at Norfolk, Jose A. Munoz y Riera; at Newport News, Pedro Fermat y Cabrero; at Charleston, Jose M. Gonzales y Rodriguez del Rey; at New Orleans, Jose R. Cabrera y Zunzunegui; at Mobile, Andres Jimenez y Ruz; at Jacksonville, Julio Rodriguez Embil; at Key West, Domingo J. Milord y Vazquez; at

Tampa, Angel A. Solano y Garcia; at Pensacola, Gabriel A. Amenabar y Cabello; at Galveston, Eduardo Patterson y Jauregui; at St. Louis, Luis Sturla y Cambiaso; at Chicago, Francisco P. Caballero y Tapany; at Detroit, vacant; at San Francisco, vacant.

United States Minister, vacant.

United States Consul General, at Havana, Carlton Bailey Huret Consuls, at Antilla, Horace J. Dickinson; at Cienfuegos, Frank Bohr; at Nuevitas, George C. Duffee; at Santiago, Harold D. Clum; at Nueva Gerona, Isle of Pines, Charles Forman.

Cuba, the "Pearl of the Antilles," largest island of the West Indies, lies between the Gulf of Mexico, the Strait of Florida and the Atlantic Ocean on the north and the Caribbean Sea on the south. Key West, Fla., is about 100 miles a little to the east of north of Havana. The Windward Passage, 50 miles wide, separates it from Haiti to the east, and Jamaica (British) lies 85 miles to the south. Yucatan is 130 miles to the west. From San Antonio, the western extremity, to Cape Mayrsl, the eastern, the length is 730 miles, and the breadth averages 50 miles, with a maximum of 160 miles. Its area nearly equals that of Pennsylvania. The coast line, including the larger keys, is about 2,500 miles in length. It has numerous safe and commodious harbors, notably that of Havana, one of the finest and safest in the world. Other first-class harbors are Bahia Honda, Matanzas, Cardenas, Nuevitas and Nipe on the north shore, and Santiago and Cienfuegos on the south; also Guantanamo, now a United States naval station.

Mountains rise in Pinar del Rio province in the west, and in Camaguey and Oriente in the east, where they reach a general elevation of about 3,000 feet, with Monte Turquino (3,320 feet) as the highest point. Santa Clara is rough and broken, but Matanzas and Havana are flat and rolling. The uplands and mountains are covered with magnificent forests, the scenery is wild and very beautiful, and many points are inaccessible. Broad intervals of low upland are frequent. Near the coast runs a continual belt of plantations. Grazing, tobacco and general farm lands cover the lower slopes of the hills.

The soil is alluvial, and under the tropical heat and humidity the vegetation is of great richness. It is estimated officially that 3,628,434 acres are covered with dense forest, mostly primeval. The royal palm is the most characteristic tree, rising to 75 feet, sometimes 100 feet in height, dominating every landscape. All tropical fruits and vegetables flourish. At Havana the mean temperature is 76° and the mean rainfall 40.6 inches. Hardly a decade passes without a destructive hurricane. The population is about 60 per cent. native white, 30 per cent. Negro, and 10 per cent. foreign white.

Sugar has been the dominant crop for 150 years and its price is the barometer of prosperity for the island. Cuba exported to the United States, which takes about 98 per cent, in the year 1921, 255,727 tons, valued at \$378,209,386; and in 1921-22, 7,720,255,237 pounds, valued at \$171,300,590. About 1,375,000 acres are occupied by the sugar plantations. Rum, molasses and alcohol are important by-products.

Tobacco raising and the manufacture of cigars and cigarettes is the second industry of the island. The total value of the crop is between \$40,000,000 and \$50,000,000 annually; the tobacco manufactured in Cuba in 1919-20 was valued at \$2,373,966. Cuba's exports of tobacco to the United States in the year 1920-21 were 18,292,521 pounds, valued at \$22,278,840; and in the year 1921-22 were 21,401,151 pounds, valued at \$20,578,009. The United States takes about 90 per cent of the cigars exported to the United States for the same periods were \$4,000,000 and \$3,214,000 respectively. Banana raising is increasing in importance.

Stock raising is an important industry, though proportionally less so than in previous years. Mahogany and other valuable cabinet woods are produced and much cedar for the manufacture of cigar boxes. From the iron mines 50,000 tons of ore are exported monthly to the United States. Copper is a valuable product, also asphalt.

Cuba had in 1919, 3,200 miles of railroads, including the private lines connecting the sugar plantations with the trunk line. In 1919, 89,458 vessels with a tonnage of 203,975,959 entered the ports of the republic in the foreign trade. In the coastwise trade 14,684 vessels of 2,582,829 tons entered. The island has over 1,500 miles of splendid automobile roads.

Cuba, discovered by Columbus in 1492, and first settled by the Spanish in 1511, attained independence of Spain by the Treaty of Paris, Dec. 1, 1898, which ended the Spanish-American War. A Constitution, modeled after that of the United States, was adopted Feb. 21, 1901. It provides for a President and Vice President, elected for four years by

direct vote; a Senate of 24 members (four from each of the six provinces) and a House of Representatives of 118 members. The provinces and municipalities have a large measure of home rule. The Congress of the United States authorized the President to hand over the government to the Cuban people on the condition that the so-called Platt amendment, adopted by Congress March 2, 1901, be accepted. This provided that the Cuban republic should never enter into any compact with a foreign power that would impair her independence; that she would contract no excessive debt; that the acts of the United States in Cuba during and after the war be validated; that the Cuban Government should carry out certain plans for the sanitation of the island; that certain lands necessary for coaling or naval stations be leased to the United States, and "that the Cuban Government consents that the United States may exercise the right to intervene for the preservation of Cuban independence and to maintain a government capable of protecting life, property and individual liberty, and for discharging the obligations with respect to Cuba imposed by the treaty of peace on the United States, now to be assumed and undertaken by the Government of Cuba." This was made, on June 12, 1901, a part of the Constitution. On Feb. 24, 1902, the election of President (Tomas Estrada Palma) took place and the United States formally transferred control of the island to the National Government. The coaling stations, Guantanamo Bay and Bahia Honda, were leased to the United States on July 2, 1903, at an annual rental of \$2,000,000.

Political disturbances occasioned intervention by the United States in August, 1906, which continued until Jan. 28, 1909, when the National Government was resumed after the institution of electoral reforms, and the last American soldiers left the island April 1, 1909. A new electoral law, drawn with the assistance of Major Gen. Enoch H. Crowder, U. S. A., was passed in August, 1919. The election of Nov. 1, 1920, was very stormy and interpretations put on the new laws brought about a deadlock. Gen. Crowder was sent to Cuba in January, 1921, again as personal representative of President Wilson to straighten matters out, the result being the inauguration of Dr. Alfredo Zayas on May 20, 1921.

Under the influence of Gen. Crowder the Congress has passed during the same session of 1922 five reform measures—the reorganization of the Federal system of accounting, the suspension of certain provisions of the civil service law to permit the President to shift the personnel of various Government departments in the interest of economy and efficiency, certain judiciary reforms, the clearing up of current indebtedness, and the flotation of a foreign loan of \$50,000,000, the latter authorized Oct. 7.

Cuba is a member of the League of Nations.

Notable work has been accomplished by the United States Military Government under Gens. Brooks and Wood, especially the stamping out of yellow fever.

The Education Act of 1899 established a system of primary and secondary schools, with compulsory attendance, under which education has progressed greatly. A wide system of kindergartens and night schools has been added. In 1919, 334,671 children were enrolled, with 6,151 teachers. In that year 223 new schools were established. The University of Havana (founded 1721) in 1919 had 2,272 students. The Roman Catholic religion is dominant.

Cuba's army numbers 12,500 men, with a reserve of 300,000.

#### CZECHOSLOVAKIA REPUBLIC OF.

AREA, 54,264 square miles; viz: Bohemia, 20,106. Moravia, 8,615; Silesia, 1,767; Slovakia, 18,933; Ruthenia, 4,903.

POPULATION, census of 1921, 13,595,818; viz: 6,000,000 Czechs; 3,700,000 Germans; 1,700,000 Slovaks; 1,200,000 Magyars; 300,000 Ruthenians; 250,000 Poles.

CAPITAL, Praha (Prague): pop., 676,476; other cities, Brno (Brunn), pop., 221,423; Plzen (Pilsen), 88,447; Bratislava (Pressburg), 93,329; Kosice, 52,699; ten others from 10,000 up.

President, Dr. Thomas G. Mazaryk; born 1850; took office, Nov. 14, 1918; re-elected May 28, 1920.

Premier, Antonin Svehla.

Minister to the United States, Dr. Bedrich Stepanek.

*Consuls in the United States, at New York, Borivoj Prusk; at Chicago, Jaroslav Smetanka; at Cleveland, Bohuslav Barabovsky; at Pittsburgh, Albert Mamatej; at Omaha, Stanley Serpan.*  
*United States Minister, Lewis Einstein.*  
*United States Consul, at Prague, Charles S. Wilans.*

Czechoslovakia is a Central European republic, about the size of the State of Illinois, bounded on the north by Germany and Poland, and on the south by Roumania, Hungary and Austria. Its extreme length from east to west is 600 miles and its width varies from 50 to 100 miles.

Czechoslovakia is one of Europe's richest countries agriculturally. It is becoming a land of peasant holdings, the number of farms being 3,791,621. Farming is unusually highly developed and is intensive, as indicated by the production of about 14,500,000 short tons of wheat, oats, barley, rye, potatoes and sugar beets from about 900,000,000 acres. Beet sugar produced annually is about 530,000 short tons, of which 280,000 are exported; 600 breweries output 5,700,000 hectolitres of beer, and 413 distilleries 27,500,000 hectolitres of spirits. Livestock number 9,000,000.

Forests cover 32 per cent. of the total 34,560,000 acres in Czechoslovakia, the annual lumber yield being 6,200,000,000 board feet. Immense quantities of foodstuffs are exported, the net food surplus being larger than for any other country in Europe. Agriculture has been restored to almost normal.

Mineral wealth is great—coal, iron, graphite, copper, lead, gold, silver and garnets being abundant. Coal production runs at about 33,500,000 short tons from 366 mines employing 120,000 men.

Factories number 8,800—textile, 2,000; glass and precious stones, 1,700; foodstuffs, 1,350; furniture and wood, 674; machinery, 595; metal, 590; paper, 300; chemicals, 450.

The railroad mileage is 8,497; 5,105 state owned, 3,320 privately owned; 1,000 miles are double-tracked. The peace treaty gave Czechoslovakia, which has no outlet to the sea 200 miles distant, the right to certain wharves in Hamburg and Stettin; the Danube is the principal waterway, its chief port being Bratislava (Pressburg). On the Elbe, which flows from Czechoslovakia through Germany, the main ports are Ustí (Aussig) and Decon (Teschen).

The Czechoslovaks, two branches of the same Slav nation, formed the independent Kingdom of Bohemia in Central Europe in the fifth century. In 1526 the Hapsburgs were elected to the throne of Bohemia, which thus became united through a common dynasty to Austria and Hungary. Religious persecution in the seventeenth century led to unsuccessful rebellions, leaving great bitterness. In its present form Czechoslovakia is a creation of the war, coming into existence Oct. 28, 1918, on the break-up of the Austro-Hungarian Empire, of which it was the northwest portion, bordering on Germany and Poland. The Constitution of the republic was adopted by the National Assembly on Feb. 29, 1920, providing for a National Assembly with legislative authority over the whole country, Carpathian Ruthenia to have autonomy. The Assembly, elected by universal suffrage, and with proportional representation, is composed of a Chamber of Deputies, six-year tenure, 300 members; and a Senate, eight-year tenure, 150 members, both in joint session to elect the President of the republic for a seven-year term; authorized to declare war with consent of the Assembly, and appoint Ministers and officials. Freedom of speech and religion are guaranteed.

There are 11,675,187 Roman Catholics, 592,699 Greek Catholics, 929,203 Protestants, 361,000 Jews. In 1920 the Reformed Clergy of Czechoslovakia decided to withdraw from the jurisdiction of the Pope and found a national church.

Education is compulsory between the ages of 6 and 14. Literacy is almost universal, excepting in Slovakia. There are 13,417 elementary schools, with 1,900,000 pupils, and 1,411 advanced schools with 1,255,000 students. The Czech University of Prague is celebrated. Founded in 1348, students number 10,300; the German University at Prague having 4,000 and two other universities 2,300.

Universal military service for men between 20 and 50 was enacted in 1920, service to be for 14 months. When mobilization is decreed, all from 17 to 60 are liable for service. Later a system of militia will be adopted. Peacetime army strength is 147,000 men. Reserve number 1,524,000. Czechoslovakia is a member of the League of Nations.

With Jugo-Slavia and Roumania, Czechoslovakia formed the "Little Entente," designed for protection against Hungarian aggression, as a defense against Bolshevism should the Soviet armies pass the Russian frontier, and to promote trade on the Dnieper.

The budgets for the last two years follow:

|                                                                               |                     |
|-------------------------------------------------------------------------------|---------------------|
| Par of exchange, crown.....                                                   | 20.3 cents          |
| Rate of exchange, Nov. 1, 1922.....                                           | 3.17 cents          |
| 1921.....                                                                     | 1922.....           |

## DANZIG, FREE CITY OF.

AREA, 709 square miles.

POPULATION, 1919, 351,380; 93 per cent. German, 7 per cent. Poles.

High Commissioner, Gen. Sir Richard Haking, appointed by the League of Nations; assumed office Jan. 24, 1921.

United States Consul, Charles L. Hoover. Diplomatic and consular representatives of Poland have charge of the interests of the Free City of Danzig in the United States.

The Treaty of Versailles set Danzig (Gdansk) apart as a free city, taking it from the former German Empire, giving all nations equal access, and to Poland certain especial privileges appertaining to public utilities. Danzig proper (the administrative district has 194,958 inhabitants), lying at the entrance of the (Polish) Vistula River to the Baltic Sea, with an ocean frontage of 35 miles, is an important seaport and grain market, and was governed after the war by an inter-Allied commission, to be gradually taken over by the citizens. A treaty was drawn between Danzig and Poland, under instructions from the Paris Peace Conference, which came in force with the proclamation of the freedom of the city on Nov. 15, 1920. There are storage capacities in warehouses for 50,000 freight tons, and plans for ultimate extensions of facilities to handle 8,000,000 tons of shipping annually. There are forty banks, half of them Polish. The German mark is the currency.

In 1913 5,765 ships of 1,861,691 tonnage, entered Danzig; in 1921, 3,836 ships of 1,967,000 tonnage. In 1913, no American ships made Danzig. In 1921 American tonnage was 233,403; British, 256,464; German, 204,958; German tonnage in 1913, 526,489.

Danzig dates from before 997 A. D., was once Polish, became German, is the world's greatest amber source, has predominant German population, with Poles increasing, and, when the Vistula-Dnieper trans-European route is perfected will be the most important Baltic port.

Danzig has many cherished historic treasures in cathedrals, notably St. Marian, abbeys, notably Olivia, and other architectural attractions much admired. Zoppot, six miles out, is the fashionable summer resort on the Baltic.

Development of Hamburg and Bremen by Germany as chief ports pressed Danzig down to relative insignificance; but its creation as a free city has reinvigorated it, rational development now being in progress, following the disorders, immediately post-war, which interfered seriously with its prosperity.

Poland's especial privileges under the Treaty of Versailles include predominant influence in control of waterways, docks, basins, traffic on the Vistula, railways, posts, telephones and telegraphs. "The General Commission of the Polish Republic in Danzig" administering Polish Treaty rights, as intermediary between foreign representatives and the municipal government. For the Danzig and Polish trade with the United States see Poland.

The Constitution, approved by the League of Nations, Nov. 17, 1920, provides for a Volkstag or Diet of 120 members, elected by direct vote, suffrage being exercised by all men and women over twenty, and by a Senate, President, Vice-President and 20 Senators, elected by the Volkstag. The Senate is the highest state authority and meets in secret. The President of the Senate directs the administration.

The funded debt of the Free City on Jan. 1, 1921, was \$3,043,647 marks.

## DENMARK, KINGDOM OF.

AREA, 16,958 square miles.

POPULATION, census of 1921, 3,283,000. Denmark gained 164,500 of population by the people of Schleswig voting in 1920 in the plebiscite to return from German rule to adherence to Denmark.

**CAPITAL**, Copenhagen, pop. without suburbs, 561,844.

**King**, Christian X, born Sept. 26, 1870; succeeded his father Frederick VIII, May 14, 1912; married April 26, 1898 Princess Alexandra of Mecklenburg; *Heir*, Crown Prince Christian Frederick, born March 11, 1899. He is also King of Iceland (which see).

**Premier**, Niels Neergaard (Finance).

**Minister to the United States**, Constantin Brun.

**Consuls in the United States**, at New York, George Bech; at Chicago, Redmund Baumann; at Boston, Gustaf Lundberg; at New Orleans, Thorkil Hoffmann-Olsen; at Seattle, Henning Plaun; at San Francisco, Fin Lunn.

**United States Minister**, John Dyneley Prince.

**United States Consul General**, at Copenhagen, Marion Letcher.

Denmark occupies the peninsula of Jutland, thrusting out to the north from Germany, which is its only land neighbor, between the North Sea and the Baltic Sea, with the adjacent islands. The Skagerrak separates it from Norway and Cattegat from Sweden. It is a little smaller than the States of Massachusetts and New Hampshire together. The country consists of low undulating plains.

Denmark has attained enormous agricultural productivity, annually (census of 1921) taking 3,527,000 tons of wheat, rye, barley, oats, potatoes and mixed grains from 3,750,000 acres. Eighty per cent. of the whole land is productive; 4.8 per cent. forest covered; and 85 per cent. arable with large supplies of peat. Domestic animals in 1921 numbered 5,191,000. Denmark sends agricultural products all over the world, notably from her dairies. Normally, there are about 82,000 industrial and shop plants, about 15,000 using power, employing 350,000, of whom 240,000 are skilled. In 1920 beet sugar production was 152,740 tons, and the Danish fishing fleet of 15,350 boats took fish to the value of 2,350,167 kroner.

Danish activity of all kinds has been largely dependent on the purchasing power of the German people, whose normal purchases of 60 per cent. of their foodstuffs afforded Denmark a valuable market. Prostration of German buying power has reduced Denmark to a current governmental budget deficit of the equivalent of about \$7,500,000.

Industry is normally stable in Denmark, attributed by many in part to the Permanent Court of Arbitration and the Public Mediation Institution. The first is representative of employers and employees and interprets agreements and legal points involved therein. The second anticipates industrial troubles, and, when stoppage of work such as will affect the whole community is threatened, takes steps to intervene and seeks to prevent it. The Court of Arbitration is national and no appeal lies against its findings to any superior court, being in themselves final and valid in law.

There are 2,662 miles of railroads, of which 1,283 are state-owned. In 1920 Denmark had 1,749 vessels of 592,724 tonnage and 23,038 vessels of 3,269,268 tonnage entered Danish ports.

Denmark is a constitutional monarchy, the succession being hereditary. The King and the Rigsdag (Diet) jointly hold legislative power. Executive authority vests in the King through his ten Ministers. The Rigsdag is of two bodies—the Folketing (House of Commons) with 149 members; and the Landsting (Senate) with 75 members. Men and women of 25 years of age and a fixed abode have the franchise.

The Evangelical Lutheran is the established religion. By the census of 1911 there were 2,732,792 Protestants and 9,321 Catholics. The population is almost entirely Scandinavian.

Education is compulsory between seven and fourteen years of age. Intelligence is widely diffused. By the census of 1920 there were 4,232 lower schools, instruction mostly gratuitous, with 473,310 pupils, and 70,000 students in the higher institutions. The University of Copenhagen, founded 1479, has 3,300 students.

Old age pensions are granted at 60 years of age to persons of good character, the number relieved in 1919-20 being 98,525.

The army is in the form of a national militia, every able-bodied male Dane being liable for service, excepting only those living in the Faeroe Islands. Even clergymen must serve. About 11,500 recruits train annually. The effective strength is 60,000, with 55,000 available on mobilization. The navy, for coast defense only, is mostly monitors.

Denmark is a member of the League of Nations. Par of exchange for the kroner is 26.8 cents; exchange on Nov. 1, 1922, was 20.20 cents.

Imports in 1921 were 1,625,000,000 kroner; exports, 1,484,600,000, mainly beverages, textiles, metals,

wood manufactures, animals, cereals, provisions, butter, cheese, eggs.

**Budget**, 1922-23—Receipts, kroner...329,098,235

Expenditures, kroner...358,379,142

**Debt**—Internal, kroner...664,225,162

External, kroner...399,597,730

Trade with the United States was:

Imports, 1920-21...\$63,065,607

1921-22...36,453,208

Exports, 1920-21...17,129,151

1921-22...8,988,645

#### GREENLAND—COLONY.

**AREA**, 46,740 square miles. Interior a lofty plateau of 9,000 to 10,000 feet altitude, covered with a glacier.

**POPULATION**, census of 1911, 13,440 (mostly Eskimos).

**CAPITAL** and largest settlement, Sydproven, population, 789.

Greenland, a huge island between the North Atlantic and the Polar Sea, separated from the North American continent by Davis Strait, Baffin Bay, etc. It reaches from 60° N. lat. to about 86°.

Greenland trade is a state monopoly for Denmark. Imports from Denmark run at about 4,000,000 kroner; exports lately less, about 3,200,000.

Trade with the United States was:

Imports, 1920-21...\$ 20,302

1921-22...12,884

Exports, 1920-21...210,000

1921-22...294,500

#### DOMINICAN REPUBLIC.

(SANTO DOMINGO.)

**AREA**, 18,750 square miles.

**POPULATION**, estimated, 700,000.

**CAPITAL**, Santo Domingo (founded 1496), pop.

1921, 45,021. Chief port, Puerto Plata, pop.

26,073; other cities, Santiago de los Caballeros,

71,956; La Vega, 58,041.

**President** (provisional), Juan Bautista y Burgos.

**Secretary of Foreign Relations**, Angel Morales.

**Secretary of Interior and Police**, Jose del Carmen Riza.

**Secretary of Justice and Public Instruction**, C.

Armando Rodriguez.

**Secretary of Hacienda and Commerce**, Eladio Sanchez.

**Secretary of Fomento and Communication**, Octavio A.

Acevedo.

**Secretary of Agriculture and Immigration**, Pedro A.

Perce.

**Secretary of Sanitation and Charities**, Licenciado

Manuel Maria Sanabria.

**Minister to the United States**, Emilio Joubert.

**Consul General**, at New York, Manuel De J. Camacho.

**Consul**, at Philadelphia, Rodman Wanamaker.

at Boston, vacant.

**United States Minister**, William W. Russell.

**United States Consul**, at Santo Domingo, Theodore B. Hogg; at Puerto Plata, William A. Beekers.

The Dominican Republic occupies the eastern

portion, about two-thirds, of the island of Santo

Domingo, the second largest of the Greater Antilles,

situated between Cuba on the west and Porto Rico

on the east. The boundary between it and the

Republic of Haiti, which occupies the western part

of the island, is 193 miles long. It has a coastline

of 1,017 miles. The land is very fertile, about

15,500 square miles being cultivable; agriculture

and stock raising are the principal industries. Sugar,

cacao, and tobacco are the chief products and

exports. The country has gold, copper, iron, salt,

coal and petroleum, but the mining industry is

beside 235 of private lines on large estates. In

1920, 714 ships, with tonnage of 957,826, entered

the ports. The population is a race of mixed

European, African and Indian blood. Spanish is

spoken. The religion of the State is Roman Catholic,

but religious toleration prevails. Education is free

and compulsory, and great advance in methods

of instruction has been made by the Military Gov-

ernment. The Dominican Republic is not a member

of the League of Nations.

Continual internal disturbances from the "war

of the restoration" (1898-95 to 1904), left the Do-

minican Republic under a crushing debt of \$32,-

000,000. Her annual revenues were about \$1,-

850,000, and her annual expenditures \$3,900,000.

Rumors were rife that European nations would

intervene to collect debts due their citizens. To

forestall armed and indefinite intervention Sec-

retary of State John Hay, in February, 1905, negoti-

ated a protocol with the republic, which provided

that the United States should adjust her debts

and administer her custom house receipts. Be-

cause a clause in the convention was interpreted

as establishing a protectorate, the United States

Senate refused to ratify the treaty. President

Roosevelt, however, made an executive arrangement with the President of the bankrupt republic essentially on these lines, and on April 1, 1905, put that modus vivendi into force, and placed an agent of the United States in charge of her fiscal administration. Marked improvement followed; her debt was adjusted and credit restored.

A treaty was signed on Feb. 8, 1907, which provided that the United States Government should for fifty years administer the customs of the Dominican Republic for the service of her debt, practically a receivership. Eight years of honest administration reduced the total debt to \$21,500,000.

It was inevitable that the administration of the finances of the Dominican Republic by the United States could not proceed without friction and interference with the government of that country. Political troubles and serious disturbances followed, to suppress which the Dominican officials incurred fresh debts without the approval of the United States, which demanded a supplementary convention be arranged. The Dominicans refused to consent. A coup d'état by Arias, deposing President Jimenez in April, 1916, was followed by disorders. The United States landed a detachment of marines and suppressed the insurrectionists; and on Nov. 29, 1916, Capt. Knapp, U. S. N., issued a proclamation announcing that the Dominican Republic was under the military administration of the United States, and declaring that his Government did not intend to destroy the sovereignty of the republic, but wished to enable her to restore internal order so that she might observe her international obligations.

A Dominican commission, headed by Provisional President Henriques Carvalhal, in 1919 visited Paris and later Washington, seeking the restoration of individual liberty in the republic. Acting under orders from Washington, the Governor, Admiral Snowden, issued a proclamation outlining the plan of the United States Government for the conditional withdrawal of its military forces, the transfer of administrative responsibility to a native government duly elected, and the continuance of the fiscal arrangements of 1907 enlarged so as to include arrangements for a new loan.

Rear Admiral Samuel S. Robison, U. S. N., who has been Military Governor of the Dominican Republic, installed on Oct. 21, 1922, a provisional government as printed above, for the purpose of promulgating legislation to regulate the holding of elections and to provide for the reorganizing of the provisional and municipal governments. This followed the plan for ultimate evacuation by the American force of occupation, which had been tentatively agreed upon in Washington June 30, 1922, by the Government of the United States and a commission headed by Dr. Adolfo A. Nouel, United States Commissioner Sumner Welles will report on political conditions preliminary to an agreement for the withdrawal of the American Marines who have now been concentrated in two or three points and have turned over the maintenance of peace and order to the Dominican police.

The treaty of 1907 authorized the issue of \$20,000,000 5 per cent bonds secured by a first lien on the customs revenues. Of this issue on July 31, 1920, there remained an unsettled balance of \$10,207,029. Of a further issue of \$4,161,300, made under authority of Aug. 2, 1918, to settle claims arising before the establishment of the military government there was on July 31, 1920, an unsettled balance of \$2,893,757, making a total bonded debt of \$13,100,786. Customs collections for the calendar year 1920 amounted to \$7,577,244.

Par of exchange, peso, . . . . . \$1.00  
Imports, 1921, . . . . . \$24,585,327  
Exports, 1921, . . . . . 20,614,048

## ECUADOR, REPUBLIC OF.

AREA, estimated, 276,000 square miles.

POPULATION, about 1,500,000.

CAPITAL, Quito, pop., 70,000; chief port, Guayaquil; population, estimated, 100,000.

President, Sr. Dr. Don Jose Luis Tamayo (1920-24), inaugurated Sept. 1, 1920.

Premier, Gen. Delfin B. Trevino (Interior and Public Works).

Minister to the United States, Sr. Dr. Don Rafael H. Elizalde.

Consuls General, at New York, Gustavo R. de Ycaza; at San Francisco, Manuel Cobeza de

Vaca. Consuls, at Philadelphia, Luis A. Mata; at New Orleans, Ismael Aviles Mejia; at Chicago, vacant.

United States Minister, Gerhard A. Boding.

United States Consul General, at Guayaquil, Frederic W. Goding.

Ecuador, on the Pacific coast of South America, extends from about 100 miles north of the Equator to 400 miles south of it. It is larger than Texas by 10,000 square miles. It is bounded by Colombia on the north and Peru on the south. The boundary in the east is in dispute, much territory being claimed by each of these three countries. Two cordillera of the Andes cross the country, with a dozen peaks above 16,000 feet in height, of which Chimborazo (alt. 20,702 feet) and Cotopaxi (19,498 feet) are the highest.

Mining has been but little developed, though the country is known to be rich in minerals. Most of the land is covered with virgin forest. Rubber abounds in the upper reaches of the Amazon in the disputed eastern territory. Panama hats are manufactured, cocoa, ivory nuts, coffee, hats, hides and rubber are the chief exports. Textiles, foodstuffs, machinery and clothing are the chief imports.

Guayaquil, the seaport, was long a hotbed of yellow fever. After a survey made by the Rockefeller Foundation in 1916, a scientific fight was made under the direction of Gen. Gorgas and May 27, 1920, the Director General of Public Health announced that the disease had been stamped out. Guayaquil is connected with Quito by a railroad (280 miles), a two-day journey. In all, Ecuador has 413 miles of railroads.

Ecuador's independence dates from the Battle of Pichincha, May 29, 1822, but its history has been stormy even for a Latin-American republic. It is estimated that three-fourths of its population are Indians, one-fifth mixed and only a small fraction white. Education is very backward. Only adults who can read and write can vote. The Constitution now in force was promulgated Dec. 28, 1906, and provides for a President, elected by popular vote for four years, a Senate of 32 members, elected for four years and a House of 48 members, elected for two years.

Ecuador has not joined the League of Nations.

## EGYPT, KINGDOM OF.

AREA, estimated, about 360,000, exclusive of the Soudan (which see). Cultivable land area, 12,226 square miles; Sinai desert, 11,200; Libyan and Arabian deserts, 340,000.

POPULATION, estimated, 1921, 13,387,000.

CAPITAL, Cairo, pop. census of 1917, 790,939; other cities, Alexandria, pop. 444,617; Port Said and Ismailia, 91,090; Suez, 30,996; Damietta, 30,984; Tanta, 74,195; Assiut, 51,431; and thirteen others between 20,000 and 50,000.

King, Fuad I., born March 26, 1868, son of the late Khedive Ismail Pasha, succeeded his brother Hussein Kamil on his death as Sultan Oct. 9, 1917, proclaimed King March 16, 1922, on termination of British protectorate and recognition of the independence of Egypt. He married Princess Nazli, May 24, 1919.

Her, his son Prince Farik, born Feb. 11, 1920.

Premier, Abdel Khalek Sarwat Pasha (Interior and Foreign Affairs).

British High Commissioner for Egypt and the Soudan, Field Marshal Viscount Allenby.

United States Minister and Consul General, at Cairo, T. Morton Howell.

United States Consuls, at Alexandria, Lester Maynard; at Port Said, Coet du Bols.

Egypt occupies the northeast corner of Africa with the Mediterranean Sea on the north and the Red Sea on the east. Beyond that between the Gulf of Suez and the Canal and the Gulf of Akabablies the Sinai peninsula, 150 miles long, flat and sandy, on the north, like the Egyptian coast line, but with granitic mountains rising to an altitude of 8,680 feet in the southern third. Along the west coast of the Red Sea is the Eastern or Arabian desert, with a great backbone of rugged mountains

(highest altitude 7,150 feet) reaching to Abyssinia. On the south is the Sudan, the parallel of the 22° north latitude forming the boundary. To the west is the vast Libyan desert, which begins a few miles west of Cairo, where stand the Pyramids of Giza, of which the great pyramid is 451 feet high, and the Sphinx. This desert stretches to Tripoli, a vast monotonous limestone plateau with a few depressions where wells and springs furnish water to irrigate small areas. These oases support a population of several thousands. Egypt is about the size of Arizona, New Mexico and Colorado, but its fertile territory is about the size of Massachusetts and Connecticut.

The Valley of the Nile and the delta are the real Egypt of sixty centuries. Here are 12,226 square miles of cultivated area; 1,900 square miles are taken up by canals, roads, date plantations, etc., and 2,850 by the surface of the Nile, its marshes and lakes. The great river runs between sandstone cliffs from Haifa to Egypt with a stretch of granite near Aswan, where the valley narrows to half a mile, and limestone from there through Luxor to Cairo, the valley widening to over 10 miles. The fertile lands occupy the floor of the valley between the river and the cliffs and north of Cairo they spread out in silt-created delta, forming the richest soil of the country. The Nile has a total length of 3,470 miles from the Victoria Nyanza to the Mediterranean. In the 960 miles of its course through Egypt it receives no tributary stream. The river has a regular yearly rise and fall, attaining its maximum the end of May. The average rise at Cairo is 13 feet. The great Aswan at Aswan (at Assuan) completed Dec. 10, 1902, and since then raised in height, stores up the surplus water and regulates its flow, a task shared by smaller barrages at Eena, Assiut, Zifta and at the head of the delta. Irrigating canals distribute the silt-laden water to the fields. Sixty miles south of Cairo to the west of the river is the fertile province of Fayum, with an area of 500 square miles, watered by the canal Bahr Yusef (built by Joseph, the son of Jacob), over 100 miles long, which takes its water from the river at Deirut.

The Nile irrigates 5,400,000 acres and this number may be increased to 7,600,000 by engineering improvements. In 1883, when the first scientific system of using the water of the Nile for irrigation purposes, and that plan, the basin system, is still used for all the land south of Deirut in Upper Egypt.

By this system the land is divided into rectangular areas from 5,000 to 50,000 acres in size and surrounded by banks; water is admitted to these basins during the flood period (August) to an average depth of 3 feet and is left on the land for about forty days; it is then run off and the seed sown broadcast on the uncovered land. A system of perennial irrigation by digging deep canals was introduced in 1820 by Mohammed Ali Pasha, which was restored and greatly improved during the British occupation. Two million acres of cultivable land were added and under the basin system, cereals, beans and lentils are grown; under the new perennial system cotton, cereals, beans, sugar cane, vegetables and fruit are the chief crops. Two and three crops a year are grown. The yield of cotton in 1920-21 was 597,515,391 pounds, the exports for the year 1920 being 396,345,306 pounds, valued at 75,096,026 Egyptian pounds (\$260,345,306 at par of exchange, the Egyptian pound equals \$4.94). The amount of acres under cotton in 1921 was 1,341,096.

The agricultural population (Fellaheen) forms about 62 per cent. of the whole, a large proportion of them (1,709,983 in 1920) being small land owners holding up to 5 acres each. The total number of land owners in 1920 was 1,866,781, of which only 7,016 were foreigners. In 1920 the amount of sugar exported was 13,795 tons.

Petroleum has been found in both the Arabian desert west of the Red Sea, and on the Mt. Sinai peninsula. To what extent, however, no announcement has been made. Drilling is going on. The reports for 1919 showed a production of 224,300 metric tons; 49,000 metric tons of manganese iron ore was produced that year, also 29,000 tons of phosphate rock.

The chief imports are textiles and yarns, machinery and hardware, tobacco (none is allowed to be raised in Egypt), chemicals and perfumes, coal, oil, cereals and animal food products and leather.

Egypt, on March 31, 1921, had 2,311 miles of railroads owned and operated by the state, and 721 miles of light agricultural railroads owned by private companies, mostly in the delta. Cairo was connected by railroad with the Palestine system by the opening of the swing bridge over the Suez Canal. The first train left Jerusalem for Cairo on June 16, 1918. This bridge was removed in 1921 and is

to be replaced by a tunnel. Passengers on the through train from Cairo to Jerusalem, "The Milk and Honey Express," now break their journey at Kantara to walk across a floating bridge. The Cairo-to-Cairo line is nearly finished. Commercial steamers entering Egyptian ports of Alexandria in 1920 numbered 1,242, with a tonnage of 2,527,436. Commercial steamers passing through the Suez Canal (103 miles long) in 1920 numbered 3,804 of 16,892,244 net tonnage; also 204 Government vessels, of 678,197 net tonnage (of these 144 were British of 521,118 net tonnage). (For Suez Canal statistics see page 722).

Four-fifths of the people are of the ancient Egyptian stock, whose forbears by their labor built the pyramids for alien Kings, and whose physical characteristics were pictured in the mural paintings of the temples and tombs and in the papyrus scrolls of the thousand years ago. The Copts entered Christianity in the first century of the Christian era, and hold the orthodox Patriarch of Alexandria as the successor of St. Mark. They numbered 854,778 in 1917. There are 155,168 Christians of other sects, and 59,581 Jews. The far larger part of that ancient stock embraced Mohammedanism on the conquest in the seventh century, and speak Arabic to-day. With the 32,663 Bedouins and 107,360 Soudanese and Berberins (of whom one-seventh are nomads), and including also some Nubians, the Mohammedans numbered in 1917 11,658,148. They have a famous sect of Moslems bearing the title of the University at El-Azhar, in Cairo, founded in 972. In 1914 it had 405 professors and 9,749 students, and affiliated with it were the Mosque of El-Ahmed; at Tanta with 2,860 students, the Mosque of Damiatta with 411, and the Meshia Khat Olama at Alexandria with 1,854. However, the percentage of illiteracy shown by the census of 1917 was 92 per cent. The Ministry of Education has under its direct management 209 schools of all grades, with 40,471 pupils. The Makshik schools care for about 200,000.

By the census of 1917 the foreign residents numbered 209,998, of whom 30,796 were Turks, 66,736 Greeks, 40,168 Italians, 24,366 British, and 21,270 French and Tunisians.

During the forty-two years of British rule the population has doubled (census of 1882, 6,831,131). The irrigation system has been enormously improved and another great dam is being built far up in the Blue Nile to impound water. In the last seven years land has trebled in value. Motor trucks crowd camels from historic caravan trails. "Egypt," says one writer, "waxed fat off the World War. It is said that England paid out over a billion dollars in Egypt for foodstuffs, camels, mules and supplies for use of her armies in the Middle East." Tourist travel up the Nile to the great monuments of ancient Egyptian civilization, interrupted by the war, is heavier than ever.

The present King of Egypt is the eighth of the line founded by Mohammed Ali, who was appointed Governor (Vah) of Egypt by the Sultan of Turkey in 1805, made himself absolute master of the country, and became hereditary Governor by force of arms in 1811. Under the rule of Khedive Ismail revenues were wasted and debts were heaped up until bankruptcy resulted. Great Britain and France in 1879 assumed dual control, forced Ismail (1863-1879) to abdicate and appointed his son Tewfik (1879-92) to succeed him. Reforms were instituted. In 1882 Arabi Pasha headed a military revolt, which was quelled by a British expedition, the French Government declining to intervene. The dual control was abolished by decree Jan. 18, 1883, and Great Britain carried on alone, the expeditionary force remaining as an army of occupation. Egypt being technically a semi-independent tributary state of the Ottoman Empire.

In January 1884, Major Sir Evelyn Baring (created, 1901, Earl of Cromer), who had served as Comptroller-General, was made British Agent and Consul General, a position which he filled with extraordinary ability until he retired in 1907. He was succeeded by Sir John Peel, and on the latter's death Lord Kitchener filled the post. This period of British occupation lasted until the World War broke out.

The Khedive Abbas II. was absent and declared himself for Turkey. He was deposed and his brother, Hussein Kamil Pasha, made Khedive. With a Turkish army headed for Gaza, on Nov. 18, 1914, Great Britain declared a protectorate over Egypt, which was therefore taken from the suzerainty of Turkey, and Hussein assumed the title of Sultan. In the unrest following the war disturbances were many and serious. Great Britain, following a promise of an increased measure of self-government, sent a commission under Lord Milner there in September 1919 to investigate the reforms needed and the demands of the Nationalists for complete independence. Much negotiation followed, in which the High Commissioner, Lord

Allenby (appointed October, 1919), took a prominent part, and to him is due the credit for effecting the peaceful arrangements announced by Premier Lloyd George in the House of Commons on Feb. 28, 1922, whereby the British protectorate was abolished. The British Government reserved to its discretion four subjects: Safety of the British Empire's communications; defense of Egypt against foreign aggression, direct or indirect; protection of foreign interests in Egypt and of minorities; and guarantees for British interests in the Soudan. The House sustained this policy later by a vote of 202 to 70. A promise was made that martial law would be withdrawn as soon as the Egyptian Government passed an act of indemnity.

On March 27 Marquis Curzon, the British Foreign Secretary, sent despatches to all British Ambassadors saying that the termination of the protectorate involved no change in Egypt's status toward other powers, and the British Government would regard as unfriendly any attempted interference in the affairs of Egypt by another power, and would repel any aggression upon Egyptian territory.

Sarwat Pasha formed a Cabinet on March 1, and Fuad was proclaimed King on March 16. The United States recognized the new Government on April 27, but declined to accept the abolition of the capitulation, and made this refusal a condition of recognition. Dr. J. Morton Howell, the Consul-General, was made Minister to the new court on June 19. Drafting a constitution has been proceeding slowly by a Government Commission headed by Rushdi Pasha, a former Prime Minister. The preliminary draft incorporates the Soudan in Egyptian territory. (See Soudan following). Disturbances continued throughout the summer.

The debt which has been handled by Caisse de la Dette, a body representing the creditors of the Treasury, was as follows on April 1, 1921:

|                                       |            |
|---------------------------------------|------------|
| Guaranteed loan, 3 per cent. . . . .  | £5,872,000 |
| Privileged debt, 3½ per cent. . . . . | 31,127,780 |
| Unified debt, 4 per cent. . . . .     | 55,971,960 |

Total . . . . . £92,971,740

The receipts and expenditures in the fiscal year 1920-21 were: Receipts, £E46,446,921; expenditures, £E62,051,182. The budget for 1921-22 estimates receipts of £E38,682,000, with expenditures to balance.

Imports and exports for 1921, exclusive of re-exports of £E6,527,894, and transit trade of £E7,473,616, were:

|                                   |              |
|-----------------------------------|--------------|
| Imports . . . . .                 | £E55,507,984 |
| Exports . . . . .                 | £E36,356,062 |
| Trade with the United States was: |              |
| Imports 1920-21 . . . . .         | \$29,530,047 |
| 1921-22 . . . . .                 | 9,454,116    |
| Exports 1920-21 . . . . .         | 26,437,350   |
| 1921-22 . . . . .                 | 32,161,501   |

## ESTHONIA, REPUBLIC OF.

AREA, 18,000 square miles.

POPULATION, 1,250,000; 95 per cent. native.

CAPITAL, Reval; population, 120,000.

State Head, Konstantin Pates.

President of the State Assembly, John Kukk.

Consul at New York, Hans Leoke (acting).

United States Minister, Frederick W. B. Coleman, also accredited to Latvia and Lithuania.

United States Consul, at Reval, Charles H. Albrecht.

Estonia, formerly under the Russian Empire, known as the Government of Estland, is situated on the Gulf of Finland, with Russia on the east, Latvia and the Gulf of Riga on the south, and the Baltic Sea on the west. It is about the size of the States of Vermont and New Hampshire.

Of its 11,520,000 acres about 1,300,000 are devoted to agriculture, and 1921 production was: rye, 95,747 tons; barley, 58,400; oats, 76,465; flax, seed, 4,700; fibre, 5,077; potatoes, 570,000; and wheat, 7,370.

Forests cover 1,995,000 acres, and in 1920 there were 164,502 horses, 442,668 cattle, 530,291 sheep and goats, and 260,695 swine.

Estonia declared her independence Feb. 24, 1918, after the Bolshevik coup d'état. The republic, on June 15, 1920, adopted its Constitution by which power is vested in the Legislative Assembly of 100 members, chosen for three years with proportional representation by universal direct equal suffrage. The initiative and referendum to the people is an important feature. The State Head and Ministers are chosen by the Assembly and are responsible to it.

Estonia appears to have settled down to production, with no boundary or other disputes to disturb it. The production of more than 800,000 tons of food, with some auxiliary wealth coming from the beginnings of industry, classes Estonia as self-supporting.

While Estonia was adjusting herself to the new

regime many American Estonians went there to assist as well as to Paris, to contribute money and personal effort to the new republic.

Estonia is a member of the League of Nations. There is no state religion, and 80 per cent. of the people are Lutherans. In 1919, illiterates above 10 years of age numbered 3 per cent.

Trade with the United States in the fiscal year 1921-22 was: imports, \$5,064,091; exports, \$494,355.

## FAR EASTERN REPUBLIC.

(See Under Russia.)

## FINLAND, REPUBLIC OF.

AREA, 125,689 square miles.

POPULATION, 3,241,000.

CAPITAL, Helsingfors; population, 188,922; other chief cities, Turku, 59,914; Tampere, 46,819; Vilpuri, 30,039; and five others with more than 10,000.

President, Dr. Kaarlo Juho Stahlberg.

Minister to the United States, Axel Leonard Astrom.

Consul General in the United States, at New York,

Vice Consuls at Boston, Ashtabula Harbor, O.;

Calumet, Du uth, Seattle, Portland, and San Francisco.

United States Consul, at Helsingfors, Leslie A. Davis.

Finland, formerly an autonomous Grand Duchy of the Russian Empire, is bounded on the north by Norway, a narrow strip of land separating it from the Arctic Ocean, on the east by Russia, on the south by the Gulf of Finland, an arm of the Baltic Sea, and on the west by the Gulf of Bothnia, Sweden, and Norway. Its territory it is as large as New England, New York and New Jersey.

Although extending far north into very cold latitudes, with rugged climate and topography Finland has developed considerable agriculture, with 284,000 farms, of which about 130,000 are of less than 30 acres, producing in 1919, 8,465,000 bushels of rye, 4,578,000 of barley, 19,105,000 of oats, 19,531,000 of potatoes, hay, 2,105,000 tons, and 951 tons of flax and hemp. Butter production was about 330,000,000 pounds, butter being a chief article of export. Cattle, 1,100,486; sheep and goats, 827,791; pigs, 110,993, and horses, 273,271, add to the wealth.

Figures for 1918 show a total of 1,458,000,000 marks factory output, iron and machinery with 254,000,000, and textiles with 260,000,000 leading.

Forests cover more than half the total area, and produced 140,000,000 marks, paper with 200,000,000 marks, coming largely from the forests. Leather was important, with 167,000,000 marks.

There were 4,098 large factories employing 82,471 persons, and 8.5 per cent. of the total area was in agriculture.

The Evangelical Lutheran Church is the state religion, although there is absolutely free worship. All but 2 per cent. of the people are Lutherans.

Two universities have 2,700 students, and about 33,000 are in other schools. There were, in December, 1920, 2,685 miles of railroads, all but 186 being owned by the state. Canal transportation is highly developed.

Finland, after the downfall of the Czar, had representative government restored to her by the Provisional Government. Following the Bolshevik coup d'état the Diet and Senate on Dec. 6, 1917, proclaimed the independence of the republic. Civil war between the "Reds" and "Whites" followed, with German intervention. The "Reds" were defeated and driven back into Russia in two battles at the end of April, 1918, and the German troops went home in December of that year. On July 17, 1919, the Finnish Diet resolved to establish a republic, and a peace treaty acknowledging the independence of Finland was signed with Russia at Dorpat, Oct. 14, 1920.

Finland is governed under the constitutional law of 1906, by a Legislative Chamber of 200 members elected directly on a proportional representative basis. Men and women of 24 years of age have the suffrage. The President is chosen for six years by direct vote and appoints the Cabinet.

A dispute with Sweden over the Aland Islands arose and became acute. By mutual agreement it was referred to the League of Nations, of which both are members, and its adjudication was accepted by both nations, marking the first success of the League in averting war.

The Finnish mark is .193 at par of exchange. Rate of exchange Nov. 1, 1922, was .025.

In 1921, imports were 3,583,000,000 Finnish marks, and exports, 3,385,000,000 Finnish marks, an almost ideal economic balance of trade. Of the 1921 imports about one-third came from Great Britain, and less than 10 per cent. from the United States; Great

Britain sending a third of the imports, and the United States nearly 20 per cent.

Trade with the United States was:

|                  |              |
|------------------|--------------|
| Imports, 1920-21 | \$11,969,030 |
| 1921-22          | 8,550,155    |
| Exports, 1920-21 | 7,853,681    |
| 1921-22          | 5,226,130    |

### FIUME, FREE STATE OF.

AREA, 11 square miles.

POPULATION, 1921, 53,000.

*United States Consul, Wilbur Kehlinger.*

The Free State of Fiume, a former Austrian port on the Adriatic Sea, on the eastern side of the Istrian peninsula, was created by Italy and Jugoslavia by the Treaty of Rapallo, Nov. 12, 1920. Each recognizes its independence in perpetuity. Equal rights to the port are guaranteed to all three. The city is Jugoslavia's outlet to the sea and is connected by rail with the hinterland.

The suburb of Susak to the east, separated by a narrow stream, remains a part of Jugoslavia.

A Government was set up with President Zanella at the head, and an elected Assembly, but in February the city became the scene of much Fascist violence, and on the March 3, the Government was forcibly ousted from the palace after severe fighting by the Fascists, led by Deputy Giunta, who declared that the National Committee of Defense had assumed full power. This committee, while Italian carabinieri were maintaining order, asked the Italian Government to take over the administration.

President Zanella and 49 other members (a two-thirds majority) of the Fiume Constituent Assembly took refuge in Jugoslavia. The Government sent Lieut. Cabruna, who took charge of the city with his troops and organized a provisional government, which was later turned over to Col. Marra. Efforts to arrange the situation diplomatically had no achieved results by Nov. 12, 1922.

### FRANCE, REPUBLIC OF.

AREA, pre-war, 207,054 square miles; present area, including Alsace-Lorraine (5,605), 212,659 square miles. This included the Island of Corsica, 3,367 square miles.

POPULATION, census, March, 1921, 39,209,760, to which should be added 192,973, military, naval forces and seamen abroad. Grand total, 39,402,739.

CAPITAL, Paris, population, census 1921, 2,906,471; cities above 100,000: Marseilles, 586,341; Lyon, 561,592; Bordeaux, 267,409; Lille, 200,952; Nantes, 183,704; Toulouse, 175,434; St. Etienne, 167,867; Strasbourg, 166,767; Nice, 155,839; Le Havre, 163,374; Rouen, 123,712; Roubaix, 113,265; Nancy, 113,226; Toulon, 106,331; there are 33 cities in addition having a population exceeding 50,000.

President, Alexandre Millerand, born Feb. 10, 1859; elected Sept. 23, 1920.

Premier, Raymond Poincare (Foreign Affairs).

Ambassador to the United States, J. J. Jusserand, appointed Feb. 7, 1903 (Dean of the Diplomatic Corps at Washington).

Consuls General in the United States, at New York, Gaston Ernest Liebert; at New Orleans, Charles L. C. M. P. Barret; at San Francisco, Hippolyte Charles Julien Neltner. Consuls, at Chicago, Antonin Barthelemy; at Philadelphia, Maurice E. A. Fallford (V. C.). There are consular agents at twenty-seven other cities.

United States Ambassador, Myron T. Herrick.

United States Consuls General, at Paris, Alexander M. Thackara; at Havre, Augustus E. Ingram. Consuls, at Bordeaux, Theodore Jaeeckel; at Brest, Herbert O. Williams; at Calais, Thomas D. Davis; at Cherbourg, Charles C. Broy; at Dunkirk, John S. Calvert; at La Rochelle, William W. Brunswick; at Lille, Hugh H. Watson; at Limoges, Eugene L. Belsize; at Lyon, vacant; at Marseilles, Wesley Frost; at Nancy, Paul H. Cram; at Nantes, Fred D. Fisher; at Nice, Otis A. Glazebrook; at Rouen, Milton B. Kirk; at St. Etienne, William H. Hunt; at Strasbourg, William J. Pike; at Algiers, Edward A. Dow; at Guadeloupe, W. I. Shelby E. Strother; at Martinique, W. I. Thomas R. Wallace; at Saigon, French Indo-China, Leland L. Smith; at Tahiti, Society Islands, Howard F. Whitely; at Tananarivo, Madagascar, James G. Carter; at Tunis, Tunis, Harris N. Cookingham.

France, a republic in Western Europe, is slightly smaller in area than a group of five Middle West States—Illinois, Indiana, Ohio, Kentucky and Ten-

nessee. Belgium and Luxemburg are its neighbors on the north. On the east Germany lies beyond the Rhine, the boundary; the Jura Mountains and Lake Geneva separate it from Switzerland and the Grail Alps and the Maritime Alps from Italy. On the south is the Mediterranean Sea, and Spain with the crest of the Pyrenees for the boundary line. On the west lies the Bay of Biscay and the North Atlantic Ocean and on the north again the English Channel and the Straits of Dover separate it from England. From north to south its length is about 600 miles, and from the western extremity near Brest to Strasbourg on the Rhine it is about 560 miles wide. The coastline on the north is 700 miles long; along the Atlantic and the Bay of Biscay, 865; on the Mediterranean 384 miles.

In the French Alps it has the highest mountain in Europe, Mont Blanc (alt. 15,781 ft.). On the French side of the Pyrenees are several peaks of over 10,000 feet in height. Forming the western border of the Rhone valley rise the Cevennes, highest point being Mont Lozere (alt. 5,534 ft.). The Massif Central continues the same mountain range of Auvergne where the Plomb du Cantal attains a height of 6,096 feet to the Cote d'Or containing Puy de Sancy (alt. 6,188 ft.). Further north are the Vosges, which run parallel with the Rhine; their crest formed the boundary line between France and Alsace. Thence the wooded highlands of the Argonne and the Ardennes bear off to the frontier. The western and northwestern part of France consists of fertile plains save for the hills of Normandy and the picturesque cliffs of Brittany.

On the North Sea and the Channel are the seaports of Dunkirk, Calais and Boulogne, with the great port of Havre at the mouth of the Seine, and Cherbourg between Cape Hague and Cape Barfleur. In the extreme northwestern projection sheltered by Cape St. Mathieu, is the roadstead of Brest, the great naval station. Further down the coast is Lorient, St. Nazaire, at the mouth of the Loire, with Nantes further up the river, Rochefort and La Rochelle. Up the estuary of the Garonne is the important port of Bordeaux, fourth city of the republic; and at the mouth of the Adour, in the extreme southwest corner, is Bayonne with its neighboring seaside resort of Biarritz. On the Mediterranean coast, which on the west is low, with lagoons and sand dunes, there is no great port till the mouths of the Rhone are passed and Marseilles, the second city of the country, is reached. Beyond is the great naval base, Toulon, and from there by Nice and Monaco to the Italian frontier and beyond runs the beautiful Riviera—the cote d'Azur.

### USE OF RIVERS.

France has four important rivers, the Seine, the Loire, the Garonne and the Rhone, the left bank of the Rhine from Basle, Switzerland, to Lauterbourg, and a dozen others, some with new flow from World War battles, but all of great value because of canalization, which binds them together. The waterways total 7,513 miles in length, of which canals cover 3,031. They are the property of the state and are free from tolls. The system was of the greatest utility in the north and northeast; and suffered great damage during the war but is now almost entirely restored. The principal canals are:

|                                                                            | Miles. |
|----------------------------------------------------------------------------|--------|
| Est (uniting Meuse with Moselle and Saone) . . .                           | 270    |
| From Nantes to Brest . . .                                                 | 225    |
| Berry (uniting Monticou with the canalized Cher and the Loire canal) . . . | 163    |
| Midl (Toulouse to Mediterranean via Beziers) . . .                         | 175    |
| Burgundy (uniting the Yonne and Saone) . . .                               | 161    |
| Lateral canal of Loire . . .                                               | 137    |
| From Marne to Rhine (on French territory) . . .                            | 131    |
| Lateral canal of Garonne . . .                                             | 133    |
| Rhone to Rhine (on French territory) . . .                                 | 119    |
| Nivernais (uniting Loire and Yonne) . . .                                  | 111    |
| Canal de la Somme . . .                                                    | 97     |
| Centre (uniting Saone and Loire) . . .                                     | 81     |
| Canal de l'Oureq . . .                                                     | 67     |
| Ardennes (uniting Aisne and Canal de l'Est) . . .                          | 62     |
| From Rhone to Certe . . .                                                  | 77     |
| Canal de la Haute Marne . . .                                              | 60     |
| St. Quentin (uniting Scheldt with Somme and Oise) . . .                    | 58     |

The Seine is navigable for 339 miles, of which 293 miles is first-class navigability, giving Rouen access to the sea. The Aisne is navigable for 37; the Marne 114; the Saone 234; all first-class. The Oise is navigable for 99 (65 first-class); the Rhone 309 (30 first-class); the Loire 452 (35 first-class); the Garonne 289 (96 first-class); and the Dordogne 167 (26 first-class). The river traffic in normal times is 42,000,000 tons a year.

A programme was adopted in 1919 for the extension and improvement of the canal system. There is in process of working out a project for a lateral canal along the Rhine from Strasbourg to

Huningue, near Basle, Switzerland, which will provide for the very heavy river traffic up to Basle and will furnish much hydro-electric power as well. It is proposed to give this canal a breadth of over 86 metres and a depth of between 6 and 7 metres, dimensions not much below those of the Panama Canal, with locks 25 x 170 metres. This would accommodate in 300 days of 12 hours 1,800 strings of barges, each with a capacity of between 2,000 and 2,400 tons yearly, a total of between 3,600,000 and 4,300,000 tons. Night traffic would double this figure.

France has six great railway systems constructed under various concessions which expire at various dates from 1950 to 1960, when they revert to the state. They represent an instalment cost of 25,000,000,000 francs. The deficit in 1920 is estimated as not less than 3,300,000,000 francs. These lines with their mileage in 1919 are:

| Railroads.                     | Mileage. |
|--------------------------------|----------|
| Ouest Etat.....                | 5,587    |
| Nord.....                      | 2,146    |
| Est.....                       | 3,117    |
| Paris to Orleans.....          | 4,781    |
| Paris, Lyon-Mediterranean..... | 6,064    |
| Midi.....                      | 2,516    |
| Total.....                     | 24,211   |

Of the main lines, 1,030 miles were destroyed in the war. All had been rebuilt by May 1, 1921; of local lines, 1,490 miles were destroyed and 1,262 miles had been rebuilt.

In addition, there were in 1919 the Paris belt line, 20 miles; the Grand belt line, 78 miles; secondary lines, 839 miles; and non-concessionary roads, 20 miles, and 1,083 miles in Alsace-Lorraine, making a grand total of 26,250 miles.

There entered French ports in 1921 22,920 vessels of 27,298,555 tons register, of which 7,776 vessels of 8,595,738 tons were French.

#### ALSACE-LORRAINE REDEEMED.

Alsace-Lorraine had been taken from France after the Franco-Prussian War by the Treaty of Frankfurt, May 10, 1871. The reason had been briefly given by Bismarck eight days before, saying: "We could do nothing but take these territories with their powerful fortresses within the framework of Germany, so as to make of them a glacis of Germany against France." The solemn protest which the Deputies of the provinces made then at Bordeaux against separation from France never was stilled. As the "Reichsland" Germany governed the country under a system of dictatorship until 1902, when its weight was lightened. A Constitution was granted in 1911, but it failed to satisfy. By the Treaty of Versailles, June 29, 1919, the provinces were transferred back to France as of Nov. 11, 1918. The day after the armistice the Parliament of Alsace-Lorraine, elected by universal suffrage in 1911, had declared itself a National Assembly and greeted with joy the return to France as a "constant and unalterable desire" and an "inviolable right." The entire unanimity of people and parties was brought out in the general elections of Nov. 16, 1919.

Germany during her occupation of 48 years, had introduced her own administrative methods and laws. France set a High Commission, assisted by a Consultative Council, at work at Strasbourg to administer the provinces. The present General Commissioner is M. Gabriel Alapetite, who succeeded M. Millerand in January, 1920. The law of Oct. 17, 1919, maintains in force the legislative arrangements and local regulations until French laws can effectively replace them. The Concordat therefore remains; also denominational schools.

As before 1871, the departments now are Bas-Rhin (lower Alsace, capital Strasbourg), Haut-Rhin (upper Alsace, capital Colmar), and the Moselle (Lorraine, capital Metz). The territory restored to France and its population by the census of 1921 was Lower Alsace, population 651,586; Bas-Rhin, 1,848 square miles, population 651,586; Upper Alsace (Haut-Rhin), 1,354 square miles, population 468,943; and Lorraine (the Moselle), 2,403 square miles, population 589,120; total, 5,605 square miles; population 1,709,649. By the German census of 1910 the population was 1,874,014; of these the Germans and Austro-Hungarians domiciled there were 301,764. After the war, up to April, 1921, German citizens had left to the number of 76,467. Alsace-Lorraine lost 45,000 men in the war. The pre-war religious figures were: Catholic, 1,428,343; Protestants, 403,274; Jews, 30,483.

Alsace has rich potash fields, discovered in 1904, which gave Germany a monopoly of this product. The output under French hands for 1919 was 512,000 tons, and in 1920 1,222,609. An annual yield of five to six million tons is expected soon. Petroleum output near Woerth is about 50,000 tons a year, and up to 1921 the total yield was 900,000 tons,

with over five million tons estimated to be available. The state acquired these deposits in 1921 and turned them over to a private company for exploitation.

Lorraine is rich in iron and coal. The output of each reached its maximum in 1913, with 21,133,676 tons of iron and 3,795,262 tons of coal. The 1920 production was 8,074,989 tons.

France is now the largest European producer of iron ore.

The exclusive rights of exploitation of the coal mines in the Saar Valley were given to France by the Treaty of Versailles as a compensation for the destruction of the coal mines in the north of France. The Saar Valley lies north of Lorraine and contains about 751 square miles and 657,870 population. For 15 years it is to be governed by a commission of five appointed yearly by the League of Nations. At the end of the period a plebiscite will decide whether it will have a continuance of that rule in a semi-autonomous form, union with France, or union with Germany. Free trade with Germany is assured the district until Jan. 10, 1925. France becomes the sole owner of all the fields and mining concessions and the value of the mines thus ceded were credited to Germany in the reparation account. The average pre-war production of the basin was 12,000,000 tons a year. The output in 1920 was 9,410,433 tons.

Metallurgical industry is highly developed also, there being thirty-one furnaces and steel plants.

#### FOREIGN TRADE.

The foreign trade of France for 1921 as compared with 1920 and 1913, the last year before the war, is as follows:

|           | France.        | Dollars.      | Exchange Rates, France to Dollars. |
|-----------|----------------|---------------|------------------------------------|
| IMPORTS.  |                |               |                                    |
| 1921..... | 23,548,473,000 | 1,744,331,300 | 13.60                              |
| 1920..... | 49,904,897,000 | 3,441,717,000 | 14.50                              |
| 1913..... | 8,421,332,000  | 1,625,317,000 | 5.18                               |
| EXPORTS.  |                |               |                                    |
| 1921..... | 21,553,101,000 | 1,596,526,000 | 13.50                              |
| 1920..... | 26,894,938,000 | 1,854,823,300 | 14.50                              |
| 1913..... | 6,880,217,000  | 1,327,881,900 | 5.18                               |

The movement of gold, silver, bullion, etc., for these years in francs and in dollars at the gold value of the franc (par of exchange, franc=19.3 cents; or 5.18 francs to the dollar) was:

|           | France.     | Dollars.    |
|-----------|-------------|-------------|
| IMPORTS.  |             |             |
| 1921..... | 363,996,000 | 70,251,200  |
| 1920..... | 214,519,000 | 41,402,200  |
| 1913..... | 974,981,000 | 188,171,300 |
| EXPORTS.  |             |             |
| 1921..... | 555,266,000 | 107,166,300 |
| 1920..... | 688,421,000 | 132,865,300 |
| 1913..... | 431,360,000 | 83,252,500  |

Considerable progress has been made in opening up the devastated coal mines, as is shown by the output for 1921, which exceeds that of 1920 by over 3,500,000 tons. Total consumption of coal in 1921 was 6,000,000 tons less, due to the industrial depression. The figures for production, imports and exports and consumption are:

|                 | 1921.<br>Tons. | 1920.<br>Tons. | 1913.<br>Tons. |
|-----------------|----------------|----------------|----------------|
| Production....  | 28,976,495     | 25,274,304     | 40,000,000     |
| Imports.....    | 22,044,591     | 30,125,774     | 22,866,967     |
| Total supply    | 51,021,086     | 55,400,078     | 62,866,967     |
| Less exports... | 2,313,265      | 508,267        | 1,742,580      |
| Consumption..   | 48,707,821     | 54,891,811     | 61,124,387     |

The comparison of imports and exports by weight (metric tons) for the three chief groups for these years follows:

|                          | 1921.<br>Metric tons. | 1920.<br>Metric tons. | 1913.<br>Metric tons. |
|--------------------------|-----------------------|-----------------------|-----------------------|
| IMPORTS.                 |                       |                       |                       |
| Food products..          | 4,066,434             | 6,195,261             | 5,511,932             |
| Industrial materials...  | 32,448,478            | 41,871,777            | 37,160,735            |
| Manufactures..           | 1,458,774             | 2,464,888             | 1,547,719             |
| EXPORTS.                 |                       |                       |                       |
| Food products..          | 1,227,133             | 1,257,615             | 1,456,676             |
| Industrial materials.... | 12,858,481            | 9,709,081             | 18,299,163            |
| Manufactures..           | 1,890,778             | 1,865,215             | 2,283,324             |
| Postal pkgs....          | 25,036                | 23,327                | 35,350                |

On merchandise account the excess of imports over exports in 1921 decreased to 1,995,372,000 francs, compared with 23,009,959,000 francs in 1920

and 1,541,115,000 francs in 1913. If the present inflated prices are taken into account the 1921 trade balance was more favorable than the pre-war figure of 1913. In pre-war days France usually had an excess of imports on merchandise accounts which was offset then by income derived from foreign investments.

The import of cereals in 1921 was 1,660,796 metric tons, compared with 3,569,903 in 1920 and 2,929,720 in 1913. The figures for 1921 are the lowest for 10 years, due to an abundant wheat harvest. The imports of meats were indicative of the return of French herds to pre-war conditions. So also that of the beet sugar crop. The figures were:

|                            | 1921.<br>Tons. | 1920.<br>Tons. | 1913.<br>Tons. |
|----------------------------|----------------|----------------|----------------|
| Imports of Meats.          |                |                |                |
| Fresh and refrigerated.... | 65,266         | 153,246        | 3,189          |
| Salted, etc.....           | 12,087         | 41,107         | 6,729          |
| Preserved, etc.....        | 5,519          | 14,694         | 3,633          |

|                       | 1921.   | 1920.   | 1913.   |
|-----------------------|---------|---------|---------|
| Imports of Sugar..... | 341,787 | 626,337 | 114,957 |

The imports of raw wool, silk, cotton, and copper in 1921 were about one-half the amount of 1913.

Exports of fish, fresh and preserved, reached in 1921 record figures for 10 years at 31,362 tons, as did potatoes and dried vegetables, 282,272 tons. Fresh and preserved vegetables and olive oil increased over 1920, though not reaching pre-war figures. Milk, butter and cheese were down even below the 1920 figures, being 14,935 tons in 1920, as compared with 45,981 tons in 1913. Wine, brandy and liquor exports were:

|                         | 1921.<br>Tons. | 1920.<br>Tons. | 1913.<br>Tons. |
|-------------------------|----------------|----------------|----------------|
| Exports.                |                |                |                |
| Wine.....               | 207,122        | 215,144        | 190,830        |
| Brandy and spirits..... | 26,790         | 56,987         | 54,523         |
| Liqueurs.....           | 4,862          | 7,792          | 6,103          |

In the export of some manufactured articles and of iron, steel and pig iron these figures were made in 1921, all but two reaching record figures:

|                               | 1921.<br>Tons. | 1920.<br>Tons. | 1913.<br>Tons. |
|-------------------------------|----------------|----------------|----------------|
| Exports.                      |                |                |                |
| Iron, steel and pig iron..... | 2,091,609      | 1,246,717      | 1,008,327      |
| Machinery.....                | 103,077        | 90,571         | 82,300         |
| Tools and metal goods.....    | 187,867        | 150,877        | 149,249        |
| Cotton goods.....             | 58,646         | 47,870         | 55,355         |

There were decreases over 1920 in the exports of perfumes, soap, pottery and glass, and silk goods.

The United States remained in 1921, as in 1920, France's principal source of supply, with Great Britain a close second, Germany third, and Belgium fourth. Shipments to America, which in 1920 had been only 20 per cent. of purchases there, rose in 1921 to nearly 60 per cent. Belgium was France's best customer in 1921, as in 1920, followed by Great Britain, Germany and the United States in that order.

The prewar figures and those of the last two years of French imports and exports, by countries, are:

It might be noted that American and British purchases of lingerie and wearing apparel in 1921 greatly exceeded normal figures and that the exports of wines to the United States were 6,568 hectolitres (a hectolitre is 26.4 U. S. gallons) in 1921, 4,168 in 1920 and 37,553 in 1913.

"The figures indicate that Germany is steadily regaining its old position as one of France's best customers and principal source of supply," says U. S. Consul General A. M. Thackeray, of Paris, reporting the above figures to the United States Department of Commerce, "while France is rapidly becoming not only independent of foreign supplies of metals and metal goods but seems likely to secure markets abroad for these goods in place of its principal competitors."

Agriculture is still the chief occupation of the French. The acreage given over to wheat, rye, barley, oats and corn in 1921 (including Alsace-Lorraine) was 28,881,000; to potatoes, 3,806,900; to sugar beets, 254,600; to tobacco, 35,900; and to hemp and flax, 62,800. The production of apples and pears for old in 1921 was 3,639,701 tons of fruit and 21,942,850 hectolitres of cider. The crop of table apples was 144,188 tons; of pears, 52,067 tons; of chestnuts, 165,557 tons; of olives, 72,613 tons; all greatly exceeding the 1920 output. Forests cover 25,000,000 acres, over 18 per cent. of the land, and about 10,000,000 acres are returned as moor and uncultivable. Stock raising suffered greatly during the war but is reviving.

## RECONSTRUCTION.

A few figures will set forth the burden the war laid upon France. Her prewar population, census of 1911, was 39,601,509. During the war the birth rate was less than one-half the normal. The number of births in 1913 was 790,355; in 1916, 315,087; in 1917, 343,310; in 1918, 399,041; in 1919, 403,502; and in 1920, 834,411.

The number of men from 19 to 50 mobilized for the defense of France was 8,400,000; the number of men killed, 1,364,000; the number mutilated, 740,000; the number wounded, 3,000,000.

Alsace-Lorraine, redeemed, brought back to the tri-color, as shown by the census of 1921, 1,709,749. Yet this census of 1921 returned the total population of enlarged France as 39,209,766, a loss of 391,743. Moreover, France, always a most attractive country to foreigners, counted as residents in 1911, 1,152,096 foreigners, and in 1921, 1,550,449, an increase of 398,353. This would indicate a net loss of French citizens amounting to 790,686. Moreover, the loss to France was almost wholly of her workers.

The invading German army for nearly five years occupied ten departments in the most populous part of France where industrial plants were most numerous, mines highly important, and fields intensely cultivated. The invaders sent machinery and movables across the Rhine. Battle trenches, high explosive shells, mines, and all the might of war left these regions devastated. But as the invaders were driven back the refugees, stout-hearted and undaunted, returned to what had been their homes, their fields, their factories, and then and there began the work of reconstruction. American visitors travel through these departments in railroads, once ruined, now rebuilt, without a thought of the work that has been done. Statesmen said, and the Peace Conference decreed, that Germany should make reparation for the devastation her armies wrought, should pay for the reconstruction.

France went steadfastly and courageously at work. The Ministry of the Liberated Regions was established. The district covered ten departments: the Aisne, Ardennes, Marne, Meurthe-et-Moselle, Meuse, Nord, Oise, Pas-de-Calais, Somme and Vosges; comprised roughly by a line south from Dunkirk to Senlis, east to St. Die, thence north to the Belgian frontier. The first task of the Government was to restore the ruined railroads and roads, and of the farmers and workmen to clear out cellars and build shacks of any kind out of any materials, mostly the wastage of war that could be found. The Government pledged its credit and issued bonds for this work up to 45,000,000,000 francs. German prisoners were set at work clearing up the battlefields and 300,000 laborers, mostly Poles and Italians, have been brought in to work at wages averaging 20 francs a day. The work done has been enormous. The amount of money spent is the reason for the insistence of the French, demand that Germany shall pay.

In figures the record is:

|                                                 |                 |

| Total Sept. 1, 1922, tons               | 1,033,793   |
| Prewar cattle                           | 892,328     |
| Supplied up to Oct. 1, 1922             | 509,848     |
| Prewar horses                           | 407,988     |
| Supplied up to Oct. 1, 1922             | 293,190     |
| Prewar sheep                            | 949,774     |
| Supplied up to Oct. 1, 1922             | 380,782     |
| Prewar pigs                             | 356,610     |
| Supplied up to Oct. 1, 1922             | 176,051     |

The Ministry for the Liberated Regions, it might be added, as part of the work had furnished up to January, 1921, the farmers who were putting the land back in order with 15,400 ploughs, 28,733 harrows, 14,935 mowers, 11,680 reapers and binders, 11,353 cream separators and churns, 25,150 carts, 56,638 sets of harness, and 185,865 other machines.

#### GOVERNMENT OF FRANCE.

The constitutional law under which France is governed was adopted in 1875 and was partially modified in 1879, 1884, 1885, and 1889. Legislative power rests in a Senate and a Chamber of Deputies. The 610 Deputies are elected by direct vote by manhood suffrage every four years; a form of proportional representation is in effect. The 314 Senators are elected for nine years, one-third retiring every three years; the election is indirect and made by an electoral body in each district made up of delegates chosen by the municipal councils of each commune, and of the Deputies, councillor-generals and district councillors of the department. The two Houses meet yearly on the second Tuesday in January and must remain in session at least five months out of the twelve.

The complexion of the Senate elected Jan. 11, 1920 was: Radicals, 120; Republicans of the Left, 58; Progressives, 23; Conservatives, 20; Liberal Republicans, 14; Socialist Republicans, 2; Unified Socialists, 2.

The Chamber of Deputies, elected Nov. 16, 1919: Republicans of the Left, 133; Progressives, 130; Socialist Radicals, 83; Action Libérale, 72; Unified Socialists, 68; Radicals, 60; Conservatives, 31; Republican Socialists, 27; Dissident Socialists, 6.

The two Houses, united as a National Assembly, elect a President of the Republic to serve seven years, meeting immediately whenever a vacancy occurs. The President selects a Ministry generally from the two Chambers but may go outside the membership. In practice the President summons a leader who can obtain a majority in the Chambers in support of his policies as President of the Council (Premier) and he makes up his list of Ministers and submits it for approval. The number of portfolios varies, numbering in the Ministry of M. Poincaré (1922) fourteen, viz.: Foreign Affairs, Justice, Interior, War, Marine, Finance, Colonies, Public Instruction and Fine Arts, Public Works, Commerce, Agriculture, Labor, Liberated Regions, and Hygiene, Assistance and Social Welfare. Each Minister is responsible to the Chambers for his acts and the Ministry as a whole is responsible for the general policy of the Government.

The unit of local government is the commune, of which the 90 departments (excluding the three in Algeria) had, in 1921, in all 37,963. Of these 22,024 have less than 500 inhabitants; 11,962 have between 500 and 1,500; 140 only have more than 20,000.

Each commune elects by universal suffrage a municipal council which in turn elects a Mayor, who is both the representative of the commune, the agent of the central government, and the head of the police. Each department has representatives of all the Ministries and is placed under a Prefect nominated by the Government and having wide functions. The elected Conseils d'arrondissement (385 in France) are charged with allotting the direct taxes.

France has not extended the franchise to women, although in May, 1919, the Chamber of Deputies voted a bill recognizing the full political rights of French women.

Diplomatic relations with the Vatican, broken off June 30, 1904, were restored in May, 1921, when M. Jonnart was sent there as Ambassador. No religion is recognized by the state.

France has an act passed in 1905 for the relief of the aged, poor, infirm, and incurable. The age limit, first placed at 70, was five years later reduced to 65. This act was supplemented by the Old Age Pensions act of April 5, 1910, which provides a system by which both employers and workers contribute. On Dec. 31, 1918, 10,475,272 persons were registered under it.

The school system of France is highly developed. Primary instruction is free since 1881 and compulsory since 1882 for all children from 6 to 13. The teachers are, by the law of 1886, lay. The public schools, primary, secondary and superior form the University of France, and are administered by the Ministry of Public Instruction, with the aid of a Superior Council and a force of seven Inspectors-General and Inspectors. There are seventeen circumscriptions called academies, each with a council to deal with instruction. Each department has a council, presided over by the Prefect, for primary school matters with large powers regarding inspection, management and maintenance, and each department must maintain two primary normal schools, one for men and one for women.

The expenditure on the public schools and for technical schools, not including those under the Ministry des Beaux-Arts, was:

|                          |               |
|--------------------------|---------------|
| For public schools, 1921 | 1,261,620,729 |
| For public schools, 1922 | 1,380,472,904 |

#### THE BUDGETS.

The normal budgets were:

|               |                |
|---------------|----------------|
| 1921—Revenues | 29,160,155,234 |
| Expenditures  | 29,120,541,626 |
| 1922—Revenues | 28,362,328,929 |
| Expenditures  | 28,348,952,955 |

To these figures there must be added the extraordinary expenses due to war, military pensions, and reconstruction to be repaid from receipts from Germany on the reparation account which are provisionally covered in part by loans. The amounts are:

|                                 |                |
|---------------------------------|----------------|
| 1921—Extraordinary expenditures | 15,317,184,792 |
| 1922—Extraordinary expenditures | 10,558,534,377 |

The cost to France of her army and navy in the last three budgets was:

|            |               |
|------------|---------------|
| Army, 1920 | 4,236,599,884 |
| " 1921     | 4,462,003,675 |
| " 1922     | 3,426,284,959 |
| Navy, 1920 | 868,224,802   |
| " 1921     | 951,542,607   |
| " 1922     | 797,804,914   |

France officially notified the League of Nations on September 10 that the strength of the French Army, metropolitan and colonial, was 690,000 men, although the new French law provides for 725,000. Of this 690,000 men it is stated that 335,000 are stationed in France proper, 92,000 on the Rhine, 70,000 are used in carrying out treaty stipulations in the Saar, Syria, the Cameroons and Togoland, while the rest are stationed in the French colonies. In the total are 100,000 professional soldiers, 375,000 conscripts, 205,000 colonial natives and 10,000 foreigners. The War Department authorized a statement on September 26 that the Senegalese contingent numbered 48,129 on Jan. 1, 1922, and that not one of these had been on the Rhine since 1920, though 7,903 were quartered at Toulon.

France has not yet ratified the treaties reducing naval armaments, signed at the Washington Peace Conference (which see).

France is a member of the League of Nations.

The debt of France on March 31, 1922 was:

|               |                 |
|---------------|-----------------|
| Debt—Internal | 155,058,325,853 |
| Floating      | 87,050,812,100  |
| Foreign       | 74,876,351,000  |

Total debt..... 316,984,988,953

## FRENCH COLONIAL POSSESSIONS.

|                 | Square Miles. | Population. |
|-----------------|---------------|-------------|
| In Asia.....    | 256,196       | 17,268,728  |
| In Africa.....  | 4,820,548     | 35,773,895  |
| In America..... | 33,200        | 459,082     |
| In Oceania..... | 9,194         | 81,200      |
| Total.....      | 5,119,138     | 53,582,905  |

## ALGERIA.

AREA, 222,180 square miles.

POPULATION, census of March 6, 1921: northern territory, 5,253,137; southern territory, 547,837; total, 5,800,974; of which 821,427 were Europeans, mostly French and Spaniards.

CAPITAL, Algiers, population, 1921, 206,595. Other cities: Oran, population 141,156; Constantine, 78,220; Bona, 45,171; Tlemcen, 43,090; Sid-el-Abbes, 37,752, and six other cities above 25,000. Governor General, Theodore Steeg, appointed July 29, 1921.

United States Consul at Algiers, Edward A. Dow.

Algeria is in the northern part of Africa, extending for 650 miles along the Mediterranean Sea, between Tunis on the east and Morocco on the west. Both neighbors are French protectorates (see following). The northern territory extends inland approximately 350 miles; beyond the four southern territories extend southward indefinitely into the Sahara Desert, merging into French West Africa. The boundaries have not been fixed but the 20° of north latitude may be considered as an approximate divisional line. These four southern territories form a separate colony, are sparsely peopled by nomads, and each is under a military commander. Algeria had for several centuries been under nominal Turkish sovereignty, but in fact was controlled by the Barbary pirates. England and France were making a half-hearted effort to suppress them, when acts of arrogance by the Dey of Algiers brought from France a punitive force in 1830. The adventure developed into a colonizing undertaking, bitterly opposed by Abd-el-Kader and his fighting men until 1847. Three insurrections later were put down and by 1881 the country was sufficiently quiet to permit the French to push on inland. By 1905 this control was extended over the desert. The help given by the native population to France in the World War resulted in a law, passed Feb. 4, 1919, giving French citizenship to native Algerians who had served in the army or navy, was a landowner, farmer, or been a trader, could read or write French, or held a French decoration. The northern territory is divided into three departments, each of which sends a Senator and two Deputies to Paris; only French citizens being allowed to vote.

The country is governed by a Governor General with the aid of a consultative council and a supreme council and three financial delegations (French colonists, French taxpayers other than colonists, and Mohammedan natives), whose special care is the budget and the taxes. The Governor prepares the budget, which in 1922 was: Revenues, 604,157,674 francs; expenditures, 603,815,199 francs.

Algeria has prospered greatly under peace and French rule. The country has four marked divisions. On the coast is an area, the Tell, from 50 to 100 miles wide, of very fertile plains with valleys running out from the hills, mainly owned by Europeans, which is cultivated scientifically. Behind the Tell is the tableland of the Sbat with an elevation of 3,000 feet, arid, or covered with salt lakes and swamp. The two chains of the Atlas Mountains, reaching to altitudes of 7,000 feet, divide the country from the Sahara.

The French have driven artesian wells and brought scientific irrigation and fertilizer to the land of the Tell. Agriculture has made great strides; wheat, barley and oats grow in abundance. The production of wheat in 1921 was 1,099,300 tons from 2,904,811 acres; barley, 1,099,300 tons from 2,513,943 acres; and oats, 170,650 tons from 573,855 acres. Fruits, olives, and tobacco are grown in the interior valley and about 500,000 acres have been planted to vineyards. The output of wines has increased greatly, 157,136,452 gallons in 1920, and nearly all the product is taken to France. Cattle and sheep are a source of great wealth and hides and wool are exported.

The country is rich in minerals, as yet very little exploited. In 1920, 1,114,438 tons of iron ore were exported and 334,704 tons of phosphates. Copper, zinc, lead and antimony are mined. Coal was discovered during the war, and petroleum in Oran.

The French have improved the ports, built 3,330 miles of excellent roads, and there were, in 1921, 2,228 miles of railroads. The three ports have also been improved; Algiers in 1920 handled 6,264,735 tons

of merchandise; Oran, 3,975,762 tons and Bona, 1,106,362 tons. In 1921 11,199 vessels of 9,201,437 tons entered the ports.

## TUNIS.

(French Protectorate.)

AREA, about 50,000 square miles.

POPULATION, census of 1921, 2,093,939, of which 156,115 were Europeans (54,476 French, 84,799 Italians); and 1,937,824 natives (1,889,388 Arabs and Bedouins, 48,436 Jews).

CAPITAL, Tunis, population, 1921, 170,381, of which 22,206 were French and 42,592 Italians. Bey, Sidi Mohammed el Habib, born 1858, succeeded his cousin, Sidi Mohammed Ben Nasr Bey, who died July 10, 1922.

French Resident General, Lucien Saint, appointed Nov. 24, 1920.

United States Consul at Tunis, Harris N. Cook-ingham.

Tunis, one of the former Barbary states under the suzerainty of Turkey, is situated on the northern coast of Africa, with the Mediterranean Sea on the north and east, on the southeast Italian Libya, on the south the Sahara Desert and on the west Algeria.

The French were obliged to send a military force into the country in 1881 to protect Algeria from the raids of the Khroumer tribes, which resulted in a treaty signed May 12, 1881, placing Tunis under the protectorate of France. Most of the tribes have settled down to agriculture and stock raising. Difficulties of administration which followed the old Turkish system have been great but the French have met them admirably and have made the country prosperous.

There are large fertile valleys in the mountainous north, excellent land for fruit culture in the northeast peninsula, high tablelands and pastures in the centre, and famous oases and gardens in the south where dates grow in profusion. The chief industry is agriculture and there are 7,925,000 acres of arable land, 2,740,000 acres of forests, including 12,000,000 olive trees and 2,137,975 date palm trees, 58,835 acres of vineyards and 11,535,000 acres of pasturage. The vineyards produced 11,000,000 gallons of wine in 1920 and the date orchards 87,520,000 pounds of dates.

Iron, zinc, and lead mines are being developed and the output from the very rich phosphate deposits in 1920 reached 1,075,000 tons. The railway mileage was 2,493 on Jan. 1, 1921. There are 2,886 miles of good roads. In 1920 there entered the ports 8,428 vessels of 2,355,319 tons.

The value of the imports in 1919 was 285,761,000 francs and of exports 202,023,000 francs.

The administration is under the French Foreign Office.

## FRENCH WEST AFRICA.

AREA, about 1,800,566 square miles, exclusive of the Sahara Desert, about 1,500,000 square miles.

POPULATION, census of 1921, 12,283,962, of which 6,829 are French and 1,826 other Europeans.

CAPITAL, Dakar, in Senegal; population, 1918, 25,468, of which 2,791 are French.

Governor General, M. Merlin, appointed January, 1918.

French West Africa reaches from the Atlantic Ocean at about 17° west longitude across Africa to the Soudan at about 24° east longitude and from the southern desert boundaries of Morocco, Algeria, Tunis and Italian Libya to the Gulf of Guinea and the indeterminate boundary of French Equatorial Africa. It has been formed by consolidation of existing colonies as follows:

| COLONY.                 | Square miles. | Population. |
|-------------------------|---------------|-------------|
| Senegal.....            | 74,112        | 1,225,523   |
| Ivory Coast.....        | 95,218        | 1,375,996   |
| Dahomey.....            | 121,976       | 1,545,680   |
| French Soudan.....      | 42,460        | 842,243     |
| Upper Volta.....        | 617,000       | 2,474,589   |
| Mauritania.....         | 154,400       | 2,974,142   |
| Territory of Niger..... | 345,400       | 261,746     |
|                         | 349,400       | 1,084,043   |

Total..... 1,800,566 12,283,962

Of Togoland, the only German colony that was self-supporting, France received 20,200 square miles, about two-thirds. It is attached to French Dahomey.

The colonies are each under a Lieutenant Governor. There is a general budget for all, that for 1921 balancing at 64,604,240 francs.

The colonies export fruits, palm nuts and oil, rubber, cotton, cacao, and timber. The chief imports are foodstuffs, textiles, machinery and hardware, and spirits. Imports for 1920 were 654,638,301 francs and exports, 589,051,244 francs.

In 1921 the railroad mileage was 1,860 miles

There entered the ports 3,169 vessels of 6,430,949 tons in 1919.

Dakar is the best port on that coast, having modern equipment.

### FRENCH EQUATORIAL AFRICA.

(French Congo.)

AREA, 982,049 square miles.

POPULATION, estimated, 1915, 6,370,000.

CAPITAL, Brazzaville, on the Congo.

Governor-General, M. Alfassa, appointed 1921.

French Equatorial Africa extends from Spanish Guinea, just south of the Cameroon, to Belgian Congo. Its eastern boundary is the Ubangi and Congo Rivers and the Sudan. On the west is the Cameroon. French acquisition began in 1841 and its territory has since been extended by exploration and occupation, and the limits defined by international convention. That part (107,270 square miles) ceded to Germany as compensation for acknowledgment of the Morocco protectorate in 1911 was restored to France in the Treaty of Versailles and incorporated in this territory. France, on Jan. 15, 1910, renamed the French Congo French Equatorial Africa and subdivided it into three colonies under one administration, subsequently adding Chad as a colony. The four colonies are:

| COLONY.           | Area,<br>square<br>miles. | Popula-<br>tion. |
|-------------------|---------------------------|------------------|
| Gabun.....        | 121,862                   | 1,300,000        |
| Middle Congo..... | 150,292                   | 1,390,000        |
| Ubangi-Shari..... | 208,219                   | 1,590,000        |
| Chad.....         | 501,676                   | 2,090,000        |

There are 30,000 square miles of tropical forest, rich in timber, but the output as yet is only wild rubber, of which 2,122 tons were exported in 1920. Palm oil output for export was 7,352 tons. Copper, lead and zinc are found. The import figures for 1920 were 18,370,512 francs; exports, 31,246,248 francs. A railroad to connect Brazzaville with Pointe Novle on the Atlantic was begun February, 1921.

### CAMEROON.

(French Mandate.)

AREA, 166,489 square miles.

POPULATION, estimated, 1921, 1,750,000.

CAPITAL, Yaounde.

That part of the former German colony Cameroon not returned to France (see French Equatorial Africa) was by the Treaty of Versailles placed under a French mandate and by decree of March 28, 1921, has been constituted an autonomous territory. It has 359 miles of railroad. The products are tobacco, palm oil, coffee, and ivory. The budget for 1921, balanced at 11,715,500 francs with a special railroad budget of 3,115,100 francs.

### FRENCH SOMALILAND.

AREA, 5,790 square miles.

POPULATION, 1921, estimated, 65,000.

CAPITAL, Jibuti; population, 1921, 8,366 (190 French).

French Somaliland lies between Eritrea (Italian) Abyssinia and British Somaliland and is separated by the Straits of Bab-el-Mandeb from Aden (British). Its port, Jibuti, is on the Gulf of Aden. A port was acquired by France in 1862, but active occupation did not begin until 1884. It is administered by a Governor. The colony has few industries; hides, coffee and ivory are exported, and textiles, food products, sugar and coal imported. The figures in 1919 were: imports, 106,301,216 francs; exports, 66,816,294 francs, of which 14,990,097 were Abyssinian goods brought down to Jibuti by the railroad (485 miles long) from Addis Abeba. In 1917 272 steam vessels of 643,290 tons entered Jibuti.

### MADAGASCAR.

AREA, estimated, 228,000 square miles.

POPULATION, census of 1918, 3,545,575, of which 15,157 were French, and 3,101 other Europeans.

CAPITAL, Tananarivo; population, 63,115. Ports: Tamatave, Diego Suarez, Majunga and Tulcar. Governor General, Hubert Garbit, appointed March 14, 1920.

United States Consul at Tananarivo, James C. Carter.

Madagascar, an island off the east coast of Africa, from which it is separated by the Mozambique Channel (240 miles wide at its narrowest part), is about 980 miles long and 360 miles wide at its greatest breadth. It is therefore nearly as large as the State of Texas. To it is attached for government

the prosperous archipelago of the Comoro Islands, with an area in all of about 790 square miles, and with 97,617 inhabitants; also Nossi Be (130 square miles).

Madagascar came under a French protectorate in 1885. In January, 1896, it became a French possession and on Aug. 6, 1896, it, together with its dependencies, was declared a French colony. It is administered by a Governor General with a consultative council. Over 2,500,000 acres are under cultivation, the chief crops being rice, manioc, beans, coffee, sugar, tobacco, vanilla, cocoa, cloves, mulberry trees and rubber. The forests are rich in cabinet and dye woods, resins and gums.

Agriculture and stock raising are the chief industries; mining is being developed and 35,000 tons of graphite were produced in 1917 and 27,141 ounces of gold in 1918.

The total railroad mileage in 1919 was 776 miles. In 1918 the tonnage entering the ports was 630,320. The imports for 1919 were 98,972,737 francs and exports 177,167,190 francs. The budget for 1921 balanced at 66,232,500 francs. The debt amounts to about \$4,200,000.

Trade with the United States was:

|                      |           |
|----------------------|-----------|
| Imports 1920-21..... | \$201,830 |
| 1921-22.....         | 152,018   |
| Exports 1920-21..... | 365,578   |
| 1921-22.....         | 65,025    |

### REUNION.

AREA, 970 square miles.

POPULATION, census of 1921, 173,190, of which 167,789 were of French European origin.

Reunion is in fact an integral part of France, as it is represented in Parliament at Paris by a Senator and two Deputies. It is an island in the Indian Ocean, about 240 miles east of Madagascar, and has belonged to France since 1643. It is administered by a Governor and an Elective Council. The chief products are sugar, rum, coffee, manioc, tapioca, vanilla, and spices. The chief imports, rice and cereals. Imports for 1920 were 58,541,861 francs; exports 88,980,113 francs. There are 80 miles of railroad, state owned. In 1920, 68 vessels of 133,181 tons entered the ports. The budget for 1920 balanced at 12,170,760 francs. The debt was 1,122,500 francs.

### FRENCH INDIA.

AREA, 196 square miles.

POPULATION, census of 1921, 265,200.

CAPITAL, Pondicherry; population 46,849.

The French possessions in India lie along the Coromandel coast, on the Bay of Bengal, in the southeastern part, to the north of the island of Ceylon. The most important is Pondicherry, established by the French East India Company in 1674, and after changing hands eight times finally rested in the control of France in 1814. The colonies are divided in five dependencies: Pondicherry, population, 1921, 170,846; Karikal, 63,027; Chandernager, 25,423; Mahe, 11,199; and Yanson, 4,705. The administration is in the hands of a Governor, and there is a general elective council. The colonies send one Senator and one Deputy to Parliament at Paris. Agriculture is the chief industry and oil seed the chief export. Pondicherry has five cotton mills; 71,213 spindles. There are 48 miles of railroad and in 1920 244 vessels entered the ports. The imports in 1920 were valued at 673,076,798 francs and the exports at 23,805,649 francs.

### FRENCH INDO-CHINA.

AREA, Cochinchina, estimated, 22,000 square miles; Annam, 39,758; Cambodia, 57,900; Tonkin, 40,530; Laos, 96,500; Kwangchow, 190; total 256,878.

POPULATION, Cochinchina, 1921, 3,795,613; Annam, 1920, 5,731,189; Cambodia, 2,000,000; Tonkin, 1918, 6,470,256; Laos, 800,000; Kwangchow, 168,000; total 18,955,052. Of these about 23,700 were Europeans.

CAPITAL, Hanoi (Tonkin), population, 1921, 90,303. Chief port, Saigon (Cochinchina), population, 72,372, of which 4,601 were Europeans.

United States Consul, at Saigon, Lelaad L. Smith.

French Indo-China, situate in the southeastern part of Asia with China on the north, Siam on the west and the Gulf of Tonkin and the South China Sea on the east and south, comprises five states: the colony of Cochinchina, the protectorates of Annam, Cambodia, Tonkin and Laos, and also Kwangchow, leased from China (1893) and Bat-tambang, ceded by Siam (1907).

The whole country is under a Governor General with a Secretary General and a superior council, and each state has a head, that of the colony being a Governor, and those of the protectorates being

called Residents Supérieur. There is a common budget for Indo-China, which in 1921 balanced at 54,878,400 piastres (par of exchange, 49 cents), and in 1920 a debt of 403,000,000 francs. There is a military force of 25,000 men and a small navy for policing the waters.

Cochin-China sends a Deputy to the Chamber of Deputies at Paris. Saigon, population, 1921, 72,372, is its capital and the chief port of Indo-China.

Annam has a King, Khai Dinh, succeeded 1916, who governs the country with the assistance of his Ministers under the guidance of the French Resident Supérieur.

Cambodia also has a King, Sisowath, succeeded in 1904 his brother Norodom, who had recognized the French protectorate in 1864. The land is very fertile but only a part is cultivated. Some cotton is grown. Fishing is the principal native industry. The ruins of a former civilization which had developed a strikingly distinctive art, are very extensive; those of Angkor being especially famous.

Tonkin became a French protectorate in 1884. Its chief town, Hanoi, which was made the capital of Indo-China in 1902 instead of Saigon, is a fine, large, well-built, modern city. Though its wealth is in agriculture, like the other provinces, it has valuable hard coal deposits, exporting in 1920 501,665 tons. From the rich limestone quarries in 1920 115,984 tons of cement were exported. There are also valuable zinc mines.

Laos, a protectorate since 1893, has extensive forest lands, and gold, tin and lead are being worked. The Mekong River is its great highway.

Kwangchow, leased from China in 1899, has a free port.

The provinces have been a customs union since 1887, and in 1885 when France forced China to give entirely her sovereignty over Annam, agreements were made for a reduction in tariff rates for goods entering China from Tonkin. France in 1895 obtained special privileges for railroads in southern China.

The railroad mileage in 1921 was 1,427, two-thirds of which is Government-owned. In 1920 there entered the port of Saigon 4,698 vessels of 2,166,464 tons. The imports in 1919 were 791,073,000 francs, and the exports 1,050,893,000 francs. Indo-China ranks second to Burma as the greatest rice exporting country in the world.

|                                   |             |
|-----------------------------------|-------------|

#### GUADELOUPE.

AREA, entire group of islands, 688 square miles.

POPULATION, census of 1921, 229,822.

CAPITAL, Basse-Terre; population, 1921, 8,318;

Port Pointe-à-Pitre, 27,679.

United States Consul, Shelby S. Strother.

Guadeloupe, consisting of two large islands, Basse-Terre and Grande-Terre, separated by a narrow channel, and five smaller islands, is a group of the Windward Islands in the West Indies, between Antigua and Dominica. They have been in the possession of France since 1634 and are represented in Parliament at Paris by a Senator and two Deputies. The Government consists of a Governor and an elected Council. The soil is very productive. The chief exports are sugar, 1920, 14,265 tons; coffee, 1,069 tons; rum, 16,615,518 litres; cacao, 666 tons, and vanilla, 26,636 tons. The value of the exports in 1920 was 146,389,180 francs, and of imports 117,858,064 francs. The budget for 1921 balanced at 16,954,562 francs. The debt, Jan. 1, 1921, was 472,254 francs.

The trade of Guadeloupe and Martinique with the United States was:

|                       |             |
|-----------------------|-------------|
| Imports, 1920-21..... | \$5,997,446 |
| 1921-22.....          | 2,644,317   |
| Exports, 1920-21..... | 126,274     |
| 1921-22.....          | 86,537      |

#### MARTINIQUE.

AREA, 385 square miles.

POPULATION, census of 1921, 244,439.

CAPITAL, Fort-de-France, population 26,399.

United States Consul, Thomas R. Wallace.

Martinique, one of the Windward Islands, in the West Indies, has been a possession of France since 1635. It is represented in the French Parliament by a Senator and two Deputies. It is administered by a Governor, a general council, and elective municipal councils. It has the famous volcano Mt. Pelee, which in eruption in May 8, 1902, destroyed the city of St. Pierre with all its 40,000 inhabitants.

The island is the birthplace of the Empress Josephine.

Rum, sugar and cacao are the chief productions. The value of the imports in 1920 was 132,186,470 francs, and of exports, 128,953,479 francs. In 1920 there entered the port 643 vessels of 455,561 tons. The budget for 1920 balanced at 16,198,602 francs.

#### ST. PIERRE AND MIQUELON.

AREA, St. Pierre, 10 square miles; Miquelon, 83.

POPULATION, census of 1921, St. Pierre, 3,419;

Miquelon, 499; total 3,918.

CAPITAL, St. Pierre.

St. Pierre and Miquelon are two groups of rocky, barren islands close to the southwestern coast of Newfoundland, inhabited by fishermen. The Government is headed by an Administrator. The exports, cod, fresh and salt, and fish products, in 1920, were valued at 28,047,100 francs, and the imports at 40,846,742 francs. The local budget for 1921 showed expenditures of 1,818,383 francs, toward which France contributed 280,607 francs.

#### FRENCH GUIANA.

AREA, estimated, 32,000 square miles.

POPULATION, census of 1918, 26,325, excluding Indians.

CAPITAL, Cayenne; population, 1919, 13,609.

French Guiana is on the north coast of South America on the Atlantic Ocean, with Dutch Guiana on the west and Brazil on the east and south. The country has lost heavily in population in the last decade, the census of 1911 returning 49,009 inhabitants. It sends one Deputy to the Chamber at Paris. The colony has a Governor and a council general of sixteen elected members. France has had a penal colony there since 1885 and in 1918 it cared for 9,000 convicts. Only 8300 acres are cultivated. Placer gold mining is the most important industry. The product in 1910 was 123,168 ounces, and in 1918 80,477 ounces. The forests are large and rich in cabinet timber. Imports in 1920 were valued at 40,405,823 francs and exports at 42,674,734 francs. The budget for 1918 balanced at 3,490,000 francs.

|                                   |             |
|-----------------------------------|-------------|
| Trade with the United States was: |             |

#### OCEANIA.

AREA, estimated, 1,520 square miles.

POPULATION, about 30,000, of which about 2,500 are French and 2,500 other Europeans.

CAPITAL, Tahiti, population, 3,617, of whom 1,909 are French.

The French possessions, widely scattered in the southern Pacific Ocean, were grouped together in 1903 as one homogeneous colony under one Governor, with headquarters at Papeete, Tahiti, one of the Society Islands. The other groups are the Marquesas, the Tuamotu Group, the Leeward Islands, the Gambier, the Tubuai, and Rapa Islands.

The chief exports are copra, mother of pearl, vanilla, coconuts and oranges. The budget in 1921 balanced at 5,980,000 francs.

Trade of French Oceania with the United States was:

|                       |             |
|-----------------------|-------------|
| Imports, 1920-21..... | \$1,447,405 |
| 1921-22.....          | 999,978     |
| Exports, 1920-21..... | 1,971,936   |
| 1921-22.....          | 1,130,363   |

#### NEW CALEDONIA.

AREA, 7,650 square miles.

POPULATION, census of 1911, 50,608.

CAPITAL, Noumea; population, census of 1921; 10,053.

France acquired New Caledonia in 1854. Its dependencies are: The Isle of Pines, the Wallis Archipelago, the Loyalty Islands, the Huon Islands, Futuna and Alofi. A Governor administers the colony, assisted by an elective council-general. France has maintained a penal colony on Nou Island, but no convicts have been sent there since 1896.

Mining is becoming the chief industry, the output of nickel from the blast furnaces in 1920 was 3,701 metric tons, and the output of nickel ore was 3,424 tons; of chrome ore, 91,634 tons, and of manganese, 2,693 tons. Exports in 1920 were valued at 45,043,000 francs; imports at 47,472,000. In 1920, 124 vessels of 128,631 tons entered the ports. The budget for 1921 balanced at 18,35,125 francs.

The New Hebrides since 1906 have been jointly administered by High Commissioners of Great Britain and France. Their area is about 5,500 square miles and population about 60,000.

## GEORGIA.

(See under Russia.)

## GERMANY, REPUBLIC OF.

AREA, 185,889 square miles, divided into these states: Prussia, 113,852; Bavaria (with Coburg), 29,501; Württemberg, 7,629; Baden, 5,817; Saxony, 5,789; Mecklenburg-Schwerin, 5,068; Thuringia, 4,646; Hesse, 2,966; Oldenburg, 2,482; Brunswick, 1,418; Mecklenburg-Strelitz, 1,181; Anhalt, 888; Lippe, 469; Waldeck, 433; Schaumburg-Lippe, 131; Hamburg, 160; Lubeck, 115; Bremen, 99.

POPULATION, census of Oct. 8, 1919, 59,858,284, divided: Prussia, 36,696,151; Bavaria (with Coburg), 7,140,333; Württemberg, 2,518,773; Baden, 2,208,503; Saxony, 4,663,295; Mecklenburg-Schwerin, 657,330; Thuringia, 1,508,025; Hesse, 1,290,983; Oldenburg, 517,765; Brunswick, 480,599; Mecklenburg-Strelitz, 106,394; Anhalt, 331,258; Lippe, 154,318; Waldeck, 55,999; Schaumburg-Lippe, 46,357; Hamburg, 1,050,359; Lubeck, 120,568; Bremen, 311,266.

CAPITAL, Berlin; population, with suburbs, census of 1919, 3,803,770; other cities of over 100,000 population, Hamburg, 985,779; Cologne, 633,904; Munich, 630,711; Leipzig, 604,380; Dresden, 529,326; Breslau, 528,260; Essen, 439,257; Frankfurt-on-the-Main, 433,002; Düsseldorf, 407,338; Nurnberg, 352,675; Hanover, 310,431; Stuttgart, 309,197; Chemnitz, 303,775; Dortmund, 295,026; Magdeburg, 286,856; Koelnberg, 260,895; Bremen, 257,923; Duisburg, 244,302; Stettin, 232,726; Mannheim, 229,576; Kiel, 205,830; Halle-on-Saale, 182,326; Altona, 168,729; Gelsenkirchen, 168,557; Cassel, 162,391; Elberfeld, 157,218; Barmen, 156,326; Augsburg, 154,555; Aachen, 145,748; Bochum, 142,760; Brunswick, 139,539; Karlsruhe, 135,952; Erfurt, 126,646; Mulheim-on-Ruhr, 127,027; Crefeld, 124,325; Lubeck, 113,071; Hamburg, 110,102; Mainz, 107,930; Plauen, 104,918; Muenster, 100,452; and forty-two cities with population of between 50,000 and 100,000. Among the latter is Coblenz, population 56,676, which has been occupied by American troops since the armistice.

President, Friedrich Ebert, born Feb. 4, 1871, elected Feb. 11, 1919, term extended to five years.

Chancellor, Wilhelm Cuno.

Ambassador to the United States, Dr. Otto Wiedfeldt. Consul General, at New York, Erich Kraake.

United States Ambassador, Hanson B. Houghton. United States Consul General, at Berlin, William Coffin; Consuls, at Bremen, Francis R. Stewart; at Breslau, John E. Kehl; at Coblenz, Elliott Verne Richardson; at Cologne, Emil Sauer; at Dresden, Louis G. Dreyfus Jr.; at Frankfurt-on-the-Main, Frederick J. F. Dumont; at Hamburg, J. Klahr Huddle; at Koelnberg, Albert W. Donegan; at Leipzig, Hernando de Soto; at Munich, vacant; at Stettin, Cornelius Ferris; at Stuttgart, Maxwell K. Moorhead.

It is estimated that the areas and population subtracted from prewar Germany give a total of 27,275 square miles and 6,471,581 population, divided: Alsace-Lorraine, returned to France, 5,604 square miles, and 1,874,014 population; Eupen and Malmédy, ceded to Belgium, 386 square miles, and 60,924 population; part of Eastern and Upper Silesia, ceded to Poland, 17,787 square miles; and 3,853,354 population; Memel, ceded to the Allies, 1,057 square miles, and 140,746 population; Danzig, made a free city, 794 square miles, and 330,252 population; Schleswig northern zone, ceded to Denmark by the plebiscite, 1,537 square miles, and 166,895 population; part of Upper Silesia, ceded to Czechoslovakia, 110 square miles, and 45,896 population.

In addition, the Saar Valley, area 751 square miles, population, 657,870, is to be under the League of Nations and exploited by France for 15 years, then submitted to a plebiscite.

The plebiscite in Upper Silesia, March, 1921, resulted in a majority for retention in the Reich, but, notwithstanding, that territory of 1,255 square miles with a population of 891,669 was annexed to Poland.

The area of the occupied territory is about 9,650 square miles, containing about 7,000,000 inhabitants. Germany (Deutsch Reich), now a federation of republics in Central Europe, is bounded on the north by the North Sea, Denmark and the Baltic Sea, on the east by Poland, Czechoslovakia and Austria, on the south by Czechoslovakia, Austria and Switzerland, and on the west by France, Luxembourg, Belgium, Holland and the North Sea.

In climate it is characteristically mild in summer and rather cold in winter, as in all western Europe. Its soil is not naturally fertile, being largely a glacial plain over which the action of the ice moved much sand; it has always demanded unusual artificial fertilization. The land naturally was heavily wooded, there being in the country about 160,000,000 acres, of which 35,552,930 acres were forested in 1913, latest available figures. Forestry is far advanced, perhaps more perfected as a science than in any other country. The Black Forest of Germany is famed for its timber and as a resort.

Excepting in the Black Forest, Germany is mostly flat, with slopes toward the north and west.

Mining is a large industry, with much iron and coal lifted, mostly in Prussia, mining districts being Westphalia, the Rhine Provinces, Upper Silesia, and Saxony.

In agriculture, the 160,000,000 acres yield 65,148,000 acres arable, grass, meadow and pastures, 21,700,000; vineyards, 296,500; and other, 12,811,500.

Crops in 1921 were: 2,663,460 metric tons of wheat from 3,603,902 acres; rye, 6,608,023 metric tons from 10,741,417 acres; barley, 1,792,904 metric tons from 3,345,897 acres; oats, 4,715,697 metric tons from 7,974,457 acres; potatoes, (1920), 28,248,765 metric tons from 6,149,680 acres; beets (1920), 7,964,024 metric tons from 817,435 acres; hay (1920), 23,659,144 metric tons from 13,721,665 acres.

In 1913 there were in the German Empire 196,084,642 fruit trees—apples, pears, plums, cherries, apricots, peaches and walnuts.

In 1920 the area devoted to vines was 181,663 acres, the wine yield being 53,683,256 gallons, valued at 2,395,274,480 marks.

Domestic animals in 1920 numbered: horses, 3,588,005; cattle, 16,805,950; sheep, 6,149,676; swine, 14,173,375; goats, 4,458,422.

Mining products in 1919 were: Coal, 116,707,234 metric tons; lignite, 93,648,264; iron ore, 5,153,834; zinc ore, 285,596; lead ore, 55,187; copper ore, 616,809; rock salt, 1,487,849; potash, 7,838,152.

Of the coal mined about a third was from Upper Silesia, which has mostly gone to Poland.

Pig iron production in 1913 was 16,763,809 tons. In 1915, 10,164,721; 1916, 11,342,077; 1917, 11,622,168; 1918, 9,208,252; 1919, 5,654,215.

Ingot steel production in 1914 was 13,520,694 tons; 1916, 13,601,451; 1917, 13,778,852; 1918, 11,392,135; 1919, 6,731,699.

Before the war Germany had a virtual monopoly of potash for the world. The return to France of Alsace-Lorraine divided the potash territory.

Industrial development in Germany is not only far advanced but also extremely diversified. The necessity of buying about half of the food consumed compelled large development of industry and mining, with effort to sell products in all foreign markets. Germany's prewar foreign trade assumed large proportions and was growing rapidly.

The common dislocation of all production, agricultural, mineral and industrial, followed the war, although there was some rehabilitation after the armistice, especially before the German mark (par gold at 23.5 American cents) began to fall so rapidly in exchange value. The rate of exchange on November 1 was .000224 cents.

Production of foodstuffs has now approximated closely enough to normal to remove that as an especial problem, excepting that the mark is so low as to render purchases abroad very costly in the German currency. The same is true of the purchases of raw materials for industry, much of which the country must import to carry on industrial production.

The loss of the coal production of the Saar Valley subtracted about 12,000,000 metric tons of annual coal output from Germany, and the division of Upper Silesia took away also about 35,000,000 metric tons, the two making about a fourth of the normal coal production of the country.

The export by the German export manufacturers for about 24 months following the war, in extending contracts and sales into foreign fields, was checked soon, Germans apparently being unable to deliver on the terms laid in the contracts and sales. The rising scales of labor and the low mark value causing higher prices when expressed in marks for raw materials bought abroad seemed to have stopped the surge of German business across the earth.

Two days before the armistice, that is, on Nov. 9, 1918, the abdication of the German Emperor, William II., was announced. He had fled to Holland, where he has since been living under Dutch surveillance at Doorn. The self-constituted Council of People's Commissioners took over the Government and declared the existing Imperial Parliament dissolved and proclaimed a republic. The reigning Princes of the Federal states were either deposed or abdicated. A call was issued for the election of a National Assembly. Elections, at which all

Germans, men and women over 20 years of age, voted, were held in January, 1919. The composition of the National Assembly thus chosen was: Majority Socialists, 165; Centre (Catholic) Party, 90; Democrats, 75; Conservatives, 42; Independent Socialists, 22; German People's Party, 22; scattering, 7; total 423. It met at Weimar, Feb. 6, 1919, and elected Friedrich Ebert President of the republic on February 11.

The National Assembly adopted a Constitution July 31, 1919. Foreign relations, defense, customs, taxation, and railway service are declared Federal matters; each component state must have a republican constitution; universal suffrage, secret ballot, and proportional representation are provided for. Freedom of speech, of the press and of assembly is guaranteed. The Cabinet appointed by the President must have the confidence of the Reichstag. The Reichsrat consists of 66 members (Prussia 26; Bavaria 10, Saxony 7, Wurttemberg 4, Baden 3, and other states 16).

The Reichstag elected Feb. 20, 1921 is of this complexion: Majority Socialists, 108; Independent Socialists, 61; Centre (Catholic) Party, 72; German National People's Party, 71; German People's Party, 65; German Democratic Party, 40; Bavarian People's Party, 20; scattering, 7; total 469.

Germany's total mobilization in the World War, as given out officially on Oct. 1, 1922, numbered 13,250,000 men, of whom 8,000,000 still were engaged at the end of the fighting. At the height of its expansion, at the beginning of the western offensive, March 31, 1918, these figures state, the German army totalled 3,500,000 enlisted personnel and 140,000 officers on the western front, besides 160,000 enlisted men and 3,000 officers in recruiting depots.

These fighters were distributed among 190 infantry divisions and two defensive cavalry divisions. They were equipped with 32,218 light and 27,143 heavy machine guns, 8,845 mine throwers, 5,652 field rifles, 3,158 light howitzers, 3,083 guns for heavy firing at high elevations, 1,747 guns for heavy fire at low elevations, and 1,137 aerial guns.

Horses to the number of 764,563 were "mustered" into the military service of the Fatherland.

It is estimated that Germany's war expenditures were 186,000,000,000 marks, which is about \$46,500,000,000 at gold par for the mark. This includes the cost of technical demobilization.

The Allied estimate is that the total Imperial revenues from 1914 to 1918 were 17,000,000,000 marks, or about \$4,250,000,000, and the total debt incurred in the war of 157,000,000,000 marks, or about \$39,250,000,000 at par of exchange.

Economists have noted also that Germany met the major part of her war needs by issuing evidences of indebtedness and by inflation of credit, taxation devoted to caring for current interest being only about heavy enough to pay that.

Since the armistice, inflation of the circulating medium has been enormous, so much as 3,000,000,000 marks being printed per day in one certain week, and for many weeks 1,000,000,000 a day. The result of these various operations, with credit in outside countries falling constantly, has been that so late as mid-November, 1922, it was estimated that debt and excess circulating medium combined totalled about 750,000,000,000 marks, which at gold par, were such a thing conceivable, would equal \$187,500,000,000.

The pre-war debt was 4,504,000,000 marks, or about \$1,126,000,000 at par of exchange.

In 1920 the German states surrendered to the Berlin Central Government the right to control direct taxes, hitherto held jealously by the several states. Increases of the direct tax rates followed, income taxes rising 50 per cent.

The stabilizing of German finances and fiscal policies and the creation of a meaningful budget system is rendered more or less impossible by the utter instability of the mark and its constant tendency to fall in exchange value. Each year that which was to be a "balanced budget" was drafted early in the year, only to appear absurd in mid-year, and not to be recognized when the autumn came.

Late in 1922, it was cabled from Berlin that the prospects for considerable trade and activity by Germans in Russia had been destroyed by the instability and lack of organization in that country, the Krupp and Hugo Stinnes having withdrawn from Russia. After Nov. 1, 1922, the tentative proposal emerged from France that both German marks and Russian rubles be abolished, that Germany be declared bankrupt, and that there be then a building up again from the bottom, with gold as the basis of whatever circulation was to be permitted after the reorganization plan had been formed.

Germany has freedom of religious worship, and there is no state church. Protestants in 1910 numbered 39,991,421, mostly Lutherans; Catholics,

23,821,453; other Christians, 233,946; Jews, 615,021; others, unclassified, 214,152.

Instruction is widespread and compulsory. The 1911 census indicated more than 10,000,000 in the lower schools, about 23,000 in the technical schools, and about 80,000 students in universities, some of which are celebrated and ancient. The University of Berlin, although only slightly over 100 years old, led with 11,807.

Imports in 1920 were 99,077,000,000 marks in value, and exports 69,420,100,000 marks.

Vessels entering German ports in 1919 numbered 39,420, of 7,718,780 tonnage.

The railway mileage of Germany totalled in 1920 35,919, of which 34,689 miles are government-owned.

Trade with the United States was:

|                        |               |

## GREECE, KINGDOM OF.

AREA, 41,933 square square miles of old Greece; 6,919 square miles of the newer territory; total, 48,852—the new territory being Macedonia, Epirus, and the Aegean Islands.

POPULATION, census of 1920, 4,777,380; divided, old Greece, 2,800,164; newer territories, 1,977,216 —Macedonia, 1,144,310; Epirus, 213,276; Crete and six other Aegean islands, 619,630.

CAPITAL, Athens; population, 1920, 300,701; other cities, Salonica, 170,195; Piræus, 133,482; Patras, 52,133; and 27 of more than 4,500 population.

King, George II., born July 19, 1890; married on Feb. 27, 1921, to Elizabeth, eldest daughter of King Ferdinand and Queen Marie of Roumania; succeeded his father, King Constantine, who abdicated for the second time, 1922. Constantine, who succeeded his father George I., assassinated March 19, 1913, had abdicated in favor of his second son, Alexander, on June 11, 1917, but had been recalled to the throne by a plebiscite following the death of King Alexander, Oct. 25, 1920.

Premier, M. Krokidas (Interior).  
Minister to the United States, Lambros A. Coromilas.  
Consuls in the United States, at New York, George Dracopoulos; at Boston, Leonidas Matels; at Chicago, Panayiotis Armyriotis; at New Orleans, Leonidas Crysanthopoulos; at St. Louis, Hector M. Pasmazoglou; at San Francisco, C. Panagopoulos.

United States Minister, vacant.

United States Consul General, at Athens, Will L. Lowrie. Consuls, at Patras, George K. Stiles; at Salonica, Leland B. Morris.

By the Treaty of Sevres, 1920, Greece obtained western and eastern Thrace, which stretched along the north shore of the Straits of the Dardanelles and the Sea of Marmora as far as the Bosphorus, Turkey being expelled from all except Constantinople and a triangular district about 30 by 40 miles. The Straits were placed under Allied control, the European shore to be under Allied sovereignty, but a neutral zone being established nine miles inland. Thrace, however, has reverted to Turkey by agreement between Great Britain, France, Italy, Turkey and Greece, following the defeat in September, 1922, of the Greek Army in Anatolia by the Turkish Nationalist Army under Mustapha Kemal Pasha. (See Turkey.)

Part of the west coast of Asia Minor, of which Smyrna was the chief city and port, also given by the treaty to Greece for administration, though under Turkish sovereignty, was lost in this campaign and reverted to Turkey. Greece also received the whole coastline of the Aegean Sea and the land back to the crest of the mountains from Bulgaria. Greece's new gain in territory from the war was part of Macedonia, Epirus and six Aegean islands. Crete (Candia) had been annexed in 1913.

In 1912 and 1913 Greece warred with Turkey, and with Bulgaria in 1913, and added to the Grecian area 16,919 square miles of territory, Macedonia, Epirus, the Aegean Islands, and Thrace, which the Treaty of Sevres, as heretofore shown, confirmed to Greece as her permanent territory.

Greece occupies the southern peninsula of the Balkans, stretching down into the Mediterranean Sea, with the Ionian Sea in the west and the Aegean Sea in the east. On the northwest lies Albania, on the north, Yugoslavia and Bulgaria, and on the northeast corner Turkey, the exact boundary being as yet undetermined. It is about the size of the State of New York. The Indus Mountains, with many spurs, a continuation of the Balkans, runs through the country from north to south. Gulfs and bays are many; the Gulf of Corinth, connected by an 18-mile canal with the Gulf of Aegina, prac-

tically cuts off Sparta from Africa and the northern part of the country.

The authentic history of Greece begins in 776 B. C. and it obtained its greatest glory and power in the fifth century B. C. It became a province of the Roman Empire in 46 B. C., of the Byzantine Empire 395 A. D., and conquered by the Turks in 1456. Greece won its war of independence in 1821-29 and became a kingdom under the guarantee of Great Britain, France and Russia.

Greece proper is chiefly agricultural, with little manufacturing. Only one-fifth of the total area is arable, 12,350,000 of the total of 16,074,000 acres are covered by mountains and lakes and rivers. The forests have been seriously destroyed, but efforts are making to reforest. About 1,300,000 short tons of crops were taken in 1919 from 2,500,000 acres, of which wheat was the chief crop, at 290,000 tons from 373,400 acres. Currants are largely cultivated; 149,000 tons were produced in 1919 and 95,000 tons in 1920. Also barley, oats, corn, tobacco, cotton and wine are produced. Olives abound on about 117,000 acres, and nuts, figs, rice and fruits are produced. Dairy products are of value. Mineral wealth, naturally great, is being rapidly developed, the 1920 output being 155,000 tons. The minerals are lead, magnesite, nickel, zinc, salt, iron pyrites, manganese, iron, emery and chromite, and lignite coal.

The 1917 industrial census showed 2,313 factories, employing 36,124 persons, the output being valued at 290,363,000 drachmas. Cotton mills employed 10,875 persons working 103,000 spindles.

Railway mileage is about 1,470, mostly state owned. There are about 50,000 miles of highways. The merchant marine in 1921 had 1,192 sailing vessels of 113,726 tonnage, and 408 steamers of 402,221 tonnage. In 1920, there were 2,930 steam vessels entered Grecian ports, of a total tonnage of 3,640,017 tonnage, and 2,600 sailing vessels of 83,083 tonnage.

The Greek Orthodox Church claims the great majority of the people, that being the state religion.

Instruction between ages of 6 and 12 is compulsory, but the law is not well enforced in rural regions.

The unit of the currency is the drachma, its gold par being 19.5 cents. Exchange Nov. 1, 1922, was 2.03.

Imports in 1920 were 2,181,083,321 drachmas; exports, 664,112,047.

The budget of 1921 showed receipts of 1,298,759,754 drachmas, with expenditures the same. No budget was submitted for 1921-22.

The public debt, March, 1921, was 4,200,000,000 drachmas.

Trade with the United States was:

## GUATEMALA, REPUBLIC OF.

AREA, 47,600 square miles.

POPULATION, estimated, 2,000,000.

CAPITAL, Guatemala, pop. estd. in 1910, 90,000. It was completely destroyed by earthquakes Jan. 3 and 4, 1917, and rebuilding has been very slow. No estimate is available of its present population.

President, Gen. Jose Maria Orellana, 1922-26.

Premier, Sr. Aldrian Racinos (Foreign).

Minister to the United States, Sr. Don Francisco Sanchez Latour.

Consuls General in the U. S., at New York, vacant; at Jersey City, Virgilio Rodriguez Botelin; at Chicago, Julio J. Brower; at Boston, A. C. Garcia; at New Orleans, vacant. Consuls, at San Francisco, Gregorio Cordoba; at Mobile, Guillermo Valenzuela; at Providence, Eduardo G. Kelton. United States Minister, Roy T. Davis (also accredited to Costa Rica).

United States Consul, at Guatemala, Arthur O. Frost.

Guatemala, the northern state of Central America, has Mexico for its neighbor on the north and west, British Honduras on the east, Honduras and Salvador on the east and south and the Pacific on the southwest. A range of mountains containing many volcanic peaks runs from northwest to southeast near the Pacific. The narrow west slope is well watered, fertile and the most densely settled part of the republic.

The broad eastern slope is sparsely settled and its chief commercial importance is the production of bananas and timber and chicle (gum) in the Peten district. Coffee and sugar are the chief crops. Stock raising is an important industry. Though rich in mineral resources little is mined owing to lack of transport. Textiles, machinery, etc., and food-stuffs are the chief imports.

Guatemala has about 612 miles of railroads, privately owned but subsidized by the Government. Good roads are few. In 1919 there entered her ports 601 ships of 896,835 tonnage.

Guatemala has a Constitution proclaimed in December, 1879, modified on four occasions, that now provides for universal suffrage, a President elected for six years, a National Assembly, elected for four years and a Council of State of 12 members, partly elected by the Assembly and partly appointed by the President. The Roman Catholic is the prevailing religion. There is complete freedom of worship. Education is free and nominally compulsory. About 60 per cent. of the population is pure Indian and most of the remainder are half castes. Many are held on plantations under a system of peonage. The army numbers 6,200, with a reserve of 128,000.

Manuel Estrada Cabrera ruled the country as a dictator for 22 years. He was turned out in April, 1920, by a revolution which put Carlos Herrera in the President's chair. The latter was overthrown by a coup d'etat Dec. 6, 1921, and Gen. Orellana made Provisional President, being inaugurated for a six-year term, March, 1922.

Guatemala is a member of the League of Nations.

Guatemala is on a silver basis; the peso is 25 grammes in weight, .900 fine. Its value varies, therefore, according to the price of silver. No silver is in circulation. Nominally, silver peso = 50.7 cents.

## HAITI, REPUBLIC OF.

AREA, 10,204 square miles.

POPULATION, estimated, 2,000,000.

CAPITAL, Port-au-Prince, pop. (estd.), 120,000. President, Louis Borno, 1922-26.

Premier, Leon Delcay (Foreign and Worship).

Minister to the United States, Albert Blanchet.

Consul General, at New York, Andre Faubert;

Consuls, at Boston, B. Preston Clark; at New Orleans, Emile Marcelin; at Mobile, T. G. McGonigal.

United States Minister, Arthur Bailly-Blanchard.

United States Consul, at Port-au-Prince, vacant; at Cape Haitien, Damon C. Woods.

Haiti occupies the western portion of the Island of San Domingo, the second largest of the Greater Antilles, lying between Cuba on the west and Porto Rico on the east. The boundary which separates it from the Dominican Republic to the east is 193 miles long. The island is the most fertile of the West Indies. The mountains are covered with rich forest and can be cultivated to the top. Prospecting indicates great mineral wealth, wholly undeveloped. Stock raising is neglected. Coffee is the most important crop and the production of logwood, sugar, cotton and cotton is increasing.

The majority of the population are Negroes, the rest mostly mulattoes descended from the former French settlers. There are about 5,000 foreigners, of which 10 per cent. are white. The Roman Catholic religion prevails. Education is nominally compulsory, but the system is poor and very lax. French is the language of the country.

Haiti, discovered by Columbus in 1492, and a French colony from 1677, attained its independence in 1803 following the revolution headed by Toussaint l'Ouverture in 1791. Its history has been a series of political disturbances and bloodshed. From 1910 to 1915 there were seven Presidents; the last, Gen. Sam, assumed office March 4, 1916, took refuge in the French Legation, July 26, 1915, while 240 political prisoners were massacred in Haiti, and at the funeral of the victims he himself was dragged out and killed. Two hours later a United States cruiser arrived at Port-au-Prince and landed marines. United States forces occupied the country and restored order.

Sudre Dartiguenave was elected President on Aug. 12, 1915, by the National Assembly which in November ratified a treaty with the United States (which ratified Feb. 24, 1916), establishing a political and fiscal protectorate by the United States over Haiti for a period of 20 years. The treaty provides that the President of Haiti appoints on nomination by the President of the United States a general receiver of customs to take charge of the custom houses; a financial adviser; American officers (drawn

from the U. S. M. C.) to organize a Haitian constabulary to replace the armed forces, and engineers to supervise public works and sanitation. Haiti agreed not to increase the public debt without consent of the United States. The United States undertook to intervene when necessary for the preservation of Haitian independence and the maintenance of a stable and effective government. The armed constabulary now numbers 2,644 men and order has been maintained. The reserve numbers 20,000. Several hundred miles of roads have been built and a railroad from Port-au-Prince to Cape Haitien, 169 miles distant, is under construction. In 1919 there entered the ports 1,469 ships with tonnage of 91,489.

The Constitution of 1918 provides for a Senate of 15 members for 6 years, and a Chamber of Deputies of about 40 members for 2 years, all elected by popular vote, and a President elected for 4 years by the National Assembly in joint session. The division of authority between the Constitutional Government, the treaty officials and the military occupation has been the cause of much friction, and a delegation visited the United States in 1921 to urge a rearrangement. In September, 1922, Haiti floated a \$16,000,000 6 per cent. 30-year loan in New York, being part of the \$40,000,000 loan provided for in the protocol between Haiti and the United States, concluded Oct. 3, 1919. It is secured by the customs and internal revenues. The average annual income of Haiti for the past six years has been \$4,776,448, and the revenues for the first eight months of the fiscal year, 1921-22, amounted to \$3,922,558.

Following the floating of a Haitian loan of \$16,000,000 30-year 6 per cent. bonds in New York, for the refunding of the two outstanding French loans, John A. McIlhenny resigned as financial adviser to the Haitian Government and was succeeded by John S. Hord.

Haiti is a member of the League of Nations.

## HEJAZ, KINGDOM OF THE.

(See under Arabia.)

## HOLLAND.

(See Netherlands, the).

## HONDURAS, REPUBLIC OF

AREA, 44,275 square miles.

POPULATION, Jan. 1, 1921, 637,114.

CAPITAL, Tegucigalpa, pop., 1921, 38,950.

President, Sr. Don S. Rafael Lopez Gutierrez, 1920-1924.

Premier, Sr. Don Guillen Velez (Interior and Justice). Minister to the United States, vacant.

Consuls General, at New York, Armando Lopez Ulloa; at New Orleans, Eusebio Toledo Lopez; at St. Louis, Rafael Martinez (in charge); at San Francisco, Marial Lagos. Consuls, at Mobile, Benj. Urbizo Vega; at Los Angeles, Manuel F. Rodriguez.

United States Minister, Franklin E. Morales.

United States Consuls, at Tegucigalpa, George K. Donald; at Celba, Alexander K. Sloan.

Honduras is an agricultural and cattle raising state of Central America, bounded on the north by the Caribbean Sea, on the east and south by Nicaragua, on the south and west by Salvador and on the west by Guatemala. The latter boundary is now being determined by a scientific party administered by the American Geographical Society. The coast line on the Caribbean is 400 miles long, the chief ports being Truxillo, Tela, Puerto Cortez, Omon, Roatal and La Celba. On the Pacific side it has a coast line of 40 miles on the Gulf of Fonseca with a port, Amapala, on Tiger Island, three hours by motor boat from San Lorenzo on the mainland, connected with the capital, 32 miles, by a good automobile road. The country is mountainous, very fertile, though mostly uncultivated, and covered with rich forests.

Mineral resources are abundant but undeveloped. The chief export is bananas, grown on the Caribbean coast 11,524,149 bunches being exported in 1920; exports of coconuts that year being 12,647,508. Cattle and hides are also exported. Trans-

port is very backward but is being improved. The country has 463 miles of railroads, laid mostly to provide for the fruit trade. The inhabitants are chiefly Indians with an admixture of Spanish blood.

The country is governed under a Constitution, adopted Sept. 2, 1904, which provides for the direct election by the people of a President for a six year term and a Chamber of Deputies of 42 members, chosen for four years. The President appoints a Cabinet of five Ministers. Education is free and compulsory. The Roman Catholic is the prevailing religion. There is a university at the capital. Military service is compulsory, with 2,900 in the regular army and 43,577 in the first line of the reserve. Of the export and import trade 95 per cent. is with the United States.

The five Central American republics proclaimed their independence as a confederation, July 1, 1823. This confederation soon broke down but renewed efforts were made again and again to re-establish it. The last attempt was made on Sept. 15, 1921 when Honduras, Guatemala and Salvador signed the Constitution of the Federation of Central America. This was to come into effect on Feb. 1, 1922, but collapsed after the Herrera administration in Guatemala was overthrown.

In 1907 representatives of the five Central American states, Mexico and the United States, met in Washington and agreed to adjust any differences that might arise in a Central American Court of Justice, which tribunal was later set up at Cartago, Costa Rica, composed of five Judges, one from each state. On Aug. 20, 1922, on board the U. S. S. Tacoma, in neutral waters of the Gulf of Fonseca, the Presidents of Honduras, Nicaragua and Salvador signed a treaty renewing the treaty of 1907 and extending its scope especially to make impossible the fomenting of revolutions from the territories of neighboring states. The Presidents of Guatemala and Costa Rica were invited to adhere to this agreement and a commercial and economic conference was called. Guatemala declined.

Honduras is a member of the League of Nations. Honduras is on a silver basis. The peso nominally is equal to 50.7 cents, but fluctuates with the value of silver.

## HUNGARY.

AREA, 35,654 square miles. (Some boundaries to be determined).

POPULATION, census of 1921, 7,840,832.

CAPITAL, Budapest, census of 1921, population, 1,184,616; other cities, Szegal, 100,896; Debreczen, 103,228; Kecskemet, 72,768; and eight others from 40,000 to 60,000.

Regent, Admiral Nicholas von Horthy, born 1867; elected March 1, 1920.

Premier, Count Stephen Bethlen (April 14, 1921). Minister to the United States, Count Laszlo Sechenyi. Consul General, at New York, Charles Winter. United States Minister, Theodore Brentano. United States Consul, at Budapest, Edwin Carl Kemp.

Hungary for a thousand years has been the abode of the Magyars. Formerly a kingdom forming an integral part of the Austro-Hungarian Empire, becoming an independent republic after the war, it was much reduced in size by the Treaty of the Trianon, June 4, 1920, losing Transylvania to Roumania, Croatia and Slavonia to Jugoslavia. Pre-war, it had 25,000,000 population on 125,608 square miles of territory, or about the size of the States of Ohio, Kentucky and Tennessee; now it is slightly smaller than Indiana, with 7,840,832 population on 35,654 sq. miles. Hungary is now a flat plain with insufficient fuel, no waterpower and a scarcity of raw materials. The Jugoslavia and Roumania boundaries are to be determined by a mixed commission. The subtraction of territory took away from the country 21,841,143 domestic animals, 7,821,362 for Roumania, 3,239,164 for Czechoslovakia, 2,439,066 for Jugoslavia and 325,687 for German Austria, leaving Hungary 6,432,744.

Agriculture is the chief activity, with great variety. The soil is fertile; in 1920, from 3,700,000 acres Hungary produced 19,600,000 quintals of wheat, barley, rye, and oats. From the 533,000 acres of vineyards excellent wine is produced.

Forests cover 1,357,438 of the total of 22,784,000 acres of the country. Coal production in 1920 was 4,458,694, plus brown coal and lignite. There were 4,372 miles of railroads in 1921, of which 1,858 were state owned. Hungary now has no seaport. She has 687 miles of navigable rivers.

On the breakup of the Dual Empire, Oct. 31, 1918, a revolution began the movement for a republic. King Charles abdicated Nov. 13. Three days later the republic was proclaimed with Count Michael Karolyi as Provisional President. Disorder followed; a Bolshevik government with Bela Kun dominant was set up March 22, 1919, but was swept away with assistance of the Roumanian army. A national government was re-established on Aug. 7, 1919. Elections, with universal suffrage, were held in January and February, 1920, a bloc of parties of the Right succeeding to control of a Provisional National Assembly which elected a Regent officially styled "Protector of the Magyar Republic." On March 23, 1920, a Government order declared Hungary a monarchy. However, two attempts of the late King-Emperor Charles to regain the throne in 1921 failed dismally.

Freedom of religion is a fundamental tenet of the new state, with equality between the many divergent sects. Four state universities have 4,750 students. The national army under the treaty is limited to 35,000 men and officers, all volunteers; other forces numbering 31,500 being police, gendarmerie and customs guards. Hungary has no air force.

Hungary became a member of the League of Nations in September, 1922.

The crown is the unit of currency, gold par of exchange being 20.26 cents (exchange Oct. 15, 1922, being .0416 cents). Imports in 1916, last reliable figures, 3,280,000,000 crowns; exports, 2,650,000,000. Budget 1922—

|              |                        |
|--------------|------------------------|
| Receipts     | crowns 20,294,193,738  |
| Expenditures | crowns, 26,762,508,209 |
| Deficit      | crowns, 6,468,314,471  |

The public debt is 54,453,041,000 crowns, of which 8,287,835,000 is pre-war, 32,631,056,000 incurred in the war, and 13,534,150,000 since the armistice.

|                                   |             |

### ICELAND, KINGDOM OF.

AREA, 39,799 square miles.

POPULATION, census of 1920, 94,690.

CAPITAL, Reykjavik; population, 17,976; other towns, Akureyri, 2,700; Vestmannaeyjar, 2,519; Hafnarfjordur, 2,310; Isafjordur, 2,175.

King, Charles X. (See Denmark).

President of the Council, Siggundur Eggers (Justice and Ecclesiastical Affairs).

Iceland is an island in the North Atlantic Ocean with an area nearly equal to that of Kentucky. It is of volcanic origin and has many geysers and hot springs. It is treeless. Agriculture engages 43,411 of the people, who produce hay, potatoes and turnips mostly. Domestic animals number 651,000, including 579,000 sheep (census of 1918) and furnish five-sixths of the exports. The fisheries output in 1918 was valued at 22,600,000 kroner. Imports include all necessities. There are no railroads, but 320 miles of roads. In 1917, 178 vessels with tonnage of 61,432 entered the ports.

Iceland was an independent republic from 903 to 1263, when it joined with Norway. The two came under Danish rule in 1381. When Norway separated from Denmark in 1814, Iceland remained under Denmark. In 1918 Denmark acknowledged Iceland as a sovereign state, united with Denmark only in that the Danish King, Christian X., was also to be King of Iceland. Its permanent neutrality was guaranteed. Provisionally until 1940 Denmark has charge of its foreign affairs, and a joint committee of six reviews bills of importance to both states.

Iceland has evolved strange social customs and traditions; is admitted to have attained approximately to absolute justice of the sterner sort, and in its constitutional monarchy to have developed an excellent democracy.

Left Ericsson, the Norseman, sailed from Iceland in the year 1000 and discovered the American mainland, starting a colony called Vinland, probably at New Bedford, Mass.

Trade of Iceland and the Faroe Islands (Danish), which lie between Iceland and the Shetland Islands (British), with the United States was:

|                  |           |
|------------------|-----------|
| Imports, 1920-21 | \$619,149 |
| 1921-22          | 371,832   |
| Exports, 1920-21 | 107,376   |
| 1921-22          | 165,333   |

### IRAQ, KINGDOM OF THE, MESOPOTAMIA. (British Mandate.)

AREA, 142,250 square miles.

POPULATION, census of 1920, 2,849,282; divided, Sunni Mohammedans, 1,146,685; Shi'ah Mohammedans, 1,494,015; Jews, 37,488; Christians, 78,792; of other religions, 42,302.

CAPITAL, Bagdad, population, 1920, 170,000; port, Basra, population, 85,600; Mosul (on the site of Nineveh), 90,000.

King, Faisal, third son of El Husein ibn Ali, King of the Hejaz, crowned Aug. 23, 1921.

Premier, The Naqib of Bagdad.

High Commissioner of Great Britain, the Mandatory Power, Sir P. Z. Cox.

U. S. Consul, at Bagdad, Thomas R. Owens.

Mesopotamia (In classical days "the country from Mosul and Tikrit on the Tigris to the borders of Syria") is the name now applied to the whole Euphrates country in southwest Asia—the former Turkish Vilayets of Basra, Bagdad and Mosul. The Arab name for this territory is Iraq. It is bounded on the north by Kurdistan; on the east by Persia; on the south by the Persian Gulf and Kuwait and on the west by the Arabian and Syrian deserts. The boundary lines are indeterminate. It is as large as the States of New York, New Jersey, Pennsylvania and Ohio.

The country is a great alluvial plain stretching from the Persian Gulf 400 miles north, rising in rolling hills in Mosul and beyond to the limestone mountains of Kurdistan. The climate is subtropical and the rainfall (all in the winter months) is scanty, Bagdad averaging 6.64 inches in 29 years. The temperature varies widely; 120 in the shade is not uncommon, and severe frosts in the winter. The country is unhealthy, demanding extreme care. Mosquitoes and sand flies are pests, and malaria and "Bagdad boils" are common. Dysentery and fever are prevalent; cholera, the bubonic plague and typhus fever have frequently scourged the country.

The soil is of extraordinary fertility and engineers estimate that the Tigris-Euphrates Rivers could irrigate 7,000,000 acres in winter and 3,000,000 of varied crops in summer. Half of this area, the report of Sir William Willcocks further declares could be immediately reclaimed if the ancient system of canals and drains were restored. Only regulatory work is attempted at present and about 1,500,000 are under water and improvements in methods of cultivation are urged. Wheat, barley, rice and millet are the chief crops with tobacco in the Kurdish hills. Cotton is being grown and large yields are possible. Dates are grown in the tidal stretches of the Shatt el Arab and the hundred miles from Fao to Qurna on both sides of the river is a continuous date grove. Dates are a staple food of the Arabs and in 1919 £1,470,000 worth were exported. Large flocks of sheep are raised in the north and wool and skins form a considerable export. Industries, weaving, silk spinning, leather working, etc., are for the local market only.

The chief port is Basra, 70 miles up the Shatt el Arab from the Persian Gulf. A railroad runs from Kalat just south of Mosul to Bagdad (designed to be part of the Berlin to Bagdad railroad) and the English have connected Bagdad and Basra by rail (opened Jan. 13, 1920).

The great value of the country to Great Britain is its petroleum. In southeastern Mesopotamia, Great Britain has built great refineries to handle the product of the country and of Persia which is now comparatively small but the reserve is great. The mandate under the Treaty of Peace with Turkey, 1920, for Mesopotamia as an independent state, was intrusted to Great Britain by the Allies, British and Indian forces having conquered the country during the World War, occupying Basra on Nov. 22, 1914 and Bagdad March 11, 1917. A British High Commissioner set up a provisional Arab Government with the Naqib of Bagdad at the head. In November, 1920, Emir Faisal, third son of the Grand Sherif of Mecca, now King of the Hejaz, who made a notable reputation as a soldier during the war and as a diplomat at the Paris Peace Conference, presented himself as a candidate for the throne. He was chosen ruler by acclamation as a constitutional democratic sovereign, a choice subsequently ratified by a referendum, and was crowned at Bagdad Aug. 23, 1921. Since then the British garrison has been gradually reduced.

A treaty of alliance between Iraq and Great Britain was signed on Oct. 10, 1922. Under it King Faisal agrees to be guided by the advice of King George on international and financial obligations and interests for the whole period—twenty years—of the treaty. Great Britain agrees to give

such support and assistance to the armed forces of the King of Iraq as may be necessary.

Budget, 1919-20—Receipts.....\$3,437,000  
Expenditures.....\$3,692,000

The trade of the Hejaz, Arabia and the Iraq with the United States in 1921-22 was: Imports, \$291,229; exports, \$734,523.

### ITALY, KINGDOM OF.

AREA, Prewar Italy, 110,632 square miles; territory added by the war, Alto Adige, 618 square miles; Carinzia, 113; Carniola, 782; Gorizia and Gradisca, 1,138; Trieste, 37; Istria, 2,035; Trentino and Ampezzano, 2,627; total, 7,350. Grand total, 117,982. Colonial possessions, Eritrea, 45,435 square miles; Somaliland, 139,430; Libya, estimated (southern boundaries undetermined), 406,000; total, 590,865.

POPULATION, Prewar Italy, census December 1921, 37,270,493; population added by the war, Alto Adige, 24,345; Carinzia, 7,667; Carniola, 88,605; Gorizia and Gradisca, 260,749; Trieste, 229,510; Istria, 404,309; Trentino and Ampezzano, 393,111; Zara, 32,551; total, 1,564,691; grand total, 38,835,184. Colonial possessions, Eritrea, pop. census of 1920, 402,893; Somaliland, estimated, 650,000; Libya, estimated, 1,000,000; total, 2,052,893.

CAPITAL, Rome, pop. 1920, 650,000; other cities, Naples, pop. 723,208; Milan, 663,059; Turin, 451,904; Palermo, 345,891; Genoa, 300,139; Florence, 242,147; Catania, 217,899; Bologna, 189,770; Venice, 168,038; Messina (1921), 126,557; Bari, 109,218; Leghorn, 108,585; Paderia, 105,135; Ferrara, 102,550; Bresire, 89,622; Verona, 86,448.

King, Victor Emmanuel III., born Nov. 11, 1869, succeeded his father, King Humbert I., July 29, 1900; married Helena, daughter of Nicholas, King of Montenegro, Oct. 24, 1896; children, Crown Prince Humbert, Prince of Piedmont, born Sept. 15, 1904; Princess Yolande, born June 1, 1901; Princess Mafald, born Nov. 19, 1902; Princess Giovanna, born Nov. 13, 1907; and Princess Maria, born Dec. 26, 1914.

Premier, Benito Mussolini (Interior and Foreign Affairs).

Ambassador to the United States, Prince Gesleto Caetani.

Consul General in the United States, at New York, Tenistode Bernardi; Consuls, at Boston, Marquis Agostino Terronte di Ruffano; at Philadelphia, Chevalier Luigi Stiltitti; at New Orleans, Count Guglielmo Silenzi; at Washington, Salvatore Floria; at Chicago, Count Giulio Bolognesi; at San Francisco, Vincenzo Fliet; at Denver, vacant. There are consular agents at many other cities.

United States Ambassador, Richard Washburn Child.

United States Consuls General, at Rome, Francis B. Keene; at Genoa, John Ball Osborne. Consuls, at Catania, Carl R. Loop; at Florence, W. Rodrick Dorsey; at Leghorn, Lucien Memminger; at Messina, Benjamin F. Chase; at Milan, Clarence Carlgan; at Naples, Homer M. Byington; at Palermo, Edward L. Nathan; at Trieste, Joseph E. Haven; at Turin, Dana C. Sycks; at Venice, James B. Young.

The Kingdom of Italy occupies the entire Italian peninsula, stretching from the Alps southeast into the Mediterranean, with the islands of Sicily, Sardinia, Elba and about 70 smaller ones. On the east is the Adriatic Sea which it dominates, on the south, the Mediterranean, on the west between the mainland, Sicily and Sardinia is the Tyrrhenian Sea, and further north the Ligurian Sea. The maritime Alps on the west separate it from France, the Swiss Alps in the north from Switzerland, and the Dolomites Alps from Austria, and the Carnac and Julian Alps on the east from Jugo-Slavia. The great plain shut in by these huge mountains, and the Ligurian Apennines, and watered by the Po (220 miles long) and the Adige, shared by the provinces of Piedmont, Lombardy, Emilia and Venetia, stretches across the top from the Maritime Alps to the head of the Adriatic. Its maximum length is 360 miles. The Ligurian Mountains circling the Gulf of Genoa run down the middle of the peninsula as the Apennines, with many summits like Monte Cimone (altitude 7,103 feet) in the northern part, and the Gran Sasso d'Italia (9,560 feet) in Central Italy, nearing the western coastline in Campagna and running down (with altitudes of about 6,000 feet), through the southern province, Calabria, to the 'toe of the boot' at Cap Spartivento. Across the narrow strait of Messina the mountain range continues through the island of Sicily with its

famous volcano Mt. Etna (altitude 10,755 feet). The active volcano Mt. Vesuvius rises to an altitude of about 4,000 feet on the Bay of Naples, and north of the Strait of Messina is the island volcano of Stromboli (3,040 feet).

The length of the peninsula is 760 miles, while its breadth nowhere exceeds 150 miles and does not generally measure more than 100 miles. Italy is about equal in area to New England and New York together, and has more than twice their population.

Two rivers, having the greatest historic importance, rise in the Apennines, and flow west to the sea—the Tiber, which flows through Rome, and the Arno, which waters the Florentine plain. The rivers in the south are unimportant. Between the spurs of the Alps lie seven beautiful Italian lakes, especially noteworthy being Como, Lugano, Maggiore and Garda, the last being the largest and the last two over 30 miles long. All are of great depth.

The Adriatic coastline from Rimini to Otranto is flat with but one indentation, and with no harbors worthy of the name save Brindisi. The salt brought down by the Po, the Adige and the eastern streams, also rising in the Alps, have built out the land from Ravenna to the Gulf of Trieste, with marshes and lagoons so marked a feature of the mouths of the Po and of Venice. The coast on the western side of the Istrian peninsula, and Flume on the eastern side, were Austro-Hungary's seaports on the Adriatic. Trieste has been joined to Italy as a prize of war, and Flume, after a bitter quarrel, occupation by d'Annunzio's troops, and much negotiation, has been created by the Italian-Jugo-Slavian treaty (Nov. 12, 1920) a free city. Italians who have not acquiesced in this settlement (the Fascisti) have tried during 1922 to upset this verdict (see Flume); also chronology of the year for later developments).

The climate of Italy is sunny, although northern Italy has a cold winter; snow is rarely seen in Naples, and olives, oranges, lemons, figs, sugar cane, cotton and pomegranates flourish in Calabria. The soil is fertile and the people industrious and frugal. Italy, though drained before the war by emigration, is one of the most densely populated states in Europe.

The population is unusually homogeneous. In prewar Italy there were about 85,000 of French origin, 10,000 Teutonic in the Val d'Aosta, 81,000 Albanian in Calabria and Sicily, 29,000 Greek, 43,000 Slav, mostly in Clivdale, and 12,000 Spanish (Catalans) in Sardinia. In the 'redeemed' provinces, formerly Austrian, annexed after the war, there are 215,345 Germans in Alto Adige and 13,920 in the Trentino; 326,715 Slovenes in the northeastern districts, and 141,663 Croats in Istria. The religion of the great majority is Roman Catholic, the census reporting 123,253 Protestants; 34,324 Jews; and 847,532 of no religion. Emigration has been very heavy. The United States census of 1920 reported 1,610,109 Italian-born in the United States alone. In the decade before the war about 650,000 immigrants left Italy annually, and about 500,000 returned each year, being a net loss to Italy of 1,500,000 in that period. It was estimated that the emigrants sent home brought home 500,000,000 lire a year. In 1914 there were about 1,500,000 residing in Brazil, 1,000,000 in Argentina, 450,000 in France, 220,000 in Switzerland, 120,000 in Germany, and 150,000 in Northern Africa. The war checked emigration greatly, but it reached 230,000 in 1919 and 365,000 in 1920.

Agriculture is the chief industry. Of a total of 71,692,592 acres 65,995,000 are under crops. The number of peasant proprietors is large, especially in Northern Italy. The census of 1921 returned 3,796,561 as proprietors of lands, buildings or both. The wheat acreage in 1921 was 11,927,000; sugar beet, 125,000. There are 5,735,550 acres given over to olives and 10,590,000 vineyards. The sugar output in 1921 was 170,466 tons. Silk culture flourishes. Dairy farming and cheese making is important in Northern Italy. Italy has suffered greatly from deforestation, but a determined effort has of late been made to reafforest the country. The chestnut crop is of great value. There are about 30,000 vessels and boats and about 110,000 men engaged in fishing.

Italy is not rich in mineral deposits and is especially lacking in coal. Much hydroelectric power is going to waste in the mountains, but the work of harnessing the water is going on. In 1919 Italy imported 6,220,000 tons of coal, of which 1,160,000 were from the United States. The amount dropped in 1920, and about 1,200,000 tons of lignite were mined in her 200 mines. Italy is almost the world's largest producer of sulphur, chiefly in the volcanic regions of Sicily, the amount in 1920 being 296,099 metric tons. Poor in iron, she produced 389,876 metric tons from 529 mines in 1920. The production

of zinc was 95,985 metric tons, and of lead 40,634 metric tons. The possession of the quicksilver mines of Idria in the territory taken from Austria, north of Trieste, makes Italy the foremost producer in the world, the output being about 1,700 metric tons in 1919, and 1,400 in 1920. The quarry industry is important.

Italy's industrial development since 1880 has been great. The chief industries have been steel products, textiles, chemicals, paper, etc. The difficulty of obtaining coal during and after the war, and the fall in exchange, depressed all industry; unemployment was widespread, and strikes and in some cities the seizure of the plants by the working forces disarranged all industry.

Italy in 1920 had 8,761 miles of state railroads operating under a heavy deficit, and 980 miles of privately owned lines; the state had electrified 639 miles by June 30, 1921, and will electricity about 4,000 miles in all. The number of ships entering Italian ports in 1919 were: Italian, 93,397, of 15,164,409 tons; foreign, 4,792 of 8,929,230 tons. The chief ports in order of tonnage entered were Genoa, Naples, Palermo, Leghorn, Venice, Messina and Catania. In her mercantile marine in 1922 were 825 steamers of 3,129,903 tons. In this year the amount of ship subsidies granted was estimated as 300,000,000 lire; the subsidy policy having begun in 1877 when 3,000,000 was given.

Italy, divided, dismembered even for centuries, began to take shape as a unity when, following the war of 1859, Lombardy, by the peace of Zurich, came under the crown of King Victor Emmanuel II. of Sardinia of the house of Savoy. By plebiscite in 1860 Parma, Modena, the Romagna and Tuscany joined, to be followed at once by Sicily and Naples, and by the Marches and Umbria. The first Italian Parliament assembled in February, 1861, and on March 17, 1861, declared Victor Emmanuel King of Italy. Mantua and Venetia were added in 1866, an outcome of the Austro-Prussian war. The Papal States were taken possession of by Italian troops on Sept. 20, 1870, after the withdrawal of the French garrison in the Franco-Prussian war (see Rome, See of), and by plebiscite on Oct. 2 were annexed to the kingdom, thereby rounding out United Italy. Italy suffered heavily in the World War, her northeast provinces having been overrun by the Austrians and Germans after a crushing defeat at Caporetto. Her loss in men was 650,000 killed and missing, and the cost to the kingdom was 48,000,000,000 lire. The increase in territory that followed the war is given in detail above.

The country is governed under an expansion of the Constitution granted to Sardinia in 1848. The executive authority is exercised by the King, acting through a Minister. The legislative power rests with the King and a Parliament of two Houses. The Senate is composed of nine Princes of the Blood and eminent men nominated for life by the King; the number in 1920 was 363. The Lower House consists of 535 Deputies (1 to every 71,000 of the population) elected by districts directly. The electoral law of 1920 provides for universal suffrage of all men and women 21 years old, and the electoral reform of 1919 provided for proportional representation. The complexion of the House elected in May, 1921, was: Constitutionalists, 276; Socialists, 122; Catholics, 107; Communists, 16; Republicans, 7; Germans, 4; and Slave, 4.

The duration of Parliament is 5 years, but the King has power to dissolve the Lower House at any time; a new election must follow within four months. All money bills must originate in the Lower House.

The army on a peace basis numbers 250,000 men, with 2,350,000 in the reserve. Service is compulsory and universal. The navy has two strongly fortified naval bases, Pola and Spezia. Many of its power units have been discarded. (For present condition see Washington Arms Conference.)

Italy is a member of the League of Nations.

The percentage of illiteracy has been high in Italy, especially in Calabria, and the other southern provinces; but in the last decade much progress has been made in correcting it. Lower grade education is compulsory. Italy has ten universities dating from the thirteenth century or the first years of the fourteenth. Famous among these are Bologna (founded 1200), with 3,031 students; Genoa (1243), 2,450 students; Naples (1224), 9,266 students; Padua (1222), 2,082 students; Pavia (1300), 1,512 students; Pisa (1338), 1,729 students; and Rome (1303), 5,173 students. The total number of students at the 21 universities in 1919 was 37,768.

The lira is the unit of currency. At par of exchange, lira = 19.3 cents; exchange rate on Oct. 15, 1922, was 4.23.

Imports, 1921, lire. . . . . 3,842,425,000  
Exports, 1921, lire. . . . . 2,120,000,000

Budget, 1922-23—Receipts, lire . . . . 17,602,957,000  
Expenditures . . . . . 20,454,800,000  
Deficit . . . . . 2,851,852,000

Exports, 1920-21 . . . . . 59,090,514  
1921-22 . . . . . 61,344,780

### Italian Colonial Possessions.

#### ERITREA.

AREA, 45,435 square miles.  
POPULATION, census of 1920, 405,681, of which 2,435 are Italians.

CAPITAL, Asmara; population, 14,711.  
Governor, Marquis G. Ceirina Ferari; appointed 1919.

Italy's colonial venture in Africa began in 1870 when the port of Assab in the extreme southern part of Eritrea was purchased. Lagging interest was revived in 1885 when the colonial project was vigorously pushed. An effort to establish a protectorate over Abyssinia was made in 1889 but was upset by King Menelik who with an army of 80,000 annihilated a force of 12,000 Italians at the Battle of Adowa in 1896. Eritrea was constituted a colony in 1890. Eritrea stretches for 620 miles along the African coast of the Red Sea from Cape Kassab to Cape Dumetich. To the west it is bordered by the Sudan and to the south by Abyssinia. The lowlands along the coast are very hot but the uplands are cool, sometimes cold. Irrigation is necessary to supplement rainfall for the crops and the soil is poor. Agriculture and stock raising are the chief industries. There is a railroad 75 miles long connecting the seaport Massawa (population, 2,275) with the capital, Asmara (altitude 7,785 feet), which is being extended via Koren to Agordat (100 miles) to open up a cotton-growing district. Gold is mined in Hamassen and petr leum is found, but there has been as yet no development.

Efforts to settle large numbers of Italians in the uplands, the only part of the country where Europeans can live permanently, have been abandoned.

The budget for 1921-22 balances at 25,044,000 lire, but this includes a state contribution to the receipts of 6,650,000 lire.

The imports, 1920, were 39,969,000 lire, and exports, 31,126,555 lire.

#### ITALIAN SOMALILAND.

AREA, 139,430 square miles.  
POPULATION, about 650,000.

CAPITAL and port, Mogadishu; population, estimated, 14,000.

Governor, Carlo Riveri.

Italy's African colony, the Italian Somaliland, extends along the Indian Ocean from the Gulf of Aden to the Juba River. The coast line runs in a north-east-southwest direction, is 1,100 miles long with no indentation of importance. Jubaland, the valley of the Juba River, was taken from Kenya (German East Africa) and added to the colony to balance British and French acquisitions of former German possessions. Agriculture and cattle and camel raising are the chief industries. In 1920, 619 steamers of 101,481 tons, entered the ports.

The budget for 1921-22 balances at 12,992,000 lire; this includes a state contribution to the receipts of 5,593,000 lire.

The imports for 1920 were 28,441,389 lire and exports 17,623,109 lire.

#### TRIPOLITANIA AND CYRENAICA.

(Italian Libya.)

AREA, 406,000 square miles.

POPULATION, estimated, 1,000,000 (30 per cent. Arabs, 40 per cent. Negroes, 28 per cent. Jews, 7 per cent. Europeans).

CAPITAL, Tripoli, population, estimated, 73,000, and Benghazi, population, 35,000.

Governor of Tripolitania, Giuseppe Volpi, appointed 1921.

Governor of Cyrenaica, Luigi Pirto, appointed 1922.

Tripolitania and Cyrenaica, or Italian Libya, in North Africa, extend along the Mediterranean Sea from Egypt on the east to Tunis (French) on the west. On the south they extend into the desert, the boundary line being unmarked though settled by treaty with France Sept. 12, 1919.

Tripoli, formerly one of the Barbary States and independent since 1714, was reconquered by Turkey

in 1835. During the Turko-Italian war of 1911-12, Italy proclaimed the annexation of Tripoli, which was recognized in the Treaty of Ouchy, Oct. 18, 1912.

The territory was divided into two independent districts for administrative purposes May 17, 1919. In both provinces natives have equal rights with Italians and there is a certain amount of local autonomy by elected local Parliaments.

The prevailing religion is Mohammedan and Arabic is generally spoken.

The country is rather barren but has date palm orchards, olive groves, lemon, almond and fig trees, and vineyards. Some cereals, chiefly barley, are grown. Pasturage is abundant in Cyrenaica. Sponge fishing is important, the value of the product in 1920-21 was 16,424,250 lire. There is considerable caravan trade to the south. The total railroad mileage is 163.

The budget for 1921-22 balanced at 176,752,200 lire. This includes a state contribution to the receipts of 86,821,100 lire.

The imports for 1920 were 196,176,950 lire and exports 62,897,225 lire.

Trade with the United States was:

|                      |           |
|----------------------|-----------|
| Imports 1921-22..... | \$212,758 |
| " 1921-22.....       | 101,203   |
| Exports 1920-21..... | 332,666   |
| " 1921-22.....       | 11,501    |

### JAPAN, EMPIRE OF.

AREA, Japan proper, 148,756 square miles. Korea (Chosen), 84,738 square miles; Formosa (Taiwan), 13,944 square miles; Pescadores (Hokoto), 47 square miles; Japanese Sakhalin (Karafuto), 13,263 square miles. Total 260,738 square miles.

POPULATION, Japan proper, census of Oct. 1, 1920, 55,961,140; Korea, 17,284,207; Formosa, 3,654,398; Sakhalin, 105,765; total, 77,005,510.

CAPITAL, Tokio, (Greater) population, 1922, 5,164,300; other cities with over 100,000 Osaka, 1,252,972; Kobe, 608,628; Kyoto, 591,305; Nagoya, 429,900; Yokohama, 322,942; Nagasaki, 176,554; Hiroshima, 160,504; Hakodate, 144,740; Kure, 130,354; Kanazawa, 129,320; Sendai, 118,978; Otaru, 108,113; Sapporo, 102,571; Kagoshima, 102,396; Yawata, 100,227; and 59 other cities with more than 30,000 inhabitants.

Emperor, Yoshihito, born Aug. 31, 1879, succeeded his father, Mutsuhito July 30, 1912, married Princess Sadako, May 10, 1900; four sons.

Regent, Crown Prince Hirohito, born April 21, 1901, constituted Regent because of his father's ill health, Nov. 25, 1921; betrothed to Princess Nagako Kuni.

Premier, Admiral Baron Tomosaburo Kato (Marine), born 1859, assumed office June 11, 1922.

Ambassador to the United States, Baron Kijuro Shidehara.

Consuls General, at New York, Kyo Kumazaki; at San Francisco, Shichitaro Yada. Consuls, at Seattle, Hiroshi Saito; at Los Angeles, Ujiro Oyama; at Chicago, Kadzue Kuwashima; at Portland, Ore., vacant.

United States Ambassador, Charles Beecher Warren. United States Consuls General, at Yokohama, George H. Seidmore; at Seoul, Korea, Ransford S. Miller; Consuls, at Kobe, Erie R. Dickover; at Nagasaki, Henry B. Hitchcock; at Nagoya, Harry F. Hawley; at Tarkoku, Formosa, Harvey T. Goodier.

The island empire of Japan lies in the north Pacific Ocean off the coast of China and Siberia from the 22° north latitude, the southern point of Formosa (Taiwan) due east of Hongkong, to the 51° of north latitude, the last of the Kurile Islands, a few miles south of Kamchatka. It includes also the southern half of the island of Sakhalin, and the ancient Kingdom of Korea, annexed May 25, 1910, on the mainland. Japan also holds the Kwangtung peninsula (Port Arthur and Dairen) on a 99-year lease, and has the mandate for the Marshall, Caroline, Ladrone and Pelew Islands, former German possessions in the Pacific.

The southernmost island is subtropical; the northernmost subarctic. Were the empire stretched out in the Atlantic off the coast of the United States at the same latitudes Formosa would lie across Cuba and Southern Florida. Tokio would be due east of Norfolk, Hakodate due east of New York, and Sakhalin would lie athwart Newfoundland with the northernmost island, Paramushir, off Labrador! In area Japan proper is about the size of New York, New Jersey, Pennsylvania and Ohio combined.

Japan proper, the ancient empire, bears a strong likeness to the British Isles, similarly separated from the continent of Europe; its 148,756 square miles compares with Great Britain and Ireland's 121,633 and its 55,961,140 inhabitants with the United Kingdom's 47,307,601. The Japanese coast is even more deeply indented, its coast line measur-

ing 17,150 miles. Few places in Japan are far removed from the mountains or really distant from the sea. The northern islands are a continuation of the Russian Karafuto chain running down through Yezo and the mainland. The continuation of the Kuentun mountain range of China appears in the southern islands, the ranges meeting in the grand Japanese Alps. In the vast transverse fissure crossing the mainland from the Sea of Japan to the Pacific rises the group of volcanoes, mostly extinct or dormant, with the majestic sacred mountain Fuji-san lifting its white cone 60 miles west of Tokio to an altitude of 12,425 feet. The earthquake zone—where the average is said to be four slight ones a day, with very serious ones only every six or seven years—has its greatest centre along the Pacific Coast near the Bay of Tokio.

The Pacific Ocean here on the eastern coast of Japan is very deep. Soundings show 4,655 fathoms in what is known as the Tuscara Deep (named after the United States man-o-war which made the survey). Many of the earthquakes with accompanying tidal waves seem to have their origin here and the configuration suggests a submarine crater.

Separating the islands of Shikoku and Kiusiu from the mainland is the wonderfully beautiful inland sea opening both into the Sea of Japan and the Pacific. It is 255 miles long and 56 wide, with a coast line of 700 miles and a surface expanse of 1,325 square miles.

Heavy snowfalls are frequent on the Japan Sea slopes of the mountains of Yezo, while the Pacific side, by which flows the Japan current, enjoys delightful winter weather. There is an abundant rainfall. The streams are short, swift and often unruly, of little value for transportation, but offering a vast but as yet little developed supply of hydro-electric power. Myriads of waterfalls add their charm to the wonderfully beautiful scenery. The "Splendor of the Sun" at Nikko makes an unbroken plunge of 350 feet. There are a thousand mineral springs.

Three-fourths of the mountain land is uncultivable, and the soil of the rest is only moderately fertile, yet by intensive cultivation, hard work and great frugality more than half the people wrest their living from the land. There is a rich supply of fish of many kinds in the sea and fish is a staple diet, so a hardy, daring, self-reliant race of fishermen has been developed.

About three-fifths of the arable land is owned by small peasant proprietors, with holdings of an acre more or less, each. The rest is mostly worked by tenant farmers. More than half the land is used for growing rice, the staple food of the country. The number of acres planted in 1919 was 7,761,527; about 300,000,000 bushels is produced annually, the crop in 1920 reaching 450,000,000. Large crops are raised of wheat, barley, rice, millet, buckwheat, maize, beans and potatoes, also tobacco and tea. Mulberry trees are widely grown and in 1919 the number of families engaged in silk culture was 1,940,000; 6,294,736 cocoon egg-cards were hatched, providing 35,387,751 bushels of cocoons. There were 3,848 factories engaged in the silk industry, employing 64,188 men and 430,110 women.

Forests cover 36,000,000 acres, about 17,000,000 belonging to the state and to the imperial household. Much cabinet wood is produced; the lacquer tree is largely cultivated in the north and the camphor tree furnishes much of the wealth of Formosa.

In the decade 1908-18 the number of industrial establishments doubled, increasing from 11,390 to 22,391, with horsepower increased from 379,556 to 2,908,098; men operatives increased from 248,751 to 644,115, and women operatives from 400,925 to 763,081. Government factories in the same decade decreased in number from 196 to 161 but doubled in power and increased somewhat in number of operatives, the figures for 1918 being men, 123,087 and women, 36,349.

The cotton mills also prospered greatly during the war, the capital was increased 288 per cent. by June, 1920, over the pre-war figure, with 3,889,000 spindles as compared with 2,409,900 in 1914. At the end of 1918 there were 6,710 factories with 65,316 men and 218,041 women operatives.

Japan has become a heavy producer of coal, 31,271,000 metric tons were mined in 1919, valued at 442,540,941 yen. The value of petroleum produced was 42,622,023 yen. Copper, 67,581,475 yen; of silver, 1,131,055 yen; and of gold, 9,681,494 yen. The difficulty of getting iron during the war compelled Japan to increase its foundries from 20 to 250, and in 1919 these produced 613,000 tons of pig iron and 553,000 tons of steel. About 2,700 factories were engaged in machine making, etc.

Shipbuilding enjoyed an enormous boom during the war. The number of shipyards increased from 6 to 57, with over six times the amount of capital and in 1914-18 the twelve leading yards built 233 steamers of a gross tonnage of 972,807.

Divide yen by 2 for dollars. Trade of Chosen and Taiwan not included in the table.

The chief exports are raw silk, silk waste and silk tissues, cotton yarns and tissues, coal, earthenware and glassware, matches, refined sugar, machinery, copper, tea, toys and camphor. The chief

imports are raw cotton and textiles, machinery and iron products, oilcake, wool and woollen tissues, sugar, rice, beans and peas, petroleum, crude rubber, coal, flax, hemp and dyes.

Trade with the United States was:  
Imports, 1920-21..... \$189,181,585  
1921-22..... 248,716,339  
Exports, 1920-21..... 248,217,835  
1921-22..... 307,514,995

Japan in 1922 had 6,202 miles of state owned railroads and 2,005 privately owned, a total of 8,207. Announcement has been made of plans to make the standard gauge 4.35 feet and to complete the work of rebuilding in 20 years. Comprehensive plans have been made for the electrification of the Government railroads, the first section to be the Takaido line, 408 miles, from Tokio to Kobe. A railway tunnel 7 miles long is under construction between the islands of Kyushu and Honshu under the Moji Shimonoseki Straits.

The Government subsidizes five shipping companies for the foreign trade. The merchant navy in 1920 consisted of 3,031 steamers of 3,011,634 gross tons, 14,415 sailing vessels of 976,286 tons.

There entered the Japanese ports in 1920 11,948 steamers of 25,239,591 tonnage. Of these, 504 of 3,143,126 tons were American; 1,121 of 4,781,888 tons, British; and 9,802 of 16,756,868 tons, Japanese.

There are 60 harbors open to foreign trade, the most important being Yokohama, Kobe and Osaka on the Pacific Coast of the main island, and Nigata on the Japan Sea coast, the port of transshipment for Vladivostok. Nagasaki, on Kyushu Island, Tamsui, in Formosa, and Fusan, in Korea, are the important ports.

The Japanese in continental United States, by the census of 1920, numbered 111,010 (in 1910 there were 72,157). Of these there were 71,552 in California (an increase of 30,000), 17,357 in Washington, 4,151 in Oregon, and 2,688 in New York. In Hawaii they number 109,274 of which about 17,000 in Honolulu are tradesmen and the rest labor on the sugar and pineapple plantations or are farmers. In the Philippines there are 10,000. There are about

16,000 in Canada, 3,000 in Mexico, 7,000 in Peru, 30,000 in Brazil, 3,000 in Argentina, 18,000 in Malaysia, and 12,000 in Australasia. In Manchuria,

according to official reports, there were 181,206 in 1919, and in China proper, 31,987. The foreign visitors to Japan number about 30,000 yearly.

Figures 1922-23 are budget estimates.

The financial years from 1877-78 to 1884-85 consist of 12 months each, from July 1 to June 30; the financial year 1885-86 comprises 9 months, from July 1 to March 31; and those subsequent to 1886-87 inclusive consist of 12 months each.

The Japanese fir 660 B. C. as the date of the accession of their first Emperor Jimmu Tenno, and count the present Emperor the 122d of that dynasty. Ethnologists trace the origin of the Japanese people to Chinese, Korean, Mongol and Malayan sources, a stock mixture that has become thoroughly amalgamated. The hairy Ainu, now surviving in meagre numbers in the island of Yezo, are believed to be the remnants of the aboriginal inhabitants.

For centuries closed to foreign influence or even contact the nation developed a high civilization and a wonderful body of art. Efforts to penetrate the island empire by Dutch traders and by missionaries were equally barren of results. The United States expedition commanded by Commodore Matthew C. Perry, U. S. N., which arrived in Yokohama in 1853, broke through the reserve and the treaty he sought of amity and the opening of the port to trade was signed in March, 1854. This treaty was followed by a much broader one negotiated by Townsend Harris, the United States Minister, in June, 1857. In Japan then the ruling power was that of the Shogunate, which had been in control since the twelfth century. In 1868, however, the de jure Emperor Mutsuhito (ruled 1867-1912 and posthumously styled Meiji) overthrew the Shogun after a short war and by 1872 had entirely suppressed the feudal system. The change and modification of Japan's social, industrial and political institutions that followed has been the most complete and radical in history.

Able men visited foreign countries and adapted ideas and methods they found there to the needs of their country. The first railroad was begun in 1870. Compulsory military service was made obligatory in 1872, and army training and development on European lines followed. In 1875 Japan got the Kurile Islands from Russia, rounding off her empire to the north. In exchange she relinquished her claim to Sakhalin, the southern half she recovered in 1905 as spoils of the Russo-Japanese War. In 1876 she seized the Ukaia Islands, extending southward to Formosa and in the China-Japan War of 1895 that great island, Formosa (13,944 square miles) larger than the State of Maryland, with a population of 3,654,398 and great potential wealth, was with the Pescadores her prize of war, and completed the southern half of her territory. In that year of her first great military success Japan drove the Chinese out of Korea, Southern Manchuria, and the Liaotung peninsula. Diplomatic pressure from Russia, France and Germany forced Japan to give up Port Arthur and withdraw from Korea, while Russia then obtained for herself from China a 25-year lease of the Liaotung peninsula with Port Arthur and Dairen the ice-free seaport opening via the Manchurian railroad, of her Trans-Siberian railroad. Germany also to avenge two murdered missionaries compelled China to give her a 99-year lease of Kiaochow and 254 square miles of hinterland in Shantung.

In 1902 Japan made a defensive alliance with Great Britain which protected her from European interference when she fought Russia from February, 1904, to September, 1905. By the Treaty of Portsmouth Japan obtained the recognition of her paramount rights in Korea (though that country remained independent), also the Russian lease of the

from April 1 to March 31. The figures for the financial years from 1875-76 to 1919-20 represent the settled accounts, those for the financial year 1920-21 the actual account on October 31, 1916.

National debt (Feb. 28, 1922) yen 3,524,336,596.

Liaotung peninsula (later to be extended by China to 99 years), and also the southern half of the island of Sakhalin. Moreover, Russia evacuated Manchuria, the development of which Japan coveted. In 1910 she annexed Korea.

Japan came into the World War under the treaty with Great Britain and drove the Germans out of Kiaochow and took the Marshall and Caroline Islands, former German possessions. She took occasion to press her claims for control in China by presenting, on Jan. 18, 1915, the "twenty-one demands." To this China was then unable to resist. By these Japan was to acquire all German rights in Shantung and no part of that province was to be leased to a third power. She also was to receive valuable railroad concessions there and in Southern Manchuria, commercial ports, special trading privileges and mining rights in Southern Manchuria and Mongolia; China also agreed to employ influential Japanese advisers in political, financial, military and police development. In fact, it was a virtual surrender of China to Japan. In July, 1916, Japan and Russia signed a treaty, practically an alliance, whereby Russia recognized Japan's special interests in China and received recognition of her special interests in Mongolia and Turkestan.

Japan announced on Oct. 10, that the former German leasehold of Kiaochow in Shantung, which was captured during the World War, was to be restored to China on Dec. 2, 1922, in carrying out the terms of the treaty signed at Washington on Feb. 4, 1922. On that date the official announcement of the Japanese members of the Shantung commission said, "the Japanese troops will withdraw, civil and military authority will be handed over and the Chinese flag will be hoisted for the first time since Germany acquired the territory in 1898."

The last troops of the Japanese Expeditionary Army in Siberia left Vladivostok on October 25. The stores of arms and munitions, amounting to 300,000 tons, stored near that port belonging to the Allies and the United States were handed over to the "Red" army before their departure.

Japan has announced her determination to hold the northern half of Sakhalin Island until her demands for reparation for the Nikolaevsk affair, where 600 Japanese were killed in 1920, have been satisfied.

Japan, previously an absolute monarchy, is now governed under a constitution promulgated Feb. 11, 1889. The Emperor, who is declared to be "sacred and inviolable," exercises the whole of the executive powers with the advice and assistance of the Cabinet Ministers, whom he appoints and who are responsible to him. He declares war, makes peace and concludes treaties; he "exercises the legislative powers with the consent of the Imperial Diet," he has supreme command of the army and navy; and he "determines the organization and peace standing of the army and navy." The Emperor has a privy council to consult with on important affairs of state and which interprets the Constitution.

Every law requires the consent of the Imperial Diet, which consists of two Chambers. The House of Peers numbers (1921) 394 members, 16 Princes of the Blood, 13 Princes, 43 Marquises, 20 Counts, 73 Viscounts, 20 Barons, 120 Imperial nominees, and 45 representatives of the largest taxpayers.

The House of Representatives has 464 members, elected for four years by 2,800,000 voters, who must be males over 25 paying a direct national tax of not less than three yen. There has been much agitation for universal suffrage. The Cabinet has an entirely free hand to formulate policies of state quite independent of the political parties and of the House, and is often organized independent of it. When it can't control the House it dissolves the Diet. Every law requires consent of the Diet.

The power of the Diet is growing steadily and it has now become an absolute necessity for the Cabinet to control a majority of the Diet, for without its approval no important matter of state can be carried out. The power and influence of the military men, it is said, are declining.

An extra-constitutional but hitherto most influential body is the Genro or Elder Statesmen, consulted on grave matters of policy by the Emperor. Death has reduced their number to four—Prince Saionji, Marquis Matsukata, Viscount Kiyoura, and Admiral Count Yamamoto, all men who have played a distinguished part in public affairs. In Japan the outgoing Premier does not always recommend his successor, for the Ministry is not responsible to the Diet. In such instances the Emperor depends on the decision of the Genro.

Governors and sheriffs of prefectures are appointed by the Government. The Mayor is that one of three candidates elected by the municipal assembly who obtains the Emperor's approval. The elected Chief Magistrates of towns and villages must obtain the Governor's approval.

There is absolute religious freedom. The chief forms of religion in Japan are Shintoism and Buddhism. Neither has state support. Elementary education is compulsory. In 1919 there were 612 kindergartens with 51,884 pupils, and 25,685 elementary schools with 172,979 teachers and 8,137,347 pupils. Japan had in 1920 five Imperial universities, and 11 other institutions of university rank; the total number of teachers was 1,868 and 32,434 students. The most influential is the Tokio Imperial University established in 1877, which has 417 teachers and 5,283 students.

Japan has twelve sects of Buddhism, 71,750 Buddhist temples, 181,100 Buddhist priests and 51,511,100 believers. The thirteen sects of Shintoism, which originated in the combined spirit of Japanese ancestor worship and Imperial veneration, centre in the shrines which number 171,723, but the Shinto priests number only 14,900. There are twelve forms of Christianity in the empire. There are Greek communicants number 65,615, with 131 churches; the Roman Catholics, 14,200 with 189 churches; the Anglican and American Episcopal Mission, 18,215 with 213 churches; the Methodist Mission, 13,356 with 181 churches, and the Congregational Mission, 15,847, with 151 churches.

Service in the army is universal and compulsory; actual service begins at 20 and lasts two years in the ranks for all arms. The peace strength of the active army is 300,000 men with a reserve of 2,350,000. (For detailed figures of the navy see the special article on the Washington Arms Conference.)

#### KOREA (CHOSEN).

AREA, 85,229 square miles (including islands).

POPULATION, 1920, 17,284,207, including about 337,000 Japanese and about 23,000 foreigners.

CAPITAL, Seoul; population, 1919, 250,942 (Koreans, 182,207; Japanese, 66,943); other cities, Fusan, population, 1919, 63,567; Pingyang, 62,775; Taiku, 40,065; Kalsong, 39,955; Chemulpo, 29,989.

Governor-General, Admiral Baron Saito.

United States Consul General, at Seoul, Ramsford S. Miller.

Korea is an ancient kingdom with a history extending back to the twelfth century B. C. but during recent centuries the "Hermite Kingdom." It occupies a peninsula in northeastern Asia dividing the Yellow Sea from the Sea of Japan. The boundaries on the mainland are the Yalu River and the Tamsen River. The mainland is as large as the State of Minnesota. Its coastline is over 6,000 miles long. Southern Manchuria lies along its northwest frontier for 600 miles and it touches Siberia for a few miles, a scanty 100 miles from Vladivostok, in the extreme northwest. Situated between that Russian port and Port Arthur, then a Russian leasehold and subject to diplomatic control and penetration by Russia, Korea became to Japan "a dagger pointed at her heart"—the chief immediate cause of the Russo-Japanese War of 1904-1905. After this war the "complete independence" of Korea that had been recognized in the treaty following the Chino-Japanese War of 1894-95 (which also was for the control of Korea), gave way to a recognition by Russia of Japan's paramount interest

in Korea. Japan continued her military occupation of the country, and in 1910 annexed Korea outright.

The administration of the country has been in the hands of a military governor of high rank directly responsible only to the throne. The first was Gen. Terauchi, who on becoming Premier of Japan relinquished the office to Gen. Count Hasegawa.

Recent reforms, following nationalist disturbances make the Governor General responsible to the Premier of Japan, open the office to civilians, and promise steadily increasing measures of local autonomy and reduction of military rule.

The former Emperor of Korea is now known as H. I. H. Prince Yi Wang; he receives the treatment of a Prince of the Blood in Japan and enjoys an annual grant of 1,500,000 yen, the same as before annexation.

Korea had no system of education when brought under Japanese control, only about 10 per cent. of the children of school age, and these all of the upper classes, attended school where they learned something of the Chinese classics. At the end of 1918, 462 public common schools had been established, attended by 76,898 boys and 10,481 girls. In addition there were 809 private schools of which 328 were connected with foreign missions. There were also 380 purely Japanese elementary schools with 42,811 pupils. Secondary and technical schools in that year numbered 109.

Confucianism and Buddhism are the chief religions and Christianity has gained a great vogue among all classes. The mission force numbers about 2,600 with about 300,000 Korean converts.

The country is mountainous, especially in the north where the forests are of great value, and there is much mineral wealth awaiting development. There are extensive fertile plains well watered by good rivers in the south and west where are five excellent harbors of Fusan, Mokpo, Chemulpo and Chinnampo. The larger rivers in the west can at full tide float boats far up the streams. At Ninsan is a tide of 33 feet.

The climate is dry and bracing. The mulberry tree thrives, 60,000 acres being planted with them. Silk worm culture has been much encouraged by the Japanese and the quality of the cocoons improved. Some 400,000 families are engaged in the industry. The cultivation of tobacco is also fostered. Stock raising is everywhere an important industry. Afforestation and irrigation are being systematically carried on by the Government.

Mining concessions covering 270,000 acres, mostly gold-bearing, which had been in the hands of about fifteen foreign corporations (four American) and individuals (four Americans) before annexation are reserved, but a new law (April 1, 1916) prohibits foreigners from acquiring mining rights. Gold, silver, zinc, copper, lead, iron, tungsten, graphite, anthracite coal and kaolin are present. In 1919 the value of gold produced was 25,314,500 yen. The output of Pyongyang coal, anthracite (Government owned), in 1919 was 128,274 tons.

The trade of Korea is almost entirely in the hands of the Japanese, who also have provided 85 per cent. of the capital for the 1,500 factories already established.

The mileage of the Government owned railroads in 1921 was 1,603. The chief line is the trans-peninsula line (585 miles), from Fusan, where the Fusan-Shimonoseki ferry service connects with the Imperial Japanese railroads, to Antung, at the mouth of the Yalu River across the Manchurian boundary where it connects with the Antung-Mukden line of the South Manchurian Railway, thus forming part of the two international through traffic lines—Japan to China, and Japan to Europe via the Trans-Siberian Railway. The total investments in the Government railroads amount to over 130,000,000 yen, and the profits in 1920 and 1921 were 3,874,000 and 6,627,000 yen, respectively. There are 230 miles of privately owned railroads.

The unit of currency is the yen—49.8 at par of exchange.

Korea was a drain on the Japanese Imperial Government until 1919 when the administration became for the first time financially independent. The budget for 1921-22 is balanced at 156,942,000 yen.

#### KWANGTUNG,

(Leased for 99 years from China.)

AREA, 1,300 square miles.

POPULATION, census of 1919, 600,644 (534,849 Chinese and 65,692 Japanese).

CAPITAL, Dairen (formerly called Dalny); population, 1919, 108,228.

Civil Governor, I. Yamagata.

United States Consul, at Dairen, (vacant).

Kwangtung is the southern part of the Liaotung peninsula, the southernmost portion of Manchuria, which has the Bay of Korea on the east, the Yellow Sea to the south and the Liaotung Gulf on the west. Japan had taken it as spoils of war from China by the Treaty of Shiminoseki but was forced to turn it back by diplomatic pressure from Russia, Germany and France. Russia then leased it for 25 years from China, and constructed the strongly fortified city of Port Arthur and the nearby commercial port of Dainy (now Dairen).

Japan took Port Arthur by siege ending with a brilliant assault in 1905 and at the conclusion of the Russo-Japanese War took over the lease in the Treaty of Portsmouth, 1905. In May, 1915, the lease was extended to 99 years by China. Kwangtung by Imperial Ordinance of April 12, 1919, was given a civil government superseding the former military government.

Dairen is a free port, the chief seaport of Manchuria and the southern terminus of the South Manchurian railroad which connects with the Peking and Korean lines at Mukden and with the Trans-Siberian at Changchun. It is a well-built, well-governed modern city with varied industries.

The number of vessels that entered the port in 1920 was 2,142 with a tonnage of 4,864,904; of this tonnage 3,408,369 was Japanese; 489,073 Chinese; 421,028 British; 381,729 American; 34,146 Russian; French, 18,277, and Norwegian, 11,618. Beans (567,129 tons), bean cake (1,131,208 tons), and cereals (707,237 tons) furnished the bulk of the exports. The value of the foreign trade was:

## JUGO-SLAVIA.

(See Serbs, Croats, and Slovenes, Kingdom of.)

## LATVIA, REPUBLIC OF.

AREA, 25,000 square miles.

POPULATION, 1921, 1,813,000.

CAPITAL, Riga; population, 1920, 185,137; other cities, Libau, population, 51,583; and six with more than 10,000.

President, Jan Chakste.

Premier, Zigfrid Meierovics.

Minister to United States, vacant; C. Louis Seya, Charge d'Affaires.

Consul, at New York, Arthur B. Lule.

United States Minister, Frederick W. B. Coleman; also accredited to Estonia and Lithuania.

United States Consul, at Riga, Daniel B. MacGowan.

Latvia, formerly a Russian province, became a republic Nov. 17, 1917, final elections being held on April 17, 1920, and the Legislative Assembly meeting first on May 1, 1920. It is bounded on the north by the Gulf of Riga and Estonia, on the east by Russia, on the south by Lithuania and Poland, and on the west by the Baltic Sea. It is one of the three Baltic states of North Central Europe. It is about the size of the State of West Virginia and has a little larger population.

About half the people engage in agriculture, dairying, livestock and other food producing industries. Flax is the important product. Pre-war flax acreage was 275,000, and annual crops were 30,000 tons of fibre and 25,000 tons of seed, exported mostly to Germany, Holland, Belgium and England. War devastation reduced the flax acreage to 70,000, and another cause was the flight of 500,000 farmers as refugees. Wheat, rye and potatoes are also produced.

The last census figures showed in 1913 there were 297,645 horses, 940,319 head, 1,100,481 sheep, and 538,920 swine—2,877,355 head in all, or one and two-thirds head per capita.

Forests cover 3,775,000 acres of the total in the country of 16,000,000, so that exportation of timber will be important, while scientific preservation of the forests will be observed.

Industry is beginning to count in the national wealth, the paper, match, wood distilleries and woodwork output having already attained large proportions for so small a country.

Other industries—metals, chemicals, textiles, and scattering—produce annually about \$113,500,000 worth.

Latvia's importance is enhanced by the fact that it is the natural route for through international trade between Russia and western nations. Pre-war, 20.6 per cent. of all Russian imports and 28 per cent. of all exports passed through Latvian territory. Excellent harbors at Riga, Liepaja and Ventspils made this possible, and three Russian main railway lines converge at Riga. Windau and Libau, all ports of Latvia. In 1920, there entered the ports 1,679 vessels of 479,801 tons. The coast line is 340 miles long. The railway mileage is 1,829 miles.

Latvia is Protestant by 76.54 per cent., Roman Catholic by 18.49 per cent., and there are Baptists, Moravians and other faiths.

In 1910 only 3.2 per cent. of the people were illiterate, and the native Letts form 80.41 per cent. of the total population.

Latvia is a member of the League of Nations.

Trade with the United States in the fiscal year 1921-22 was: Imports, \$6,660,589; Exports, \$275,432.

## LIBERIA, REPUBLIC OF.

AREA, estimated, 40,000 square miles.

POPULATION, estimated, 2,000,000.

CAPITAL, Monrovia, population, estimated, 1920, 4,000.

President, Charles D. B. King, 1920-24.

Consuls in the U. S., at New York, Edward G.

Merrill; at Philadelphia, Thomas Hunt; at St. Louis, Hutchins Inge; at Mobile, George W. Lovejoy; at Galveston, J. R. Gibson; at San Francisco, Oscar Hudson.

United States Minister and Consul General, Solomon Porter Hood.

Receiver of Customs and Financial Adviser (designated by the United States Government), H. F. Worley.

Liberia lies on the southwest (Guinea) coast of Africa between Sierra Leone (British) on the west and the French colony of the Ivory Coast on the east, with a coast line on the South Atlantic of about 350 miles. It extends inland about 200 miles. Beyond 25 miles there is no civilized settlement. Most of the country is covered with tropical forests rich in timber and oil nuts but lacking in transportation. There is one motor road, 20 miles long. The Government is trying to float a loan of \$5,000,000, based on custom receipts, with the United States Government, with the proceeds of which it will build roads to open the hinterland to commerce. The House has acted favorably on the resolution, which was waiting action in the Senate at its adjournment in September. The country has now a bonded indebtedness of \$1,700,000 floated by New York bankers in 1912, with an internal floating debt of about \$500,000.

The population is entirely of the African race; about 100,000 of the dwellers along the coast may be considered civilized. The number of American Negroes is estimated at 12,000. Liberia was founded in 1822, when a settlement was made at Monrovia by Negro freedmen from the United States with the assistance of American colonization societies. It was declared a free and independent republic on July 26, 1847. Its Constitution is modelled on that of the United States. Electors must be of Negro blood and owners of land. The Government rests with a President, elected for four years, a Senate, elected for six years, and a House of Representatives, elected for four years.

The control of customs since 1912 has been in the hands of a General Receiver and Financial Adviser, designated by the United States.

Government schools are supplemented by mission schools, mostly of Protestant denomination. The Methodists maintain a college at Monrovia. There is an organized militia of 650 men, with reserves of 2,500.

Liberia was a signatory of the Versailles Treaty and is a member of the League of Nations.

Coffee, rubber, oil nuts, raffia, ivory and ginger are the chief exports and textiles, hardware, glass and earthenware, tobacco, spirits, rice and food-stuffs are the principal imports. In 1920, there entered at Monrovia 446 vessels of 525,314 tonnage. Customs duties in 1913 were \$162,120; 1919, \$226,720; in 1920, \$314,690.

Trade with the United States was:

|                       |           |
|-----------------------|-----------|
| Imports, 1920-21..... | \$189,002 |
| 1921-22.....          | 178,048   |
| Exports, 1920-21..... | 3,532     |
| 1921-22.....          | 1,444     |

**LIECHTENSTEIN.**

(Principality).

AREA, 65 square miles.

POPULATION, 1912, 10,716.

CAPITAL, Vaduz; population, 1,376.

Prince, John II., born Oct. 5, 1840; succeeded his father Nov. 12, 1858.

Administrator, appointed by the Prince, Joseph Ospelt.

Liechtenstein is on the Upper Rhine between Austria and Switzerland. It was a member of the German Confederation until 1866. Since that time it had practically been a dependency of Austria, but on Nov. 7, 1918, the Diet declared its complete independence. By treaty with Switzerland in 1921 that country administers its posts and telegraphs. The population is agricultural; stock raising is highly developed. The monarchy is hereditary. By the Constitution, October, 1921, legislative powers rest in a Diet of 15 members, elected for four years by direct vote, on a basis of universal suffrage and proportional representation. The budget for 1922 balanced at 384,500 francs.

**LITHUANIA, REPUBLIC OF.**

AREA, 33,000 square miles.

POPULATION, 4,500,000, of which 70 per cent. are Lithuanians, 13 per cent. Jewish, 8 per cent. Polish or Polonized Lithuanians.

CAPITAL, Kovno, temporarily; population, 190,000. President, Aleksandras Stulginskis.

Premier, E. Galvanuskas.

Minister to the United States, vacant; Voldemar Carneskis, Charge d'Affaires.

Consul, at New York, Dr. J. J. Bielskis (acting).

United States Minister, Frederick W. B. Coleman; also accredited to Estonia and Latvia.

United States Consul, at Kovno, Clement S. Edwards.

Lithuania, a Baltic state, is bounded on the north by Latvia, on the east by Russia, on the south by Poland, and on the west by Poland and the Baltic Sea. It is about the size of the State of Maine.

Lithuania was a Grand Duchy under the Russian Empire, having shared the fate of Poland. After the Bolsheviks captured the Russian Government, the republic proclaimed its independence on Feb. 16, 1918. It was recognized by most of the powers and by Russia in the Treaty of Moscow, July 12, 1920. The dispute with Poland, relative to whether or not certain Lithuanian areas were to be left as a part of the country or become part of Poland has been constant since 1918.

The League of Nations has had the matter in hand. On Oct. 9, 1920, General Zeligowski, with 15,000 Polish troops, occupied Vilna, historic Lithuanian capital, and declared it annexed to Poland. The Polish Government proclaimed Zeligowski a rebel, but he remained there many months. Vilna has been lately claimed as a part of Poland, but the Lithuanians refuse to consent, and late in 1922 the matter was in status quo, with proposals afoot that it be referred to the International Court of the League of Nations, Poland not consenting. Lithuania is a member of the League of Nations.

Legislative power is vested in a constituent Assembly of 112 members, elected directly on a basis of proportional representation by universal equal suffrage. The Assembly elects the President.

Eighty per cent. of the people engage in agriculture, there being in all the country 21,120,000 acres, of which 5,635,426 are arable, 1921 production being 530,000 tons of rye, 145,350 of barley, 77,300 of wheat, 263,500 of oats, 1,386,000 of potatoes, 23,100 of flaxseed and 18,800 of flax fibre.

Agriculture was close enough to making the people self-supporting to enable export in the crop year of 1920-1921 of 10 per cent. of the rye, barley and wheat, half the flax and much of other products.

Forest wealth also gives export of timber. Forests cover a fourth of the total area, pine, fir and hardwood.

Livestock is abundant. In 1921 there being 370,000 horses, 780,000 cattle, 1,262,000 swine and 1,036,000 sheep. This was a gain of 50 per cent. over the 1920 figures.

The industries employed, in 1922, 42,000 persons, and concerned utilization of the country's products.

Exports are of the country produce, plus the output from textile mills, and imports are manufactures. The total in 1921 was 631,964,148 marks. Imports totalled 876,874,930 marks.

Memal, chief port, is under Allied control; there are 1,800 miles of railway.

Lithuania is on the through railway route from Paris, Berlin, Warsaw to Riga, Dvinsk and Petrograd, and regards the international rail traffic as

one of its principal points of importance, it being the intention to develop facilities for its proper care.

About 75 per cent. of the people are Roman Catholic, 12 per cent. Jewish, 9 per cent. Greek Catholic and 4 per cent. Protestants.

Pre-war there were 871 schools with 40,330 pupils. In 1922 there were 1,801 schools with 177,379 pupils.

A state university was opened in Kovno Feb. 16, 1922. The old university at Vilna was declared Polish by President Pilsudski soon after Poland was made a republic, and along with Vilna and adjacent territory remains in question as to control.

Trade with the United States in the fiscal year 1921-22 was: imports, \$63,968; exports, \$62,850.

**LUXEMBURG, GRAND DUCHY OF.**

AREA, 999 square miles.

POPULATION, census of 1916, 263,824.

CAPITAL, Luxembourg, population, 1921, 45,986.

Grand Duchess, Charlotte, born Jan. 23, 1896; succeeded on the abdication of her sister, Marie Adelaide, Jan. 9, 1919; married Prince Felix of Bourbon-Parma on Nov. 6, 1919; *Heir*, their son, Prince Jean, born Jan. 6, 1921.

President of Government, Emile Reuter.

Minister to the United States, vacant.

Consuls, at Chicago, Pierre Kransz; at Minneapolis, Emile Ferrant.

United States Minister, vacant. (Diplomatic matters cared for by the legation at The Hague, Netherlands.)

Luxemburg is a European Grand Duchy four-fifths the size of Rhode Island, situated between Germany on the east, Belgium on the west, and France on the south. Its integrity and neutrality were guaranteed by the Treaty of London, May 11, 1867, having been previously, since 1815, a part of the Germanic Confederation. It, however, remained in the German Customs Union, formed in 1842. German capital built its railroads and its iron and steel furnished material before and during the war to the Germans, who occupied the country throughout the war.

A referendum (under universal suffrage) taken Sept. 23, 1919, to settle some of the problems brought to the front by the World War resulted in the following vote out of a total of 90,984: For the reigning Grand Duchess, 66,811; for a continuation of the dynasty under another Grand Duchess, 1,286; for another dynasty, 889; for a republic, 16,885; for an economic union with France, 60,133; for an economic union with Belgium, 22,242. France declined the union in favor of Belgium. A treaty was then negotiated between Luxemburg and Belgium eliminating the customs barrier and providing for the use of Belgian money in the Grand Duchy. The agreement came in force April 1, 1922, and is for 50 years.

The Grand Duchy is governed under the Constitution of 1868 as amended in 1919. Legislative power rests with a Chamber of 48 Deputies, elected by universal suffrage (men and women over 21). Executive power rests with a Minister of State and President of Government and a Cabinet of four Directors-General. The population is almost entirely Catholic. Education is compulsory for children between the ages of six and thirteen.

Agriculture gives occupation to 90,000 of the population, but mining is the chief industry. The production in 1920 was: Iron, 3,704,390 tons; steel, 732,457 tons. There were in 1920, 330 miles of railroads.

Par of exchange, franc, . . . . . 19.3 cents

Rate of exchange Nov. 1, 1922, . . . . . 6.57 cents

Budget—Receipts, francs, . . . . . 56,388,147

Expenditures, francs, . . . . . 156,569,044

**MESOPOTAMIA.**

(See the Kingdom of the Iraq.)

**MEXICO, REPUBLIC OF.**

AREA, estimated, 767,198 square miles.

POPULATION, estimated, 15,800,000.

CAPITAL, Mexico City, population estimated, 1920, 1,080,000; chief cities, Guadalajara, pop. 119,468; Puebla, 96,121; Vera Cruz, 48,633; Tampico, 16,318; San Luis Potosi, 85,000; and Monterey, 85,000.

President, Gen. Alvaro Obregon, 1920-24, inaugurated Dec. 1, 1920.

Ambassador to the United States, vacant; Sr. Salvador Diego Fernandez, Minister Plenipotentiary, Charge d'Affaires ad interim; Dr. Manuel C. Teller, Secretary of the Embassy.

*Consuls General* in the United States, at New York, Gumaro Villabos; at New Orleans, Arturo M. Elias; at San Francisco, Jose Garza Zertuche; at Laredo, Enrique D. Ruiz. *Consuls*, at Mobile, Pablo Tamayo; at Los Angeles, Gustavo Luiders; at Boise, Miguel Angel Rico; at Baltimore, Roberto Garcia; at Boston, Rafael Calvo y Arlas; at Kansas City, Luis Villalpando; at Cincinnati, Raoul G. Dominguez; at Norfolk, Jose Antonio Valenzuela; at Clifton, M. A. Limon; at Phoenix, Manuel Esparza; at Calexico, Manuel G. Paredes; at Corpus Christi, Lisandro Pena; at Dallas, Bengno Cantu V.; at El Paso, Hermenegildo Valdez; at Galveston, German Meade y Fierro; at Hidalgo, Francisco Perez; at Port Arthur, Guillermo Prieto Laurens; at Presidio, Cosme Benegoecha; at Rio Grande, Renato Cantu Lara. There are also consulates (vacant) at Yaco, Nogales, Tucson, Brownsville, Del Rio, Eagle Pass, Houston, San Antonio, Seattle, Denver, Chicago, St. Louis, Jacksonville, Salt Lake, Portland, Ore., and Philadelphia.

*United States Ambassador*, vacant; George T. Sumnerlin, counsellor of Embassy, Charge d'Affaires ad interim.

*United States Consul General*, at Mexico City, Claude I. Dawson; *Consuls*, at Vera Cruz, John Q. Wood; at Monterey, Paul H. Foster; at Acapulco, George A. Bucklin; at Ciudad Juarez, John W. Dye; at Matamoros, Gilbert R. Willson; at Mazatlan, William E. Chapman; at Mexicali, Walter F. Boyle; at Progreso, O. Gaylord Marsh; at Nogales, Francis J. Dyer; at Tampico, vacant; at Frontera, Robert L. Rankin.

Mexico is bounded on the north by the United States, on the east by the United States (Texas), the Rio Grande forming the boundary line, and the Gulf of Mexico; on the south by Guatemala and on the southwest and west by the Pacific Ocean. The Gulf of California, 739 miles long with a maximum width of 190 miles, makes a huge indentation in the western coast, completely separating the narrow mountainous sterile and sparsely inhabited peninsula of Lower California, 760 miles long, from the mainland. On the east the province of Yucatan juts out into the Gulf of Mexico, connected with the main territory of the country by a narrow strip northwest of the Guatemala frontier. The coast line on the Pacific is 4,574 miles long and 1,727 on the Caribbean.

The Sierra Madre range runs north and south near the western coast turning near Colima and continuing nearly due east paralleling the coast into Central American countries. Near the Gulf Coast a range of mountains—a continuation of the eastern range of the Rocky Mountains—runs down nearly to Vera Cruz. Loftiest of the extinct volcanoes are Popocatepetl, altitude, 17,888 feet, Ixcacahuatl, altitude, 17,343 feet, and Orizaba, altitude, 18,209 feet.

Between the two ranges lies the vast tableland of Mexico, altitude from 5,000 feet to 8,000 feet, with a delightful climate (like New York in September) and with the vegetation and products of the temperate zone varying with the altitude. The lowlands along the coast are tropical, rising to sub-tropical in the foothills; hot, and unhealthy with a heavy rainfall on the Gulf side. Along the Pacific slope and in the interior irrigation is needed and natural streams from the mountains are put to use with increasing zeal.

Agriculture and stock-raising are the chief industries. The country is marvellously rich, but the land is barely scratched except on the larger ranches primitive methods of cultivation prevail. The cultivated lands amount to about 30,000,000 acres (of which 20,000,000 require irrigation) the grazing lands 120,500,000 acres and forests 44,000,000 acres, of which 25,000,000 are estimated to be rich in pine, spruce, cedar, mahogany, rosewood and logwood. The principal products are corn, cotton, henequen (sisal), wheat, coffee, beans, tobacco, sugar and molasses. In 1920 there were 2,162,984 cattle, 929,385 horses, 354,331 mules, 1,089,976 sheep, 1,987,869 goats, and 1,654,089 pigs. Cattle, hides and tallow were among the chief exports.

Next to agriculture, the chief wealth of Mexico is in its minerals, and mining has been the most highly developed of her industries since the days of the Spanish conquest. The total value of silver mined from the first year of the Spanish conquest (1521) to January, 1922, was \$3,000,000,000, somewhat more than 155,000 tons in weight, according to figures compiled by the Bureau of Mines of the Mexican Department of Commerce and Industry, being two-thirds of the world's silver production for the last 400 years. About \$500,000,000 American capital is invested in mining. Mexico now yields

over one-third of the world's production of silver and about 5 per cent. of its gold.

Mexico has an abundance of low grade coal, much like that of Texas, with 300,000,000 tons in sight.

#### PETROLEUM PRODUCTION.

The petroleum industry in Mexico, which, in 1920, produced 23.5 per cent. of the world's output, became a commercial factor in 1910. The total production from 1901 to 1920 has been 563,524,000 barrels, or 80,470,000 metric tons. Oil had been discovered in 1901 in the Tampico district. In 1910 the famous Juan Casiano No. 7 well was drilled, and the equally famous Potrero del Llano No. 4, came in later with an initial flow of 10,000 barrels daily, increasing to 160,000 barrels, establishing itself as the largest producer up to that time. These were in the southern part of the Tampico district.

In January, 1914, in the Panuco pool, a well with a flow of 100,000 barrels daily was brought in. On Feb. 10, 1915, the Cerro del No. 4 well, in the southern district, was completed and on the 19th flowed 260,858 barrels, being estimated the largest producer ever drilled. In 1921 it was still continuing its steady yield.

Plenty of wells with large initial capacity have been completed in the Casiano pools. The Alamo pool, the southernmost producing area in the Tampico-Tuxpam region, came into prominence in October, 1914, when the famous Alamo No. 2 well began to flow. It is estimated to have produced by May, 1921, 27,000,000 barrels of oil.

In 1919 and 1920 large gushers came in in the Naranjos pool in the southern field which produced about 90,000,000 barrels in 1920, considered to be the largest output in history.

The Potrero del Llano No. 4 well suddenly went to salt water in December, 1918, after producing up to that time about 100,000,000 barrels of oil. The Juan Casiano No. 7 well went to salt water in November, 1919, after producing about 80,000,000 barrels of oil. Many of the large wells in the Tepetate pool and the Panuco field were affected by salt water in 1919 and 1920. There are important wells in the Toteco district, and in 1920 it was estimated this field produced 120,000,000 barrels, all in a strip of land 42 miles long and less than 1 mile wide.

The petroleum production of Mexico, from 1908 to 1920 is estimated:

|           | Barrels.    | Met Tons   |
|-----------|-------------|------------|
| 1908..... | 3,932,900   | 624,968    |
| 1909..... | 2,713,500   | 431,175    |
| 1910..... | 3,634,080   | 577,455    |
| 1911..... | 11,552,798  | 1,994,640  |
| 1912..... | 16,558,215  | 2,631,100  |
| 1913..... | 25,696,291  | 4,083,141  |
| 1914..... | 26,235,403  | 4,168,805  |
| 1915..... | 32,910,508  | 5,229,480  |
| 1916..... | 40,545,712  | 6,445,957  |
| 1917..... | 55,292,770  | 8,790,583  |
| 1918..... | 63,828,327  | 10,147,587 |
| 1919..... | 87,072,954  | 13,843,077 |
| 1920..... | 163,000,000 | 22,638,888 |

Mexico's manufacturing plants are not sufficient to supply home consumption. Cotton mills (about 140 with 762,200 spindles, and 27,100 looms) and woolen mills have been established under a high protective tariff. There are about 1,500 tobacco factories. Some smelters, paper mills, flour mills, saw mills, sugar mills, and refineries and breweries are also in operation.

Mexico had in 1918 15,942 miles of railroads. In 1909 the main lines were united in one Government-controlled corporation—the National Railways of Mexico, the operation of which, with virtually all the private lines, was taken over in 1914 and operated by the Government under the name of the Constitutional Railways of Mexico. The National Railways of Mexico own 6,518 miles of track and control 1,229 more; the Mexican Railroad has 520 miles of track; the Tehuantepec, 184; the Mexico Northwestern, 512; the Southern Pacific Railroad of Mexico about 1,000; and the United Railroads of Yucatan about 500. Vera Cruz, Tampico, Puerto Mexico, Salina Cruz, Manzanilla and Acapulco, are the chief ports.

#### CIVIL WARS AND INSURRECTIONS.

Mexico has been much torn by civil war and insurrections since achieving its independence from Spain (proclaimed Sept. 15, 1810, and effected in 1821). Conditions resulting almost in a state of war with the United States followed the *coup d'etat* by which, in February, 1913, Gen. Victoriano Huerta replaced Francisco I. Madero (murdered Feb. 22, 1913) in the Presidency. The United States did not recognize his Government (he resigned July 15, 1914), but on Oct. 19, 1915, did recognize that of Gen. Carranza who had driven Huerta's successor Carbajal from the capital, and assumed executive power, Aug. 20, 1915. Carranza

held power until May, 1920, when he fled from the capital before an uprising, and was killed trying to reach Vera Cruz. Adolfo de la Huerta, then Governor of Sonora and now Secretary of the Treasury, was made Provisional President in May, 1920, and Gen. Alvaro Obregon was chosen President at a general election in September, being inaugurated Dec. 1, 1920. The United States has not yet recognized his Government, no common ground having been found following the suggestions of Secretary of State Hughes, presented May 27, 1921, suggesting the preliminary signing of a convention covering boundary disputes, claims, and the stipulation that Article 27 of the new Constitution (1917) is not to be interpreted retroactively.

Article 27 affirmed that the title to mineral and other subsoil deposits was vested in the people of Mexico, and stipulated that only Mexicans and Mexican companies had the right to acquire concessions to develop mineral fuel in the republic. A foreigner might secure that right only if he renounced the privilege of recourse to his Government for redress through diplomatic channels. The intent to safeguard future concessions in the interest of the commonwealth is clear, but whether or not the article is retroactive has been the subject of much debate.

However, following decisions of the Mexican Supreme Court to that effect, President Obregon in September, 1922, declared Article 27 to be non-retroactive. Foreign corporations holding concessions, however, hold that the intent under the article and the manner of its interpretation by the Mexican authorities was confiscation. President Carranza had on Feb. 10, 1918, issued a decree imposing heavy taxes on petroleum land and on contracts and royalties and exacted license fees for new drilling and explorations. Other provisions in decrees at various times have aimed to bring the entire oil industry under the Federal Government. Citizens of the United States and the United Kingdom appealed to their Governments for protection against what they asserted to be threatened confiscation. A new source of trouble is the asserting of an independent right to take oil production recently made by some of the individual states.

#### AGREEMENT ON THE DEBT.

The Secretary of Finance, Adolfo de la Huerta, signed an agreement in New York, June 16, 1922, with the International Committee of Bankers, designed to settle the eight-year-old question involving the Mexican external and internal debt. This agreement was approved by both Houses of the Mexican Congress and has been signed by President Obregon.

The plan of adjustment relates to all external Mexican Government debts, direct or guaranteed, the National Railways debt and certain so-called internal Government debts largely held outside Mexico; the total face value of the securities covered being over \$500,000,000, of which the interest in arrears amounts to approximately \$200,000,000.

This \$700,000,000 includes Mexico's direct debt and guaranteed railroad bonds, totalling approximately \$322,000,000 gold; the railroad debt, not guaranteed, amounting to about \$230,000,000 back interest on bonds, and railroad debt amounting to about \$115,000,000; sinking fund defaults amounting to about \$28,000,000.

As to current interest, cash payments, in varying proportions among the different bond issues, are to be begun after Jan. 2, 1923, out of a special fund as provided for in the agreement; the schedule of disbursements in general to be based on the relative values and priorities of the different issues of bonds. For such part of current interest as is not in cash, scrip will be issued and redeemed in due course, certain bonds being made available for this purpose.

The special fund for current interest will be increased each year until Jan. 1, 1928, when full service of the debt will be resumed. The oil export taxes and a surcharge of 10 per cent. on railway gross receipts will be paid into this special fund.

As to back interest, all cash payments are to be waived. The matter will be arranged by the deposit of overdue coupons with a trustee. Against these coupons receipts will be issued to be amortized without interest over a period of time. This arrangement is, in effect, equivalent to cancellation of a part of the back interest.

As to the railways, they are to be operated by private management as before the revolution. The Government will assume by indorsement all railway debts not previously guaranteed. The rights of foreclosure hitherto held by the bonds will be suspended so long as the plan is being carried out, thereby protecting both the stock ownership of the Mexican Government and other shareholders, as well as the ultimate rights of the bondholders.

In general, in order to give time for full resumption of all cash obligations, all classes of bondholders are to agree to temporary suspension of sinking fund rights during a five-year period, after which all contract clauses will again become effective.

#### THE NEW CONSTITUTION.

Mexico is now governed under a new Constitution promulgated Feb. 5, 1917, replacing the Constitution of 1857. By it Mexico is declared to be a federated republic of 28 states, each with a large measure of home rule and with Governor, Legislature and Judiciary elected by popular vote; two territories and a Federal District whose Governors are appointed by the President. Interstate customs duties are not permitted. The legislative power rests in a Congress consisting of a Chamber of Deputies, and a Senate of 88 members, two for each state, all elected for two years by universal suffrage. The President is elected for 4 years by direct popular vote and cannot be re-elected. He appoints a Cabinet of ten Secretaries. Article 33 confers on the President the right to expel from Mexico without "judicial process" any foreigner whose presence he might deem "inconvenient." The prevailing religion is Roman Catholic but the new Constitution provides for the separation of church and state, and all religions are tolerated.

Education is under Federal control and is free and compulsory from 6 to 16. The percentage of illiteracy among the peons is very high, and there are many Indian tribes, about 20 per cent. of the population, quite uncivilized. The present administration is making every effort to extend elementary education to all classes of the people; 2,000 volunteer teachers of illiterates were enrolled in 1921. The appropriation by the Government for schools in 1922 was \$49,826,716; number of schools supported was 5,399. Vocational education, particularly in agriculture, is being promoted. There are normal schools for both sexes throughout the country and some hundred technical schools. The National University of Mexico, founded in 1553, is famous among Latin-American universities, and in the capital are many higher institutions of learning and culture and scientific institutions and societies.

The army numbers 68,316 men, with a reserve of 833,000. Military education is compulsory in the schools.

Mexico is not a member of the League of Nations. Par of exchange, peso . . . . . 49.8 cents  
Rate of exchange, Oct. 15, 1922 . . . . . 48.3 cents

#### MONACO, PRINCIPALITY OF.

AREA, 8 square miles.

POPULATION, 1913, 22,956.

CAPITAL, Monaco, population, 1913, 2,247; other towns, La Condamine, 11,087; Monte Carlo, 9,627.

Prince, Louis, born July 12, 1870, succeeded his father, the late Prince Albert, June 26, 1922.

Monaco is a small Principality on the Mediterranean surrounded by the French department of the Alpes Maritimes. An independent Principality for 800 years, the reigning Prince was dispossessed by the French Revolution. The line was re-established in 1814 and placed under the protectorate of the Kingdom of Sardinia. In 1861 King Charles III. ceded his rights to France. The Prince of Monaco

was an absolute ruler until Jan. 7, 1911, when a Constitution was promulgated which provides for a National Council of 21 members, elected by universal suffrage for four years. The revenue is mainly derived from the gaming tables of the Casino at Monte Carlo. The annual grant for the concession was £80,000 in 1917; in 1927 it will be £90,000, and in 1937, £100,000. The yearly average of visitors is over 1,500,000. The late Prince established an important oceanographic museum and laboratory at Monaco.

### MONTENEGRO.

(See Serbs, Croats and Slovenes, Kingdom of.)

### MOROCCO, SULTANATE OF.

(French and Spanish Protectorates.)

AREA, about 231,500 square miles; viz., French Protectorate, 220,400; Spanish Protectorate, 10,960; Tangier (Internationalized), 140.

POPULATION, estimated, 1921, French zone, 5,400,000; Spanish zone, 550,000; Tangier zone, 52,000.

CAPITAL, Fez, population, census of 1920, 62,693; Seat of government French zone, Rabat, population, 29,559; residence of French Resident General. Seat of government Spanish zone, Tetuan, population, 30,000; administrative headquarters of the Calipha and the Spanish High Commissioner. Other cities, Marrakesh or Morocco, population, 1920, 102,170; Casablanca, 101,690 (39,283 European); Tangier, 50,000; Meknes, 36,592; Mazagan, 21,630; Mogador, 20,309; Sale, 24,202; Safi, 26,396, and Melilla, 42,590.

Sultan, Mulai Yusef, proclaimed on the abdication of his brother, Sultan Mulai Abd-el-Hafid, Aug. 18, 1912.

French Resident General, Marshal Hubert Lyautey, appointed (second term) April 7, 1917.

Spanish High Commissioner, Gen. Domaso Berenguer, appointed Jan. 25, 1919.

United States Consul General, at Tangier, Joseph M. Denning; at Casablanca, Robert R. Bradford.

Morocco of to-day is the remnant of the great Shereefian Empire founded by the Arab invaders who carried the crescent of Islam west at the close of the seventh century and ruled all northwestern Africa and most of the Iberian peninsula. It is bounded on the east by Algeria, on the north by the Mediterranean, the extreme point opposite Gibraltar being Ceuta, a city which, with its four-mile-long peninsula (dominated by Jebel Musa, one of the Pillars of Hercules), has belonged to Spain since the close of the sixteenth century. This narrow northern strip, about 60 miles wide, from the Atlantic nearly to the Algerian border, is one of the Spanish zones.

On the west is the Atlantic Ocean and on the south Rio de Oro (Spanish) and the Sahara Desert. The extreme southern end forms a second Spanish zone, and a strip 50 miles long by 15 deep on the Atlantic coast, inclosing the town of Infil, the third.

Along the 200 miles of the Mediterranean littoral run the Rif hills, still unexplored. Through the country from northeast to southwest run the Atlas Mountains in five great ranges rising to an altitude of 12,000 feet (Mt. Ayashlu, altitude 14,150 feet). Between these ranges lie fertile, well-watered plains, and the northern slopes of the mountains are well wooded. Irrigation is much used, though all agricultural methods and implements are primitive.

The climate is good and healthy, especially on the Atlantic coast, which is shielded from the hot winds of the Sahara by the Atlas Mountains, and where there is a "tell" or fertile region. Tangier is a recognized health resort, also Mogador, where the temperature never rises above 80° or falls below 40°.

The most numerous of the inhabitants are the aboriginal Berbers, mountain dwellers, whose forebears thrice conquered Spain, and who so long maintained the independence of their country. The plains are mostly occupied by Arabs and a mixture of the two races, known to foreigners as "Moors." The latter are also town dwellers. The third race is Jewish, in two sections, one settled there from time immemorial, and the other driven from Europe in comparatively modern times, who live near the ports, are progressive and have much of the foreign trade. The European population in 1921 numbered about 100,000, of which two-thirds are French.

The people are agricultural and pastoral. Eggs and poultry have become the chief articles of export, reaching even to England. In 1919 the value of eggs

exported was 44,948,779 francs, and in 1920, 29,910,443 francs. Other important exports are skins, hides, wool, beans, barley, linseed and wheat, almonds, cummin and gums. The chief imports are textiles, sugar, tea, machinery and hardware, candles and spirits. Fruit and vineyards are abundant and dates a regular crop. Under proper cultivation Morocco should become a rich, cereal-producing country. Carpets, leather goods, fezzes, woolen and silk stuffs are among the manufactures, chiefly for domestic consumption. Mineral deposits are undeveloped, but much copper, lead and tin are known to exist. An oil field extends from Fez to Larash. Phosphate exists in great abundance, estimated at 100,000,000 metric tons with a yield of 65 per cent., and a decree of 1920 reserves to the Sultan's Government the right of exploitation.

The country had no roads or bridges, transportation being by mule and camel back, but the French have built about 3,000 kilometers and have more surveyed; the most important being from Tangier to Fez. Little has been done in the Spanish zone. In the French zone, in 1920, there were 610 miles of railroads, those of narrow gauge being rebuilt at standard gauge. The Spaniards have a narrow gauge road from Ceuta to Tetuan is Rio Martin. The French use aeroplanes for mail, passengers and freight. In 1919, 1,200 vessels of 845,708 tonnage entered the ports of French Morocco.

French interests in Morocco had been steadily growing because of its proximity to Algeria for years and had been recognized in the agreements of 1906 and 1909. A general rising of the tribes in October, 1910, culminating in the siege of Fez called out a French expedition of pacification which occupied Fez in 1911. The need of this had been notified to the powers, but was resented by Spain, who in June suddenly occupied two towns, and by Germany, who on July 1, 1911, sent the gunboat Panther to Agadir, a seaport on the Atlantic, ostensibly to safeguard German subjects in the Sus, but really to challenge the extension of French influence. The crisis became acute and war seemed inevitable. Great Britain, however, stood by the Entente and made formal objection to Germany's acquiring territorial influence in Morocco. Diplomatic conversations followed, which resulted in the Franco-German treaty of Nov. 4, 1911, by which France ceded to Germany some territory in French equatorial Africa on the southern and eastern borders, the Cameroons, in return for recognition of her political protectorate over Morocco. A treaty with Spain adjusted the limits of their respective spheres. On March 30, 1912, the Sultan Mulai Hafid signed a treaty with France accepting the protectorate, which was recognized by the powers who withdrew their diplomatic representatives. Gen. Lyautey was appointed Resident General and his advice the Sultan, an absolute despot, and his six viziers have to follow. Risings occurred later in the year and Mulai Hafid abdicated in favor of his brother. The rebellious tribesmen made much trouble and were stirred up to more by the Germans during the World War. The last outbreak, in October, 1920, was crushed by the French capture of Wazzan, who thus consolidated their rule in most of the districts.

A severe outbreak near Melilla in July, 1921, seriously threatened the Spanish rule in its protectorate and has but recently been suppressed by a vigorous military expedition. The notorious brigand, Raisuli, now dead, was probably the directing spirit.

Gen. Lyautey's wise administration of the protectorate, to which he returned in 1917, after service in 1916 as Minister of War in Paris, has been one of peaceful penetration, extension of railroads and roads, public works and social welfare. Agricultural and industrial enterprises have been fostered, public health and education improved. The country has become safe and orderly. Able army officers and civilians have assisted him. Colonization is encouraged. Economic opportunity, the "open door" is guaranteed to all.

Tangier, a seaport of 52,000 inhabitants, including 11,700 Europeans and 12,000 Jews, which occupies the extreme northwest corner of Africa on the Atlantic, was temporarily internationalized in the negotiations of 1911-12, with a hinterland of about 100 square miles. It is administered by the resident diplomatic corps, which does not make for economic progress. Both France and Spain desire complete possession, but no agreement has been reached.

The revenue and expenditures of the French protectorate are estimated for the year 1921 at about £10,750,000 each. The Moroccan debt (three French loans) amounted in 1921 to £16,224,960.

Trade with the United States was:

**NEPAL, KINGDOM OF.**

AREA, estimated, 54,000 square miles.

POPULATION, 5,639,092.

CAPITAL, Kathmandu, population, 60,000.

*Sovereign*, Maharajah Tribhubana Bir Bikram, born June 3, 1906, succeeded his father Dec. 11, 1911.*Prime Minister*, Maharajah Sir Chandra Shumshere Jung, Bahadur Rana, appointed June 26, 1901; he holds the rank of General in the British Army.

Nepal is an independent state on the southern slope of the Himalayas, bounded by Tibet on the north, by Sikkim and Bengal on the east and by Bengal and the United Provinces of British India on the south and west. Though friendly, a policy of seclusion is followed and travel discouraged. The Gurkhas, whose Aryan ancestors from Rajputana mixed with the Mongolic aborigines, overran the country in the latter half of the eighteenth century, and are the dominant race. From their ranks the British Indian Government recruits regiments of most valuable soldiers. The kingdom maintains a well-drilled and efficient army of 32,000 infantry and 2,500 artillery. There are many fertile valleys lying in the slopes of the bleak and lofty mountains (which include Mt. Everest, altitude 29,141 feet), and its territory runs into the Terai on the plains of India. It has rich forests. Nepal exports rice, grain, hides and cattle, and imports textiles, sugar, salt, hardware, etc. The capital is in a most fertile valley cultivated from end to end, 15 miles long and 20 miles wide, which supports 300,000 inhabitants and is noted for its 2,700 Buddhist shrines, nearly all lavishly decorated examples of Nepalese art. Paton is the largest city and Pasopati a holy centre for pilgrims. In 1920-21 its exports to India were £4,112,000 and imports £1,913,000.

**THE NETHERLANDS, KINGDOM OF.****HOLLAND.**

AREA, 12,582 square miles. Colonial possessions: Dutch East Indies, 683,000 square miles; Dutch Guiana, 48,060 square miles; Curacao Islands, 403 square miles; total, 742,045. Grand total, 756,627.

POPULATION, census of 1920, 6,841,155. Colonial, Dutch East Indies, 49,161,047; Dutch Guiana (1921), 113,181; Curacao, 53,702. Grand total, 56,169,085.

CAPITAL, The Hague, population (1920), 353,286; other cities, Amsterdam, population, 642,162; Rotterdam, 510,538; Utrecht, 140,189; Groningen, 89,895; Haarlem, 76,858 and 24 others from 25,000 to 70,000.

*Queen*, Wilhelmina, born Aug. 31, 1880, succeeded, on the death of her father, Willem III., Nov. 23, 1890; crowned Sept. 6, 1898. Married Prince Henry of Mecklenburg-Schwerin (Prince Consort), Feb. 7, 1901. *Heir*, her only daughter, Princess Juliana, born April 30, 1909.

*Premier*, Jonckheer Dr. Ch. J. M. Ruys de Beerenbrouck (interior), born Dec. 1, 1873, appointed Sept. 9, 1918.

*Minister to the United States*, Dr. J. C. A. Everwijn.

*Consuls General in the United States*, at New York, D. J. Steyn Parve; at San Francisco, H. A. van Coenen Torchiana; at Chicago, J. Vennema; *Consuls*, at Boston, J. H. Reurs; at Philadelphia, A. P. van der Burch; at Baltimore, R. H. Mottu; at Norfolk, J. P. A. Mottu; at Charleston, J. L. C. Diemes; at New Orleans, W. J. Hammond; at St. Louis, W. A. J. M. van Waterschoot van der Gracht; at Kansas City, H. Visscher; at Mobile, Palmer Pillans; at Galveston, O. S. Flint; at Grand Rapids, J. Steketee; at Cleveland, P. Plantings; at Seattle, J. C. J. Kempees; at Port Arthur, L. F. J. Wilkins.

*United States Minister*, vacant.

*United States Consul General*, at Rotterdam, George E. Anderson, *Consuls*, at Amsterdam, Frank W. Mahlin; at Curacao, W. J. Bradstreet S. Rairden; at Batavia, Java, Charles L. Hoover; at Socorabaya, Java, Parker W. Buhrman; at Medan, Sumatra, Carl O. Spamer.

The Netherlands (Holland) a kingdom in north-western Europe, 196 miles long by 109 miles wide, is bounded by Germany on the east, Belgium on the south and the North Sea on the west and north. Its surface is flat with an average height above sea level of 37 feet and with about one-fourth of its land below sea level, reclaimed and protected by dikes, of which there are 1,500 miles. A plan to drain half of the shallow Zuyder Zee has been prepared by engineers designed to add 817 square miles to the cultivable land (polders), adopted June 14, 1918, but not yet begun. The work is

expected to take 15 years, the first outlay to cost \$26,500,000. Of the country's 8,052,480 acres, 6,089,200 are cultivated intensively and 618,165 given over to forests equally well cared for. Great crops of cereals, potatoes, etc., are raised. Dairy products are an important industry, her cheese products being famous, and her cattle high grade; tulips and other flowering bulbs and roots are grown and exported extensively. In 1920, 1,365,552 tons of sugar beets were raised on 158,675 acres. Fisheries engage about 6,500 vessels and 18,000 men, and the product of the herring fisheries alone is about \$3,750,000.

Shipbuilding and sugar refining are important industries, also brewing and distilling. Amsterdam is famous for diamond cutting. Coal is found in Limburg where 2,168,590 tons were mined from privately owned mines and 1,772,210 from state mines, total 3,940,590.

Canals, of which there are 2,000 miles, are most important in internal communication; elaborate systems are in the cities and feed the harbors. The Rhine and the Scheldt reach the sea through the Netherlands and carry enormous traffic. There are 3,000 miles of roads, 1,830 miles of tramways and 2,377 miles of railroads. Holland's merchant marine in 1921 numbered 1,069 vessels of a total gross tonnage 226,318. In 1921 there entered the ports of the Netherlands 14,074 vessels with a tonnage of 8,051,114.

The first Constitution after the reconstruction of the Netherlands as a sovereign state was promulgated in 1814, and revised in 1815, after the addition of the Belgian provinces, and again in 1840, 1848, 1887 and 1917. It assures a hereditary constitutional monarchy. Executive power rests exclusively in the sovereign, legislative power in the sovereign and the States-General of two Chambers—First Chamber, 60 members, elected for 9 years (one-third each third year) by the provincial states, and the Second Chamber, 100 Deputies, elected for four years directly. Universal suffrage for citizens of both sexes over 25 years of age and proportional representation is in force. The sovereign exercises the executive authority through a Council of Ministers, the President thereof corresponding to a Prime Minister. There is a State Council of 14 members, named by the sovereign of which she is President, to be consulted on all legislative and some executive matters.

The kingdom has a unique system of frontier defense, besides the fortresses, inasmuch as two-thirds of the total area is surrounded by the sea, with dikes to hold back the waters, an advance by an enemy may be stopped by inundating the lands. Army service is partly compulsory and partly voluntary. Every Dutchman is liable for service from ages nineteen to forty. Actual service may be by lot, substitution being prohibited. Annually 25,500 are recruited, with 600 for sea service. The reserve numbers 450,000.

Entire liberty of worship and conscience is guaranteed. The royal family belong to the Dutch Reformed Church. The state budget contains allowances for different churches, Protestant, 1,588,000 guilders; Roman Catholic, 2,063,000; Jewish, 14,000.

Education is obligatory from ages six to thirteen. Intelligence is most widely diffused. Conscripts called in 1913 showed only six-tenths of 1 per cent. unable to read. There are universities at Amsterdam, Utrecht, Leyden, Delft and Groningen. The Netherlands is a member of the League of Nations.

The guilder (or florin) is the unit of currency, gold par being 40.2 cents. Rate of exchange, Nov. 1, 1923, 39.05 cents.

The budget voted for 1921 and estimates for 1922 were:

|                      | 1921<br>Guilders | 1922<br>Guilders |
|----------------------|------------------|------------------|
| Budget—Receipts..... | 552,170,089      | 608,590,233      |
| Expenditures.....    | 934,245,953      | 938,130,598      |

The budget for the colonial possessions in the East Indies for 1922 is:

|                      | Mother<br>Country<br>Guilders | Colonies<br>Guilders |
|----------------------|-------------------------------|----------------------|
| Budget—Receipts..... | 44,038,070                    | 890,453,771          |
| Expenditures.....    | 214,373,361                   | 710,839,019          |

The budget for 1922 shows the national funded debt to be 2,502,150,000 guilders, with an annual interest and sinking fund charge of 170,318,096 guilders.

The imports for 1921 were 2,288,503,000 guilders; exports, 1,471,564,000 guilders.

Trade with the United States was:

|                       |               |
|-----------------------|---------------|
| Imports, 1920-21..... | \$250,818,059 |
| "    1921-22.....     | 129,780,054   |
| Exports, 1920-21..... | 61,815,284    |
| "    1921-22.....     | 53,120,972    |

## DUTCH EAST INDIES.

AREA, 683,000 square miles; viz. Borneo, 212,737; Molucca Islands, 144,620; Celebes Islands, 72,070; Java and Madura, 50,557; Sumatra, 159,739; Timor Archipelago, 17,698; Rian-Lingga, Archipelago, 16,301; New Guinea and others.

POPULATION, census of 1920, 49,161,047. Java, 35,017,204; Borneo, 1,625,453; Sumatra, 5,848,868, etc. (No figures available for New Guinea.)

CAPITALS, Batavia, Java, population, 234,697; Banjarmasin, Borneo, 52,000.

Governor General, Dr. D. Fock.

United States Consuls, at Batavia, Charles L. Hoover; at Soerabaya, Parker W. Buhrman; at Medan, Sumatra, Carl O. Spamer.

The colonial possessions of the Netherlands in the East Indies consist of great islands and archipelagoes lying along the Equator from about 6° north latitude to 10° south latitude, between the Asiatic mainland and the Philippines, and Australia. They form the bulk of Malaysia. The census of 1920 gave the native Malay population as 48,112,706; Europeans, 169,355 and Orientals, chiefly Chinese and Arabs, 878,986. Java is the most densely populated land mass in the world. The great majority of the natives are Mohammedans. Much attention is given to education.

The islands are luxuriant, even for the Tropics, of enormous natural and annually productive wealth. Dense forests abound in valuable timber. Besides raising sufficient food for the dense population, there is produced for export in Java and Madura alone, sugar (1,480,346 tons in 1920), coffee, tea, cocoa, indigo, spices, cinchona, tobacco, rubber, copra, tin and petroleum. Of coal the mines of Java, Sumatra and Borneo produced, in 1920, 1,055,832 tons.

There are 3,923 miles of railroads, 3,130 in Java and 793 in Sumatra. In 1920, 12,167 vessels of 5,106,156 tonnage entered the ports. The Colonial army numbers 40,000, about one-quarter European, with 20,000 in the reserve.

The guilder with native coin is legal currency, guilder gold par being 40.2 cents. Imports were 1,310,825,000 guilders; exports, 2,267,871,000. Receipts, budget of 1922 were: 734,491,841 guilders; expenditures, 924,717,380; deficit, 190,225,539. Debt, 446,868,584 guilders.

Trade with the United States was:

## DUTCH GUIANA (Surinam).

AREA, 46,060 square miles.

POPULATION, 1921, 113,181, exclusive of Negroes and forest Indians.

CAPITAL, Paramaribo, population, 1920, 50,560. Governor, Baron von Heemstra.

Dutch Guiana (about the size of the State of Mississippi) is situated on the north coast of South America, between French Guiana on the east and British Guiana on the west; inaccessible forests and savannas on the south stretch to the Tumuc Humac Mountains. The chief products are sugar (10,091 metric tons in 1920), cacao, coffee, bananas and rum. Placer mines produced in 1920 gold to the amount of 13,110 ounces. In 1920, 214 vessels of 409,878 tonnage entered its ports.

The Dutch by the Treaty of Breda, 1667, gave New Netherlands (New York) to England in exchange for Surinam.

The guilder is the unit of currency, gold par being 40.2 cents. Imports in 1920 were 13,718,000 guilders; exports, 7,477,512. Receipts, 1921, were 6,440,000 guilders, expenditures, 8,193,000.

Trade with the United States was:

## CURACAO—(Dutch West Indies).

AREA, 403 square miles.

POPULATION, 1920, 53,702.

CAPITAL, Willemstad, population, 12,500.

A group of six islands in the Caribbean Sea, off the coast of Venezuela, constitute the colony.

Products are maize, pulse, cattle, salt and phosphates; chief industry is the refining of oil.

In 1920, 3,144 vessels of 2,654,000 tonnage entered the ports.

Imports, 1920, were 7,307,000 guilders; exports, 10,903,000.

Budget of 1922—Receipts, 1,302,000 guilders; expenditures, 2,723,000 guilders.

Trade with the United States was:

## NICARAGUA, REPUBLIC OF.

AREA, 51,700 square miles.

POPULATION, census of 1920, 638,119.

CAPITAL, Managua, population, 1920, 60,342; other cities, Leon, population, 47,234; Granada, 21,925; Matagalpa, 32,271.

President, Sr. Don Diego Manuel Chamorro (1921-25), inaugurated Jan. 1, 1921.

Premier, Engineer Adolfo Cardenas, Acting Minister (Foreign).

Minister to the United States, Sr. Don Emiliano Chamorro.

Consuls General, at New York, Toribio Tegerino; at San Francisco, Fernando Chamorro Chamorro; at New Orleans, Agustin Bolonos Chamorro; at Kansas City, Kan., Edwin R. Heath; at Chicago, Berthold Singer; at Philadelphia, Lorenzo Guerrero Potter; at St. Louis, Rodolfo Jose Gutierrez. Consuls, at Boston, David Sequiera; at Calcutta, Arturo Pallais; at Minneapolis, F. Stewart; at Kansas City, Mo., Willis Wood; at Fort Worth, John E. Petrill; at Houston, James P. Williams; at Norfolk, Charles M. Barnett; at Seattle, W. L. Kennedy. Consul General at Panama for the Canal Zone, Marco E. Velasquez.

United States Minister, John E. Ramey.

United States Consul, at Corinto, Harold Playter;

at Bluefields, William H. Heard.

Nicaragua lies between the Caribbean Sea, with a coastline of 280 miles, and the Pacific (200 miles), with Honduras on the north and Costa Rica on the south. In area it is a little larger than the State of New York. The Cordillera range of mountains, including many volcanic peaks runs from northwest to southeast through the middle of the country. Between this range and a range of volcanic peaks to the west, lies Lake Managua, 30 miles long by 15 miles wide, and Lake Nicaragua, 100 miles long and 45 miles wide, of great importance in the transport system of the country; and with the San Juan River on the Costa Rican boundary, the latter forms the route for a trans-isthmian ship canal planned to connect the Atlantic and Pacific. The right to construct a canal over this route for 99 years, together with a naval base in the Gulf of Fonseca on the Pacific and Corn Island in the Caribbean was acquired for \$3,000,000 by the United States in a treaty ratified Feb. 18, 1916; the United States was to supervise the expenditure of that money. The Pacific Railroad running from Corinto to Leon and from Managua to Granada (171 miles), the only one in the country, was Government-owned, but 51 per cent. of the stock was sold to New York bankers who also hold the rest of the stock in escrow for a loan of \$1,060,000.

The country has valuable forests, some gold is mined, but it is essentially an agricultural and stock raising community. On the broad tropical plains of the east coast, bananas and sugar cane are cultivated and coffee is grown on the mountain slopes. The chief exports are coffee, sugar, bananas, timber and hides. Textiles, machinery, etc., chemicals and flour are the chief imports.

In 1920, 779 ships with a tonnage of 463,925 entered her ports.

The Constitution of March 12, 1912, amended in 1913, provides for a Congress of two Houses, a Senate of 13 members elected for six years, and a House of 40 Deputies elected for four years by universal suffrage. The President is appointed for four years and has a Council of five Ministers. The Roman Catholic is the prevailing religion. The army numbers 2,000 men, selected by conscription. Nicaragua is a member of the League of Nations. (For part in Federation of Central America, see Honduras.)

## NORWAY, KINGDOM OF.

AREA, 124,964 square miles (exclusive of Spitzbergen, estimated, 25,000).

POPULATION, census of 1920, 2,646,306.

CAPITAL, Christiania, population, 258,520; Bergen, 91,081; Trondhjem, 54,520; Stavanger, 43,883; Drammen, 26,174, and twelve others above 10,000.

King, Haakon VII., born Aug. 3, 1872, second son of Frederik VIII., King of Denmark, elected King of Norway by the Storting Nov. 18, 1905, and crowned June 22, 1906; married July 22, 1896, to Princess Maud, third daughter of King Edward VII. of Great Britain. Heir, Crown Prince Olaf, born July 2, 1903.

Premier, Otto Albert Blehr (Finance).

Minister to the United States, H. H. Bryn.

Consul General, at New York, Hans Heinrich Theodor Fay; Consuls, at Chicago, Olaf Bernits; at St. Paul, Eingebrith Hagbarth Hobe; at San Francisco, Nils Voll.

United States Minister, Laurits S. Swenson.

United States Consul General, at Christiania, Alban G. Snyder; Consuls, at Bergen, George N. Ifft; at Stavanger, Robert S. S. Bergh.

Norway occupies the west part of the Scandinavian Peninsula in Northwest Europe from the Skagerrack, which separates it from Denmark, to the North Cape in the Arctic Ocean, where on the east it meets Lapland and Finland. The Kjølen Mountains, which separate Norway from Sweden to the east, give to Norway in the northern part but a narrow fringe of country washed by the Arctic and North Atlantic Oceans, and cut deep by fjords of scenic grandeur. The climate is mild and moist, like England's, on the west coast, but cold and dry in the interior and in the north and east sections.

Norway has but 4,400 square miles of land under cultivation; rivers and lakes occupy 5,000, and forests 25,000; three-fourths of the land is unproductive. Norway is essentially a maritime country. Her merchant fleet, though neutral, suffered heavily in the World War by sinking and torpedoing, the total loss being 831 vessels with a total of 1,238,300 registered tons, and 1,200 men killed. She dropped from fourth place to sixth in mercantile tonnage. Norway's merchant marine on Jan. 1, 1921, was 3,828 vessels of 1,528,104 net tons. Her sailors are known the world over. Fisheries constitute a leading industry and provide a large part of the exports. In 1921 more than 112,000, 17 per cent. of the entire male wage earning population (660,000), earned their living directly or indirectly by the sea.

The forests have an estimated value of a billion kroner (approximately \$250,000,000) and about three-fifths of the acreage is covered with pine and fir trees. The export of timber and wood pulp in 1919 was valued at 113,043,100 kroner; and in 1920 at 226,689,000. The Norwegian Afforestation Association has planted since 1906 between ten and fifteen million new trees annually. Agriculture is limited and the country imports much food supply.

The country lacks coal but has become a great power producing country by utilizing by electrical transmission its greatest natural asset—water power, which is estimated to amount to 15,000,000 horsepower day and night. Of this the Government owns 2,000,000, and has developed 75,000. Private enterprise has developed about 1,200,000 horsepower. Engineering plans are under way to transmit hydro-electric power to Central Europe. Already Norway is feeling the impulse on its industries which, on Jan. 1, 1921, numbered 8,069 establishments, giving employment to 158,269 workers; and which have been developing on an export basis.

The chief mineral products are pyrites, copper ore, iron ore, nickel ore, silver and gold.

Norway in 1921 had 2,139 miles of railroads, of which 1,771 are state owned; the work of converting these to electrical power is going on rapidly. The number of ships entering Norwegian ports in 1920 was 8,031 with a net tonnage of 4,402,277.

The population of Norway is singularly homogeneous, there being numbered of non-Norwegians only about 1 per cent., 20,000 Lapps or Finns and 8,000 Quains, both of Mongolian ancestry. This excludes about 50,000 foreign-born residents of the country before the war, many of whom returned to their native countries. Norwegians have emigrated in great numbers, chiefly to the United States and Canada. The United States Census of 1920 returned 363,862 residents of the United States as born in Norway.

Norway under its Constitution, adopted May 17, 1814, is a constitutional hereditary monarchy. Independent for centuries, Norway entered into a union with the Kingdom of Denmark in 1814. By treaty of Jan. 14, 1814, the King of Denmark ceded Norway to Sweden, but the Norwegian people declared themselves independent and elected a

Danish Prince as their King. The foreign powers refused to recognize this election; as a result a convention on Aug. 14 proclaimed the independence of Norway in union with Sweden, and on Nov. 4 elected Charles XIII. of Sweden King of Norway. This union lasted until 1905. Disagreements having arisen, culminating in Norway's claiming the right to maintain its own consular service, Norway declared the union dissolved on June 7, and after negotiations a repeal of the union by mutual agreement was signed Oct. 26, 1905. After a plebiscite Prince Charles of Denmark was elected King and ascended the throne, taking the name of Haakon VII. A treaty guaranteeing the integrity of Norwegian territory was signed in October, 1907, by Norway, Great Britain, France, Germany and Russia.

The legislative power is vested in the Storting, the members numbering 150, elected for three years by direct vote on universal suffrage of citizens, both male and female, of 23 years of age. The Storting divides itself into two sections, one-fourth of the membership forming the Lagthing, and three-fourths the Odelsting, which consider the legislation separately, sitting in joint session on failure to agree separately, when decision is made by a two-thirds majority. The King may exercise the veto twice, but if the same bill is passed a third time it becomes law. The King appoints an executive Cabinet of at least eight Ministers, who may speak in the Storting, but have no vote. There is a large measure of home rule throughout the country through local governing bodies elected by universal suffrage.

The Evangelical Lutheran religion is endowed by the state and its clergy are nominated by the King. All religions are tolerated.

Education is compulsory from seven to fourteen, and the school system is highly organized. There is, so to speak, no illiteracy. The University at Christiania, founded 1811, has 1,500 students and is subsidized by the state.

The army is a national militia with universal and compulsory service. The peace strength is 40,000 men, with a reserve of 315,000. The navy is designed for coast defense only and numbers about 1,200 officers and men, with all seafaring men between the ages of 20 and 44 enrolled on the active list and liable to conscription.

The Norwegian Meteorological Service established in October, 1922, a station at Mygbugten, in eastern Greenland, and weather reports are now being transmitted daily by radio-telegraphy. Greenland is one of the "factories" of polar air.

Norway in the reaction from the World War found herself in the grip of hard times in the year 1921, and her industries and commerce have suffered heavily. The unit of currency, the kroner (par of exchange, 26.8 cents), being quoted in October, 1921, at 8.45 to the dollar. Great recovery has been made during 1922, and the dollar now (Oct. 15, 1922), equals 5.40 kroner. Norway's commerce was:

|                              |                           |
|------------------------------|---------------------------|
| Imports, 1920, calendar year | ... kroner, 3,029,900,000 |
| 1921, calendar year          | ... kroner, 1,460,000,000 |
| Exports, 1920, calendar year | ... kroner, 1,241,800,000 |
| 1921, calendar year          | ... kroner, 576,000,000   |

Norway's trade with the United States was:

## SPITZBERGEN.

AREA, about 25,000 square miles.

POPULATION, 1921, 1,503.

Spitzbergen, a mountainous group of islands in the Arctic Ocean between 76° 26' and 80° 50' north latitude and 10° 20' and 32° 40' east longitude, the largest being West Spitzbergen (12,000 square miles), lies about 370 miles due north of Norway, half-way to the Pole. Discovered by Norsemen in 1194 and rediscovered by Barents in 1596 the islands had been the resort of whalers of several nations. Ever since 1261 Norway has periodically asserted her claims to the islands, and from 1870 the demand became more insistent, increasing as Norwegian exploration discovered rich outcropping seams of coal—a necessity which Norway lacks. International conferences were held without result, the islands remaining a No Man's Land. The war put an end to negotiations, but following action by the Peace Conference in 1919, a treaty was signed in Paris Feb. 9, 1921, by the United States, Great Britain, Denmark, France, Italy, Japan, the Netherlands, Sweden and Norway, which put Spitzbergen under the flag of Norway, but not with unlimited sovereignty, as they set certain specified guarantees—no naval base to be established, the ships of all

signatories to enjoy hunting and fishing privileges there; and equal treatment must be shown to all.

The development of the coal fields has proceeded rapidly. Norwegians own the two largest mining companies. The coal exported has been good steam coal; the output in 1919 was 90,000 tons, and in 1921, 172,500 tons, practically all of which went to Norwegian ports. There are large deposits of low-grade iron ore and gypsum, and signs of oil have been reported.

### PALESTINE.

(British Mandate)

AREA, estimated, 9,000 square miles.

POPULATION, estimated, July 1, 1921, 770,000; divided 600,000 Mohammedans, 80,000 Jews, 84,500 Christians, 5,700 Druses, 170 Samaritans. CAPITAL, Jerusalem, population, estimated, 64,000. *British High Commissioner*, Sir Herbert L. Samuel. *United States Consul*, at Jerusalem, vacant.

Palestine, the Holy Land, lying between the Mediterranean Sea and the River Jordan, was formerly a vilayet of the Turkish province of Syria. It was conquered during the World War by British troops under General, now Field Marshal, Viscount Allenby, Jerusalem being surrendered Dec. 9, 1917. Jerusalem had been in Moslem hands since 1244, had been conquered and reconquered in the crusades, and had been under the rule of the Turk since 1517. It remained under British Military Administration until July 1, 1920, when Sir Herbert L. Samuel was appointed High Commissioner and a civil government set up. The announced policy of Great Britain is to accord equal treatment to the people and to provide a national home for the Jews, permitting them to return to Palestine only as the development of that country guarantees the normal absorption of immigrants for rising industries and reclaimed agricultural lands. There were about 60 colonies in 1921 with about 17,000 colonists living on 163,000 acres, about 10 per cent. of the cultivated area. Jews maintain an agricultural experimental station in Haifa.

Jerusalem, the Holy City, is visited annually by large pilgrimages of Orthodox Greek Christians. The Mosque of Omar occupies the site of Solomon's Temple. It contains the sacrificial stone of Abraham and a relic of Mahomet. Bethlehem is also visited, the Church of the Nativity being reputed the oldest Christian church in existence.

Palestine proper is about the size of the State of Vermont with twice as many inhabitants. On the west is the coastal plain a hundred miles long and fifteen miles wide, fertile and well watered. In the centre is the plateau of Judea. The eastern border drops sharply into the depressed valley of the River Jordan and the Dead Sea, 46 miles long, with an average width of 8 miles, 1,292 feet below sea level. The country is capable of great agricultural development, dependent on irrigation. Olives, figs and grapes are grown in large quantities; also cereals. There are large flocks of sheep and goats. The Government is making an effort to reforest the country. Rice, sugar, petroleum and cotton textiles are the chief imports.

There were 625 miles of railroads in 1921; and for the year ending March 30, 1921, 603 steamers of 779,521 tons, and 2,688 sailing vessels of 29,578 tons entered the seaports—Jaffa, population, 45,000; Haifa, 26,000; Acre, 6,500; and Gaza, 15,000.

Transjordan, an ill defined territory of Arabia east of the Jordan, has been set up as an Emirate by the British Government with Abdullah, the second son of the King of the Hejaz and brother of the King of the Iraq, as its Emir. The seat of Government is at Amman.

### PANAMA REPUBLIC OF.

AREA, 31,890 square miles.

POPULATION, 1920, 401,428, excluding the Canal Zone.

CAPITAL, Panama, population, 1917, 61,369; Colon, 26,076.

*President*, Dr. Belisario Porras, 1920-24.

*Premier*, Sr. Rodolfo Chiari (Interior and Justice). *Minister to the United States*, Dr. Ricardo J. Alfaro. *Consuls General*, at New York, Belisario Porras, Jr.; at New Orleans, vacant; *Consuls*, at Boston, Melvin Maynard Johnson; at San Francisco, Francisco Jimenez; at Atlanta, John Ashley Jones; at Kansas City, Loren O. Rooman; at St. Louis, vacant; at Fort Worth, L. T. Rogers; at Galveston, A. A. Van Alstyne.

*United States Minister*, John Glover Smith.

*United States Consuls*, at Panama, George Orr; at Colon, Jultum D. Dreher.

*United States Governor of the Canal Zone*, Col. Jay J. Morrow, U. S. A., appointed March 28, 1921.

The Republic of Panama, formerly a department of Colombia, declared its independence Nov. 3, 1903, and was recognized Nov. 13 by the United States. It occupies the entire Isthmus of that name connecting North and South America, lying between the Caribbean Sea on the north and the Pacific on the south. The Costa Rican boundary line on the west has been a matter of dispute (see Costa Rica). The Colombian boundary line to the east was determined in 1921 by the Thompson-Urrutia Treaty.

By treaty Nov. 18, 1903, ratified Feb. 23, 1904, and with a supplemental (Taft) agreement of 1904, the United States acquired the right to construct the Panama Canal across the Isthmus, a strip (the Canal Zone) extending for five miles on each side of the Canal, the terminal cities of Cristobal adjacent to Colon, and Balboa adjacent to Panama, and islands for defensive purposes in the bay, in perpetuity and exclusive control for police, judicial, sanitary and other purposes. The United States also has complete jurisdiction over sanitary and quarantine matters in the two Cities of Colon and Panama and owns and operates the Panama Railroad, 47 miles long, connecting these cities. In return the United States paid Panama \$10,000,000, and \$250,000 a year, beginning after nine years.

President Harding recommended to Congress on Sept. 5, 1922, the negotiation of a new treaty with Panama to supersede the 1903 treaty with the Taft agreement under which the Canal was constructed. The Panaman Government is anxious to have clarified the provision regarding the right recognized for the Government of the United States to intervene in behalf of peace and order in Panama; also that relating to relations with the Canal authorities; and also that on land valuations.

The civil population of the Canal Zone by census of June 30, 1921, was 23,757, of whom 8,158 were Americans, 2,825 connecting these cities, and 323 American women were employed by the Panama Canal and Railroad. The other employees numbered 5,168, chiefly British West Indian Negroes.

The Canal Zone is a military reservation and is administered by the War Department. No private individuals are permitted to acquire land. (For statistics of the Panama Canal see page 720).

The soil of Panama is very fertile, but of the whole area more than half is wholly uncultivated. Immigration is encouraged. The forest resources are great. Stock raising is extensively carried on. The chief exports are bananas (from Almirante), coconuts, balata, hides, gum and tortoise shell. The Constitution, adopted Feb. 13, 1904, and amended Dec. 26, 1918, provides for a Chamber of Deputies of 33 members (election to be held every four years beginning with 1924) and a President, also elected by direct vote for a four-year term, and not eligible for re-election. He appoints a Cabinet of five Ministers. There are eight provinces, each under a Governor elected by popular vote. The Roman Catholic religion prevails, but religious freedom is guaranteed. Primary education is free and compulsory. A university has been opened. There is no army; the national police numbers 69 officers and 750 men. The finances of the republic have been reorganized by a fiscal agent of the United States.

Panama is a member of the League of Nations. Par of exchange..... balboa=\$1.00

### PARAGUAY. REPUBLIC OF.

AREA, estimated, 75,673 square miles.

POPULATION, estimated, 700,000.

CAPITAL, Asuncion, population, 1920, 99,836.

*President*, Dr. Eusebio Ayala, 1920-24, assumed office, Oct. 29, 1921.

*Premier*, Sr. Rogelio Ibarra (Interior).

*Minister to the United States*, none; legation in charge of the Consul General.

*Consuls General*, at New York, William Wallace White; at Philadelphia, Rodman Wanamaker. *Consuls*, at Norfolk, Carlos Barrett; at New Orleans, James Lloveras; at Chicago, Alberto W. Holmes; at Seattle, Erastus Brainerd.

United States Minister, William J. O'Toole.

United States Consul, at Asuncion, Harry Campbell.

Paraguay is an inland agricultural and pastoral country of South America, communicating with the South Atlantic by the Paraguay River, a tributary of the River Plata, and navigable by vessels of light draft up to Asuncion. A railroad, British owned, 232 miles long, connects the capital with the Argentine railroad system. It is bounded on the north by Bolivia and Brazil, on the east by Brazil and Argentina, on the south by Argentina, and on the west by Argentina and Bolivia. In area it is about the size of Nebraska. The high plateaus are suitable for cattle raising. The chief exports are hides, timber, cattle, yerba (mate) and tobacco.

The Constitution of 1870 is modelled on that of the United States, but more centralized. The history of Paraguay since its declaration of independence from Spain in 1811 has been one of constant dissensions, dictatorships, revolutions and wars. The Roman Catholic religion is established but others are tolerated. Education is free and nominally compulsory. The university at Asuncion had 247 students in 1919.

Paraguay is a member of the League of Nations. She has a standing army of 1,900 and a reserve of 100,000.

## PERSIA, KINGDOM OF.

AREA, 628,000 square miles.

POPULATION, estimated, 10,000,000.

CAPITAL, Teheran, population estimated, 280,000; other cities, Tabriz, 200,000; Isphahan, 100,000; Meshad, 80,000, and 42 cities of above 10,000.

Shah, Ahmed Mirza, born June 29, 1893, succeeded his father, Mohammed Ali (who abdicated), July 16, 1909, crowned July 21, 1914; heir, his brother, Mohammed Hassan Mirza, born Feb. 19, 1899.

Premier, Mushir-ed-Dowleh (Interior).

Administrator General of Finance, Dr. Arthur C. Millsbaugh of the United States, appointed September, 1922.

Minister to the United States, Hursza Husseln Khan Alai.

Consul General—at New York, H. H. Topakyan.

Consul, at San Francisco, vacant.

United States Minister, Joseph Saul Kornfeld.

United States Consul, at Teheran, Gordon Paddock.

Persia (Iran) is an ancient kingdom occupying the western and larger half of the great Iranian plateau, between the rivers Indus and Tigris in Southwestern Asia. It is bounded on the north by Transcaucasia (Russia), the Caspian Sea and Turkestan; on the east by Afghanistan and Beluchistan (British India); on the south by the Arabian Sea and the Persian Gulf; on the southwest by Mesopotamia (the Kingdom of Iraq); and on the west by Armenia. The boundaries are indeterminate—a cause of much friction. In size it equals the States of Idaho, Colorado, Utah, Nevada, Arizona and New Mexico combined. It is described as a "vast and miserably poor country with scanty population." The people are Moslems, mostly of the Shi'a sect, and education is largely limited to reading the Koran.

Across this plateau, which lies at an altitude of 4,000 to 8,000 feet, in the north central part, from northwest to southeast, stretches a desert, 800 miles long, varying from 100 to 200 miles wide. There are many peaks from 9,000 to 10,000 feet high. Fine forests cover the marshy plains and mountain slopes. Mineral deposits are undeveloped, but known to be considerable. Turquoise mines are worked crudely in Nishapur. Oil is produced near Ahwaz in Karun Valley, at the head of the Persian Gulf. The Anglo-Persian Oil Company holds the concession, covering nearly 500,000 square miles, and has large refineries at Abadan in the Shatt el Arab on the Persian side of the Tigris below Basra. The British Government bought control in this company in 1914 and increased its holdings in 1917 to \$25,000,000. Prospecting is vigorously pushed.

Agriculture is the chief industry, wheat, barley, rice, fruits, gums, drugs, wool and cotton being the chief products. Some wines are famous. Persian

carpets, all made on hand looms, are produced in Tabriz, Sultanabad and Kerman. The chief exports in 1920 were petroleum, cottons, carpets, fruits, opium and rice; the chief imports were textiles, sugar, tea and manufactures of metals. The British Empire, Russia, Egypt and Turkey are the best customers. There are fifteen regular trade routes along which goods are carried by caravans. Persia has but 350 miles of railroads. At the southern ports, all small, there entered in 1919-20 vessels of a total tonnage of 1,551,129, nearly all British; and at the Caspian ports 808,921, all Russian.

Persia has been in political turmoil for twenty years. A Constitution was forced from the Shah in 1906 which provides for a National Assembly, which has been convened three times. Government is in the hands of a Cabinet. In 1907, Great Britain and Russia, by a convention, while mutually engaging to respect the integrity and independence of Persia, marked off special "spheres of influence" for each, Russia taking about two-fifths of her territory in the north and Great Britain about one-quarter in the South, the remainder being a buffer zone. Persia, though a neutral in the World War, was constantly fought over, suffered heavily and the northwest provinces brought nearly to famine. The province of Azerbaijan, peopled by Tatars, in the extreme northwest, adjoining Armenia and Transcaucasia with Baku, the great oil port on the Caspian as its capital, declared its independence in 1917 after the Russian debacle, and later became a Soviet republic.

On Aug. 9, 1919, Great Britain and Persia signed a treaty by which the former agreed to furnish expert advisers, military officers, munitions and modern military equipment, a loan of \$10,000,000 to be secured by customs duties, and to build certain railroads. This agreement was never put in force and was denounced by Persia with the consent of Great Britain in February, 1921. Immediately (in March) Persia signed a treaty with the Russian Soviet Republic as a substitute for all previous Russo-Persian treaties which established diplomatic relations, restored Fuzuzeh and Ashurada to Persia, annulled all concessions previously granted to Russians in Persia, turned over the Russian Discount and Loan Bank to the Persian Government, cancelled all Persian debts to Russia and abolished the capitulations.

Persia sent a delegation to Paris in 1919 to lay its claims before the Peace Conference, but was denied a hearing. Persia is a member of the League of Nations.

Trade with the United States was:

## PERU, REPUBLIC OF.

AREA, 722,461 square miles.

POPULATION, estimated, 3,500,000, besides un-enumerated savage tribes.

CAPITAL, Lima, population, 1920, 176,467; chief port, Callao, population, 52,843. Other cities are: Quipa, population, estimated, 35,000, Cuzco; 12,000.

President, Dr. Augusto B. Leguia, 1919-1923, by coup d'etat July 4, 1919, legalized by Congress; he took the oath Oct. 15, 1919, for full term of five years.

Premier, Dr. Alberto Salomon (Foreign).

Ambassador to the United States, Federico Alfonso Pezet.

Consuls General, at New York, Edwardo Higginson; at New Orleans, Victor Pezet; Consuls, at Boston, A. G. Riveros; at Baltimore, Carlos Alberto Oyague y Flucker; at Philadelphia, Eduardo Espantoso y Cosio; at San Francisco, Santiago Lloa Arguellos; at Los Angeles, Alexandro de la Puente y Ganoza; at St. Louis, vacant; at Portland, Ore., M. D. Derteano; at Charleston, vacant; at Norfolk, vacant; at Seattle, J. M. Macedo. Consul General at Panama for the Canal Zone, Guillermo Espantoso.

United States Ambassador, vacant.

United States Consul, at Callao-Lima, Claude E. Guyant.

Peru is situated on the Pacific Coast of South America, bounded on the north by Ecuador, on the east by Brazil and Bolivia, and on the south by Chile. In area it almost equals the combined area of Texas, Oklahoma, Kansas, Nebraska, Colorado and New Mexico. The territory in the northeast corner in the Amazon basin is in dispute between Colombia, Ecuador, Brazil and Peru, and the possession of the provinces of Tacna and Arica on the Pacific, containing the very valuable nitrate deposits, which were retained by Chile on defeating Peru in

the war of the Pacific, 1879-82, has been long in dispute and is now the subject of diplomatic negotiations with the United States as mediator. The Protocol and Complementary Act, signed at the Washington Conference, was ratified by the Peruvian Congress on Sept. 12 by a vote of 94 to 3.

The Andes reach their highest altitudes in Peru, which contains seven peaks towering about 19,000 feet, of which Huascarán (altitude 22,050 feet), Huandoy (21,100 feet), Arequipa or Misti (20,013 feet) and Hualcan (20,000 feet) are the loftiest. The thirty mile wide strip of land along the Pacific is a desert except as it is irrigated from streams from the mountains; the uplands or western slopes of the Andes are well watered and also the eastern descent to the Amazon basin, which is covered with forests. The mountains are rich in minerals and many valuable mines, some dating back to the Incas, are being worked. Peru produces 95 per cent. of the world's vanadium. Sugar, cotton, copper, silver, vanadium, guano, petroleum and wool (both alpaca and sheep) are the principal exports, and textiles, wheat, lumber and iron. There were in 1920, 1,984 miles of railroads, 1,385 being state railroads under control of the Peruvian Corporation. At Callao in 1920 in the foreign trade there entered 721 steamers of 1,767,032 tons, of these 194 were British, 192 American, 135 Peruvian, 131 Chilean, and 11 Japanese.

Under the new Constitution, Jan. 18, 1920, the Government is highly centralized. The President, the Senate (35 members) and the House of Representatives are all elected for five years. Absolute political and religious freedom is guaranteed. The Catholic religion is the state religion. The law of Feb. 5, 1921, makes elementary education compulsory and free. At Lima is the University (founded in 1530, 1,308 students) founded by Charles V. In 1921, Over 50 per cent. of the population are full-blooded Indians, including many uncivilized and unenumerated tribes, 40 per cent. are Mestizos, or of other mixed blood, and but 2 per cent. entirely of Caucasian blood. The lot of the Indians has been very bad. President Leguia put in motion an elaborate series of reforms to modernize the country, including the sanitation of 31 Peruvian cities, the reorganization of the army and navy, the reconstruction of the educational system, huge irrigation works, and the stamping out of yellow fever.

Military service is compulsory; the standing army numbers 7,600, with 99,000 in the reserves. The navy is small. Peru is a member of the League of Nations.

## POLAND, REPUBLIC OF.

AREA, 124,097 square miles; viz.: former Prussian portion, 16,668; Russian portion, 40,603; former Austrian Galicia, 30,533; Teschen, 386. Eastern territories, boundaries undetermined (estimated), 43,920; acquired in Upper Silesia, 1,300.

POPULATION, census of 1921, 26,376,103, viz.: Former Prussian, 2,912,283; Russian, 11,221,249; Austrian Galicia, 7,464,367; Teschen Silesia formerly Austrian, 145,241; eastern territories (undetermined), 3,662,963; Upper Silesia, 970,000. Figures exclusive of army, which then numbered 230,000. Density of population, 181 per square mile.

CAPITAL, Warsaw, population, 931,176. Chief cities, Lodz, population, 500,000; Krakow, 181,000; Lwow, 218,000; Poznan, 178,000; Sosnowiec, 120,000.

President—Chief of State, Marshal Joseph Pilsudski. Prime Minister, Dr. Julian Nowak.

Minister to the United States, Dr. Ladislas Wroblewski.

Consuls General in the United States, at New York, Dr. Stefan Grotowski; Chicago, Dr. Zygmunt Nowicki. Consul, at Pittsburgh, Zdzislaw Kurvikowski; at Detroit, George Barthel de Weydenhal; at Buffalo, Stanislaw Manduk (V. C.). United States Minister to Warsaw, Hugh S. Gibson. United States Consul General at Warsaw, Leo J. Keena.

The Republic of Poland was formed following the World War of reunited parts of the old kingdom, dismembered about 150 years ago by Russia, Austria

and Prussia. It is about the size of the States of Ohio, Kentucky and Tennessee.

Poland is bounded by Germany on the north and west; Latvia and Lithuania, north; Czechoslovakia and Roumania, south; Ukraine and Russia, east. Of the population about 13,000,000 are Catholic Poles and Slavs; 3,000,000 Jews; the others are Ruthenians, Germans, Lithuanians, Russians, etc. Fifty cities have over 25,000.

Poland is, except in the extreme south, an unbroken plain, across which three glacial movements have swept; average elevation, 480 feet; average rainfall, 21 to 23 inches; snowfall, 10 to 20 per cent. of total precipitation lasting 40 to 100 days.

Access to Free City of Danzig (Gdansk), formerly of German Empire, port on Baltic Sea, was granted by Treaty of Versailles. Poland also has developed its own Baltic port, Gdania, on Polish soil, the "corridor" granted her just west of Danzig.

The Vistula River gives navigation from Danzig south through Poland. A trans-European trade route is projected by canalizing the Vistula, cutting a canal to the Dnieper, and canalizing that river to the Black Sea at Odessa.

Fifty-one per cent. of the population engage in agriculture. There are approximately 45,000,000 acres arable; 13,000,000 pastures; 23,153,000 forests; 9,000,000 gardens and other uses. Heavy war losses have been recouped to within approximately 80 per cent. of normal agricultural productivity. Normal cereal crops run about 60,000,000 bushels of wheat; 155,000,000 rye; 124,000,000 oats; 60,000,000 barley; 800,000,000 bushels potatoes; sugar beets, 4,823,000 tons; more than 1,000,000 tons of clover. Domestic animals normally number 17,000,000; distilleries, 2,000, with an output of 40,000,000 gallons; 422 breweries, 75,000,000 gallons; normal sugar production, 600,000 tons.

In Galicia there are large deposits of petroleum. Operations are closely controlled by the Government, but French and English capital for 25 years has been predominant and is permitted to retain their interests. The oil measures are estimated at several billion tons. Ore production has ranked Galicia eighth in the world. The output in 1921 was 790,478 short tons, less than half that of 1909, which was the highest ever known, 2,509,793 tons. The market is mainly in Poland, the Ukraine, Czechoslovakia, Germany, Austria and the Baltic states.

Forests cover 23 per cent. of area; total, 22,153,000 acres; state-owned, 29.5 per cent.; private, 70.5 per cent. Coniferous trees predominate, mostly Scotch pine, spruce, fir, larch; deciduous trees, beech, oak, alder, birch, elm, aspen, etc. Wood-working industries are important. Annual re-growth is estimated at 9,000,000,000 feet board measure, permitting exportation of about 5,500,000 tons or about 8,000,000,000 feet, with constant demand.

In Upper Silesia, Poland acquired 1,300 square miles of 4,100 involved. Most of mineral and industrial values were in Polish-acquired territory, which contains enough coal to mine annually 50,000,000 tons for 300 years. The normal coal production in Poland proper, Dombrowa district, is 10,000,000 tons. Poland acquired virtually all the zinc mines, whence annually 180,000 tons are taken—18 per cent. of world's zinc; most of iron industry, 22 out of 36 blast furnaces. Railways, which are nationalized, are to remain undivided for 15 years, with Polish-German commission to supervise them and industries. The major part of steel industry remains German.

Commercial treaties exist with all neighboring nations, especially close political and economic relations with France. Polish exports run at about 650,000 tons; imports, excluding coal, 850,000 tons. Poland is self-supporting, foodwise, producing normal food surplus more than enough to pay for necessary food imports. Exports include live animals, food, raw materials, manufactures and semi-manufactures. Upper Silesian coal acquisitions will give Poland large surplus for exportation. Heavy trade with Russia is anticipated. Trade with others is approaching normality by removal of hampering post-war restrictions. Imports from United States, raw cotton, automobiles, tires, machinery, locomotives (of which \$7,500,000 worth was bought in 1919), foodstuffs up to 1920, when they practically ceased.

Poland is governed under a Constitution adopted March 17, 1921, which calls for a two-chamber legislative body, Senate and House, elected by universal suffrage. Freedom of press, religion, etc., is guaranteed. The President of the republic is to be chosen by Parliament for a seven-year tenure, and appoints a Cabinet of Ministers responsible to Parliament. There are six political parties.

The Polish Army, which numbered more than 1,000,000 during Soviet-Polish war of 1920, was re-

duced to 230,000 by Sept. 1, 1922, and it is announced will be reduced by January, 1923, to 200,000.

Four universities and two polytechnics have 17,000 students; public schools, 2,000,000.

Poland is a member of the League of Nations. Par of exchange is mark..... 23.8 cents  
Exchange rate, Nov. 1, 1922..... 0.072 cents  
Internal debt, 420,000,000,000 marks; foreign debt, 732,138,000,000 marks, plus \$18,969,120 bond issue floated in the United States. Foreign debt, at exchange rate, about \$10 per capita; total all debts, \$15 per capita.

The budget for 1922 shows a deficit at exchange rate of about \$50,000,000. The estimates are:  
Budget—Receipts, marks..... 459,000,000,000  
Expenditures, marks..... 591,500,000,000

### PORTUGAL, REPUBLIC OF.

AREA, 35,490 square miles; which includes the Azores, 922 square miles, and Madeira, 314, islands in the North Atlantic Ocean. Colonial possessions in Africa—Cape Verde Islands, 1,480 square miles; Guinea, 13,940; Principe and St. Thomas Islands, 360; Angola, 484,800; Mozambique, 426,712; total Africa, 927,292; in Asia—Goa, India, 1,469; Damao, India, 169; Timor, Malaysia, 7,330; Macao, China, 4; total Asia, 8,972. Grand total, 965,754.

POPULATION, census of 1911, 5,960,056. Colonial possessions in Africa, 7,734,701; Asia, 1,001,153; total colonial possessions, 8,735,854. Grand total, 14,695,910.

CAPITAL, Lisbon, population, 1920, 500,276. Other cities, Oporto, population, 1920, 215,981; Setubas, 30,346; Funchal (Madeira) 2,687.

President, Dr. Antonio Jose de Almeida, born 1866, elected Aug. 6, 1919.

Prime Minister, Antonio Maria Silva (Interior), appointed Feb. 9, 1922.

Minister to the United States, Viscount d'Alte.

Consuls General in the U. S., at New York, Jorge da Silveira Duarte d'Almeida; at Chicago, S. Chapman Simms; at Boston, Eduardo Rodrigues de Carvalho; at New Orleans, Luiz da Costa Carvalho; at San Francisco, Mario do Nascimento. Consul, at Panama for the Canal Zone, Jose Augustin Arango.

United States Minister, Fred Morris Dearing.

United States Consul General, at Lisbon, W. Stanley Hollis; Consuls, at Loanda, Angola, Reed Paige Clark; at Oporto, Samuel H. Wiley; at Funchal, Madeira, Stillman W. Eells; at St. Michaels, the Azores, Drew Linard; at Lourenco Marques, East Africa, Cecil M. P. Cross.

Portugal occupies the western part of the Iberian Peninsula, being bounded on the north and east by Spain and on the south and west by the Atlantic Ocean. Its area is 34,254 square miles, a little larger than the State of Maine. The Azores and Madeira, Islands in the North Atlantic, are politically an integral part of the republic. The country is mountainous and well watered to the north. About one-third of the land is cultivated. Vineyards abound, and wines, olive oil and fruit are largely produced. Wine-making is the chief industry. Forests of pine, oak, cork and chestnut cover 19 per cent. of the country, and cork, of which 175,000,000 pounds are produced annually, is the second largest industry. Portugal has much mineral wealth, but is undeveloped because of a scarcity of coal and poor transportation. The sardine fisheries are important. Hides and wool are also exported.

Portugal had in 1920 2,128 miles of railroads, of which 733 were state owned. The merchant marine in 1917 numbered 206 vessels, with tonnage of 122,726; in 1918, 5,566 vessels of 3,284,995 tonnage entered the ports.

Portugal, an independent state since the twelfth century, was a kingdom until Oct. 5, 1910, when a revolution drove King Manuel II. from the throne and proclaimed a republic. It is governed under a Constitution, adopted Aug. 20, 1911, which provides for a National Council of 164 members, elected by direct vote of three years, and an Upper Chamber of 71 members, elected by the Municipal Councils, half renewable every three years. The President is elected by both Chambers for a four-year term; he appoints the Ministers, who are responsible to the Chamber. Voters must be able to read and write (1919). The army is raised by conscription and numbers 33,000, with reserves of 620,000. The navy personnel is 6,000.

The dominant religion is Roman Catholic; there is freedom of worship. Primary education is free

and nominally compulsory; the republic has been showing increased interest in education, but the percentage of illiteracy is about 75. There are three universities.

Portugal is a member of the League of Nations. The escudo is the unit of currency, gold par being \$1.0805. Exchange, Oct. 15, 1922, \$0.0655.

Imports in 1919 were 52,110,675 escudo; exports, 24,874,600.

Budget, 1921—Receipts, escudos..... 134,565,000  
Expenditures, escudos..... 264,010,000  
Debt, 1921—Internal, escudos..... 1,862,815,897

Trade of the Azores and Madeira Islands with the United States was:  
Imports, 1920-21..... \$1,726,524  
1921-22..... 897,555  
Exports, 1920-21..... 2,442,687  
1921-22..... 3,191,248

### PORTUGUESE COLONIAL POSSESSIONS. Asiatic.

Portuguese India includes Goa (capital, Panju), on the Malabar coast; Damao, near Bombay; and Diu, a small island 140 miles from Damao; area 1,638 square miles; population, 548,472. Salt is produced in Goa and Damao, and manganese near Mormugao, where there are 20 mines. Manganese is imported into the United States for steel-making as an essential. The 1921 estimated revenue of this group was 1,651,000 escudos; expenditures, 2,086,000; imports, 4,751,000; exports, chiefly coconuts, coir, fish, spices and salt, 1,401,000.

Macao, China, is on an island of the same name at the mouth of the Canton River; it has 74,866 population (1910); 2,171 of which were Portuguese, the rest Chinese; a military force of 488 natives; and had (budget of 1922) a revenue of 2,665,000 escudos, and expenditures of 2,519,000, with imports in 1920 of 9,519,000 escudos, and exports of 7,016,000. The trade is mostly transit.

Portuguese Timor is the eastern part of the Malay island of that name, off the north coast of Australia, Holland having the western part. The population in 1915 was 377,815. The 1922 budget estimate shows revenues 378,125 escudos, expenditures the same—a balanced budget; imports, 1919, 814,612 escudos; exports, coffee, sa dalwood, sandal root, copra and wax, 365,595.

### PORTUGUESE AFRICAN POSSESSIONS.

The Cape Verde Islands, in the North Atlantic, longitude 25°, latitude 15°, 14 in number, Praia, capital, had a population of 149,793 in 1912, of which 4,799 were white. Chief products are coffee, medicinal products, hides and millet. Receipts, budget of 1922, 2,783,000 escudos; expenditures, the same—a balanced budget.

Portuguese Guinea, on the coast of Senegambia, chief port Bissau, has a population estimated at 289,000. In 1920 imports were 15,659,000 escudos; exports, chiefly rubber, wax, oils, ivory and hides, 9,540,000.

Angola, Portuguese West Africa, has a 1,000-mile coast line stretching south from the mouth of the Congo. It is governed by a High Commissioner, who resides in Loanda, with large powers. The Portuguese have owned it since 1575. Its area covers 484,800 square miles.

The native population in 1914 was estimated at 2,124,000. There were 52 Government schools, with 2,400 pupils. The budget estimated revenues and expenditures for 1922 were 53,507,000 escudos.

Chief products are coffee, rubber, wax, sugar, oil seeds, coconuts, ivory, cattle, fish, tobacco for local use, cotton, petroleum and asphalt. There are large deposits of malachite, copper, iron and salt, and gold has been found. Railway mileage is 818.

Mozambique, Portuguese East Africa, extends from Cape Delgado (10° 30' south latitude) to the Union of South Africa just below the capital, Lourenco Marques. To the west lies the Union of South Africa and Rhodesia (British). On the north is Tanganyika, formerly German East Africa, but surrendered to the British November, 1918; over 400 square miles of that territory, the Kionga Triangle, was transferred to Mozambique in 1919.

Mozambique has 428,132 square miles, and an estimated population of 3,150,000 natives and 10,500 whites. The budget estimates for receipts and expenditures for 1922 were 13,749,000 escudos. Chief products are sugar, coconuts, beeswax and mining products. Gold has been discovered and coal deposits exist. It has vast natural resources practically untouched. The principal ports are Mozambique, population in 1910, 363,000 (including

472 Europeans); Ibo, Quillame, Chinda and Beira. In 1919 imports were 27,923,000 escudos; exports, 11,730,000, re-exports and transits, 66,463,958.

Railroads are being pushed, the most important line being the Delagoa Bay to Pretoria, 347 miles.

The islands of St. Thomas and Principe, 125 miles off the coast of Africa in the Gulf of Guinea, were discovered in 1471. The population in 1914 was 63,500. Chief products are cacao, coffee, rubber and cinchona. The 1921 estimated budget, revenues and expenditures, were 1,718,000 escudos. Imports in 1920 were 12,398,000 escudos; exports, 17,490,000.

Trade of Portuguese Africa with the United States

| 1921-22.....          | 1,881,148   |

## ROME, THE SEE AND CHURCH OF.

*Supreme Pontiff*, Pius XI. (Achilles Ratti), born at Desio, May 30, 1857, created Archbishop of Milan, September, 1921, Cardinal, June 13, 1921, elected Pope (261st) in succession to Benedict XV., Feb. 6, 1922.

*Secretary of State*, Cardinal Gasparri.

(For members of the College of Cardinals consult the index).

*Apostolic Delegate to the United States*, Archbishop Bonzano.

The Popes for many centuries, with some slight breaks, held temporal sovereignty over mid-Italy (the so-called Papal states), extending from sea to sea, comprising an area of some 16,000 square miles with a population in the nineteenth century of over 3,000,000. This territory in the reign of Pius IX. was incorporated in the Kingdom of Italy, the sovereignty of the Pope being confined to the palaces of the Vatican and the Lateran in Rome and the villa of Castel Gandolfo by the Italian law of May 13, 1871; this law also guaranteed to the Pope and his successors in the chair of St. Peter a yearly indemnity of 3,225,000 lire (\$622,425 at par of exchange), which allowance, however, remains unclaimed and unpaid.

The central administration of the Roman Catholic Church is carried on by eleven committees called Sacred Congregations, viz: Holy Office, Consistorial Discipline of the Sacraments, Council, Religious, Propaganda, Rite, Under Rites, Ceremonial, Extraordinary Ecclesiastical Affairs, Seminaries and Universities, Tribunals and various offices.

The Holy See maintains diplomatic relations with Austria, Bavaria, Belgium, Czechoslovakia, France, Germany, Great Britain, Hungary, Jugoslavia, Monaco, the Netherlands, Poland, Portugal, Roumania, Russia, Spain, together with the most of the American republics except the United States and Mexico.

## ROUMANIA, KINGDOM OF.

AREA, 122,282 square miles; divided, Old Roumania, 53,489; additions confirmed by the 1919 peace treaties, Bessarabia, 17,146; Bukovina, 4,030; Transylvania, 22,312; Crisana, 8,038; Maramuresh, 6,258; Banat, 11,009.

POPULATION, 17,393,149; divided, Old Roumania, 7,904,104; Bessarabia (joined March, 1918), 2,344,800; Bukovina (joined November, 1918), 800,098; Transylvania (joined December, 1918), 2,678,367; Crisana, 1,316,981; Maramuresh, 766,666; Banat, 1,582,133 (Census of 1917).

CAPITAL, Bucharest; population, 345,666; other cities, Chisinau, population, 114,100; Cernauti, 87,128; Ismail, 85,600; Iasi (Jassy), 76,120; and 20 others from 25,000 to 75,000.

King, Ferdinand I., born Aug. 24, 1865; succeeded his uncle King Carol, Oct. 11, 1914; married Jan. 10, 1893, Princess Marie, daughter of the Duke of Saxe-Coburg and Gotha, granddaughter of Queen Victoria. Heir, Crown Prince Carol, born Oct. 15, 1893, married March 10, 1921, Princess Helen of Greece; one son Michel.

Prime Minister, Jon Bratiano (War).

Minister to the United States, Prince A. Bibesco.

Consul General in the United States, at New York, T. Tlestone Wells; Consuls, at Chicago, Ivan C. Popovici; at Pittsburgh, Samuel A. McClung.

United States Minister to Roumania, Peter Augustus Jay.

United States Consuls, at Bucharest, Ely E. Palmer;

at Constantza, Richard B. Haven.

Roumania, whose history began as a Roman colony, was formed within Turkey-in-Europe by the union of the Danubian principalities Wallachia

and Moldavia, in 1861; proclaimed its independence May 21, 1877, during the Russo-Turkish war; and was so confirmed by the Treaty of Berlin in 1878, losing Bessarabia, however, to Russia. The World War resulted in the return of Bessarabia, the addition of Transylvania from Hungary and of Bukovina with part of the Banat, Crisana and Maramuresh from the Austro-Hungarian Empire, based on ethnological grounds. The country is now bounded on the north by Hungary, Czechoslovakia and Poland, on the east by the Ukraine (Russia) and the Black Sea, on the south by Bulgaria and Serbia, and on the west by Jugo-Slavia and Hungary. It is equal in size to the State of New Mexico. For about 300 miles the Danube forms its southern boundary; the last 250 miles of its course (from Ottenitza to the Black Sea) it flows through Roumania. The Danube forms its northeast boundary for 300 miles. The Carpathian Mountains extend from north to south to the middle of the country, whence the Transylvanian Alps extend 200 miles due west. These mountains formed the old western boundary.

The forests are extensive (18,750,000 acres), and the timber industry important. The soil is very fertile, making the country a granary of Europe. Four-fifths of the population engages in agriculture and stock raising. The production of wheat in 1919 was 1,820,000 tons and in 1920 640,000 tons; other cereals, 3,148,000 and 2,710,000 tons respectively. The tobacco crop in 1920 was 5,000 tons. About 50,000 are employed in the oil fields, the largest industry, and 1,180,885 metric tons of petroleum was produced in 1920. Salt mining in the lower Carpathians is a state monopoly.

Roumania had in 1920 7,240 miles of railroads, with a navigation service in the Black Sea and the Danube River, all state operated. The merchant marine has 158 vessels of 71,158 tonnage. In 1919 there entered Roumanian ports 10,546 vessels of 2,991,000 tonnage. The European Commission of the Danube, established in 1866, with sovereign powers over the navigation of that river, has its seat at Galatz.

A Constituent Assembly was elected in May and June, 1920, by universal, direct and secret suffrage. Work is in progress on harmonization of the Constitutions of the several countries with which before had Constitutions—Old Roumania, Bessarabia, Transylvania and Bukovina. The Constitution of Old Roumania was adopted in 1866, and amended in 1879 and 1894. It provided for two legislative chambers. The Senate now consists of 170 members, 82 for Old Roumania, 45 for Transylvania, 24 for Bessarabia, 19 for Bukovina, four for the universities, and 19 bishops. The Chamber of Deputies now consists of 347 members, 168 for Old Roumania, 112 for Transylvania, 51 for Bessarabia, 16 for Bukovina. The King has veto power over the acts of the Assembly. Executive power is vested in a Council of twelve Ministers. Military service is compulsory. On Jan. 1, 1922, the effective strength was 230,000 men, the having been disorders in 1918 which called 400,000 men to the colors. Further reductions are in progress.

The navy consists of a small cruiser, six destroyers, two scout boats, and four gunboats, with a special Danube River naval force of 12 gunboats, nine sloops, four river monitors, eight destroyers and seven torpedo boats. The naval base is at Sulina, on the Black Sea, chief port.

Of the population in 1918 there were 9,695,000 of the Orthodox Greek Church, 1,456,000 of the Greek Catholic Church, 1,483,000 of the Roman Catholic Church, 1,334,000 Protestants, 17,000 Armenians, 834,000 Jews and 44,000 Mohammedans. Liberty of worship is assured. Orthodox clergy are paid by the state, other clergy being subventoned.

Instruction is free and compulsory, "wherever there are schools." Intelligence is spreading, but in 1909, by a special census, 60.16 per cent. of the population over seven years of age was illiterate. Roumania is a member of the League of Nations.

The leu is the unit of currency, gold par being 19.3 cents. Exchange, Nov. 1, 1922, was .63 cents. Imports in 1919 were 3,575,000,000 lei; exports, 102,875,000. The too heavy adverse trade balance caused Roumania to default the interest of her two-year treasury notes early in 1922. Nationalization of mineral resources is seriously proposed.

Budget, 1922-23—Receipts, 10,260,000,000 lei; expenditures, theoretically equal.

The public debt on April 1, 1921, was 20,311,293,312 lei, besides the portions of the debts of Austria-Hungary and Russia which have been assumed by Roumania, 10,000,000,000 lei.

Trade with the United States was:

|                       |             |
|-----------------------|-------------|
| Imports, 1920-21..... | \$9,779,668 |
| 1921-22.....          | 2,577,415   |
| Exports, 1920-21..... | 55,065      |
| 1921-22.....          | 501,868     |

## RUSSIA.

(Russian Socialist Federal Soviet Republic.)

AREA, 8,166,130 square miles; dependencies (Khiva, estimated, 24,000 square miles, and Bokhara, estimated, 83,000), 107,000 square miles; grand total, 8,273,130 square miles.

POPULATION, estimated, 1922, 131,546,065; dependencies, Khiva, estimated, 646,000; Bokhara, estimated, 1,250,000; total 1,896,000; grand total, 133,442,065.

CAPITAL, Moscow, succeeding Petrograd (St. Petersburg) as capital of Soviet Russia; population, 1920 census, 1,050,011; other principal cities, Petrograd, population, 1915, 2,318,645; population, estimated, 1922, 700,000; Kharkov, capital of the Ukraine, population, 1913, 258,360; Odessa, port on the Black Sea, population, 1912, 631,000; Kazan, 1913, 195,300.

Council of People's Commissaries (as of April, 1922): President, of Council, Vladimir Ilch Ulianov-Lenin, born April 23, 1870.

Minister of Foreign Affairs, Georges Chicherin.

War and Marine, Leon Trotsky; Finance, Krestinsky; Health, Semashko; Posts and Telegraphs, Dovgalevsky; Ways and Communications, Dzerzhinsky; Supreme Economic Council, Bogdanov; Agriculture, Yakovenko; Food, Brivkhanov; Justice, Kursky; Social Welfare, Vinckurov; Labor, Schmidt; Education, Lunacharsky; Nationalities, Stalin; Workers' and Peasants' Inspection, Stalin; Home Affairs, Dzerzhinsky; Foreign Trade, Krassin.

Chairman of the Central Executive Committee of Soviets, Kallinin (elected by the All-Russian Congress for period of one year).

Ambassador to the United States, no diplomatic relations with the Soviet Government. The United States State Department still recognized (May, 1922) Boris Bakhmeteff, appointed July 5, 1917, by the Kerensky Government, as Ambassador from Russia.

Consuls General in the United States, at New York, Michel Ostinow; at Seattle, Wash., Nikolai Bogovavlensky (also for Nome, Alaska); at Chicago, Antoine Volkoff. Consuls, at Boston, Joseph A. Conroy; at Philadelphia, William Tucker; at Pittsburgh, Georges Tchirkow; at San Francisco, George Romanovsky.

United States Ambassador to Russia, vacant. United States Consuls, at Vladivostok, Siberia, S. Plinckney Tuck.

Russia stretches across two continents from the North Pacific to the Baltic. It occupies the northern part of Asia and the eastern half of Europe, from the Arctic to the Black Sea.

On March 12, 1917, the day of the revolution that destroyed Czardom, Imperial Russia comprised 8,764,586 square miles of territory, with 182,182,600 (official "revision" estimate of 1915) of population; this included 131,796,800 in European Russia; 13,229,100 in the Caucasus, 10,377,900 in Siberia, and 11,254,100 in the Central Asiatic provinces. The population analyzed 100,331,516 Aryans, the several branches of the Slavs forming 92 per cent. thereof, with half a dozen other races represented.

The changes wrought by the world war, the revolutionary movements in minor regions, treaty decrees of the Allied and Associated Governments, and negotiations of the Russian Socialist Federal Soviet Republic as to political and economic relations, brought dismemberment to the old empire and great modifications of territory and relationship toward the new federations (R. S. F. S. R.) of many of the old districts and provinces. Five independent states have risen in the west. In 1920 the Russian Soviet Government concluded treaties of peace with each, Estonia, Feb. 2; Lithuania, July 12; Latvia, Aug. 11; Poland, Oct. 12; and Finland, Oct. 14; which recognized the territorial limitations of each or provided for further settlement. That same year agreement was reached by the Allied Powers whereby Rumania received Bessarabia, taken from her in 1878, subject to later discussion by Russia. The former Turkish province of Kars, also taken in 1878, was renounced by the Soviet in the Treaty of Brest-Litovsk, March 3, 1918. The area and population lost were:

|                                  | Square miles | Population |
|----------------------------------|--------------|------------|
| Poland (independent).....        | 43,804       | 12,247,600 |
| Finland (independent).....       | 125,689      | 3,241,000  |
| Estonia (independent).....       | 16,000       | 1,750,000  |
| Latvia (independent).....        | 27,000       | 2,500,000  |
| Lithuania (independent).....     | 22,890       | 2,246,000  |
| Bessarabia (to Roumania).....    | 17,330       | 2,213,000  |
| Kars Area (semi-autonomous)..... | 7,780        | 492,000    |
| Total.....                       | 260,493      | 24,689,600 |

The Ukraine, nine provinces, 174,510 square miles (about the size of New England, New York, New Jersey and Pennsylvania), with 26,001,802 of population, was, by the Treaty of Riga, 1921, technically left as an independent state, so recognized by Soviet Russia and Poland. The subsequent establishment of a Soviet form of government, under direct Soviet influence, placed Ukraina virtually in Russian territory, and it appears now to be regarded by practically all authorities as properly inclusive in the areas and population of the R. S. F. S. R. These are the statistics given out March 1, 1922, by the People's Commissar of Internal Affairs.

## RUSSIA OF TO-DAY.

## INDEPENDENT REPUBLICS:

|                           | Square Miles | Population |
|---------------------------|--------------|------------|
| Soviet Russia Proper..... | 1,290,440    | 65,751,898 |
| Ukraine.....              | 174,510      | 26,001,802 |
| White Russia.....         | 23,290       | 1,634,223  |
| Azerbaijan.....           | 33,970       | 2,096,973  |
| Armenia.....              | 15,240       | 1,214,391  |
| Georgia.....              | 25,760       | 2,372,403  |
| Far Eastern Republic..... | 652,740      | 1,811,725  |
| Siberia.....              | 4,210,420    | 9,257,825  |

## AUTONOMOUS REPUBLICS:

|                         |         |           |
|-------------------------|---------|-----------|
| Bashkir.....            | 40,420  | 1,268,132 |
| Tartar.....             | 25,960  | 2,832,125 |
| Crimea.....             | 15,060  | 761,600   |
| Mountain Republics..... | 17,420  | 808,480   |
| Daghestan.....          | 13,730  | 798,181   |
| Kirghiz.....            | 843,640 | 5,058,553 |
| Turkestan.....          | 577,400 | 7,201,551 |

## AUTONOMOUS AREAS:

|                       |         |         |
|-----------------------|---------|---------|
| Votlak.....           | 11,300  | 686,049 |
| Zyrian.....           | 107,060 | 186,878 |
| Kalmyk.....           | 38,440  | 126,256 |
| Mari (Cheremiss)..... | 6,040   | 300,069 |
| Chuvash.....          | 6,720   | 758,161 |

## LABOR COMMUNES:

|                           |        |         |
|---------------------------|--------|---------|
| Karelia.....              | 28,890 | 144,392 |
| German Volga Commune..... | 7,680  | 454,368 |

Total..... 8,166,130 131,546,045

Because of permanent agreement the Asiatic states of Khiva and Bokhara should be considered as dependencies of the R. S. F. S. R. Their statistics are:

## DEPENDENCIES OF THE R. S. F. S. R.:

|              | Square miles | Population |
|--------------|--------------|------------|
| Khiva.....   | 24,000       | 646,000    |
| Bokhara..... | 83,000       | 1,250,000  |
| Total.....   | 107,000      | 1,896,000  |

Of the group under the heading Independent Republics, the Ukraine is the southwestern division of European Russia. (See following.)

White Russia lies along the Polish frontier with Minsk as its chief city.

Azerbaijan (the size of the State of Maine), has its southern half of the Caspian Sea shore line for its eastern boundary with Persia on the south.

Armenia (the size of Massachusetts, Connecticut and Rhode Island), also of the independent republic group, on the south and west, and Georgia (the size of West Virginia), another on the north and Daghestan (the size of Maryland), classed as an autonomous republic, along the Caspian, on the north; Baku, the great oil port on the Caspian is its chief city. Armenia has Persia on the south, Turkey on the west and Georgia on the north. Erivan is its chief city.

Georgia also has Turkey as its neighbor on the south and Daghestan on the northeast. On the west it lies along the Black Sea with Tiflis as its capital and Batum as its port.

North of Georgia and west of Daghestan, with Persia on the north and the Black Sea on the west are the mountain republics of the autonomous group—four of them—(about the size of Vermont and New Hampshire). These five divisions are a rearrangement of the former Transcaucasia.

Of the other autonomous republics, the Crimea (about the size of Maryland and Delaware) occupies the peninsula between the Black Sea and the Sea of Azov. Sebastopol is its chief city and seaport. Turkestan (twice the size of Texas) lies in Asia east of the south half of the Caspian Sea. North of it in Asia and enclosing the north side of the Caspian Sea so that the western portion lies along the European side of the Ural River is Kirghiz (as large as the eight mountain states of the United States), and still north of that, in European Russia, Bashkir (a province as large as Kentucky), Tartar (the size of West Virginia), lies further to the west on both

sides of the Volga with the so-called autonomous area Votak as its neighbor on the north, and Mari and Chuvash as neighbors on the west. Kazan is its chief city. These three neighbors together are about equal in size to Tartar. Further to the north Zyrian stretches up to the Arctic Ocean with the Ural Mountains as its northeast frontier. In territory it equals Nevada, with nearly twice its population. Kalmyk has the Caspian Sea on the southeast and the Volga runs along its northeast frontier. It is about the size of Indiana. Astrakhan is the chief city.

The so-called Labor Commune, Karelia, lies along the Finnish frontier, to the north, between Lakes Ladoga and Onega and the Arctic Circle with the White Sea on the northeast. Beyond is the Murman coast. The other Labor Commune, the German Volga Commune, is an irregular group like islands on both sides of the Volga east and south of Saratov, and is somewhat smaller than the State of New Hampshire with about the same number of inhabitants.

#### DECLINE OF POPULATION.

M. W. Mikhalovsky, director of the Central Statistical Office at Moscow, in an article on the third Russian census, as quoted in a bulletin of the health section of the League of Nations, September, 1922, gives these figures on the decline of population in Russia. He bases his study on data for European Russia, Northern Caucasus, Siberia up to the Balkal Sea, the Kirghiz Republic and two governments of the Ukraine. He finds that in this area the population has declined from 162,793,000 in 1914 to 90,790,000 in 1920 (excluding the army which was then estimated at 3,000,000 men), a decrease, including the army, of nearly 10 per cent. Instead of this decrease of 9,000,000 inhabitants, there would have been an increase of about 12,000,000, it is stated, if the rate of natural increase obtaining before the war had continued.

European Russia is said to have been the principal sufferer, whereas the population has diminished only slightly in the far-away Asiatic territories. The percentages of decrease given by M. Mikhalovsky are 14 per cent. for Northern Caucasus, 3 per cent. for Siberia, and 4 per cent. for the Kirghiz Republic.

The decline in population is given as due to the following causes: (1) Emigration following the civil war, which is estimated as high as 2,000,000; (2) military losses in the World War, 2,500,000; (3) loss of life in the civil war, estimated at not less than 1,000,000; and (4) excess mortality, largely due to the great epidemics, about 3,500,000. The latter figure is stated as being probably an underestimate.

The census of Russia was taken in August, 1920, it should be noted, and since that time the famine has occurred which overshadows all previous scourges of this kind from which the country has suffered, and the loss of lives from which is estimated in millions.

The disproportion of the sexes, especially in the rural districts, is highly significant. The sex distribution is given as follows:

|            | Male.      | Female.    | Total.      |
|------------|------------|------------|-------------|
| Urban..... | 9,788,000  | 10,904,000 | 20,692,000  |
| Rural..... | 51,241,000 | 59,613,000 | 110,854,000 |
| Total..... | 61,029,000 | 70,517,000 | 131,546,000 |

The birth rate in Russia, stated to have been extremely high before the war, averaging about 45 per 1,000 population, is said to have declined by more than 40 per cent.

The London Times, on Sept. 1, 1922, printed a despatch from Riga, saying that according to official Bolshevik figures the Cheka executed 1,766,118 persons before being renamed the supreme political administration last February. The total includes 6,775 professors and teachers, 8,800 doctors, 355,250 other intellectuals, 1,243 priests, 54,650 officers, 280,000 soldiers, 59,000 policemen, 12,950 landowners, 192,350 workmen and 815,100 peasants.

#### RESOURCES OF RUSSIA.

The political home of the Russian Socialist Federal Soviet Republic is in Eastern Europe, centralized in fact, in Moscow, the ancient capital.

The Russian domains comprehend every phase of climate except the distinctly tropical, and have varied topography. It has vast plains, some virtually desert, some actually or potentially productive; many high mountain ranges, and a distinctive geologic feature is the Russian steppes—broad plains of shifting sandy formation.

In the main, however, Russia proper begins in the centre with a series of low tablelands, and slopes in the direction of the Baltic, Black and Caspian Seas, and toward the White Sea and the Arctic Ocean to the north.

The Ural Mountains form the boundary between

Russia proper and the main body of Asia; the Caucasian Mountains are on the southern line, between the Black Sea and the Caspian. Extensive forests occupy much of the central portions, total forest area being about 500,000 square miles.

The rivers are important as actual or potential channels of commerce—the Dnieper and Dniester, flowing into the Black Sea, the Dnieper being part of the proposed trans-European waterway from the Black Sea at Odessa to the Baltic Sea at Danzig; the Volga and Ural flowing into the Caspian Sea; the Neva flowing into the Gulf of Finland; and the Petchora flowing into the Arctic Ocean. There are 42,091 miles of rivers, lakes and canals navigable for steamers.

The areas controlled by Russia comprehend nearly every material natural resource of modern civilization—minerals of all kinds, base and precious; every variety of timber, excepting tropical, every character of cereals, vegetable and fruit lands; being as near to self-contained, economically, as any other power, excepting the British Empire.

The chief interest is in agriculture, the other physical resources not yet being well developed. The oil measures, however, have been quite well developed, there being petroleum in large quantity in the Baku region, in the Caspian fields, with considerable pre-war production, and production now being resumed in small measure; and in several other parts petroleum exists in large measure. Several working concessions have lately been reported as granted by the Soviet Government to American and British oil interests, but no development has been undertaken as yet.

Russia is normally the world's greatest source of platinum, the Russian share in 1912 and 1913 being from 1,000 to 300,000 troy ounces of the world total of 267,000 to 313,000.

Unmined iron ore is estimated at nearly 1,000,000,000 tons, considerable of it being in the Ukraine, economically convenient to transport to the Black Sea.

There are very large mineral resources in the Ural Mountains. Gold and silver are mined there and in many other localities, also coal, salt, zinc and copper.

Before the war, Russia was a heavy exporter of foodstuffs; since the war, Russia has had to call on other countries, chiefly the United States, for food to feed millions who were starving. (See special article elsewhere in THE ALMANAC on the Russian famine and the work of the American Relief Administration.)

The cotton crop of 1917 was reported as about 526,000,000 pounds, or about 1,000,000 bales, around one-eighth to one-tenth of the crop of the United States.

Approximately 500,000,000 acres of forested areas are to a large degree potentially agricultural when the timber has been removed. The by and large estimate is that under development such as has been attained in other civilized countries Russia would have close to 700,000,000 acres of cultivable lands, or the equivalent of more than 1,000,000 square miles of actually tilled lands, which is more than like areas in the United States.

Industry is not well advanced, although in some of the western portions there has been considerable progress in iron, steel and tin making, with rather heavy production of sugar from the beet.

Railway mileage is relatively small, the figures for lines actually operated in 1921 being 29,909 miles, with about 130,000 miles of telephone lines in 1913. On the vast plains area and in the more settled areas in the west there were enormous totals of domestic animals, the 1914 figures showing 33,875,000 horses, mostly the smaller Russian type; 60,038,000 cattle; 14,543,000 swine and 71,708,000 goats.

Development of industry has run coincidentally with the freeing of the serfs 60 years ago, and the further progress toward modern conditions up to the time of the late troubles. Industrial employment was about 2,000,000 when the war began, in about 15,000 factories. The cotton industry normally is important. In 1916, Russia had 8,000,000 spindles, produced nearly 700,000,000 pounds of yarn, and wove nearly 750,000,000 pounds of cotton cloth. Russian flax and linen also were extensively produced.

Since the 1917 revolution, industry has been much upset. Reliable figures are not easily obtained. The normal Russia imported much machinery from England and Germany, and agricultural machines from the United States; raw cotton from Egypt, and iron and coal from England.

#### PRODUCTION OF PRE-WAR RUSSIA.

What Russia was capable of producing before the war and the Bolshevik revolution is indicated by these official statistics of the former empire; the cultivable areas in acres were as follows:

European Russia, cereal crops, 196,997,000 acres:

potatoes, 8,059,000; flax and hemp, 4,733,000; total, 209,789,000; meadows, 61,330,000 acres.

Poland, cereal crops, 11,377,000; potatoes, 2,586,000; flax and hemp, 110,000; total, 14,073,000; meadows, 2,280,000 acres.

Caucasia, cereal crops, 22,073,000; potatoes, 247,000; hemp and flax, 292,000; total, 22,612,000; meadows, 5,676,000 acres.

Siberia, cereal crops, 14,925,000; potatoes, 292,000; hemp and flax, 147,000; total, 15,364,000; meadows, 17,132,000 acres.

Central Asia, cereal crops, 11,458,000; potatoes, 67,000; hemp and flax, 236,000; total, 11,761,000 acres; meadows, 9,338,000 acres.

Aggregate totals, cereals, 256,830,000; potatoes, 11,251,000; hemp and flax, 5,518,000; total, 273,599,000 acres; meadows, 95,756,000 acres. The grand total of cultivable and meadow lands was, therefore, 369,628,500 acres.

In round numbers, the crops produced in 1913, in Russia, exclusive of Finland, were:

Winter wheat, 20,800,000 tons, or about 624,400,000 bushels; spring wheat, 9,900,000 tons, or about 297,600,000 bushels.

Winter rye, 27,600,000 tons, or about 827,800,000 bushels; spring rye, 634,000 tons, or about 19,000,000 bushels.

Oats, 19,900,000 tons, or about 598,400,000 bushels. Other cereals, 8,677,000 tons.

Total cereals, 45,092,300 tons, or about 3,000,000,000 bushels.

Potatoes, 39,400,000 tons, or about 1,183,300,000 bushels. Hay, 58,400,000 tons. Tobacco produced in 1913 was about 200,000,000 pounds.

Russia in 1914 had the return from 34,973,000 horses; 25,053,000 cattle; 72,273,000 sheep and goats; 14,995,000 pigs.

Cotton production in Ferghana, Samarkand, Bokhara, Transcaspia, Khiva, Syr-Daria, (not including Amu-Daria,) Erivan, Elizavetpol, Baku, Tiflis and Kutais, in 1915 was 1,125,675 of 500-pound bales. Russia imported considerable cotton from Egypt and other countries, raw cotton consumption being larger than production, and using 416,274 spindles.

The forests netted annually about \$30,000,000 profit.

In 1912, mineral production was given as 58,462 kilograms of gold, 5,525 kilograms of platinum, 13,013 kilograms of silver, 1,699 metric tons of lead, 11,708 metric tons of zinc, 33,531 metric tons of copper, 4,198,000 metric tons of pig iron, 3,727,000 metric tons of iron and steel, 30,910 metric tons of coal, 9,260,000 metric tons of naphtha, and 1,906,000 metric tons of salt.

Oil production in 1915 was 9,152,000 short tons, four-fifths of it coming from the Baku region; alcohol, 60,812,000 gallons; sugar, 1,697,760 short tons from 1,888,136 acres; the 1914 catch of the fisheries being 996,500,000 pounds, or 33 per cent. less than former years, with 35,051,000 rubles paid for imported fish, and about 7,300,000 rubles for fish and caviar exported.

Total Imperial Russian imports in 1915 were given as 1,114,000,000 gold rubles (par of exchange in 1914, 61.5 cents) and exports 397,000,000 rubles; but up to 1913, exports exceeded imports, figures for that year by the Russian Government being imports, 1,374,000,000 rubles, and exports, 1,520,000,000 rubles.

The export in 1913 of 807,183,000 rubles of food, more than half of all exports, indicate to what extent Imperial Russia helped to feed the world, much of the Russian export food going to Great Britain and to Germany, both of which returned in exchange largely manufactures, machinery, woolens, and coal, and raw cotton came from the United States and Egypt. A study of the foreign trade of Imperial Russia for some years before the war proves that the balance between imports and exports, exports being always in excess, was close enough to be economically healthy.

#### BOLSHEVIST CONTROL.

Cataclysmic events took place when Imperial Russia fell on March 12, 1917, and revolutionary forces took over the Government, Czar Nicholas II, abdicating. A provisional government was set up by the Duma, Russia's national legislative body, with Prince George Lvoff as the head, Alexander Kerensky becoming Premier on Aug. 6, 1917. The All-Russian Congress of Workmen's, Soldiers' and Peasants' Deputies finally seized the power in a revolutionary movement on Nov. 7, 1917, the Military Revolutionary Committee of the Soviet of Petrograd having wrested the government away from Kerensky. Lenin and Trotsky were leaders.

The official name of the Government became the Russian Socialist Federal Soviet Republic, and it was officially announced that this Communism was fashioned on the Karl Marxian social and economic theories. The basic demand was that only actual

workers, laborers, should have part in government. The dictatorship of the proletariat was set up.

Russia withdrew from her alliance with the Allied and Associated Governments in the World War and signed the Brest-Litovsk Treaty of Peace with Germany, March 3, 1918.

All right of private property was abolished. The Government took over all transport, communication, industry, food, money, the productive processes of all activities, title to lands, stocks of goods, and assumed disposition of the products of industry and the produce of agriculture.

By the end of December, 1917, the theories of nationalization were in almost absolutely complete operation, confiscation having proceeded without limitation. Private capital was no longer permissible.

#### CAPITAL EXPROPRIATED.

Disregarding the comparatively small number of private estates and residences in Russia, practically all the foreign capital in that country was represented by investments in banking, industrial, and trading establishments. According to the data of the Petrograd Institute of Economic Research (published in the Soviet paper, *Levestiya*, of June 24, 1922), the aggregate capitalization of these investments in January, 1917, amounted to 2,242,974,000 gold rubles, made up of stock and share capital to the extent of 1,986,772,000 rubles and bonds to the amount of 256,202,000 rubles (the gold ruble equals \$0.5146).

These investments were distributed among the following classes of commercial enterprises:

| ENTERPRISE.                               | Gold Rubles. |
|-------------------------------------------|--------------|
| Mining industry.....                      | 334,320,100  |
| Metalurgical industry.....                | 392,709,600  |
| Urban real estate.....                    | 259,430,900  |
| Credit institutions.....                  | 237,200,000  |
| Textile industry.....                     | 192,494,000  |
| Chemical industry.....                    | 83,593,200   |
| Trading establishments.....               | 80,715,200   |
| Foodstuffs manufacture.....               | 37,330,500   |
| Paper and printing arts.....              | 31,404,800   |
| Transports, roads, and rolling stock..... | 26,650,000   |
| Sawmills and woodworking industry.....    | 25,736,500   |
| Mineral-working industry.....             | 18,239,300   |
| Animal-products industry.....             | 14,450,000   |
| Insurance.....                            | 8,700,000    |

Total.....2,242,974,100

The foreign investments were distributed as follows:

| NATION-ALITY.       | Invested in all Russia. | Per cent. | Expropriated by Soviet Russia. |
|---------------------|-------------------------|-----------|--------------------------------|
| <i>Gold Rubles.</i> |                         |           | <i>Gold Rubles.</i>            |
| French.....         | 731,746,600             | 32.6      | 648,089,700                    |
| British.....        | 507,479,800             | 22.6      | 500,563,700                    |
| German.....         | 441,593,200             | 19.7      | 317,475,500                    |
| Belgian.....        | 321,602,500             | 14.3      | 311,812,400                    |
| American.....       | 117,750,000             | 5.2       | 117,750,000                    |
| Dutch.....          | 35,456,700              | 1.6       | 36,456,700                     |
| Swiss.....          | 32,479,100              | 1.5       | 31,666,700                     |
| Swedish.....        | 23,772,300              | 1.1       | 16,646,700                     |
| Danish.....         | 14,737,700              | 0.7       | 14,537,700                     |
| Austrian.....       | 7,550,000               | 0.4       | 5,900,000                      |
| Italian.....        | 2,506,200               | 0.1       | 2,106,200                      |
| Norwegian.....      | 2,300,000               | 0.1       | 2,300,000                      |
| Finnish.....        | 2,000,000               | 0.1       | 2,000,000                      |
| Total.....          | 2,242,974,100           |           | 2,007,305,300                  |

The investments included in the first column and not expropriated are those in territories like Latvia, Poland, etc., now beyond the boundaries of Soviet Russia.

Various counter-revolutions broke forth against the Soviet Government, which consisted of government by group representation in the hands of the Bolshevik Party, so that the admittedly correct definition was that *Russia's government was administered by the Bolshevik Party by means of the Soviet method.*

The Soviets held the control, and finally removed the capital to Moscow, further from the western frontier, for greater safety.

For various reasons, the Soviets at last decided to modify materially the degree to which Communism nationalization and the prohibition of private capital was to be enforced, there being yielding to the extent that private capital was permitted in some instances, official promulgation by the Government of the new economic policies (so-called "Nep.") in March, 1921, being that for the present the continuance of absolute Communism would not be insisted upon.

This change found expression in various permissions for private capital to operate in industry, and for the individual citizen of the Russian Socialist

Federal Soviet Republic to possess certain kinds of property.

### ALTERATION OF POLICY.

A fundamental alteration of Soviet Russian policy, as analyzed by the United States Department of Commerce in October, 1922, was a "reversion from the land policy of strict socialization to the plan of peasant possession, peasants being allowed to acquire actual possession, though technically ownership remains with the state."

The new status was further accentuated at various times by such concessions as were reported to have been granted in 1920 to Washington D. Vanderlip of Los Angeles, an American, in Siberia, the present status of which is indeterminate; and the reported giving back in 1922 to Leslie Urquhart, chairman of the Russia Asiatic Corporation, Ltd., Urquhart to have a 99-year lease on properties, and to pay the Government 6 per cent. of the output. Validation of this transaction was later refused by the Soviet Government.

London and Berlin cablegrams to American newspapers outlined this situation at various times, it being regarded as a fundamental test of alteration of Soviet policy.

Also, the status of the Baku oil fields was reported often to have undergone changes, by concessions by the Soviets, which were to permit private operation of the wells.

Careful correspondence from London to The New York World in October, 1922, indicated that Lenin, President of the Council of the People's Commissaries, R. S. F. S. R., in a speech on Oct. 17, declared "that his hearers could not but remark the sudden change in the economic policy of the Soviets, which now included more elements of the old economic system than had hitherto been the case."

The United States, having withheld indorsement of American participation in Russian economic operations, finally considered sending a commission to study economic conditions in Russia, but failed to reach an acceptable agreement.

Cables to American newspapers on Sept. 21, 1922, reported that the Soviets had granted a concession to the American International Barnsdall Corporation to certain oil working rights; this being followed two days later with cablegrams to The New York World, intimating that the conditions governing the concession were not so favorable as had been thought at first.

Summing up all reports, the consensus appears to be that the initial degree of nationalization had been fundamentally altered, and that the Soviets had decided to retrace somewhat their long step toward complete Communism.

The British Government, in 1919 and 1920, negotiated a trade agreement with Russia, M. Krasin, Minister of Foreign Trade, being the Soviet representative, who went to London for the purpose, and remained there for many weeks, going occasionally back to Moscow. The agreement, although signed *de facto* by the British Government, had not, at last reports, been made *de jure* by the Parliament at London.

The signing of a separate treaty between Russia and Germany by their delegates at the Genoa Conference is referred to elsewhere in THE ALMANAC; but one of the international questions which has been raised has been whether the two mentioned nations were in a rapprochement which would unite Russia's large natural resources and German organizing and scientific skill in some close working agreement. Also late in 1922 the report was that China was about to recognize the Soviet Russian Government.

The United States remained in a non-committal attitude regarding America's part in Russian trade. Russia was understood to back the Turks in the dispute over the Straits of the Dardanelles. Russia and Japan were in a deadlock over the disposition of the northern part of Sakhalin Island in the Pacific, which had been occupied by Japan. Russia was believed by many to aspire to lead all Asiatic people, among whom already she had a footing in her Central Asiatic provinces.

Since the revolution of 1917, the chief military activity of the Russian Socialist Federal Soviet Republic has been against the Poles, in the Soviet-Polish war. It found its culmination in 1920, when Marshal Pilsudski of Warsaw, with more than a million men in the Polish Army, invaded the Ukraine, reaching Kiev, its capital, and 100 kilometres beyond toward the Black Sea, and then was hurried back to close to Warsaw. French Generals Weygand and Henry, aides to Marshal Foch, aided in reorganization of the Polish forces, and the Soviets were driven out from Poland. The Treaty of Riga in 1921 ended hostilities, reparations in gold and

jewels being pledged by the Soviets, the values paid over later forming the first gold reserve established by the Warsaw Government as the basis of the new currency.

Military service is compulsory under Bolshevist Sovietism, actual bearing of arms having been reserved solely for the actual workmen, soldiers, sailors and peasants, others doing non-combat service. In the Soviet-Polish war, numbers of Mongolians were utilized by Russia. The army numbers 1,300,000 with a reserve of 3,500,000.

Trotsky, the Commissar for War, however, in an interview on Aug. 26, 1922, told the Associated Press: "Our fighting forces have been reduced from 5,500,000 to 800,000," and he praised the work of the new Black Sea Navy.

Russia is not a member of the League of Nations.

The state religion of Russia is Greek Orthodox, the church being thrown somewhat into confusion by the changed attitude of the Soviets toward religious establishment. But there are many Mohammedans in technical Russian territory, and also in much of the area of the autonomous and semi-autonomous Soviet republics in the south. It has been claimed that the Soviet Government, during the immediately post-revolutionary action killed a majority of the Russian intellectuals. Reliable figures are not available.

### OFFICIAL STATEMENT OF THE R. S. F. S. R. AT THE HAGUE.

In 1914 Imperial Russia, as reported by the officials thereof, had in circulation paper currency totaling 1,775,000,000 rubles, the gold ruble being worth 51.46 American cents. It was based on a gold guarantee fund of 1,695,000,000 rubles.

Under the Soviet regime its financial conditions have not been easily ascertainable. Reports vary widely. However, resorting to the claims of the R. S. F. S. R., put forward by its delegation at the Hague Conference in July, 1922, the following is a condensation of the fiscal facts as set forth at that time by them:

#### PAPER MONEY IN CIRCULATION.

(In Billions of Rubles.)

|            | 1918. | 1919. | 1920. | 1921.   | 1922.    |
|------------|-------|-------|-------|---------|----------|
| Jan. ....  | 1.2   | 4.1   | 35.2  | 180.3   | 12,021.9 |
